1 copy to Mr. Grew

Serial No: 03-011

July 8, 2003

Senior Ministry Advisor
Coalition Provisional Authority

Dear Senior Advisor:

Enclosed is the budget for your ministry for the remainder of Fiscal Year 2003 and instructions for accessing and expending amounts available in July.

Authorized funds will be made available after the following steps have been completed:

1. Each Ministry must send a single account manager to the Ministry of Finance Computer Center with a written estimate of the amounts required by budget section for each Department in Baghdad and the Governorates (two copies). Please use the attached sheet to display the information. Only twenty percent of the amount authorized for the remainder of 2003 will be available in July.

(Please note that the distribution of funding by Governorate that several advisors already submitted is sufficient for moving currency only. A more detailed accounting is required before funds can be made available.)

2. In those instances where a Ministry has not yet submitted a budget request to the Ministry of Finance, the account manager must bring a copy for review. Appropriate officials at the Ministry of Finance have the opportunity through July 31, 2003 to propose changes to the budget that do not increase total outlays based on these submissions and other information. Changes must be approved by the Ministry of Finance Senior Advisor and will be published.

The Ministry of Finance will issue a letter to the appropriate financial institutions making funds available to your Ministry. Your representative should return to the Ministry of Finance to obtain a signed copy of this letter and the spending plan. Ministry officials are encouraged to bring a copy of these documents when attempting to withdraw funds.

Funds shall be spent for authorized purposes only and in a manner consistent with the enclosed instructions and, where consistent, existing Iraqi accounting and budget law. These statutes require in part that only the Minister of Finance can transfer funds between budget sections. Requests must be submitted in writing to the Minister of Finance.

Senior Advisor to the Ministry of Finance
Coalition Provisional Authority

Date Request Returned to Requester/Submitted to Comptroller:

Disposition (including expenditure authorized):

Description of Program or Goods To Be Purchased – Please See Above Instructions

Purpose: To provide the basic security equipment vital to establishing safe and secure prisons and detention centers. Currently, MOJ has established the first Iraqi operated detention center, Al Taserat, and is in the process of establishing or trying to open five more correctional facilities within the next 60 days. The security equipment requested in the attached document will provide the vital security equipment needed to operate these facilities safely and securely.

Justification: The Prison Department, Ministry of Justice, has been given the mission of establishing pre-trial detention centers and post-trial prisons throughout the country of Iraq as soon as possible in order to provide secure and safe jails and prisons to house detainees and inmates required to support the reactivated criminal justice system for Iraq. The security equipment requested will provide the security equipment necessary to accomplish this mission.

Coordination:

This project was coordinated through the 800th MP BDE, and Judge Donald Campbell, Senior Advisor, Ministry of Justice, the Prison Department, Ministry of Justice.

Goods and Commodities:

All attempts to find and purchase the required security equipment on the Iraqi economy has met with negative results. Working through the S4, 800th MP Brigade, we have been able to locate the required security equipment in other foreign countries. The Brigade has been purchasing this type of equipment for the operation of EPW camps within Iraq for the past few months.

Project Implementation:

This project will be implemented by the Prison Department, Ministry of Justice, and the 800th MP Brigade which will provide security and supervision at each of the prison and detention centers as they are placed into operation by our Iraqi counterparts.

Budget settlement – Ministry of Justice

This note follows on from my email of 3rd July. The budget has now been settled, and this note sets out what the Ministry of Justice has been given, together with the terms and conditions which **apply** to spending it. We have been asked to advise Ministry officials to draw down 20% of it, and allocate it across governorates. Furthermore, we are being urged (in no uncertain terms) to start spending! My impression is that this is more **easily** said than done, as the process for getting the money from being a **twinkle** in Ambassador Bremer's eye, to buying goods and services is **long, complicated**, and seems to have several versions.

The main point to note is that if you want to spend money, you need to do it through your local MoJ officials.

Settlement

Courts etc

We have been given **\$5.8m/8.7b ID** for our operating expenses (excluding salaries) for the 6 month period July – December 2003, and **\$25.7m/38.6b ID** for capital investment, a total of **\$31.5m/47.25b ID**. This is to cover the 2002 Ministry of Justice responsibilities (ie courts, deeds registries, notary public offices, minor welfare offices, MoJ HQ and the Judicial College). Inevitably, some conditions apply. We also have to earn **\$12m/18b ID**. (The exchange rate has been set by the Ministry of Finance at a rather heroic 1,500 ID per \$.)

Baseline operating costs

The bad news is that this year we only have \$289k/213m ID to spend on the same operating costs that we incurred last year (excluding salaries). Last year's operating costs were \$1.02m/1.53b ID (again excluding salaries), so for the period July to December, we have at most only 57% of what we need. In managing this **shortfall**, it might be helpful to know that last year, 40% of the Ministry's spend was on printing, 17% on building maintenance and 14% on rent.

MoJ income last year was \$26.6m/40b ID. 40% of it was earned through the deeds registries, 25% through the courts and notary public offices, and 5% through the MoJ main office. \$12m is 45% of last year's income. I don't know how the **affordability** (or otherwise) of printing affects the **ability** to earn money.

The good news is that we have a huge sum of money to spend on four new programmes, as follows.

