- 3- We ask for loan <sup>sufficient</sup> (specially the companies which have no balance) for the purposes of repairing mentenance and start up operating the production lines in our factories and buying raw materials to run off.

~~4- Release the frozen funds into international~~

~~Banks.~~

4- Release The Frozen Funds into The international Banks.

((In the Name of God, the compassionate, the Merciful))

Honorable Mr. Representative of (Orha) organization.

We the employees of the mixed industrial sector, which is joined to the ministry of industry and minerals, whose employees amount to ten thousand, forward to you our demands Requesting from your excellency to infrom those responsible to include us with all recent privileges given to government employees, the same as the ministry of industry and minerals employees, and that all acts and Instruction concerning them would include us in the future.

We here by include a summary concerning the mixed sector corporations.

1) These corporations were established to specialize in producing household equipments such as refrigerators, aircoolers, air-conditions, televisions, radio, tape recorder.... Etc.

2) The Governmental sector has a share between (50- 60%) of the total capital.

3) These corporations are runed by a board of directors consisting of nine members distributed as follows.

a) Three members are appointed by the ministry of industry and minerals.

b) Four members represent the private secotor selected by the private sector.

c) Two members are selected by the employees of the corporation through the labor union, which has been dissolved recently.

4) The government representatives in the board of directors have the greatest role in decision making, where they have the right of veto, where no decision could be passed if two government representatives don't agree.

5) All acts and decisions issuede by the ministry of Industry and minerals that concerns important issuse such as employment principles are mandatory to board of directors.

6) Most of the advanced technical and administrative personnel such as engineers, administrator, specialist, were employeed by the government through Ministry of planning, in the same procedure for other government employees.

The employees of these corporations are included with the government pension law.

7) It is worth to mention that the goods stored in these corporations were mostly looted due to the fact that they are government goods.

From what we have noted, it is clear that the government has a big role in the administration and supervision of these corporations.

Finally except our greatest thanks and respect.

Employees of the mixed industrial corporations sector.

**Subject:** FW: Privatisation of Iraqi Seed Production Company

Dear (b)(6)

I am forwarding this series of emails and the attachment to you after a conversation with David Oliver on this matter. To say that I am amazed at how long it has taken to resolve this matter would be an understatement. I have been pushing for some resolution for nearly 5 months and am embarrassed and tired of making excuses to the people who work in this company (all 600 of them) for our system, which just does not seem capable of making decisions on this matter.

I look forward to you providing a solution to this issue.

Regards

Roger Hartley

**Subject:** Privatisation of Iraqi Seed Production Company

Dear Tony

As discussed with Trevor, please find attached a letter to (b)(6) regarding the mixed company, Iraqi Seed Production Company, requesting his approval to cancel its debt with the Ministry of Finance and release its assets, currently frozen in accounts in the Rashid bank.

As explained, this company cannot repay funds borrowed to purchase inventory, which was subsequently looted. The letter confirms that the Iraqi Seeds Company will be cut loose from the government as a result of these measures.

This letter, as requested, is to be signed by the interim Minister of Agriculture, the Chief Executive of Iraqi Seeds and Ambassador Trevor Flugge.

In discussion with the Minister on this issue, he wished to be reassured that the way all assets (including buildings etc) would be handled in the full privatisation, would be consistent with how they will be dealt with by other ministries and that this would stand up

## **CONTACT REPORT**

**Date of Contact:** 15 MAY 03

**Organization:** Al-Hilal Industries Company vic. MB51937837

**POC:** Adnan Ibrahim – Director General, Adham Thejeel – Security Director

**Description of the Facility:** Large industrial complex that produces air cooling and liquid cooling systems. Has experienced no looting. It is a mixed sector company, where the state owns 51% of the shares, and Iraqi citizens own the remaining 49%. There is a board of directors, comprised of the private share holders, and this board is under the leadership of a central board that regulates boards of directors. Thus the government had a great deal of control over the facility. The facility employs approximately 700 employees. Currently 220 men comprise the 24 hour guard shifts.

### **Issues:**

1. Lack of industrial power
2. Back salaries

**Requests:** None
