ENCLOSURE 2INSTRUCTIONS FOR CREATING OFFENSE INFORMATION

1. OFFENSE CODES – GENERAL. Offense codes are divided into four basic components. The applicable codes for these fields are provided in the Appendix to this enclosure.

a. Offense Statutory Basis. The offense statutory basis indicates the source of the statute violated; i.e., the statutory basis of the offense that, in turn, creates the jurisdiction involved. Federal codes other than those in Chapter 47 of title 10, United States Code (U.S.C.) (also known and hereafter referred to as “The Uniform Code of Military Justice” (UCMJ)) (Reference (f)) should include the correct statute reference.

b. Offense Code. The offense code is the code for the offense itself. National Incident-Based Reporting System (NIBRS) codes are used for reporting local, State, Federal, and foreign offenses committed by civilians. Standard offense codes were developed for reporting UCMJ codes.

c. Offense Result. The offense result indicates whether the offense was attempted or completed.

d. Involvement. This code indicates the level of involvement of the person committing the offense. The involvement component applies only when the offense is associated with a person.

2. UCMJ CODING. Table 1 provides an example of how to report a UCMJ code using the four general offense codes in the Appendix. The example reports an attempted crime involving an arrestee who was an accessory.

Table 1. Sample UCMJ Coding

COMPONENT and CODE	CODE VALUES
Offense Statutory Basis Code = A	= UCMJ
Offense Code = 112AD2	= Offense Description: Distribution of Schedule IV or V Drugs
Offense Result = A	= Offense Attempted
Involvement = A	= Arrestee was an Accessory

3. LOCAL, STATE, FEDERAL, AND FOREIGN CODING. Table 2 provides an example of how to report a local, State, Federal (other than UCMJ), or foreign code using the four general Offense Codes in the Appendix. The example reports a completed crime in the Commonwealth of Virginia involving the primary suspect and the Statutory Basis is Virginia State Code 18.2-90.

Table 2. Sample Local, State, Federal, and Foreign Coding

COMPONENT and CODE	CODE VALUES
Offense Statutory Basis Code = C	= State
Offense Code = 220	= Breaking and Entering (B&E). (NIBRS code 220 is the best translation of Virginia State Code 18.2-90.)
Offense Result = C	= Completed
Involvement = P	= Arrestee was the Principal Offender

4. REPORTING SUICIDE. Table 3 provides an example of how to report a suicide using the special Offense Code for suicide, "0000A6," and the other three general Offense Codes in the Appendix. The Offense Statutory Basis Code is "B," "Non-Criminal Fatality (High Interest);" the Offense Result should reflect whether the suicide was attempted or completed; and the Involvement is "P," "Principal Offender."

Table 3. Sample Suicide Coding

COMPONENT and CODE	CODE VALUES
Offense Statutory Basis Code = B	= Non-Criminal Fatality (High Interest)
Offense Code = 0000A6	= Suicide
Offense Result = C	= Completed
Involvement = P	= Principal Offender

APPENDIX TO ENCLOSURE 2GENERAL OFFENSE CODES

Tables 4, 5, and 6 provide the offense statutory basis, offense results, and involvement codes. Tables 7 and 8 provide the offense codes. Table 7 is sorted by offense description. Table 8 is sorted by UCMJ code. (Both Tables 7 and 8 include offenses pursuant to References (g) through (o).) For the “Group” codes in the fourth columns of Tables 7 and 8, see Table 9.

ENCLOSURE 3DATA ELEMENT DICTIONARY

The numbers listed in this dictionary are the actual data element numbers (not paragraph numbers). They correspond to the column, “FIELD NUM” in Tables 1 through 8 to Volume 1 of this Manual. The fields in Table 10 are assigned to all segments and are essential to the construction of the database. For the DIBRS field recode conditions and possible recode values, U.S. State codes, property description codes, and Federal Bureau of Prisons facility codes referred to in Table 10, see the Appendix to this enclosure.