Rebuilding and refurbishment

We have \$22.5m capital to spend this year. ("Capital" here includes furniture.) We have also been given some new operating costs money for security guards to protect this investment, and there is a cap on what we can pay them. For every 100 security guards, we are **allowed** to spend up to \$22k on their salaries (ie \$37 per month per guard).

IT/communications infrastructure

We have received up to \$2.7m for capital investment in an IT/communications system, together with \$453 new operating costs. I understand this would probably best be spent on a satellite 'phone system.

Criminal defence fund

We have received **\$4.6m** for a criminal defence fund. Again, this is shown as a new operating cost. The intention is that an indigent defendant get a court appointed (and funded) lawyer for investigations that are likely to proceed to trial, and also for the trial itself. The lawyer will be paid \$2 per hour, with a cap on what he or she can earn in each case. The cap is

- \$50 for each misdemeanour investigation and each misdemeanour trial (ie \$100 for each case that proceeds to trial),
- \$200 for each felony investigation and each felony trial (ie \$400 for each case that proceeds to trial), and
- \$100 for each juvenile investigation and each juvenile trial (ie \$200 for each case that proceeds to trial).

One of the assumptions used to estimate the cost of this policy is that 20% more investigations than trials receive public funding. The definition of "indigent" has not yet been settled.

Real estate claims reconciliation

We have been given **\$0.5m** to cover expenses relating to the cost of sorting out legal claims over property seized by the previous regime

Prisons

We have been given a further **\$26.6m/39.8b ID** to reconstruct and refurbish the prisons over the same period. **\$5.8m/ 8.7b ID** is for operating costs, leaving **\$20.7m/31.1b ID** for capital spend.

\$19.6m/29.3 ID of this is for 14 specific projects. This includes all the operating and refurbishment costs. The breakdown by governorate is as follows.

- Baghdad has been allocated **\$6.33m/9.49b ID** capital and **\$3.54m/5.30b ID** operating costs,
- Basrah has been allocated **\$1.16m/1.74b ID** capital and **\$0.56m/0.84b ID** operating costs,
- Mosul has been allocated **\$5.57m/8.35b ID** capital and **\$1.43m/2.14b ID** operating costs,
- A -Hillah has been allocated **\$0.68m/1.02b ID** capital and **\$0.73m/1.10b ID** operating costs,

a total of **\$13.73m** capital and **\$6.25m** operating costs. (Again, "capital" here includes furniture.)

The remaining **\$7m/10.5b ID** is for reconstruction and refurbishment of buildings we don't yet know about, and would very much appreciate your help in identifying. We hope to end up with a prison in each governorate.

Process

Baghdad

The Ministry of Finance has opened two accounts (one \$, one dinar) for the MoJ in the same bank that we use to pay salaries. They will transfer however much the Ministry of Justice asks them to into the dollar account. This sum should cover all MoJ expenditure in Baghdad.

Governorates

Again, the Ministry of Finance has opened two bank accounts (one \$, one dinar) in each governorate (All ministries in each governorate will use the same bank.) The Ministry of Justice needs to advise the Ministry of Finance of the estimated funding needs for each governorate.

I have discussed how to allocate our settlement across governorates with the Ministry of Justice, and the accountability arrangements for spending it with the Ministry of Finance advisors

Accountability

If I understand correctly, the existing Iraqi process for formulating, executing and enforcing the budget will be used. This process comprises the following steps:

- There is a controller for each Department in each governorate that approves spending proposals.
- Once approved, a representative from the department should present his or her request to the regional Ministry of Finance office (though this last step may be different from previous practice).
- If the Ministry of Finance official approves the expenditure, he or she will provide the MoJ representative with a letter authorizing a withdrawal from the treasury/Ministry of Finance account at the nominated bank.

There is a set of statutes regulating the process which may be complemented by additional department specific rules (for example, with caps on how much can be spent without referring to any other authority).

One of the implications of using the Iraqi process is that CPA has no direct control over how this money is allocated or spent. It must all be done through the local Ministry officials.

Allocation

The Ministry of Finance advisors have asked that 20% of the MoJ funding be allocated across the governorates immediately. They will then move that money into each of the relevant banks. This should put your Iraqi counterparts in a position to start spending using the same procedures they did last year and (if I understand my ministry counterpart correctly), every year since 1995.

Baseline operating costs

Last time I discussed this with my counterpart she wanted to keep all the money allocated for this purpose centrally. I hope to persuade her to devolve 20% of it in the same proportions as last year.

Criminal Defence Fund

I hope to persuade my ministry counterpart to devolve 20% of the total allocation on a pro rata basis using information on the number of different types of criminal cases (misdemeanours, felonies and juvenile trials) in each governorate to estimate relative need. The amounts are as follows:

Baghdad	\$156.4/ 235k ID (Rasafa \$91.8k/138k ID and Karkh \$64.7/97k ID)
Nineva	\$165.2/248k ID
Basrah	\$58.0/87k ID
Babil	\$111.3/167k ID
Najaf	\$77.2/116k ID
Thiqar	\$48.1/72k ID
Ta'amim	\$46.4/70k ID
Anbar	\$86.6/130k ID
Wasit	\$21.1/32k ID
Sa'aladin	\$53.3/80k ID
Diyala	\$88.0/132k ID
Total	\$911.5/1,367k ID

Rebuilding and refurbishment

Our highest priority here is to start rebuilding as quickly as possible. To get things moving, I hope that some money is immediately allocated to each governorate using the same information that we used to bid for resources from the Ministry of Finance in the first place. This initial allocation will not be the full amount for everything that is needed in each governorate (we think), but should be enough to start getting projects under way. Once we have a better idea of what rebuilding and refurbishing will actually cost (through signed contracts, for example), my counterpart will be able to provide the rest later in the year.

