Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2011 Military Family Life Project,* which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The survey program is conducted under the leadership of Kristin Williams, Director, and Timothy Elig, former Director, *Human Resources Strategic Assessment Program* (HRSAP).

Policy officials contributing to the development of this survey included Cathy Flynn and Yuko Whitestone (Military Community and Family Policy).

DMDC's Survey Design, Analysis & Operations Branch, under the guidance of Lindsay Rock, Acting Branch Chief, is responsible for the development of questionnaires used in the survey program. The lead survey design analysts were Rachel Lipari, Elizabeth Van Winkle, and Malikah Dorvil. They designed the unique presentation of complex items used in this tabulation volume. They were supported in these efforts by Jill Settle, Consortium Research Fellow. Margaret Coffey, Acting Team Lead of Survey Operations, is responsible for the survey database construction and archiving. The lead operations analyst on this survey was Amy Campbell, SRA International, Inc.

DMDC's Statistical Design Branch, under the guidance of Branch Chief, David McGrath, is responsible for developing the sampling and weighting methods used in the survey program. Fawzi Al Nassir, SRA International, Inc., supervised the sampling and weighting processes and provided consultations and process control. Susan Reinhold provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing.

Mary Padilla, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool. A team consisting of Amy Campbell, Malikah Dorvil, and Margaret Coffey completed quality control for this tabulation volume.

2011 MILITARY FAMILY LIFE PROJECT: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. *Human Relations Surveys* are in-depth studies of topics and populations, often requiring both paper-and-pencil surveys and Web-based surveys.

This report contains tabulations of responses from the *2011 Military Family Life Project* (*2011 MFLP*) conducted May 6 to August 25, 2011. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,[1] and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.

Survey Content

The *2010 MFLP* was DMDC's first survey designed for longitudinal study. Traditionally, DMDC has conducted cross-sectional data collections whereby participants respond to questions at one point in time and are not followed past this time point. While this method of data collection is by far the most commonly used method, limitations of cross-sectional data preclude some types of in-depth analysis. That is, while cross-sectional surveys are able to provide a "snap shot" of how military families are managing the military lifestyle, they do not provide any causal links between specific military-related life events, such as deployments, and resulting changes in well-being. In contrast to cross-sectional data collection, longitudinal analysis follows spouses over time to determine how events impact long-term functioning. This effort addresses the continuing need for information from spouses on these issues, in respect to changes incurred during the military members' deployment, to monitor changes in attitudes/opinions, establish baselines prior to policy changes, and evaluate effectiveness of recent initiatives. A longitudinal analysis of the *2011 MFLP* and its 2010 predecessor (*2010 MFLP*) will enhance our understanding of how military-related life changes may specifically affect spouse well-being and family readiness.

The survey was subdivided into the following ten topic areas:

1. *Background Information*—Marital status, member's active duty status, nights away, and housing location.

[1] Details on survey methodology are reported in DMDC (2012a).

2. *Education and Employment*—Spouse education level and goals, use of Military Spouse Career Advancement Accounts (MyCAA), current academic enrollment status, reasons for not attending school/training, military service, employment status, reasons for not looking for work, weeks looking for work, hours worked per week, reasons for working part-time over full-time, professional license/certification, most recent career field, how most recent job was found, importance of working, and member's support for spouse working.

3. *Permanent Change of Station (PCS) Moves*—Spouse PCS move in the past 12 months, month and year of most recent PCS move, transfer of professional licensure, and length of time to find employment after last PCS move.

4. *The Military Spouse's Family*—Number of children living at home, behavioral changes in the child identified in *2010 MFLP*, and impact of military family life on this child in past 12 months.

5. *Health and Well-Being*—Perceptions of stress, mental health, and family coping; marital satisfaction and stability; access and use of counseling; usefulness of counseling sources, and attitudes towards receiving counseling.

6. *Life in the Military*—Satisfaction with military way of life, spouse's support for member staying on active duty, perceived social support, and use of Military OneSource.

7. *Service Member's Deployments*—Times member deployed in past 12 months, relocation during deployments, deployment to combat zone, spouse's coping with multiple deployments, impact of deployments on spouse and family life, members' current deployment status, and spouse expectations of member's return from deployment.