Table 10. Data Element Dictionary

1. <u>FEDERAL BUREAU OF INVESTIGATION (FBI) LOCATION NUMBER – 9 CHARACTERS</u>					
a. The FBI Location Number, also known as the Originating Agency Identifier (ORI) Number, must be included in each Incident Report Segment. The FBI Location Number must be left justified. The first seven positions identify the locale of the incident. Enter the first 7 characters of the FBI Location Number of the city or county law enforcement agency that most specifically describes the incident’s location. The use of the local law enforcement FBI Location Numbers to identify the locales of criminal incidents and arrests will greatly facilitate merging Federal, State, and local data into comprehensive nationwide statistics. The DoD Component shall then identify itself by entering a two-character Federal Identifier (FID) into the last two character positions. The FID codes currently assigned are:					
DA	U.S. Air Force	DK	Defense Criminal Investigative Service	DS	Air Force Security Police
DB	Marine Corps Military Police	DL	Defense Logistics Agency	DT	Navy Law Enforcement
DC	Army Criminal Investigation Command (recode to DD when reporting to NIBRS)	DM	Army Military Police	DV	Marine Corps Criminal Investigation Division
DE	U.S. Marine Corps	DN	Navy Commander Action	DZ	Department of Defense
DF	Marine Corps Commander Action	DO	Air Force Office of Special Investigations	YC	U.S. Coast Guard
DG	Inspector General’s Office	DP	Defense Protective Service	YE	Coast Guard Law Enforcement
DI	Naval Criminal Investigative Service	DR	U.S. Army	YF	Coast Guard Criminal Investigations
DJ	Navy Criminal Investigative Division				

Table 10. Data Element Dictionary, Continued

<b>1. FEDERAL BUREAU OF INVESTIGATION (FBI) LOCATION NUMBER – 9 CHARACTERS, Continued</b>			
b. Only the FBI Criminal Justice Information Services (CJIS) can assign new ORI numbers. To get a new ORI for statistical reporting purposes, the submitting agency must vet it through its respective CJIS System Officer (CSO) first. The agency must provide the CSO the name, phone number, mailing and e-mail addresses then the CSO will forward the request to the FBI CJIS. Overseas locations should be identified by the two-position Country Code (Federal Information Processing Standards Publication 10-4 (Reference (p))), followed by the five-position Air, Army, or Fleet Post Office, followed by the two-position FID. The DMDC File Manager should be notified if the DoD Components find it necessary to deviate from this convention.			
<b>2. INCIDENT NUMBER – 12 CHARACTERS.</b> This is the number assigned by your agency to each Incident Report to identify it uniquely; e.g., the Originating Agency Case Number. The number is 12 characters in length. The Incident Number must be included in each segment of the Incident Report. The number is composed of 2 digits for year, one digit for Military Service Code (Army used “W” for Unit Identification Code (UIC) designation), five digits for unit, and four digits for a sequential number assigned by the originating agency (e.g., 95W4H7AA1234). This pattern is recommended but not required as long as the Incident Number submitted by the agency allows unique identification. The incident number must be present and left-justified; it cannot have embedded blanks between the first and last character; and it must be a unique number: no two incidents can have the same incident number.			
<b>3. SEGMENT TYPE – 1 CHARACTER.</b> This letter is assigned to the segment to facilitate database construction. It identifies the segment (e.g., offender, victim, property) being submitted. The Segment Type codes are:			
Administrative Segment	M	Offender/Arrestee Segment	A
Offense Segment	F	Commander Report Segment	D
Property Segment	P	Results of Trial Segment	T
Victim Segment	V	Corrections Segment	R
<b>4. REPORT TYPE – 1 CHARACTER.</b> This code is assigned to the segment to facilitate database construction. “A” is used to identify the initial submission of any segment. “M” is used when a modification is being made to an existing segment. “D” is used when it is necessary to delete a segment.			
<b>5. REPORTABLE TO NIBRS – 1 CHARACTER</b>			
a. This code is assigned to the incident as a quality control check for data that need to be reported to the FBI. Non-criminal fatalities such as suicide are not reportable to NIBRS; however, these high interest incidents are tracked at the DoD level and should be reported. Allowable codes are Y = Yes and N=No.			