The initial needs assessment is necessarily rough and ready. All governorates get some money (with the exception of the KAZ, who have been given their own pot). Those with several severely damaged court houses will get \$475k/712.5m ID, those with only one or two badly damaged buildings will get \$200k/300m ID, and the rest will get \$40k/60m ID.

- Baghdad, Sa'aladin, Basrah, Maysan, Nineva, Kerbala and Najaf each get \$50k/75m ID.
- Wasit, Diyala, Qadissia, Thiqr, Muthan and Ta'amim each get \$25k/37.5m ID.
- Anbar and Babil each get \$40k/60m ID.

Any glaring inequalities can be sorted out easily, as most of the money remains in the central pot.

IT/communications infrastructure

We have decided to hold this money in the central account until a project manager has been appointed to oversee implementation.

Real estate claims reconciliation

Again, we will keep this money centrally until we have an implementation plan.

Prisons

As this is a new responsibility for the Ministry of Justice, and it comprises two machinery of government changes (prisons from the Ministry of Labour + Social Affairs, and detention centres from the Ministry of the Interior), we are having difficulties finding anyone willing to take responsibility for it. Consequently, we are again going to keep this money centrally until we can be sure there is a suitable channel through which it can be disbursed.

I hope this leaves you less confused than when it arrived. I shall keep you informed of whatever progress I know about as decisions get made, and money moves around.

Happy to discuss.

- If the Ministry of Finance official approves the expenditure, he or she will provide the MoJ representative with a letter authorizing a withdrawal from the treasury/Ministry of Finance account at the nominated bank.

There is a set of statutes regulating the process which may be complemented by additional department specific rules (for example, with caps on how much can be spent without referring to any other authority).

One of the implications of using the Iraqi process is that CPA has no direct control over how this money is allocated or spent. It must all be done through the local Ministry officials.

Allocation

The Ministry of Finance advisors have asked that 20% of the MoJ funding be allocated across the governorates immediately. They will then move that money into each of the relevant banks. This should put your Iraqi counterparts in a position to start spending using the same procedures they did last year, and (if I understand my ministry counterpart correctly), every year since 1995.

Baseline operating costs

Last time I discussed this with my counterpart she wanted to keep all the money allocated for this purpose centrally. I hope to persuade her to devolve 20% of it in the same proportions as last year.

Criminal Defence Fund

I hope to persuade my ministry counterpart to devolve 20% of the total allocation on a pro rata basis using information on the number of different types of criminal cases (misdemeanours, felonies and juvenile trials) in each governorate to estimate relative need. The amounts are as follows

Baghdad	\$156.4/ 235k ID (Rasafa \$91.8k/138k ID and Karkh \$64.7/97k ID)
Nineva	\$165.2/248k ID
Basrah	\$58.0/87k ID
Babil	\$111.3/167k ID
Najaf	\$77.2/116k ID
Thiqar	\$48.1/72k ID
Ta'amim	\$46.4/70k ID
Anbar	\$86.6/130k ID
Wasit	\$21.1/32k ID
Sa'aladin	\$53.3/80k ID
Diyala	\$88.0/132k ID
Total	\$911.5/1,367k ID

Rebuilding and refurbishment

Our highest priority here is to start rebuilding as quickly as possible. To get things moving, I hope that some money is immediately allocated to each governorate using the same information that we used to bid for resources from the Ministry of Finance in the first place. This initial allocation will not be the full amount for everything that is needed in each governorate (we think), but should be enough to start getting projects under way. Once we have a better idea of what rebuilding and refurbishing will actually cost (through signed contracts, for example), my counterpart will be able to provide the rest later in the year.

The initial needs assessment is necessarily rough and ready. All governorates get some money (with the exception of the KAZ, who have been given their own pot). Those with several severely damaged court houses will get \$475k/712.5m ID, those with only one or two badly damaged buildings will get \$200k/300m ID, and the rest will get \$40k/60m ID.

- Baghdad, Sa'alah, Basrah, Maysan, Nineva, Kerbala and Najaf each get \$50k/75m ID.
- Wasit, Diyala, Qadissia, Thiqr, Muthan and Ta'amim each get \$25k/37.5m ID.
- Anbar and Babil each get \$40k/60m ID

Any glaring inequalities can be sorted out easily, as most of the money remains in the central pot

IT/communications infrastructure

We have decided to hold this money in the central account until a project manager has been appointed to oversee implementation.

Real estate claims reconciliation

Again, we will keep this money centrally until we have an implementation plan.

Prisons

As this is a new responsibility for the Ministry of Justice, and it comprises two machinery of government changes (prisons from the Ministry of Labour + Social Affairs, and detention centres from the Ministry of the Interior), we are having difficulties finding anyone willing to take responsibility for it. Consequently, we are again going to keep this money centrally until we can be sure there is a suitable channel through which it can be disbursed.