8. *Effect of Deployments on Children*— Child's (identified in *2010 MFLP*) deployment experiences during most recent deployment, use of resources and programs during most recent deployment, behavior problems during most recent deployment, spouse need for child care, and child's coping ability in past 12 months.

9. *Reunion and Reintegration*—Service member's wounded status during most recent deployment, timing of Service member's return, member's emotional and behavioral state after returning, member's ability to reconnect with children upon return, spouse's readjustment to member's return, spouse's use and satisfaction with available deployment-related resources, spouse's expectation of next deployment, and member's military retention plans.

10. *Financial Well-Being*—Changes in financial condition compared to 12 months ago, perceived financial condition, saving habits, emergency savings, total household monthly earnings, and spouse's monthly earnings.

Population and Reporting Categories

The target population for the *2011 MFLP* consists of spouses of active duty members of the Army, Navy, Marine Corps, and Air Force who (1) have at least six months of service at the time the questionnaire is first fielded (2) are below flag rank and (3) participated in the first wave of the longitudinal survey (*2010 MFLP*). Spouses of National Guard/Reserve members and warrant officers were excluded from the target population. In addition, for the respondent to remain eligible, he/she must indicate that, at the time of the survey, he/she was currently married to an active duty member. Survey results are presented for the total population and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified by administrative record data for member categories of Service, paygrade, and enlisted years of service; and the spouse category of gender. The remaining reporting categories are based on survey self-report. Definitions for reporting categories follow:

- *Member Service*—The categories include *Army*, *Navy*, *Marine Corps*, and *Air Force*.

- *Member Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1-E9). The *Enlisted* subgroup is broken into the following groups: *3 to 5 Years of Service* (i.e., first-term decision window), *6 to 9 Years of Service* (i.e., second-term decision window), *E1 – E4s*, and *E5 – E9s*. The *E1 – E4* category is broken down into *E1 – E3* and *E4.* The *E5 – E9* category is broken into *E5 – E6* and *E7 – E9*. The *Officers* subgroup is broken into *O1 – O3* and *O4 – O6.*

- *Member Deployment Status—Not Deployed Career* includes spouses whose husband/wife had not been deployed for 30 consecutive days or more in his/her career based on information provided on the *2010 MFLP*.[2] *Deployed Career* includes spouses whose husband/wife had been deployed for 30 or more consecutive days in his/her career based on information provided on the *2010 MFLP*. *Deployed Career* is further broken down into *Deployed Multiple Times.* This category includes spouses whose husband/wife had been deployed more than once in his/her career. *Not Deployed Past 12 Months* includes spouses whose husband/wife had not been deployed in the preceding 12 months. *Deployed Past 12 Months* includes spouses whose husband/wife had been deployed in that time. This category is further broken down into *Currently Deployed*, which includes spouses whose husband/wife was deployed at the time the spouse submitted the survey.

[2] Member deployment status is based on spouse's survey responses.

- *Spouse Gender*—This category is self-explanatory.

- *Spouse Race/Ethnicity*—Respondents are classified based on self-reported categories consistent with requirements of the *Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity* (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only[3] Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone marking that they are Spanish/Hispanic/Latino, regardless of how they answered the question on race.

- *Spouse Education*—Respondents are classified based on self-reported educational attainment. *No College* includes those without any college credit. *Some College* includes those with some college credit, including a two-year degree, but does not include those with a four-year degree. *Four-Year Degree* includes those with a four-year degree and those with some graduate school, but no graduate or professional degree. *Graduate/ Professional Degree* includes those with a masters, doctorate, or other professional degree.

- *Spouse Employment*—Spouses are classified based on self-report of employment status. Categories include *Employed*, *Unemployed*, and *Not in Labor Force*. Those who are included in the *Unemployed* category are spouses who need or want to work and who are employed (Q10-13). *Not in Labor Force* include those who are permanently or temporarily not working or not actively looking for work.[4]

- *Spouse Location—On Base* includes spouses who reported living in military housing on base. *Off Base* includes spouses who reported living either in military housing off base or in civilian housing.

- *Counseling*—Spouses are divided into two categories. *Counseling in Past 6 Months* includes spouses who reported receiving counseling in the past six months. *No Counseling in Past 6 Months* includes spouses who reported not receiving counseling in the past six months.

