2008 SURVEY OF ACTIVE DUTY SPOUSES: TABULATIONS OF RESPONSES

Defense Manpower Data Center
Human Resources Strategic Assessment Program
1600 Wilson Boulevard, Suite 400, Arlington, VA 22209-2593

Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2008 Survey of Active Duty Spouses*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The survey program is conducted under the leadership of Timothy Elig, Director, *Human Resources Strategic Assessment Program* (HRSAP).

Policy officials contributing to the development of this survey included Jane Burke, Cathy Flynn, and Lin Porter (Military Community and Family Policy). Other policy officials contributing to the development of this survey included: John Winkler, Tom Bush, Virginia Hyland, Dan Kohner, Richard Krimmer, James Scott, COL Kathleen Woody (USAFR), and CAPT Stephen Nye (USCGR), all from the Office of the Assistant Secretary of Defense for Reserve Affairs. Howard Weiss of Purdue University was also an important contributor.

DMDC's Program Evaluation Branch, under the guidance of Brian Lappin, Branch Chief, is responsible for the development of questionnaires in the survey program. The lead survey design analyst was Rachel Lipari, Senior Scientist. In addition, Kristin Williams and Kelly Sand designed the unique presentation of complex items used in this tabulation volume. They were supported in these efforts by Torrey Coriden and Jason Smith, Consortium Research Fellows.

DMDC's Personnel Survey Branch, under the guidance of Jean Fowler, previous Branch Chief, and David McGrath, current Branch Chief, is responsible for developing the sampling and weighting methods used in the survey program and survey database construction and archiving. The lead operations analyst on this survey was Margaret Coffey, supported by Whitney Gaber and Tyler Blouin, Consortium Research Fellows. Carla Scanlan used a customized sampling tool designed for this survey to plan the sample. Michael Paraloglou, SRA International, Inc., created the sample weights for the survey data. Susan Reinhold and Carole Massey, and Deborah West, Northrup Grumman Corporation, provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing.

DMDC's Survey Technology Branch, under the guidance of Frederick Licari, Branch Chief, is responsible for the distribution of datasets outside of DMDC and maintaining records on compliance with the Privacy Act and 32 CFR 219.

Jacqueline Malone, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool. A team consisting of Rachel Lipari, Margaret Coffey, Amy Campbell, Kristin Williams, and Torrey Coriden completed quality control for this tabulation volume.

f. My spouse's job made him/her too tired to do the things at home that needed attention 634

g. I experienced a major life event without the presence of my spouse (e.g., move, birth of a child, major illness, death in the family) 636

94. How much do you agree or disagree with each of the following statements? 638

a. My spouse continues to serve in the military because leaving would require considerable sacrifice 638

b. The lack of civilian opportunities for my spouse makes me think we should stay in the military 640

c. It would be too costly for us if my spouse left the military 642

d. Being a military spouse fulfills most of the important needs I look for in my life 644

e. Being a military spouse is ideal for me 646

f. Being a military spouse is consistent with my personal goals 648

g. If we left the military today, I would feel like we had let our country down 650

h. I feel no obligation for my spouse to remain in the military 652

i. I am proud to tell others that I am married to a Service member 654

j. Generally, on a day-to-day basis, I am proud to be a military spouse 656

k. I feel a strong obligation to support my spouse's commitment to a military career 658

l. I am committed to staying in the military because my spouse is 660

m. I enjoy being a military spouse 662

n. Generally, on a day-to-day basis, I am happy with my life as a military spouse 664

o. The military community is a good place for bringing up children under 11 years of age 666

p. The military community is a good place for bringing up children between 11 and 19 years of age 668

q. A couple can have a good life together when one or both serve in the military 670

94. Affective Commitment scale: Constructed from Q94d, Q94e, Q94f, Q94m, and Q94n. Affective Commitment can be defined as a military spouse's emotional attachment to, identification with, and involvement in the military 672