Table 10. Data Element Dictionary, Continued

5. <u>REPORTABLE TO NIBRS – 1 CHARACTER</u> , Continued			
b. “No” should be entered in Reportable to NIBRS for this category of incidents. Incidents referred to local, State, or Federal agencies not responsible for reporting pursuant to Reference (a) should also be flagged “No.” These agencies are responsible under NIBRS guidance to report the incident. Incidents referred to foreign authorities are not NIBRS-reportable incidents, but are of interest to the Department of Defense. An incident that is reportable to NIBRS, as determined by the reporting agency, must comply with the requirements specified in Volumes 1 to 4 of FBI handbook (Reference (q)).			
c. The list of DIBRS field recodes at Table 11 shows DIBRS fields that are always required and those that may be conditionally required depending on the circumstances of the incident. For example, Field 5 (Reportable to NIBRS) is always required, while Field 28 (Type Weapon/Force Used) is required when certain offenses (e.g., aggravated assault) are reported. Additionally, the list details the conditions and the recode values that are possible.			
d. All DIBRS incident data shall be stored in the DIBRS database with the agency's originally provided data content. However, NIBRS-bound records may have data elements recoded. Fields that are not provided to DIBRS shall be recoded where necessary to comply with NIBRS requirements ONLY on the OUTPUT process if Field 5 is “Y,” and only in accordance with the list of field recodes. The data recode shall not be stored in DIBRS.			
e. DIBRS does not collect or report NIBRS Field 30, Resident Status.			
6. <u>INCIDENT/REPORT OCCURRED DATE CATEGORY – 1 CHARACTER</u> . The incident date and time should be recorded IF AVAILABLE. Otherwise use the report date and leave time blank. This code is used to indicate which has been provided. Allowable codes are I = Incident and R = Report.			
7. <u>INCIDENT/REPORT OCCURRED BEGIN DATE (YYYYMMDD) – 8 CHARACTERS</u> . This data element is used to enter the year, month, day that the incident occurred or started, or the beginning of the time period in which it occurred (as appropriate).			
8. <u>INCIDENT/REPORT OCCURRED BEGIN TIME (24 HOUR) – 4 NUMBERS</u>			
9. <u>INCIDENT/REPORT OCCURRED END DATE (YYYYMMDD) – 8 CHARACTERS</u> . This data element is used to enter the year, month, day when the incident ended or the end of the time period in which it occurred.			
10. <u>INCIDENT/REPORT OCCURRED END TIME (24 HOUR) – 4 NUMBERS</u>			
11. <u>INCIDENT CLEARANCE REASON – 1 CHARACTER</u>			
a. This data element is used to indicate why the incident was cleared. Allowable codes and incident clearance reasons are:			
U	Unfounded	C	Extradition Declined
X	Arrest or Arrest Equivalent	D	Victim Refused to Cooperate
A	Death of Offender	E	Juvenile, No Custody
B	Prosecution Declined		