- *PCS Moves—PCS in Past 12 Months* includes respondents who reported experiencing a permanent change of station (PCS) within the past year. *No PCS in Past 12 Months* includes those who have not experienced a PCS move within the last year.

[3] Persons marking they are Black or African American <u>and</u> another race are not in this category.
[4] Those who have not actively looked for work in the past four weeks are considered to be out of the labor market. This category includes some percentage of spouses who are in the midst of a PCS move and, therefore, only temporarily out of the labor market.

- *Spouse Age*—Categories include *Less Than 26 Years Old*, *26 to 30 Years Old*, *31 to 35 Years Old*, *36 to 40 Years Old*, and *More Than 40 Years Old*.

- *Family Status—With Children* includes respondents who reported having children under the age of 18 living at home either part-time or full-time. *Without Children* includes those who do not have children under the age of 18 living at home either part-time or full-time.[5]

- *Child Demographics*—Respondents are classified based on self-report gender and age of the child in their household identified in the *2010 MFLP*. Child age is divided into the following categories: *Less Than 6 Years Old, 6 to 12 Years Old*, *13 to 18 Years Old.*

- *Member Service by Paygrade*—The categories include each of the Services by enlisted and officer paygrade groups.

Survey Methodology

The Web survey administration process began on May 6, 2011, with the mailing of a postcard to members who participated in the Wave 1 *2010 MFLP*. The postcard thanked spouses for participating in the Military Family Life Project and provided a few initial findings from Wave 1. Additionally, the postcard notified them of the upcoming Wave 2 administration and requested address update information. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected May 31 to August 25, 2011. Paper surveys were mailed June 27, 2011 to those who did not respond via the Web.

Single-stage, nonproportional stratified random sampling[6] procedures were used to allocated the original sample in the *2010 MFLP*. The *2011 MFLP* sample consisted of the spouses who provided complete responses in the *2010 MFLP*, the sample size was 28,552 spouses. The 2010 sample consisted of the spouses of 101,812 members drawn from the sample frame constructed from DMDC's *September 2009 Active Duty Master Edit File*, *September 2009 Family Database*, *September 2009 Active Duty Pay File*, *September 2009 Basic Allowance for Housing Population File*, and *December 2009 Defense Enrollment Eligibility Reporting System File*. The original sample size is larger than would be required to make accurate and stable estimates for spouses in each of the reporting categories. The sample size was increased to ensure an adequate number of spouses were available for the second

[5] *Without Children* includes some percentage of spouses who may have children over 18 years old or who do not currently live in their home, therefore, child-related responses may appear in this category.
[6] In stratified random sampling, all members of a population are categorized into mutually exclusive homogeneous groups. For example, spouses might be grouped by the gender and Service of their husband or wife (e.g., spouses of all male Army personnel in one group, spouses of all female Navy personnel in another). Within each group, spouses of active duty members are chosen at random. In the *2010 MFLP* small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

wave (*2011 MFLP)* given the pool of possible respondents would naturally decrease as members leave the military service. Spouses in the sample became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that they were divorced, widowed, or their husband/wife was no longer on active duty, or they are currently a Service member (2.22% of sample).

Completed surveys (defined as 50% or more of the survey questions asked of all participants were answered, including the two eligibility questions, Q1 and Q2) were received from 12,355 eligible respondents. The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 43%.[7]

Data were weighted using the industry standard three-stage process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The three-stage process of weighting consists of the following steps:

- *Adjustment for selection probability*—Sample or base weights for this survey were calculated based on the nonresponse adjusted weights for the *2010 MFLP*. That is, the starting weight for this survey which is the sample weight is the nonresponse adjusted weight from *2010 MFLP*. In general probability samples are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.

- *Adjustments for nonresponse*—Some sampled spouses do not respond to the survey. Continuing the previous example, suppose only half of the spouses sampled, 500, completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the nonresponse rate. In this example, the base weight (10) is multiplied by the reciprocal of the nonresponse rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.

- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings

[7] For more information on the demographic characteristics of respondents who replied to the Web and paper-and-pencil versions of the survey, please see pages 554-561 of this volume.

used in designing the subgroups for the sample. The second is based on population characteristics that are known to be related to whether a sample person responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents was 7,000 men and 3,000 women. To dampen this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women so that the final weights for men and women would be 24.3 and 10, which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (pages 8-9) shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the estimated number of spouses and the portion of total spouses in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.