94. Continuance Commitment scale: Constructed from Q94a-c. Continuance Commitment can be defined as a military spouse's attachment based on the perceived costs of the member leaving the military 674

94. Pride scale: Constructed from Q94i-j. Pride can be defined as a strong connection with the identity of being a military spouse 676

ADMINISTRATIVE

95. In what Service is your spouse? Constructed from administrative data. 678

96. What is your spouse's current paygrade? Constructed from administrative data 680

97. What is your gender? Constructed from administrative data 682

98. Did you respond to this survey via the Web or a paper survey questionnaire? Constructed from administrative data 684

2008 SURVEY OF ACTIVE DUTY SPOUSES: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. *Human Relations Surveys* are in-depth studies of topics and populations, often requiring both paper-and-pencil surveys and Web-based surveys, that take longer to develop, administer, and analyze.

This report contains tabulations of responses from the *2008 Survey of Active Duty Spouses* (*2008 ADSS*) conducted March 14 to August 4, 2008. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,[1] and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.[2]

Survey Content

The *2008 ADSS* continues a line of research on active duty spouses begun with the *1985 DoD Surveys of Officer and Enlisted Personnel and Military Spouses*. In 1992, 1999, and 2006 DMDC conducted subsequent Joint Service surveys of active duty spouses. Many key topics covered by the *2008 ADSS* were also included in its predecessors; however, questions have been updated or streamlined in the *2008 ADSS*. The survey was administered by both Web and paper-and-pencil questionnaires. The Web version of the survey contained additional survey items, which are identified in the tabulations. The paper-and-pencil questionnaire appears in Appendix A, and the Web questionnaire appears in Appendix B. The survey was subdivided into the following nine topic areas:

1. *Background Information*—Marital status, length of marriage, race/ethnicity, age, dependents, and member's active duty status.

2. *Permanent Change of Station (PCS) Moves*—Number of spouse moves, length of time since most recent PCS move, and programs or services that would have helped in obtaining employment after a PCS move.

[1] Details on survey methodology are reported by DMDC (2008).
[2] The survey was administered via the Web and paper-and-pencil questionnaires. Question numbering differed between the Web and paper questionnaires. The tabulations follow the order of items used on the Web administration. Appendix A provides the order of items used on the paper-and-pencil administration, and Appendix B provides the order of items used on the Web administration.

3. *Your Spouse's Deployments*—Financial steps taken to prepare for deployments; member's deployment status over the past 3 years; spouse adjustment to multiple deployments; member's current deployment status; number of days deployed and combat exposure in the past 12 months; impact of deployment on spouse and family life, expenses, and spouse employment; coping; member's post-deployment behavior; difficulty of spouse's readjustment to member's return; and reunion/reintegration support services.

4. *Effect of Deployments on Children*—Use of "drop-in" child care during deployments, age and gender of child(ren) most impacted by deployments, emotional/behavioral impact of deployment on child(ren), and ways child(ren) cope with deployments.

5. *Military OneSource*—Use of Military OneSource and usefulness of Military OneSource features/services.

6. *Education and Employment*—Spouse education level and goals, current academic enrollment status and barriers to pursuing further education, spouse employment status, reasons for not looking for work, hours worked per week, preferred and current career field, use of Career Advancement Accounts, and importance of working.

7. *Financial Well-Being*—Total household monthly earnings and spouse's monthly earnings; financial problems experienced, saving habits, emergency savings, and Federal Thrift Savings Program (TSP) participation; general financial condition; and financial goals.

8. *Health and Well-Being*—Perceptions of stress and social support, marital satisfaction, and spouse height and weight.

9. *Feelings About Military Life*—Overall satisfaction with military way of life, spouse's support to stay on active duty, nights away in past 12 months, impact of member's time away on spouse's support for member's military career, likelihood of member being deployed in the next year, member's work/life balance, and spouse commitment to the military.