I hope this leaves you less confused than when it arrived. I shall keep you informed of whatever progress I know about as decisions get made, and money moves around.

Happy to discuss.

Ministry of Justice Advisor

Fourth - Prison of Abi-Greeb: the visit on 3-9-2003

We notice the following:

- 1-Inventory of fixtures: We were finished of inventory of fixtures and as follows with the enclose lists from number (1) to number (2) there are no weapons and cars except those belong to the Coalition Forces in a prison.
- 2- Lique assets: there are no financial assets in a prison.

		D3	SM	6.30	100	1260
		D4	SM	4.50	100	
		D5	SM	3.15	100	315
5-2	Supply and install ventilation window ,double frames, glass width not exceed 10 cm, to include supply and install glass, security bars, painting and ensure window instalment a against removing, a sample should be provided before executing above works to get final acceptance.	W1,W2 w3	SM	7.56	50	156
5-3	Close the holes using bricks and cement mortar.		SM	12	10	240
	SUBTOTAL					6963
6 - ELECTRICAL SYSTEMS		SIZE	Unit	Quantity	U.Price	Total
Item	Description					
	Install new under ground electrical wiring by using old ducts of by making channal in wall, using seimens type wires and then repairing walls with gypsum.		over all	1	250	500
6-2	Install new electrical outlet complete with wire (Volex type).	13,15,20 Amp	Each	10	6	120
6-3	Install new wall switch complete with all wire		Each	12	5	120
6-4	Install new fluorescent light fixture complete with wire and starter and tube(philips type)		Each	24	20	960

BOQ of Prison-building no.5 and 9

6-5	Install new ceiling fan (double ball-bearing type) complete with regulator and wires.		Each	7	50	700
6-6	Install new telephone cable		LM	200	2	800
6-7	Install new telephone jack		Each	1	25	50
6-8	Install new control panel consist of main switch (250 A), circuits, fuses, eath system connection as per drawings.		Each	1	250	500
6-9	Install new circuit breakers.	3-phase 18 Lines	Each	1	150	300
6-10	Install new mains cabling from control room to buildings	4x25 mm	LM	110	10	2200
6-11	Installing electrical bell	bigtype	Each	1	25	50
6-12	Install main alarm switch in guard room and conectting with main alarm system.		Each	1	25	50
	SUBTOTAL					6290
Item	Description	SIZE	Unit	Quantity	U.Price	Total
7-1	Installing the exhaust fan 12 inch with the frame and iron cage	12 inch	Each	7	50	700
7-2	Install air coolers (4000 cubic meter/hr)		Each	1	200	400
	SUBTOTAL					1100
8 - SANITARY AND WATER SYSTEMS						
Item	Description	SIZE	Unit	Quantity	U.Price	Total
8-1	Install new Eastern style toilet complete with flush tank		Each	1	50	100
8-2	Test and clean sanitary drain pipes		over all	1	250	500
8-3	Install new sanitary drain pipes .plastic type, high pressure (10 bar) PVC		LM	30	10	600

BOQ of Prison-building no.5 and 9

8-4	Clean and repair existing septic tanks (to include new locking hatch covers)		Each	1	350	700
8-5	Install new septic tank including casting floor and plastering walls from inside (to include locking hatch covers)	4x3x2 m	Each	1	700	1800
	Install new porcelain sink with chrome mixer and shut-off valves		Each	7	60	846
8-7	Install new water piping (galvanized steel)	3/4, 1/2, 1 inch	LM	70	4	260
8-8	Install new main shut-off valve	1 inch	Each	1	t2	24
8-9	Building brick (24 cm) manholes, plastering them from inside, casting the concrete floor, providing top cover	(50 x 50 x 50) cm	Each	10	25	500
8-10	Installing chrome tap 1/2" dia. (western made) , all necessary galvanized water pipes 1/2" dia Outside the wall with all	1/2 inch	Each	8	5	80
8-11	Supply and install concrete latrine big type		Each	6	25	300
8-12	Build water fountain (1.2m high and 50cm width) with plastering and painting 2 layers of oil paint		.LM	6	25	300
8-13	Install new plastic shower with chrome mixer.		Each	5	60	600
8-14	Install water electrical boiler (capacity 60 gallon of heater 3000 watt) with electrical and mechanical connection.	60 gallon	Each	2	120	480
	SUBTOTAL					7084
9 - OTHER ITEMS						
Item	Description		Unit	Quantity	U.Price	Total

Description of Program or Goods To Be Purchased – Please See Above Instructions

Purpose/Objective

At the end of active hostilities, the Iraqi prison system was in a state of total devastation. The prisons had been emptied in October 2002, the facilities were severely damaged and looted during and after the war, the prison management had disappeared, the remaining staff were untrained and suspect, and most prison records had been systematically destroyed. Coalition forces have had to completely create the facilities to detain criminals. As an interim measure, the military has taken on the role of running the prisons system and in spite of the many challenges has performed exceptionally. Due to the limited military assets to continue this mission and the fundamental importance of a functioning prison system to the establishment of a rule of law in Iraq, the CPA must assume leadership of rebuilding and managing the Iraqi prison system. The success of the entire justice and police initiative hinges on the development of a prison system that comports with accepted international standards.