Tabulation Procedures

Tabulations[8] for each question in the survey are shown on a set of facing pages. The text of the questions and response options are shown at the top of the even-numbered pages with only the question number repeated on the odd-numbered pages. To compress the width of columns in the tables, the response options are shown with a number or letter; then that number or letter is used as the column heading for the responses. The central feature of the tabulations is the percentage of spouses choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding error.

[8] Details of data editing and preparation are provided by DMDC (2012a).

Where an item can be presented as an average, that average is shown as a number estimate and in a bar chart. The averages lend themselves to a quick scan for reporting groups differing from other similarly defined groups. Where a true response continuum is available (e.g., number of children), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage unless specified in the footnote. When multi-level response scales (e.g., yes, no, not applicable) are dichotomized in the bar chart, the footnote may specify that the bar chart represents percentages derived from the calculation of one column (e.g., yes) divided by a denominator that excludes one or more columns (e.g., not applicable). For example, Q68a asks spouses whether their child experienced an increase in academic problems in response to their husband/wife's recent deployment. Spouses were able to mark *Yes*, *No*, or *Not applicable* (e.g. for those with children too young to be able to participate in academic programs). The tabulation shows percentages for each response option as well as a bar chart which reflects the percentage of spouses who marked *Yes*. However, the bar chart percentage excludes those who marked *Not applicable*. Thus, it represents the percentage of spouses who marked *Yes* out of those spouses who reported this subitem applied to them (e.g. of those who marked *Yes* or *No* only).

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it reflects item nonresponse due to skip patterns, and the table note indicates that "Percent responding are active duty member spouses who answered the question."

Not all questions will apply to every respondent. Respondents to the paper version of the survey are instructed to skip questions that do not apply to them (based on their answers to previous questions). Where possible, the Web survey is programmed to skip respondents over questions that do not apply to them. For example, Q61 asks spouses whether their husband/wife's most recent deployment had been to a combat zone. This question does not apply to those who marked in Q58 that their spouse has not been deployed. The table note for this question indicates that the "Percent responding are active duty member spouses who answered the question and whose husband/wife had been deployed in the past 12 months (Q58)."

It is often not practical to skip respondents out of every survey item that does not apply to them. For these items, *Does not apply* responses are often tabulated separately. For example, Q81 asked when respondents expected their spouse's next deployment. Responses of *Does not apply, I do not expect my spouse to be deployed* were tabulated separately as responses to the constructed question, *Do you expect your spouse to be deployed?*

Because the survey contains open-ended questions, not all responses are tabulated. For example, if spouses indicated that they did not feel comfortable using

military-provided services for counseling (Q52), then they were asked to explain their reasons for not being comfortable with military-provided services. Since it is not feasible to tabulate the wide range of responses, the open-ended responses for Q52 are not tabulated.

Paper and Web Survey Comparability

On occasion, the paper and Web versions of the survey differ. These differences result from the technological advantages and requirements available in a Web-based survey. Question stems differ slightly between the paper and Web versions of the survey. On the paper version of the survey, question stems will refer to specific survey items, whereas questions on the Web version are not numbered. The Web version of the survey contains additional survey items, as well as more open-ended questions.

In addition to variations in the question text between the paper and Web versions of the survey, the survey response options differ at times. A common difference between the surveys is the use of *Does not apply* response options on the paper version that are unnecessary in the Web version due to "smart skip" technology. For example, in Q45 of the paper version, respondents are asked whether they feel their counseling experiences were beneficial. Spouses could mark either *Yes*, *No*, or *Does not apply; I have never seen a counselor*. On the Web version of the question (Q47), respondents who had indicated that they had not seen a counselor either in the past six months or during their spouse's active duty career were automatically skipped over the question.

In constructing the dataset that combines the paper and Web respondents, questions from the Web version were typically used. The responses to the paper-and-pencil version of the questions were recoded to comply with the Web version.

Combining Information From Multiple Items or Response Options

Tabulations in this volume generally present data for individual survey questions.[9] There are four exceptions. The first type of exception is where the results for multiple items are presented on a single set of pages.

- In Q22a-b, spouses were asked if they wanted (Q22a) or needed (Q22b) to work. The tabulation shows percentages who answered *Yes* to Q22a and Q22b on one set of pages, so as to allow comparison between the percentages.