Population and Reporting Categories

The target population for the *2008 ADSS* consisted of spouses of active duty members of the Army, Navy, Marine Corps, Air Force, and Coast Guard, excluding National Guard and Reserve members, who (1) have at least six months of service at the time the questionnaire is first fielded and (2) are below flag rank. In addition, for the respondent to remain eligible, they must have indicated at the time of the survey

that they were currently married to an active duty member.[3] Survey results are presented for the total DoD population[4] and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified by administrative record data for member categories of Service, paygrade, enlisted years of service, and the spouse category of gender. The remaining reporting categories are based on survey self-report. Survey results are categorized by three demographic characteristics: member characteristics of Service, paygrade, enlisted years of service, Service by paygrade, and deployment status; spouse characteristics of gender, educational level, race/ethnicity, age, and employment; and the household characteristic of presence of children. Definitions for reporting categories follow:

- *Member Service*—The categories include *Army*, *Navy*, *Marine Corps*, and *Air Force*.

- *Member Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1-E9). The *Enlisted* subgroup is broken into the following groups: *3 to 5 years* (i.e., first-term decision window), *6 to 9 years* (i.e., second-term decision window), *E1-E4s*, and *E5-E9s*. The *E5-E9* category is further broken into *E5-E6* and *E7-E9*. The *Officers* subgroup includes warrant officers and commissioned officers (*O1-O3* and *O4-O6)*.

- *Member Deployment Status—Not Deployed Past 36 Months* and *Not Deployed Past 12 Months* includes members whose spouses reported that they were not deployed in the preceding 36 or 12 months, respectively. *Deployed Past 36 Months* and *Deployed Past 12 Months* includes members who have been deployed. Members who have been deployed more than once in the past 36 months are also divided into an additional deployment category. *Deployed to Combat Zone* includes members whose spouses reported that they have been deployed at least once in the past 12 months to Iraq, Afghanistan, or another combat zone.

- *Spouse Gender*—This category is self-explanatory.

- *Spouse Education*—Respondents are classified based on self-reported educational attainment. *No College* includes those without any college credit. *Some College* includes those with some college credit, including a two-year degree, but does not include those with a four-year degree. *Four-year Degree* includes those with a four-year degree and those with some graduate school, but no graduate or professional degree. *Graduate/Professional Degree* includes those with masters, doctorates, and other professional degrees.

[3] An active duty member married to another active duty member would be eligible for the survey depending on their spouse's status, not their own.
[4] Total DoD reflects the responses from spouses of Army, Navy, Marine Corps, and Air Force members. Responses from spouses of Coast Guard members are tabulated in a separate section.

- *Spouse Race/Ethnicity*—Respondents are classified based on self-reported categories consistent with requirements of the *Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity* (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only[5] Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone marking that they are Spanish/Hispanic/Latino, regardless of how they answered the question on race.

- *Spouse Age*—Categories include *Less Than 21 Years Old*, *21 to 25 Years*, *26 to 30 Years*, *31 to 35 Years*, *36 to 40 Years*, and *More Than 40 Years Old*.

- *Spouse Employment*—Spouses are classified based on self-reports of employment status and membership in the Armed Forces. Categories include *Employed*, *Unemployed*, *Not in Labor Force*, and *Armed Forces Member.*

- *Family Status*—C*ategories* include *With Children* and *Without Children*.

- *Service by Paygrade*—The categories include each of the Services by enlisted and officer paygrade groups.

- *Coast Guard*—Includes all spouses of Coast Guard members, and is further broken down into the following subcategories: member paygrade and deployment status in the past 36 months; spouse gender and employment status; and family status.

Survey Methodology

The Web survey administration process began on March 14, 2008, with the mailout of notification letters to sample spouses. The notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected between March 21 to August 4, 2008. Paper surveys were mailed on April 11, 2008, to those who did not respond via the Web.[6]

[5] Persons marking they are Black or African American and another race are not in this category.
[6] A random 10% of the sample were offered only the Web survey and were not mailed the paper version. The remaining sample members were offered both the Web survey as well as the paper survey. The e-mail and postal reminders sent to the 10% Web-only sample did not mention the paper survey option.