The extent of the prison catastrophe was outlined in a June 15, 2003 assessment prepared for the U.S. Department of Justice, International Criminal Investigative Training Assistance Program (ICITAP) through the Science Applications International Corporation (Tab A). The ICITAP assessment and recommendations form the foundation of this request. The June 16, 2003 CPA Justice Presence Action Memorandum prepared by the Senior Advisor to the Ministry of Justice, (b)(6) (Tab B) also identified the crisis in the prisons and the need for immediate action. Interim measures have been undertaken to rebuild a limited number of Iraqi facilities and to fund a small civilian Prisons staff within the CPA Ministry of Justice office.

Justification

The immediate and monumental nature of the task ahead needs to be understood. There is an urgent requirement to create from nothing, a prison infrastructure capable of handling 25-30,000 prisoners. This task includes building or rebuilding a complete physical infrastructure and recruiting and training 15-20,000 corrections officers and management personnel. In addition, as occupying powers, the CPA and Coalition members are responsible for the treatment of prisoners within the system, even if Iraqis run the prisons. The CPA must therefore undertake a comprehensive program to build prisons and develop a professional cadre of correctional staff and management, and until the Iraqis have developed the necessary expertise to run the prisons, the CPA must directly manage the operation of the prisons.

To this point a skeleton staff within the Ministry of Justice's Prisons office has made great progress working in coordination with the military. A number of facilities have been renovated and are beginning to become operational. The efforts thus far, however, are merely the start and have relied heavily on military support. This proposal is focused solely on providing the international personnel necessary to develop a comprehensive program and to manage the rebuilding of the Iraq prison system, the recruiting and training of the prison staff, and to run the prisons until such time as the Iraqis can take control. It is critical that this effort begun immediately. An estimate by the Senior Advisor to the Ministry of Justice (Prisons) is that it will take four years before the Iraqi prison system reaches a satisfactory level. The prisons issue is not one that can be left unresolved. Without a robust and operational prison system that complies with acceptable international standards, all efforts to establish a rule of law in Iraq are doomed to failure. Prisons are a critical leg in the three-legged stool of police-courts-prisons. To meet Ambassador Bremer's aggressive

deadlines for transition to Iraqi control, it is essential that the prisons effort begin immediately. The full complement of international staff must be deployed as soon as possible to begin the process of building a viable prison system.

This proposal calls for 109 international personnel deployed, plus a Program Analyst supporting the program from Washington (for full descriptions of positions see Tab C). This matter has been raised with Ambassador Bremer who approved it in concept, but subject to funding availability (Tab D). The current proposal for 109 persons is more than the 87 personnel initially raised with Ambassador Bremer on July 17, 2003 and conceptually approved by him. This increase reflects an increase in the number of training personnel believed to be necessary. The estimated budget assumes that all personnel in the program would require funding. It is possible that personnel provided by Coalition partners and other international personnel will fill some positions within the program and thus not require funding. In the absence of firm commitments for such personnel, however, the budget estimate has assumed that all personnel will need to be funded. The need to move ahead quickly calls for this measure. If personnel are made available, funds can be returned from the program.

The estimated budget of additional funds for the remainder of calendar 2003 is \$8 million. This estimate includes significant capital expenses for equipment (e.g., vehicles, body armor) in 2003. The amount for these expenditures is approximately \$3.25 million. The remaining amount necessary will depend on how soon the program is approved and funded and then how soon personnel can be deployed. Fully funding all personnel in the program for two months would require \$8.7 million (including the capital expenses outlined above) (See Tab E). Fully funding all personnel in the program for three months would require \$11.1 million (including the capital expenses outlined above) (See Tab F). It is unlikely all personnel will be deployed by October 1, or even November 1. In addition, some of the positions could be filled by Coalition partners and thereby not require funding. The estimated budget for this program for 2004 is \$29 million (Tab G). This amount also may be adjusted downward if Coalition partners fill positions.

The expenditures in the current proposal were not included in the 2003 budget as the program was not sufficiently developed to meet the deadlines for the budget. The proposal includes expenditures for 2004, outside of the budget process, because it is critical that this project be fully funded now in order to recruit qualified personnel and to provide certainty that the program will continue for a set period of time.

Coordination

The outlines of this program have been coordinated with the former Senior Advisor to the Ministry of Justice, [REDACTED] of the NSC staff; [REDACTED] of the U.S. Department of Justice, ICITAP; CPA General Counsel; and DoD General Counsel.

Goods and Commodities

The goods outlined in this program (e.g., vehicles, cell phones) are minimal and proposed to be procured by a contractor who will purchase them and make arrangements for their transportation to Iraq.

Project Implementation

This project will be largely implemented through a contract for services, monitored by the U.S. Department of Justice ICITAP and U.S. civil servants assigned to the program. The personnel will be deployed as soon as possible and the current program envisions a substantial presence through

2004. The details for drawing down the program and transition to Iraq control will need to be determined as the program progresses.