Table 10. Data Element Dictionary, Continued

11. <u>INCIDENT CLEARANCE REASON – 1 CHARACTER</u> , Continued			
b. Use code “U” if, based on the investigative findings, the initial allegations of the incident could not be substantiated. If an agency receives a complaint that is determined through investigation to be false or baseless, in other words no crime occurred, it also will be coded “U” unfounded. The agencies must enter into this incident all known offenses, including those subsequently determined to be unfounded. The recovery of stolen property, the low value of stolen property, the refusal of the victim to cooperate with prosecution, or the failure to make an arrest DOES NOT unfind a legitimate offense			
c. If the incident is not cleared by “U” or “X,” the incident is considered to be exceptionally cleared. In a multiple-offense incident, the exceptional clearance of one offense clears the entire incident. An incident cannot be cleared exceptionally if it was previously or at the same time cleared by an arrest; i.e., if an Arrestee Segment was or is being submitted. In order to clear an offense by exceptional means, all of these four conditions must be met: (1) The investigation must have clearly and definitely established the identity of at least one offender. (2) Sufficient probable cause must have been developed to support the arrest, charging, and prosecution of the offender. (3) The exact location of the offender must be known so that an arrest could be made. (4) There must			
d. If blank, this data element shall be recoded to “Not Applicable.” If Exceptional Clearance Date is coded, Incident Clearance Reason should contain the values A-E.			
12. <u>EXCEPTIONAL CLEARANCE DATE (YYYYMMDD) – 8 CHARACTERS</u> . If an incident was cleared by exceptional means, the year, month, and day when the incident was cleared is to be entered. If Incident Clearance Reason contains the values A-E, this field is required. The clearance date cannot be earlier than the incident date.			
13. <u>NUMBER OF VICTIMS NOTIFIED – 3 CHARACTERS</u> . Enter the number (000-999) of victims notified of their rights using DD Form 2701.			
14. <u>NUMBER OF WITNESSES NOTIFIED – 3 CHARACTERS</u> . Enter the number (000-999) of witnesses notified of their rights using DD Form 2701.			
15. <u>OFFENSE STATUTORY BASIS – 1 CHARACTER</u>			
a. Allowable codes and statutory basis are:			
A	UCMJ	D	Local
B	Non-Criminal Fatality (High Interest)	E	Foreign
C	State	F	Federal, Non-UCMJ
b. This data element indicates the source of the statute violated; i.e., the statutory basis of the offense and the jurisdiction involved. (See paragraph 1.a. of Enclosure 2 and Table 4.) “Federal” includes any Federal statute other than the UCMJ.			

Table 10. Data Element Dictionary, Continued

<p>16. <u>OFFENSE IDENTIFIER – 6 CHARACTERS</u>. This data element is the offense code and was created to clearly indicate the nature of the offense reported. (See paragraph 1.b. of Enclosure 2 and Tables 7 and 8. ) In the case of violations of the UCMJ, the numbers listed correspond closely with the punitive article of the UCMJ. For instance, Offense Code entry 112AC2 clearly indicates a violation of Article 112A of the UCMJ.</p>
<p>17. <u>OFFENSE RESULT – 1 CHARACTER</u></p> <p>a. Allowable codes are A = Attempted and C = Completed.</p> <p>b. This data element indicates whether the offense was completed or merely attempted. If there was more than one occurrence of the same offense within an incident and one was completed, then completed should be entered. (See paragraph 1.c. of Enclosure 2 and Table 5.) If Attempted is coded, no property loss segment should be associated.</p>
<p>18. <u>INVOLVEMENT – 1 CHARACTER</u></p> <p>a. Allowable codes are P = Principal, A = Accessory, C = Conspiracy, S = Solicit.</p> <p>b. This data element indicates the level of participation in the offense. (See paragraph 1.d. of Enclosure 2 and Table 6.)</p>
<p>19. <u>OFFENDER SUSPECTED OF USING ALCOHOL – 1 CHARACTER</u></p> <p>a. Allowable codes are Y = Yes and N = No.</p> <p>b. This data element is to be used to indicate whether any of the offenders in the incident were suspected of consuming alcohol. For example, witnesses to an assault reported that the victim and offender were in a bar drinking beer when an argument broke out and the offender attacked the victim with a knife. If blank, this element shall be coded “No.”</p>
<p>20. <u>OFFENDER SUSPECTED OF USING DRUGS – 1 CHARACTER</u></p> <p>a. Allowable codes are Y = Yes and N = No.</p> <p>b. This data element is to be used to indicate whether any of the offenders in the incident were suspected of using drugs. For example, a medical supply warehouse was burglarized and large quantities of methadone, morphine, and valium were stolen. While drugs were the object of the crime, there was no indication that the offender used drugs or narcotics before or during the incident. “No” should be entered. If blank, this element shall be coded “No.”</p>
<p>21. <u>OFFENDER SUSPECTED OF USING COMPUTER EQUIPMENT – 1 CHARACTER</u></p> <p>a. Allowable codes are Y = Yes and N = No.</p> <p>b. This data element is to be used to indicate whether any of the offenders in the incident were suspected of using computer equipment to perpetrate the crime. Larceny of computer equipment should not be included in this element. If blank, this element shall be coded “No.”</p>