The second exception pertains to constructed composite measures (e.g., scales, summary variables) described below. With the exception of spouse

[9] Demographic information based on member administrative data are also presented. For example, member Service and paygrade, and spouse gender were constructed from administrative data.

employment, individual items in each measure are presented first followed by tabulation pages showing composite measure results.

- *Employment status*—Spouse employment indicators are derived from Q10-13 and are comparable to employment measures used in the U.S. Census Bureau's *Decennial Census* and *Current Population Survey* (CPS). Two sets of tabulations are presented. In the first set, labor force participation is shown for the spouses of those in the reporting category. The three categories contain percentages of employed, unemployed, and not in the labor market. Those not in the labor market include those who are permanently or temporarily not working or not actively looking for work.[10] The second set of data shows only those in the labor market. That is, the percent responding are spouses who answered the items and are in the labor market employed and unemployed but looking for work). The unemployment rates shown in these tables are the percent of those who need or want to work and who are unemployed. These rates are comparable to those reported monthly by the Bureau of Labor Statistics based on the CPS data.

- *Attachment Behavior Index (AQS*)—The *AQS* is used to measure insecurity of children in military families. A benefit of the *AQS* is its applicability across a range of age groups from young toddlers to adolescents. The *AQS* has been shown to be a valid measure of child's markers of insecurity as indexed by the child's behavior based around a specific caregiver. The scale is constructed from Q34a-f, with Q34a reverse coded. Spouses must have responded to all of the subitems in the scale to be included. Scores are reported as a single figure, which is the average of the individual scores (range 1 to 5). Higher scores indicate higher levels of insecurity in children. For details, refer to Waters, Vaughn, Posada, & Kondo-Ikemura (1995).

- *Patient Health (PHQ-4)*—The *PHQ-4* is designed to identify potential mental health concerns by measuring the extent that spouses have felt negative emotions, such as depression, anxiety, or nervousness, in the two weeks before taking the survey. This scale is constructed from Q39a-d and spouses must have responded to all of the subitems in the scale to be included. Each item is rated on a 1 to 4 scale. Scores on the *PHQ-4* are reported as a single figure, which is the average of the individual scores. A higher total score indicates a higher likelihood of mental illness. For details, see Kroenke, Spitzer, and Williams (2001).

- *Family Crisis Oriented Personal Evaluation Scale (F-COPES)*—The *F-COPES* measures a variety of coping behaviors and problem solving strategies that respondents may indicate they and their families use in times

[10] Those who have not actively looked for work in the past four weeks are considered to be out of the labor market. This category includes some percentage of spouses who are in the midst of a PCS move and, therefore, only temporarily out of the labor market.

of stress or crisis. This scale is constructed from Q40a-u and spouses must have responded to 90% of the subitems in the scale to be included. Each item is rated on a 1 to 5 scale. Scores are reported as a single figure, which is the average of the individual scores. Q40r and t are reverse coded in the construction of the overall score. A higher total score indicates better ability to cope with stressful situations. In addition, the *F-COPES* has five subfactors (McCubbin, Olson, & Larsen, 1996).[11] These subfactors include *Acquiring Social Support* (Q40a, b, e, g, i, and u; measures an individual's reliance on family and/or friends during difficult times), *Reframing* (Q40c, k, m, o, and q; measures an individual's ability to view a difficult situation in a more positive way or by accepting difficulties as a part of life), *Seeking Spiritual Support* (Q40j, p, and s; measures an individual's use of spiritual resources, such as church, and/or the use of spiritual advisors, such as church-based counseling, during difficult times), *Mobilizing to Acquire and Accept Help* (Q40d, f, h, and n; measures an individual's ability to cope with difficulties by seeking out and accepting help from others such as friends, other military families, health providers, etc.), and *Passive Appraisal* (Q40r and t; measures an individual's inability to cope with difficult situations or crises due to an avoidant interpretation of the challenging situation, such as believing if they wait long enough, the problem will go away). Scores are reported using the average of the subitems in each subfactor. Q40l is included in the overall score, but researchers have not included this item in the construction of subfactors (McCubbin et al., 1996). Respondents must have answered all of the subitems within each subfactor to be included in that specific score. Each of these subfactors are presented as separate tab pages. With the exception of *Passive Appraisal*, higher scores on subfactors indicate more frequent use of these positive coping strategies. For *Passive Appraisal,* higher scores also indicate more frequent use of this coping strategy, but research as found that the use of *Passive Appraisal* is not conducive to effective coping and is therefore considered a negative coping strategy. For details on the *F-COPES*, see McCubbin, Olson, and Larsen (1996).