ACTION MEMORANDUM

16 June 2003

To: Presidential Envoy Ambassador L. Paul Bremer
From: (b)(6) Senior Advisor, Ministry of Justice
Subject: CPA Justice Presence

SUMMARY AND PURPOSE

Pursuant to our discussion on 6 June, and in line with the parameters you suggested, I have drawn up a revised plan for an international justice presence in Iraq. Recognizing that the Iraqis themselves are to staff the courts and the central ministry and are to have responsibility for most operations, it will nevertheless be necessary to place international advisors in key positions to steer the reform process and to exercise oversight of the Iraqi justice system as it transitions to a democratic model. The first part of this proposal addresses those needs and provides for staffing of a number of posts in the key functional areas of the ministry. The second part of the proposal allows for the introduction of international judges and prosecutors – working in an operational capacity – if it is determined that conditions warrant their use. The third and final part of the proposal relates to prisons and detention facilities, a functional area which has recently been transferred from the Ministry of Labor and Social Affairs to the Ministry of Justice.

DISCUSSION

This proposal addresses only the international component of the justice presence and the functional areas where I believe attention should be directed. In addition to the international posts I describe, a large number of Iraqis will be required to support the international staff in roles such as interpreters, secretaries, and even legal officers. Beyond that, the CPA will be able to draw on the considerable resources of the Ministry of Justice, an organization of some 12,000 employees.

Relying on personnel that have already been deployed in justice-sector assessment teams, some of the core posts I have proposed below can be filled in relatively short order. Other posts are currently occupied by military judge advocates on assignment to the CPA, and most of them will remain in place for the next two to three months. Some of the positions can be staffed with attorneys provided by the US Department of Justice (DOJ) Office of Overseas Prosecutorial Development, Assistance, and Training (OPDAT). Additional lawyers can be provided through DOD recruitment or by Coalition partners. In regard to the latter, the United Kingdom, Spain, South Korea, and Denmark have already expressed interest in providing personnel to work in the justice sector. Undoubtedly, other countries will be in a position to contribute lawyers as well.

My suggestion is to put in place a staff to carry out core functions as soon as possible – ideally by late-July 2003. This group, consisting of approximately 21 international staff members, would be assigned to key posts in the central ministry, the proposed Central Criminal Court, and to four regional monitoring centers. If necessary, four additional regional monitors and an operations officer would be deployed in October 2003. At that same time, if it is determined that international judges and prosecutors are to be used, they will begin deploying in a staged process, reaching their full complement by February 2004.

In relation to corrections, the majority of personnel discussed in this proposal will be required in the near future. While the core justice staff required at the beginning will primarily be in advisory roles, the prison personnel will be deployed in an operational capacity from the outset. This is necessary because the prison setting is much more conducive to abuse of persons under government control than are courts, or even police. This factor has led to the adoption of well-developed international standards on the rights of prisoners, and as the occupying powers, the US and the UK will bear ultimate responsibility for prison conditions – even if facilities are managed by Iraqis – for the entire period of occupation. Accordingly, while operational involvement in courts is optional, the Coalition will have little choice but to be actively involved in the running of the prisons.

Core Justice Presence

Senior Advisor/Management Element (7 posts)

Senior Advisor to the Ministry of Justice (1 international post)

The senior post within the CPA justice presence will be the Senior Advisor to the Ministry. This individual will oversee the work of all of the other international justice personnel and he or she will have primary responsibility for development and implementation of policy. The Senior Advisor, acting either as the *defacto* minister, as is the case now, or working closely with an Iraqi minister once one is put in place will ensure that the Ministry as a whole operates in accordance with CPA policy.

Chief Operational Advisor (1 international post)

As justice operations expand – particularly if an international judge and prosecutor program is established – there will be a need to coordinate operations. The Ministry of Justice operates 156 courthouses and employs approximately 12,000 personnel throughout Iraq. For the foreseeable future, the CPA will shoulder much of the responsibility for operational effectiveness, therefore, an individual dedicated to oversight of this matter is required. Additionally, with international justice personnel distributed nationwide, extensive coordination will be required in respect to them as well.

Administrative/Finance Officer (1 international post)

Thus far, much of the work of the Senior Advisor and his staff has been related to administrative, financial, and budgetary matters within the Ministry of Justice. As the ministry becomes fully functional again, these issues will only loom larger. As a result, I would recommend that an administrative officer be included within the Senior Advisor's immediate office. This individual will have responsibility for all contacts with the ministry administrative staff and will also oversee all of the administrative issues related to the international justice presence.

Facilities Officer/Engineer (1 international post)

Currently, around 75% of Ministry facilities are damaged and are non-functional. Although emergency repairs are being implemented to get courts and other buildings operational, it will be necessary to engage in a reconstruction and renovation program for several months to come. The scale of this program and the extent to which it will be reliant on international assistance requires that an individual with expertise in this field be dedicated to this issue. I would suggest, however, that this post only be staffed for a period of six months, to coincide with the most intense period of physical reconstruction work. If it is determined that ongoing projects require continuing someone in this post, a decision can be taken at the end of 2003 to extend the individual's contract.

Support Element (3 international posts)

To support the work of the Senior Advisor and the justice presence generally, I would recommend placing three internationals in the immediate office of the Senior Advisor: a secretary, a legal officer, and an operations officer. A capable secretary will be required from the outset as will a legal officer. The number of legal matters coming to the Senior Advisor on a daily basis will require that he or she have someone available to research issues, draft documents, and provide advice on a range of subjects. The third post – that of an operations officer – will be filled only if an international judge and prosecutor program is established. If this occurs, an additional individual will be needed to assist the Chief Operational Advisor with internal international justice presence operations.