b. This data element is to be used to report the type of location/premises where each offense took place. Only one location can be entered for each offense.			
<b>23. ON MILITARY SERVICE INSTALLATION – 1 CHARACTER</b>			
a. Allowable codes are Y = Yes and N = No.			
b. “Yes” should be entered into this data element if the offense occurred on DoD or Coast Guard property.			
<b>24. U.S. STATE OR POSSESSION – 2 CHARACTERS.</b> Allowable codes are in Enclosure 4 of this Volume. Enter the U.S. State Codes in Table 11 for the location of the offense. If the offense occurred in a location not included in the State Codes, the field should be null.			

Table 10. Data Element Dictionary, Continued

## 25. NUMBER OF PREMISES ENTERED – 2 CHARACTERS

- a. This data element is to be used only if the crime is Burglary/B&E and the hotel rule is applicable. In such cases, the number (01-99) of structures (premises) entered is to be reported.
- b. In the Summary Reporting System, the hotel rule is applied to only temporary lodgings. It requires that if a number of dwelling units under a single manager are burglarized and the offenses are most likely to be reported to the police by the manager rather than the individual tenants, the burglary should be scored as one offense. The hotel rule may include military living quarters with multiple dwelling units. For example, if six Bachelor Enlisted Quarters are entered at the same time, it should be reported as one incident.
- c. The hotel rule has been expanded to include rental storage facilities; i.e., Mini-Storage and Self-Storage buildings. Therefore, this data element is to be used if the offense is Burglary/B&E and either “14” = Hotel/Motel/Etc. or “19” = Rental Storage Facility is entered into Location Type. The total number (up to 99) of individual rooms, units, suites, storage compartments, etc., entered is to be reported in this data element.

## 26. METHOD OF ENTRY – 1 CHARACTER

- a. Allowable codes are F= Forced and N= Not Forced.
- b. This data element is to be used only if the offense is Burglary/B&E. It is for reporting whether “Force” or “No Force” was used by the burglar(s) to enter the structure. A forced entry is where force of any degree, or a mechanical contrivance of any kind (including a passkey or skeleton key), was used to unlawfully enter a building or other structure. An unforced entry is one where the unlawful entry was achieved without force through an unlocked door or window. If both forced and unforced entries were involved in the crime, the entry should be reported as having been accomplished through “Force.”

## 27. TYPE OF CRIMINAL ACTIVITY – 1 CHARACTER; can occur up to 3 times in each Offense Segment.

- a. Allowable codes are:

B	Buying/Receiving	O	Operating/Promoting/Assisting	G	Gangs
C	Cultivating/Manufacturing	T	Transporting/Importing	J	Juvenile Gang
D	Distributing/Selling	U	Using/Consuming	N	None/Unknown (No known gang affiliation)
E	Exploiting Children	P	Possessing/Concealing		

- b. This data element is to be used to provide additional information on the criminal activity of the offender(s) in the incidents involving:
- (1) Counterfeiting/Forgery
  - (2) Drugs/Narcotics
  - (3) Drug Equipment
  - (4) Gambling Equipment
  - (5) Pornography/Obscene Material
  - (6) Stolen Property
  - (7) Weapons
- c. Up to three types of activity may be entered for each of the offenses listed in data element 27.

Table 10. Data Element Dictionary, Continued

28. TYPE WEAPON/FORCE USED – 2 CHARACTERS. Can occur up to 3 times in each Offense Segment.

a. The allowable codes are:

11	Firearm (type not stated)	30	Blunt Object	70	Narcotics/Drugs
12	Handgun	35	Motor Vehicle	85	Asphyxiation
13	Rifle	40	Personal Weapons	90	Other
14	Shotgun	50	Poison	95	Unknown
15	Other Fire Arms	60	Explosives	99	None
20	Knife/Cutting Instrument	65	Fire/Incendiary		

b. This data element is to be used to enter the type(s) of weapon(s) or force used by the offender(s) in committing these offenses:

Murder and Non-Negligent Manslaughter	Forcible Sodomy	Simple Assault
Negligent Homicide	Sexual Assault with an Object	Extortion/Blackmail
Justifiable Homicide	Forcible Fondling	Weapon Law Violations
Kidnapping/Abduction	Robbery	Suicide
Forcible Rape	Aggravated Assault	Injuring/Killing an Unborn Child

c. Up to three types of weapons/force may be entered for each of the offenses listed in data element 28.