Single-stage, nonproportional stratified random sampling[7] procedures were used. The sample consisted of the spouses of 49,368 members drawn from the sample frame constructed from DMDC's September 2007 *Active Duty Master Edit File*, September 2007 *Family Database*, September 2007 *Active Duty Pay File*, September 2007 *Basic Allowance for Housing Population File*, and Novermber 2007 *Defense Enrollment Eligibility Reporting System (DEERS) File*. Spouses of the sample became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that they were divorced, widowed, or their husband or wife was no longer on active duty as of the first day of the Web survey, March 21, 2008 (0.69% of sample).

Completed surveys (defined as 50% or more of the survey questions asked of all participants were answered, including the two critical questions, Q1 and Q2) were received from 13,423 eligible respondents (9,016 DoD and 4,407 Coast Guard). The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 28% (28% for DoD and 32% for Coast Guard).[8]

Data were weighted using the industry standard three-stage process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The three stage process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples such as the sample for this survey are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.

- *Adjustments for nonresponse*—Some sampled spouses do not respond to the survey. Continuing the previous example, suppose only half of the sample spouses, 500, completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project

[7] In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, spouses might be grouped by the gender and Service of their husband or wife (e.g., spouses of all male Army personnel in one group, spouses of all female Navy personnel in another). Within each group, spouses of active duty members are chosen at random. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.
[8] Nearly two-thirds (63%) of respondents completed the Web version of the survey. For more information on the demographic characteristics of respondents who replied to the Web and paper-and-pencil versions of the survey, please see pages 684-685 of this volume.

the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the nonresponse rate. In this example, the base weight (10) is multiplied by the reciprocal of the nonresponse rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.

- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings used in designing the subgroups for the sample. The second is based on population characteristics that are known to be related to whether a sample person responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents was 7,000 men and 3,000 women. To dampen this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women so that the final weights for men and women would be 24.3 and 10, which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (pages 8-9) shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the estimated number of spouses and the portion of total spouses in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.[9]

Tabulation Procedures

Tabulations[10] for each question in the survey are shown on a set of facing pages. The text of the questions and response options are shown at the top of the even-numbered pages with only the question number repeated on the odd-numbered pages. To compress the width of columns in the tables, the response options are shown with a number, letter, or DNA (i.e., *Does not apply*); then that number, letter, or DNA is used as the column heading for the responses. The central feature of the tabulations is the percentage of spouses choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding error.

[9] There is also a slight difference in the treatment of missing data. Cases with missing data are included in counts of respondents, but are excluded from population estimates.
[10] Details of data editing and preparation are provided by DMDC (2008).

Where an item can be presented as an average, that average is shown as a number estimate and in a bar chart. The averages lend themselves to a quick scan for reporting groups differing from other similarly defined groups. Where a true response continuum is available (e.g., number of children), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage. When multi-level response scales (e.g., "yes," "no," "don't know") can be dichotomized, the bar chart represents either the sum of the percentages in multiple columns (e.g., "no" and "don't know" summed) or the percentage in one column (e.g., "yes").

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it reflects item nonresponse, and the table note indicates that "Percent responding are Service member spouses who answered the question."

Not all questions will apply to every respondent. Respondents to the paper version of the survey are instructed to skip questions that do not apply to them (based on their answers to previous questions). Where possible, the Web survey is programmed to skip respondents over questions that do not apply to them. For example, Q15 (Now that your spouse has been deployed multiple times in the past 3 years, has coping with deployments become more or less difficult with each experience?) does not apply to those who marked in Q14 that their spouse has not been deployed in the past 3 years. The table note for this question indicates that the "Percent responding are Service member spouses who answered the question and whose spouse had been deployed multiple times in the past 3 years (Q14)."