- *Marital Instability Index (MII)*—An abbreviated version of the *MII* is used to capture the extent that respondents perceive problems in their marriages. The scale is constructed from Q43a-e and respondents must have answered all of the subitems in the scale to be included. Each item is rated on a two-point scale (yes/no). Scores are reported as a single figure, which is the sum of the individual scores (range 0 to 5). A higher score indicates a greater amount of perceived problems within the marriage. For more details, see Edwards, Johnson, and Booth (1987).

- *Social Support Index (SSI)*—The *SSI*, derived from items Q56a-r, captures the degree to which spouses have a community or network of people, other

[11] A principal component analysis was conducted, using promax rotation, to replicate these findings. Analyses indicated almost identical clusters.

than their spouse, who they can depend on and who can provide companionship and assistance. Respondents must have answered 90% of the subitems in the scale to be included. Scores are reported as a single figure, which is the average of the individual scores (range 1 to 5). A higher total score indicates greater perceived support. In addition, the *SSI* has four subfactors reviewed in the literature (McCubbin, Patterson, & Glynn, 1991).[12] These factors include *Community as a Source of Support* (Q56b, e, g, l, and n; measures an individual's belief that the community offers supportive resources during difficult times and that individuals feel secure living in the community), *Emotional, Esteem, and Friendship Network* (Q56f, i, p, and q; measures an individual's reliance on friends for emotional support and for increasing self-esteem), *Family Community Connection* (Q56h, j, k, o, and r; measures an individual's belief that community members and family members mutually support and understand each other), and *Family Affection and Commitment* (Q56a, c, d, and m; measures an individual's belief that family members support and show affection for each other). Q56h, j, k, n, o and r are reverse coded in both the construction of subfactors and the construction of the overall score. Scores are reported using the average of the subitems in each subfactor. Respondents must have answered all of the subitems within each subfactor to be included in that specific score. Each of these subfactors is presented as separate tab pages. Q56a is not a question in the traditional *SSI* but was added for the purpose of this survey. Principal component analysis indicated Q56a loaded significantly on the first factor of *Family Affection and Commitment* and was therefore included in this group. For each subfactor, higher scores indicate higher perceived support in that specific network.

- *Child Behavior Checklist*—The *Child Behavior Checklist* was created by DMDC to capture the potential problematic behaviors in children, including academic and behavioral problems. Traditional scales that capture these behaviors are difficult to use due to the range of ages this scale needed to cover (ages 0 to 17). DMDC created this scale as a way of measuring problem behaviors across this age range. The scale is constructed from Q35a-g (for the past 12 months) and Q68a-g (for the member's most recent deployment). Respondents must have answered all of the subitems in the scale to be included. Q35d, f, g and Q68d, f, and g are reverse coded in the construction of the overall score. The score is built by summing the presence/absence of the behavior ("yes" has the value 1 and "no" and "not applicable" have the value of 0). Scores are reported as a single figure, which is the sum of the individual scores (range 0 to 7). A higher score indicates a higher incidence of problematic behaviors.

[12] A principal component analysis was conducted, using promax rotation, to replicate these findings. Analyses indicated almost identical clusters.

Margins of Error

The complex sample design required weighting to produce population estimates (e.g., percent female).[13] Because of the weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN® PROC DESCRIPT (Research Triangle Institute, Inc., 2004).

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters (such as percentages or means) and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tab volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- "0" indicates that no one in the reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 30), or relative standard error (greater than 0.225),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.

[13] This differential weighting means that only certain statistical software procedures, such as SUDAAN® PROC DESCRIPT, correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

Note. Percent responding are active duty member spouses who answered the question. The scale ranges from 1 to 5. Higher scores indicate a higher level of marital instability. Cronbach's coefficient alpha = 0.84.

44. During your spouse's active duty career, have any of your children ever talked to a mental health professional (e.g., counselor)?