29. GUN CATEGORY – 1 CHARACTER. Can occur up to 3 times in each Offense Segment.

a. Allowable codes are A = Fully Automatic, M = Manual, S = Semi-Automatic

b. This element is used to report whether the weapon was an “automatic,” “manual,” or “semiautomatic” firearm.

30. BIAS MOTIVATION – 2 CHARACTERS.

a. Allowable codes are:

AV	Anti-White	AS	Anti-Multi-Religious Group
AH	Anti-Black	AA	Anti-Agnostic
AD	Anti-Arab	AW	Anti-Homosexual
AM	Anti-Hispanic	AQ	Anti-Male Homosexual
AC	Anti-American Indian	AK	Anti-Female Homosexual
AB	Anti-Alaskan	AL	Anti-Heterosexual
AE	Anti-Asian	AG	Anti-Bisexual

30. BIAS MOTIVATION – 2 CHARACTERS, Continued

c. The aforementioned factors are not all-inclusive of the types of objective facts that evidence biased motivation. Reporting agencies must examine each case for facts that clearly evidence that the offender's bias motivated him or her to commit the crime. Agencies must be alert to misleading facts, e.g., the offender used an epithet to refer to the victim's race, but the offender and the victim were of the same race. Agencies must be alert to evidence left by the offenders, which is meant to give the false impression that the incident was motivated by bias. Even if the offender was mistaken in the belief that the victim was a member of a racial, religious, ethnic/national origin, sexual orientation, or disability group, the offense is still a hate crime as long as the offender was motivated by bias against that group. For example, a middle-aged, non-gay man walking by a bar frequented by gays was attacked by six teenagers who mistakenly believed the victim had left the bar and was gay. Although the offenders were wrong on both counts, the offense is a hate crime because it was motivated by the offenders' anti-gay bias. If, after an initial incident report was submitted, a contrary finding regarding bias occurs, DIBRS record must be updated with the new finding. Further examples are:

(1) While driving through a predominantly Mexican-American neighborhood, a black male stopped his car to repair a flat tire. A group of Mexican-Americans leaving a bar across the street accosted the driver and attacked him with bottles and clubs. During the attack, the offenders called the victim by a well-known and recognized epithet used against blacks and told him that blacks were not welcome in the neighborhood. This incident would be reported as Anti-Black because blacks were not welcome in the neighborhood. This incident would be reported as Anti-Black because the victim and offenders are of different races, the offenders used a racial epithet, and the facts reveal no other reason for the attack than the stated one, i.e., to keep blacks out of the neighborhood.

(2) A white juvenile male snatched a Jewish woman's purse, and in doing so, knocked her down and called her by a well-known and recognized epithet used against Jews. The offender's identity is not known. Although the offender used an epithet for Jews, it is not known whether he belongs to another religious group or whether his motive was anything more than robbery. Because the facts are ambiguous, agencies should not report this incident as bias motivated.

(3) Overnight, unknown persons broke into a synagogue and destroyed several religious objects. The perpetrators left a large swastika drawn on the door and wrote "Death to Jews" on the wall. Although valuable items were present, none was stolen. Report this incident as Anti-Jewish because the offender destroyed religious objects, left anti-Semitic words and graffiti behind, and theft did not appear to be the motive for the burglary.

(4) A 29-year-old Chinese-American male was attacked by a 51-year-old white male wielding a tire iron. The victim suffered severe lacerations and a broken arm. The incident took place in a parking lot next to a bar. Investigation revealed that the offender and victim had previously exchanged racial insults in the bar, the offender having initiated the exchange by calling the victim by a well-known and recognized epithet used against the Japanese and complaining that the Japanese were taking away jobs from Americans. Anti-Asian/Pacific Islander offense would be reported based on the difference in race of the victim and offender, the exchange of racial insults, and the absence of other reasons for attack.