The survey does not always skip questions that do not apply to the respondents. In the tabulations, *Does not apply* responses are typically tabulated separately. For example, Q72 asked spouses if there was a change in responsibility for paying bills during the member's most recent deployment. Responses of *Does not apply; no change in responsibility* were tabulated separately, as responses to the constructed question *When your spouse was deployed was there a change in responsibility for paying bills?* In other cases, the *Does not apply* or *Not applicable* responses are included in the percentages in the *Percent Responding* column. For example, Q27 asked spouses if their spouse had difficulty reconnecting with their children after returning from deployment. Respondents can indicate the question does not apply.

Because the survey contains open-ended questions, not all responses are tabulated. For example, Q30 asked spouses how their marital relationship has been impacted by deployments. Since it is not feasible to tabulate the wide range of responses, the open-ended responses for Q30 are not tabulated.

Paper and Web Survey Comparability

On occasion, the paper and Web versions of the survey differ. These differences result from the technological advantages and requirements available in a Web-based survey. Question stems differ slightly between the paper and Web versions of the survey. On the paper version of the survey, question stems will refer to specific survey items, whereas questions on the Web version are not numbered. The Web version of the survey contains additional survey items, as well as more open-ended questions.

In addition to variations in the question text between the paper and Web versions of the survey, the survey response options also differ at times. A common difference between the surveys is the use of *Does not apply* response options on the paper version that are unnecessary in the Web version due to “smart skip” technology. For example, Q14 of the paper survey (Now that your spouse has been deployed multiple times in the past 3 years, has coping with deployments become more or less difficult with each experience?) has a response option of *Does not apply, my spouse has been deployed only once* for respondents who had previously indicated that their spouse has not been deployed in the past 3 years. For the Web version of the question (Q15), respondents who had indicated that their spouse has not been deployed in the past 3 years are automatically skipped over the question.

In other cases, the response option of *Does not apply* on the paper version is not necessary because the question is asked as separate items on the Web survey. For example, in Q22 of the paper version, respondents are asked how many months has it been since their spouse returned home from deployment. Spouses could either enter the number of months or mark *Does not apply, hasn’t returned*. On the Web version, respondents were asked in a preceding question whether their spouse had returned home from a deployment in the past 12 months. If respondents answered No to this question (Q25) on the Web survey, they were automatically skipped over the question asking how many months it had been since their spouse returned.

In constructing the dataset that combines the paper and Web respondents, the Web version of questions was typically used. The responses to the paper-and-pencil version of the questions were recoded to comply with the Web version. Exceptions may occur when the tabulation of a survey item would benefit from presenting responses in a manner representative of the total population, as opposed to only the applicable population, by coding respondents who were skipped over the question to force their inclusion.

Combining Information From Multiple Items or Response Options

Tabulations in this volume generally present data for individual survey questions.[11] There are four exceptions. The first type of exception is where the results for multiple items are presented on a single set of pages.

- In 45a-d, spouses were asked about the ways in which they used the confidential Military OneSource in the past 12 months. In addition to a tabulation showing the percentage of those who indicated "Yes," a composite tabulation shows the total percentage of those who indicated "Yes" to any of the subitems a-d.

The second exception is where spouses can provide multiple answers to a single question (e.g., race).

- In Q5, spouses were asked to mark one or more races. The tabulations show the percentage who responded that they were White, Black or African American, American Indian or Alaska Native, Asian, or Native Hawaiian or Other Pacific Islander. Respondents who indicated more than one race are also shown in the percentage of More Than One Race Marked. For example, if a respondent indicated they were Asian and White, they were counted in the percentage as Asian, White, and More Than One Race Marked.

The third exception pertains to combining response options from a single item to present an aggregate number.

- For example, in Q21, spouses who had indicated in a previous question that their spouse had been deployed in the past 36 months were asked about the effects of their spouse's most recent deployment on their jobs. In addition to the tabulation showing the percentage of those indicating the response options *Yes, a positive effect; Yes, a negative effect; Yes, both a positive and negative effect;* or *No, neither a positive nor a negative effect*, another tabulation shows the percentage of those who had a job during the spouse's most recent activation/deployment.

