Step 1: Verify you have a DoD365 Account with Certificates.

To access CUI DoW issuances, you must first have an active DoD365 account with valid security certificates. If you do not have a DoD365 account, contact your local IT support to have one created before proceeding to Step 2.

Step 2: Access the DoD365-Joint Guest Request Package.

Navigate directly to the permissions page by using this link: Guest Request
Once on the page, follow the prompts to submit your request.

- Select "DOD365-J DoD Guest" under Access Packages.
- Click Request.
- Click Accept when prompted for permission.

You will receive an email once permissions have been granted. It may take up to 24 hours for your access to be approved. Once approved, you can access CUI DoW issuances through the Directives Division website.

TROUBLESHOOTING TIP:
If you receive an error after your request is approved, try clearing your browser's cache and restarting your computer before attempting to access the site again.