30. <u>BIAS MOTIVATION – 2 CHARACTERS</u> , Continued			
<p>(5) An adult white male was approached by four white teenagers who requested money for the bus. When he refused, one of the youths said to the others, “Let's teach this (epithet for a gay person) a lesson.” The victim was punched in the face, knocked to the ground, kicked several times, and robbed of his wristwatch, ring, and wallet. When he reported the crime, the victim advised he did not know the offenders and that he was not gay. The facts are ambiguous. Although an epithet for a gay person was used by one of the offenders, the victim was not gay, such epithets are sometimes used as general insults regardless of the target person's sexual orientation, and in this case the offenders' motivation appeared to be limited to obtaining money from the victim. Therefore, the incident would not be designated bias motivated.</p> <p>(6) A small neighborhood bar frequented by gays burned down after being closed for the night. Investigation revealed that the fire was deliberately set, the fact that the bar was frequented by gays may have been coincidental. Therefore, the incident is not reported as bias motivated. Two weeks later, three white adult males were arrested on a tip from an informant. They admitted burning down the bar, saying they did it to keep gays out of the neighborhood. As a result, this incident should now be reported as a bias crime.</p> <p>(7) Six black men assaulted and seriously injured a white man and his Asian male friend as they were walking through a residential neighborhood. Witnesses said that the victims were attacked because they were trespassing in a “black” neighborhood. An Anti-Multi-Racial Group bias incident should be reported because the victim and offenders were of different races and witnesses reported that the victims were attacked because they were not black.</p> <p>(8) Overnight, an auditorium, which was being used by representatives of several religious denominations to hold an ecumenical conference, was vandalized by unknown subjects. Extensive damage was caused and statements, such as “There is but one true religion” and “Down with the nonbelievers,” were spray painted onto the walls. An Anti-Multi-Religious Group incident should be reported because the offenders clearly evidenced their hostility against a group representing more than one religion.</p>

31. <u>PROPERTY LOSS BY – 1 CHARACTER</u> , Continued	
b. This data element is to be used to describe the type(s) of property loss, recovery, seizure, etc. that occurred in an incident. A separate Property Segment is to be submitted for each type of loss and Property Description combination when the incident involved one or more of these offenses:	
Kidnapping/Abduction	False Pretenses/Swindle/Confidence Game
Robbery	Credit Card/Automatic Teller Machine Fraud
Arson	Impersonation
Extortion/Blackmail	Welfare Fraud
Burglary/B&E	Wire Fraud
Pocket-Picking	Embezzlement

Theft From Coin-Operated Machine or Device	Drug Equipment Violations
Theft From Motor Vehicle	Betting/Wagering
Theft of Motor Vehicle Parts or Accessories	Operating/Promoting/Assisting Gambling
All Other Larceny	Gambling Equipment Violations
Motor Vehicle Theft	Sports Tampering
Counterfeiting/Forgery	Bribery
c. The types of offenses in the incident (e.g., Arson, Bribery, Burglary/B&E, counterfeiting/Forgery, Larceny/Theft) determine which type(s) of loss/etc. and data elements apply.	
32. <u>PROPERTY DESCRIPTION – 2 CHARACTERS</u> . Can occur up to 10 times in each Property Segment.	
a. Allowable codes are in Table 12. This data element is to be used to enter descriptions of the property that was burned, counterfeited, destroyed/damaged/vandalized, etc., as a result of the incident. Each property description within a Property Loss By is an individual record.	
b. Up to 10 property descriptions can be entered for each Property Segment (i.e., each type of property loss/etc.) involved in the incident. If more than 10 types of property are involved, the 9 most valuable specifically codable types of property are to be entered and the remaining types of property are to be combined and entered as “77” = Grouped Items.	