The fourth exception pertains to constructed composite measures (e.g., scales, incident rates, summary variables) described below. For example, an incident rate for financial problems was constructed from multiple items. With the exception of spouse employment, individual items in each measure are presented first followed by tabulation pages showing composite measure results.

- *Spouse employment*—Spouse employment indicators are derived from Q51-Q54 and are comparable to employment measures used in the U.S. Census Bureau's *Decennial Census* and *Current Population Survey* (CPS). Two sets

[11] Demographic information based on member administrative data is also presented. For example, member Service, paygrade, and spouse gender were constructed from administrative data.

of tabulations are presented. In the first set, labor force participation is shown for the spouses of those in the reporting category. The four categories contain percentages of (civilian) employed, unemployed, not in the labor market, and Armed Forces members. Those not in the labor market include those who are permanently or temporarily not working or not actively looking for work.[12] The second set of data shows only those in the labor market. That is, the percent responding are spouses who answered the items and are in the labor market (civilian employed, unemployed but looking for work, and in the Armed Forces). The unemployment rates shown in these tables are the percent of those who need or want to work and are unemployed. These rates are comparable to those reported monthly by the Bureau of Labor Statistics based on the CPS data.

- *Social Support*—The *Social Support* scale, derived from items Q77a-j, indicates the degree to which spouses have a network of friends and family, other than their spouse, who can provide companionship, assistance, and other types of support. A higher score on the scale indicates greater perceived support.

- *Perceived Stress*—To evaluate stress levels, spouses were asked about their emotional experiences/reactions in the month prior to taking the survey. The scale measure consists of four items (Q78a-d) from the *Perceived Stress Scale*© (Cohen & Williamson, 1988). For the purposes of this report, Q78b-c were reverse-coded. The items are scored 0 to 4. Scores are reported as a single figure, which is the sum of the individual scores (range 0 to 16). Higher scores indicate greater perceived stress.

- *Kessler Scale (K6)*—The K6 is designed to identify potential mental health concerns by measuring spouses' experiences/reactions in the four weeks before taking the survey. The K6 is constructed from Q80a-f. The scale ranges from 0 to 24, with higher scores indicating a greater likelihood of mental illness. Scores of 13 or greater on the K6 indicate serious psychological distress. For details, see Kessler et al., (2002).

- *Military Career Support*—A two-item composite measure indicating whether spouse support for the member's military career decreased as a result of the member being away more than expected was constructed from Q90 and Q91. The tabulation shows the percentage of spouses who indicated in Q90 that the member spent more time away from home than expected, and who also indicated in Q91 that their support had decreased.

- *Military Spouse Commitment*—Three measures of military spouse commitment (Q94) are presented. *Affective Commitment* can be defined as the military

[12] Those who have not actively looked for work in the past 4 weeks are considered to be out of the labor market. This category includes some percentage of spouses who are in the midst of a PCS move and, therefore, only temporarily out of the labor market.

spouse's emotional attachment to, identification with, and involvement in the military (Q94d, e, f, m, and n). *Continuance Commitment* can be defined as a military spouse's attachment based on the perceived costs of the member leaving the military (Q94a-c). *Pride* can be defined as a strong connection with the identity of being a military spouse (Q94i-j). Lower scores on these measures indicate less military spouse commitment/pride, whereas higher scores represent more commitment/pride.

Margins of Error

The complex sample design required weighting to produce population estimates (e.g., percent female).[13] Because of the weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN© PROC DESCRIPT (Research Triangle Institute, Inc., 2004).

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters (such as percentages or means) and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tab volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- "0" indicates that no one in any reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 30), or relative standard error (greater than 0.225),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.

