- 🧭 Detainces in US control in Afghanistan: 324. Capacity exceeds population,
- 178 detainces are ready for immediate movement from CENTICOM AOR.
(U) SOUTHCOM CAPACITY
- Camp X-Ray current capacity is 220 (one detainee per unit). Projected capacity: 260 on 30 Jan and 320 on 5 Feb
🦛 Current Detaince population at GTMO: 158
(U) INTERROGATION
<ul> <li>USCINCSO estimates that current interrogation processing prediction would allow elimination of backlog no later than 12 Feb</li> </ul>
- (f) NOTE: Initial interrogations indicate probability that some small portion of detainces offer little intel value, pose no threat and have committed mo-orime.
(U) USCINCCENT Recommendation:
<ul> <li>Begin detainee flow immediately, flying 62 detainces to GTMO on 2 separate flights.</li> </ul>
- Contraction of the second se

:

- A Resume detainee flow o/a 12 Feb, based on the guidance to complete interrogation of detainee already at GTMO. USCINCSO acknowledges that he can begin receiving detainees immediately.

## (U) Options

- (6) Begin Flow as soon as reasonably possible (next detainee arrival at GTMO on 6 Feb). Transport subsequent groups every other day (to allow initerrogations to keep up with arrivals) until capacity is reached. This option prioritizzes factors 1) and 2), alleviating the detainee population in CENTCOM AOR to the exttent possible, within the capacity capability at GTMO.

- @ Begin flow on 12 Feb with 34 detainees flown every other day until reaching Camp X-Ray unit capacity. This option prioritizes factor 3), giving IUSCINCSO the time to "catch-up" on the interrogations on detainees currently held at GTMO.

RECOMMENDATION: Begin flow to facilitate arrival at GTMO no earlier than 6 Feb. Direct USCINCCENT to ensure detainees that pose the least threat; are not deemed criminal, and have minimal intelligence potential be held and flowed last to GTMO.