Table 10. Data Element Dictionary, Continued

<p>33. <u>DATE RECOVERED (YYYYMMDD) – 8 CHARACTERS</u>. Can occur up to 10 times in each Property Segment. If previously stolen property is recovered, the year, month, day of its recovery is to be entered into this data element. Accordingly, this data element is to be used only if Recovered is entered into Data Element Type Property Loss/Etc. If there is more than one date of recovery for the same “Property Description,” enter the earliest date. If the recovery date is unknown, enter the date of the report.</p>
<p>34. <u>DATE RETURNED (YYYYMMDD) – 8 CHARACTERS</u>. Can occur up to 10 times in each Property Segment. When previously stolen property is returned to its owner, the year, month, day of its return is to be entered into this data element. Accordingly, this data element is to be used only if Recovered or Seized is entered into Data Element Property Loss/Etc.</p>
<p>35. <u>QUANTITY – 9 NUMBERS</u>. Can occur up to 10 times in each Property Segment. This data element is used to report the number (up to 999,999,999) of items of a specific property description. This field is null for property description codes Drugs/narcotics, Money, Negotiable Instruments, and Nonnegotiable Instruments.</p>
<p>36. <u>VALUE OF PROPERTY – 9 NUMBERS</u>. Can occur up to 10 times in each Property Segment.</p> <p>a. This data element is to be used to enter the total dollar value (up to \$999,999,999) of the property that was burned (includes damage caused in fighting the fire), counterfeited, destroyed/damaged/vandalized, recovered, seized, stolen, etc., as a result of the incident.</p> <p>b. The value should be reported in whole dollars. The value entered for each property description should be the total value of the property loss/etc. for all of the victims in the incident. If the value is unknown, enter one dollar (\$1.00), which means unknown; i.e., “1” = Unknown. These guidelines should be used to report the value of property:</p> <ol style="list-style-type: none"> <li>(1) Use fair market value for articles that are subject to depreciation because of wear and tear, age, or other factors that cause the value to decrease with use.</li> <li>(2) Use cost to the merchant (wholesale cost) of goods recovered, seized, stolen, dollar amount etc., from retail establishments, warehouses, etc. In other words, use the value representing the actual cash loss to the victim without any markup or profit added.</li> <li>(3) Use victim's valuation of items such as jewelry, watches, and other similar goods that decrease in value slightly or not at all with use or age.</li> <li>(4) Use replacement cost or actual cash cost to victim for new or almost new clothes, auto accessories, bicycles, etc.</li> <li>(5) When the victim obviously exaggerates the value of stolen/destroyed/damaged property for insurance or other purposes, common sense and good judgment shall dictate a fair market value to be placed on the stolen items by law enforcement.</li> <li>(6) For Government property, use fair market value for articles that are subject to depreciation. Use replacement cost for other types of property.</li> </ol> <p>c. In most instances, accept the victim's valuation. The theft of nonnegotiable instruments such as traveler's checks, personal checks, money orders, stocks, bonds, food stamps, etc. should be scored but no value recorded. Again, hair-splitting refinements are unnecessary. Negotiable instruments such as bonds payable to the bearer, etc. are valued at the current market price at the time of the theft, seizure, etc. Values should be rounded to the nearest whole dollar. Often the condition of the property is different at recovery than it was when stolen. The market value at the time of recovery should be used even though it is less than the value reported at the time of the theft. If the value has increased by the time the property is recovered, the recovery value should not exceed its value at the time it was stolen.</p>

36. <u>VALUE OF PROPERTY – 9 NUMBERS</u> , Continued. Can occur up to 10 times in each Property Segment.			
d. If drugs or narcotics were seized in a drug case, no value is to be entered into this data element, but the estimated quantity of the drugs/narcotics is to be reported. Therefore, when the offense is Drug/Narcotic Violations, “6” = Seized was entered into Property Loss/Etc., and “10” = Drugs/Narcotics was entered into Property Description, no value is to be entered into this data element and Drug Code, Drug Quantity, and Type Drug Measure are to be used instead. However, when drugs or narcotics are involved in other types of crime (e.g., they were stolen through burglary, robbery, theft, etc. or destroyed by arson) their value is to be entered into this data element and Drug Code, Drug Quantity, and Type Drug Measure are null.