[13] This differential weighting means that only certain statistical software procedures, such as SUDAAN© PROC DESCRIPT, correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

PRIVACY ACT & INFORMED CONSENT

In accordance with the Privacy Act, this notice informs you of the purpose of the Human Resources Strategic Assessment Program (HRSAP) Surveys and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

Returning this survey indicates your agreement to participate in this research.

AUTHORITY: 10 USC Sections 136, 1782, and 2358. 14 USC Section 1.

PRINCIPAL PURPOSE: Information collected in this survey will be used to research attitudes and perceptions of military spouses. This information will assist in the formulation of policies for programs that benefit military families. Reports will be provided to the Department of Defense (DoD), Department of Homeland Security (DHS) due to the inclusion of U.S. Coast Guard spouses, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research and datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the following Web site: http://www.dmdc.osd.mil/surveys/. In no case will individual identifiable survey responses be reported.

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people take 16-30 minutes to complete the survey. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if a direct threat to harm yourself or others is found in survey comments or communications, DMDC is legally required to forward information about that threat to an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to select a sample that represents the Defense community. This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., location, Service). You were selected at random from one of these clusters of people. This is your chance to be heard on issues that directly affect you. While there is no direct benefit for you for your individual participation, your answers on a survey ***make a difference***. For example, results from previous surveys have helped the Department design better child care programs, employment programs, and morale and retention programs.

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as survey responses. Survey responses may be shared with organizations doing research on military spouses but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. To further minimize this risk, some variables are randomly set to missing. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality.

If you have questions about the survey, please e-mail SMS@osd.pentagon.mil or leave a message any time, toll-free, at 1-800-881-5307. If you have concerns about your rights as a research participant, please contact Ms. Caroline Miner, Certified IRB Professional, HRPP Program Manager for the Office of the Under Secretary of Defense (Personnel & Readiness), 5113 Leesburg Pike, Skyline 4, Suite 901, Falls Church, VA 22041, HRPP@tma.osd.mil, (703) 575-2677, Fax (703) 578-8501.

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION FOR SURVEY OF ACTIVE DUTY SPOUSES

In accordance with the Privacy Act, this notice informs you of the purpose of the HRSAP Surveys and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

AUTHORITY: 10 USC Sections 136, 1782, and 2358. 14 USC Section 1.

PRINCIPAL PURPOSE: Information collected in this survey will be used to research attitudes and perceptions of military spouses. This information will assist in the formulation and improvement of policies for programs that benefit military families. Reports will be provided to the Department of Defense (DoD), Department of Homeland Security (DHS) due to the inclusion of U.S. Coast Guard spouses, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the following Web site: https://www.dmdc.osd.mil/surveys/. In no case will individual identifiable survey responses be reported.

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people take 16-30 minutes to complete the survey. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if a direct threat to harm yourself or others is found in survey comments or communications about the survey, DMDC is legally required to forward information about that threat to an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to select a sample that represents the Defense community. This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., location, Service). You were selected at random from one of these clusters of people. This is your chance to be heard on issues that directly affect you. While there is no benefit just for you for your individual participation, your answers on a survey make a difference. For example, results from previous surveys have helped the Department design better child care programs, employment programs, and morale and retention programs.

SECURITY PROTECTION ADVISORY

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as answers to survey questions. Answers to survey questions may be shared with organizations doing research on military spouses but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. To further minimize this risk, some variables are randomly set to missing. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality.

If you cannot access the Web or experience any other problem with the survey, please e mail ADSurvey@osd.pentagon.mil or leave a message any time, toll-free, at 1-800-881-5307. If you have concerns about your rights as a research participant, please contact Ms. Caroline Miner, Certified IRB Professional, HRPP Program Manager for the Office of the Under Secretary of Defense (Personnel & Readiness), 5113 Leesburg Pike, Skyline 4, Suite 901, Falls Church, VA 22041, HRPP@tma.osd.mil, (703) 575-2677, Fax (703) 578-8501.