Ministry Advisors (10 posts)

Judicial Inspection Unit (3 international posts)

This office will be the most crucial one in the ministry for ensuring that meaningful reform takes place and that corruption and other problems are adequately addressed. With the mandate to investigate judges and prosecutors for acts of impropriety, malfeasance, or professional incompetence, this office will have significant power. Acting either on complaints or on its own initiative, it will conduct investigations and then offer recommendations for disciplinary action (reprimand, suspension, or removal from office). Where evidence of criminal conduct is found, it can refer cases for prosecution. If it does its job properly, it will weed out a number of bad judges and

prosecutors and have a strong deterrent effect on those who remain. While this office should be led by the three internationals, it should be staffed by a number of Iraqi lawyers who have been thoroughly vetted.

Office of the Director of Prosecutions (1 international post)

This office supervises all of the prosecutors throughout Iraq, and thus can have considerable influence over the administration of justice. Currently, prosecutors have a more limited role than in common law jurisdictions, but it is expected that their responsibilities will expand significantly in coming months. It will be necessary to closely monitor the prosecution service as this transformation takes place and prosecutors take on a much more substantive role than they had under Saddam. Accordingly, an international advisor can assist with this process and can affect development of policy in a positive way. He or she can also identify training requirements for prosecutors and feed this information back to capitals so that programs can be set up to address these needs.

Judicial Training Institute (2 international posts)

All judges are required to complete a two-year course at the Judicial Training Institute before being sworn in as judges and assigned to courts. The director of the Institute exercises considerable power in that he determines who will be admitted to the Institute and thus who will become judges. He also sets the curriculum, thereby fashioning the education and training potential judges receive. For these reasons, it is crucial that we have a strong presence in the Institute. One international would serve as principal advisor to the director of the Institute, where he or she could closely monitor admission practices and also ensure development of a suitable curriculum. The other international would coordinate training programs for sitting jurists, which will be required to upgrade the skills of retained judges and prosecutors. This individual will also be responsible for liaising with OPDAT to arrange deployments of lawyers to conduct specialized training programs.

Judicial Advisory Council (1 international post)

The Council, which has in the past had a key role in creating judicial policy, was sidelined under Saddam. Formerly headed by the President of the Court of Cassation, leadership of the Council was vested with the Minister of Justice under the last regime. Whether the Council is again established as an independent body (the recommendation of the Iraqi Jurists Association) or remains as a component part of the Ministry, it will play an important role in judicial reform. Thus, it is extremely important that we have an advisor in place working on a full-time basis with the Council and with the Court of Cassation. Whenever significant projects are undertaken, the advisor can draw upon additional experts who can be deployed to work on specific issues.

Office of Court Administration (2 international posts)

Early indications are that the court system in Iraq is plagued by inefficiency. In large part, this is due to deprivation of resources under the last regime, but it is also due to the use of outmoded practices and procedures. Administrative reform will significantly affect the functioning of the system and will be absolutely crucial as the legitimate courts (i.e., those in the Ministry of Justice) take on increased responsibilities. To address this problem, I would suggest placing two court administration experts in this office.

Juvenile Directorate (1 international post)

A directorate for juvenile affairs oversees the work of the juvenile courts and the offices dealing with juvenile rehabilitation, education, and re-location. Although this directorate is arguably in better shape than some other aspects of the central ministry, the treatment of juveniles is still at a level significantly lower than in the developed world.

Accordingly, I would suggest placing an advisor, experienced in juvenile issues, in this directorate. This advisor will also work with the juvenile prisons directorate, which is being transferred from the Ministry of Labor and Social Affairs.

Central Criminal Court of Iraq (1 post)

A decision has recently been taken to establish the specialized Central Criminal Court of Iraq (CCCI) which will handle cases from all over the country involving the most serious criminal offenses. The CCCI will be comprised of selected Iraqi judges and prosecutors who have been thoroughly vetted. They will prosecute and hear cases referred to the court by the Administrator, on the recommendation of the Senior Advisor. Thus, it is expected that most high-profile matters such as those involving terrorism, organized crime, and inter-ethnic crimes will be addressed in this court, at least for the near term. It is also possible that this court could evolve over time into the forum where crimes of the Saddam regime are addressed, either with or without international participation. In light of the very serious responsibilities attached to this organ, it is extremely important that an international advisor be placed at the CCCI. This individual will assist in the set-up of the court, in enhancing its operational capabilities, and will additionally serve as the principal liaison from the CPA to the court.

Judicial Monitors/Advisors (8 posts)

Regional Offices (4 international posts initially; 4 additional optional posts)

In order to monitor courts and prosecutors' offices throughout the country, I would suggest placing lawyers in four regional offices situated in Mosul, Baghdad, Al Hillah, and Basra. They will be in a position to ensure that policies are implemented at the local level and also that problems are reported back to the central ministry and the CPA. Four of these lawyers would be deployed in July 2003 and an additional four could be deployed in October 2003, if it is determined that a need exists to supplement the original group.