1. Yes
2. No
3. Does not apply; we do not have any children

Note. Percent responding are active duty member spouses who answered the question, whose husband/wife had been deployed in the past 12 months (Q58), who provided the birth date of a child in their household in 2010, and who indicated that child had lived with them in the past 12 months (Q32). Average Problem Behaviors excludes those who indicated "Not applicable." The scale ranges from 0 to 7. Higher scores indicate more problematic behaviors. Cronbach's coefficient alpha = 0.79.

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION

In accordance with the Privacy Act, this notice informs you of the purpose of the survey and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

AUTHORITY: 10 United States Code Sections 136, 1782, and 2358.

PRINCIPAL PURPOSE: Information collected in this survey will be combined with your responses from the 2010 survey and used to research the effects of the deployment cycle on the family, financial well-being, and views of military life. This information will assist in the formulation of policies which may be needed to improve the working environment. Reports will be provided to Department of Defense (DoD), each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the Web: http://www.dmdc.osd.mil/surveys/

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people can complete the survey in 16-30 minutes. Certain survey questions may solicit information about the military member, which may be considered negative in nature. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. If you participate, you may be contacted to participate in a similar survey in 2012. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. In no case will individual identifiable survey responses be reported. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC will notify an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: In 2010 DMDC used well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., deployment status, Service and gender). Based on your participation in the 2010 survey, you have been selected to participate in the 2011 survey. This is your chance to be heard on issues that directly affect you, including how deployment impacts you and your children. While there is no direct benefit for your individual participation, your responses on this survey ***make a difference***.

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as survey responses. Survey data may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. Government and contractor staff members have been trained to protect your identity and are subject to civil penalties for violating your confidentiality. You may experience discomfort and/or other emotions while completing the survey. If this occurs, you may contact Military OneSource by calling 800-342-9647 to find an appropriate helping professional.

If you experience any difficulties taking the survey, please contact the Survey Processing Center by sending an e-mail to MFLP@osd.pentagon.mil or call, toll-free, 1-800-881-5307. If you have concerns about your rights as a research participant, please contact: Ms. Caroline Miner, Human Research Protection Program Manager for the Office of the Under Secretary of Defense (P&R), HRPP@tma.osd.mil (703) 575-2677.

Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to August 16, 2011. Please include in the e-mail or phone message your name and Ticket Number. Unless withdrawn, partially completed survey data may be used after that date.

Click *Continue* if you agree to do the survey.

FREQUENTLY ASKED QUESTIONS

What is Defense Manpower Data Center (DMDC)?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in Department of Defense (DoD). DMDC also conducts Joint-Service surveys including the Status of Forces Surveys, QuickCompass, and Human Relations Surveys for the Department of Defense. To learn more, visit the DMDC Web site.

http://www.dmdc.osd.mil/

What is the Human Relations Survey Program?

- Human Relations Survey is a DoD personnel program that features Web-based surveys sponsored by the Under Secretary of Defense for Personnel and Readiness USD([P&R]).
- These surveys enable the DoD to regularly assess the attitudes and opinions of the DoD community—active duty and Reserve component members, and DoD civilian employees—on the full range of personnel issues.

How do I know this is an official, approved DoD survey?

- In accordance with DoD Instruction 8910.01, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# DD-P&R(AR)2145, expiring April 30, 2014.

How did you pick me?

- DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., deployment status, service and gender). As part of a longitudinal survey project, additionally were chosen based on your participation in the *2010 Military Family Life Project*.

Why should I participate?

- As a result of your participation in the first *MFLP* survey in spring 2010, you have played an integral role in many of the policy decisions made to help improve the life of all military spouses. Your continued participation in this project will help us see what has happened in your life over the past 12 months, and whether your outlook on being a military spouse has changed. This project phase will allow us compare your current situation with last year's – allowing us to tell and more complete story of your experiences.
- This is your chance to be heard on issues that directly affect you, including how deployment impacts you and your children.
- Your responses ***make a difference***.

Why do I receive so many surveys?

- We recognize that military spouses are often contacted for surveys from "grassroot" organizations, individual services, and other parties interested in the well-being of military families. The *Military Family Life Project* is different because it is from the Department of Defense and is the only DoD-wide survey of military spouses. Therefore, your responses to this survey will be heard by a larger audience and reflect the well-being of military spouses across all services.