Click 'continue' if you agree to do the survey. Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to January 14, 2008 by sending an e-mail to ADSurvey@osd.pentagon.mil or leave a message, toll-free, at 1-800-881-5307. Please include in the e-mail or

phone message your name, Ticket Number, and the PIN that you selected when you started this survey. Unless withdrawn, partially completed survey data may be used after that date.

ABOUT THIS QUESTIONNAIRE

Why should I participate?

- This is your chance to be heard on issues that directly affect you and your family.
- Some examples of topics include: impact of deployments on you and your spouse and children, your employment opportunities, and overall satisfaction with military life.
- Your answers on a survey *make a difference*. For example, results from previous surveys have helped the Department design better childcare programs, employment programs, and morale and retention programs.

How did you pick me?

- We use well-established, scientific procedures to select a sample that represents the military community.
- You were selected at random to be part of this survey.

Why am I being asked to use the Web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- The survey program starts off on a .mil site within DMDC. Next, each person is redirected to a contractor site which uses a .net domain because this makes it as easy as possible for everyone to access the survey, even from a non-government computer. The survey is administered by our contractor, Data Recognition Corporation, an experienced survey operations company.

Do I have to take the survey in one sitting?

- No, it is not necessary to complete the survey in one sitting. Just click the "Save and Return Later" button and the work you completed will be saved.
- When you return to the survey Web site, enter your Ticket Number and PIN to get to the place in the survey where you had stopped.

Can I withdraw my answers once I have started the survey on the Web?

- Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to January 14, 2008 by sending an e-mail to ADSSurvey@osd.pentagon.mil or leave a message, toll-free, at 1-800-881-5307. Please include in the e-mail or phone message your name, Ticket Number, and the PIN that you selected when you started this survey.

Why does the survey ask personal questions?

- The Defense Manpower Data Center (DMDC) reports not only overall results, but also results by education level, number of children, etc. To complete these analyses, we must ask respondents for these types of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel (e.g., with children/without children, employed/not employed) so that no groups are overlooked.
- Sensitive questions are sometimes also asked about topics like personal finances. Such information will be used to improve personnel policies, programs, and practices. As with all questions on the surveys, your responses will be held in confidence.

Will my answers be kept private?

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579).
- Only group statistics will be reported. Individual data will not be reported.

Will I ever see the results of the survey?

- This survey's briefings and reports will be posted on the following Web site: http://www.dmdc.osd.mil/surveys/.
- When you complete a survey, you can request to be notified by e-mail when results are posted on the Web.

What is DMDC?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in DoD. It also conducts Joint-Service surveys and operates the Status of Forces Survey Program for the DoD. To learn more, visit the DMDC web site: http://www.dmdc.osd.mil/.

How do I know this is an official, approved DoD survey?

- In accordance with DoD Instruction 8910.01, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for the SOFS is DD-P&R(AR)2145, expiring 05/31/2008.
- DMDC has set up a telephone line for anyone who wishes to verify that this is a legitimate survey. From any DoD or other government telephone with DSN, you can call 426-7427 for a list of current data collections by licensed DMDC surveys. If you do not have access to a DSN telephone line, you can call 1 703 696 7427. This prerecorded list does not include surveys being conducted by other DoD offices.

What is ADSurvey@osd.pentagon.mil?

- The official e-mail address for communications to and from the Department of Defense about the Survey of Military Spouses. "ADSSurvey" is short for Active Duty Spouse Survey.

14. ABSTRACT
The 2008 Survey of Active-Duty Spouses (2006 ADSS) is part of the 2008 Survey of Military Spouses project. The 2008 ADSS was designed to measure the attitudes and opinions of spouses regarding a wide-range of issues including demographic information, marital history, employment status, feelings about military life, use of military programs and services, and number and age of children or other legal dependents. Results are tabulated by member Service, member paygrade, member Service by paygrade, member deployment status, spouse gender, spouse race/ethnicity, spouse location, spouse employment, spouse education, spouse age, length of marriage, family status, and total household income. A copy of the Web and paper-and-pencil versions of the survey instrument are included.