How do I participate?

- The survey will be available at this Web site around May 31, 2011. Currently you may (1) read the Privacy Act Statement, (2) verify contact information, and (3) provide e-mail address(es) so we can notify you when the survey opens.

What is MFLP@osd.pentagon.mil?

- The official e-mail address for communicating with spouses of active duty members about Human Relations Survey surveys. "MFLP" is short for Military Family Life Project.

Why am I being asked to use the Web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- The survey is administered by our contractor, Data Recognition Corporation, an experienced survey operations company. The survey collection tool starts on a .mil site within DMDC. Once you enter your ticket number you are redirected to a contractor site which uses a .net domain. This allows everyone to access the survey, even from a non-government computer.

Do I have to answer all questions?

- No, it is not necessary to answer every question. Within the survey screen, you have four control buttons: *Next* Page (->), *Previous Page* (<-), *Clear Responses* and *Save and Return Later*. Use these buttons to navigate through the survey or skip questions. Use the *Save and Return Later* button to give yourself flexibility to complete the survey at a convenient time. When you return to the survey Web site, enter your Ticket Number to get to the place in the survey where you had stopped.

Why does the survey ask personal questions?

- DMDC reports overall results, as well as by other characteristics, such as location, gender, etc. To complete these analyses, we must ask respondents for these types of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel so that no groups are overlooked.
- Sometimes sensitive questions are asked in order to improve personnel policies, programs, and practices. As with all questions on the surveys, your responses will be held in confidence.

Will my answers be kept private?

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579). Privacy Act Statement
- All data will be reported in the aggregate and no individual data will be reported.
- We encourage you to safeguard your Ticket Number to prevent unauthorized access to your survey. In addition, to ensure your privacy, be aware of the environment in which you take the survey (e.g., take the survey when no one else is home, take care to not leave the survey unattended).

Can I withdraw my answers once I have started the survey?

- If you wish to withdraw your answers, please notify the Survey Processing Center prior to August 16, 2011 by sending an e-mail to MFLP@osd.pentagon.mil or calling, toll-free 1-800-881-5307. Include your name and Ticket Number.

Will I ever see the results of the survey?

- DMDC posts survey results on the following Web site:

http://www.dmdc.osd.mil/surveys/

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION

In accordance with the Privacy Act, this notice informs you of the purpose of the survey and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully. **Returning this survey indicates your agreement to participate in this research.**

AUTHORITY: 10 United States Code Sections 136, 1782, and 2358.

PRINCIPAL PURPOSE: Information collected in this survey will be combined with your responses from the 2010 survey and used to research the effects of the deployment cycle on the family, financial well-being, and views of military life. This information will assist in the formulation of policies which may be needed to improve the working environment. Reports will be provided to Department of Defense (DoD), each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the Web: http://www.dmdc.osd.mil/surveys/

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people can complete the survey in 16-30 minutes. Certain survey questions may solicit information about the military member, which may be considered negative in nature. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. If you participate, you may be contacted to participate in a similar survey in 2012. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. In no case will individual identifiable survey responses be reported. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC will notify an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: In 2010 DMDC used well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., deployment status, Service and gender). Based on your participation in the 2010 survey, you have been selected to participate in the 2011 survey. This is your chance to be heard on issues that directly affect you, including how deployment impacts you and your children. While there is no direct benefit for your individual participation, your responses on this survey ***make a difference.***

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as survey responses. Survey data may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. Government and contractor staff members have been trained to protect your identity and are subject to civil penalties for violating your confidentiality.
You may experience discomfort and/or other emotions while completing the survey. If this occurs, you may contact Military OneSource by calling 800-342-9647 to find an appropriate helping professional.

If you experience any difficulties taking the survey, please contact the Survey Processing Center by sending an e-mail to MFLP@osd.pentagon.mil or call, toll-free, 1-800-881-5307. If you have concerns about your rights as a research participant, please contact: Ms. Caroline Miner, Human Research Protection Program Manager for the Office of the Under Secretary of Defense (P&R), HRPP@tma.osd.mil (703) 575-2677.

If you desire to withdraw your answers, please notify the Survey Processing Center prior to survey close date. Please include in the e-mail or phone message your name and ticket number. Unless withdrawn, partially completed survey data may be used after that date.