Training Component

In addition to these twenty-five Iraq-based lawyers and support staff, other attorneys could be brought in, as suggested above, for short or medium-term missions to provide training or advice on selected issues. In terms of training, OPDAT can draw upon all areas of expertise in the US justice system and arrange for prosecutors or judges to deploy for one or two-week stints to conduct training in their respective areas of specialization. Likewise, as legal reform issues come under consideration, US DOJ, the Department of State, and others can contribute advisors to assist the Iraqis in revising and drafting laws. If a specialized legal reform committee is established, as is being discussed now, OPDAT can provide lawyers to assist in the process for the lifetime of the committee. The American Bar Association and other NGO's, working under the auspices of USAID, can be called upon to provide training to the defense bar and attorneys engaged in civil practice.

International Judges and Prosecutors

In the next two to three months, a final decision should be taken on whether it is necessary to use international judges and prosecutors (IJPs) in Iraq. This decision will largely be contingent on two factors: the extent to which international police are to engage in investigative and operational functions; and, the capability of Iraqi courts to handle sensitive cases (e.g., inter-ethnic cases, terrorism, organized crime, etc.). In relation to the first issue, the use of IJPs may be warranted if international police officers are given primary responsibility for the conduct of most investigations, or if specialized units of internationals are set up to exclusively handle the more sophisticated investigations. In either case, the substantial resources invested by the international community in investigating these cases may justify the use of IJP's to ensure that the cases are competently handled when they reach court. Iraqi judges and prosecutors may be able to do this, but if they prove incapable, mishandling of these matters in court will effectively negate the work done by the police.

In terms of the capabilities of Iraqi courts to handle sensitive cases, it is probably premature to make conclusions on this issue. Unlike the situation in the Balkans where courts were re-established after violent inter-ethnic wars, there is nothing to suggest that Iraq will devolve into an ethnic battleground where courts are incapable of objectively handling inter-ethnic matters. Although this is a possibility, it certainly should not be taken as a given at this point that this will occur. So, the primary justification for using IJPs in Kosovo – to protect the rights of ethnic minorities – is not a readily apparent factor in Iraq. Of greater concern is the ability of Iraqi courts to effectively handle sensitive matters such as organized crime or terrorism cases, and to do this in the face of threats and/or corruption. Although this is a concern in all immature judicial systems, a determination must be made if the problem is so widespread and so pervasive that it will significantly undermine the rule of law and thus justify the replacement of local judges and prosecutors by internationals.

Finally, it should be recognized that the use of IJPs is a much more intrusive measure than the use of international police. Although international policemen may engage in policing activities alongside their Iraqi counterparts, and may even have the leading role, it is easier to present their work as a partnership effort where responsibilities and decision making are shared. When international prosecutors and judges are used, however, they completely supplant the locals and take on decision making roles in a very public setting. While this may be justified under certain circumstances, such as those I have described above, a decision to introduce IJPs should be taken only after all other alternatives for delivery of justice by local personnel have been exhausted. One such alternative may be the establishment of the Central Criminal Court, comprised of selected Iraqi judges and prosecutors, to handle serious cases. If the CCCI operates successfully for some time, it may negate the need for international intervention in this sphere. If, on the other hand, it is determined that the CCCI does not adequately address all of the security needs of the CPA, it would nevertheless be a convenient venue for placement of IJPs as it would be a consolidated court along the lines suggested above.

Should a decision be taken to introduce international judges and prosecutors (IJPs) into Iraq, it will be necessary to create a specialized unit which will include them and their support element. The proposal I set out in this memorandum provides for the creation of this unit through a staged deployment beginning in October 2003. Well in advance of that time, the size of the international police contingent, and the nature of the work in which they will be engaged, should be much clearer. Also, by that time, we should have a much better appreciation of the capabilities and shortcomings of the Iraqi judicial system and thus be in a position to decide if there is a sufficient basis for introducing IJPs.

International Judicial Unit (41 posts)

Legal Issues and Procedures

In order to set up an IJP program, a sufficient legal foundation will have to be laid. This would involve the promulgation of a regulation by the CPA establishing the jurisdiction of IJPs and the procedure whereby cases could be removed from the normal Iraqi system and diverted to chambers in which IJPs constituted a majority of the membership. These chambers could either be in the already established Iraqi courts, or alternatively in separate courts set up for the purpose of IJP interventions. In light of the large number and widespread geographical distribution of Iraqi criminal courts, the latter option is probably preferable. I have adopted this model for the purposes of this proposal.

The criteria for diverting cases to IJPs will have to be very clear-cut and must be stated in the enabling regulation. I would recommend giving them jurisdiction solely in criminal matters. IJP participation would be limited to serious cases (e.g., with potential penalties of 5 years or more) in which significant doubts exist about the objectivity or capabilities of Iraqi judges and/or prosecutors. These might include inter-ethnic crimes, war crimes/crimes against humanity cases, terrorism cases, organized crime cases, and public integrity matters, among others. Determining the types of cases that warrant the use of

IJPs goes back to the initial analysis of whether such a program should be established in the first place. If Iraqi judges or prosecutors prove incapable of rendering justice in certain kinds of cases, then those obviously should be included in the jurisdictional ambit of IJPs. Within the broad categories of cases, though, additional specific criteria will have to be satisfied in relation to each case that is diverted to IJPs. These criteria would relate to specific disqualifying factors for Iraqi jurists which call into question their abilities to adjudicate any specific case (e.g., evidence of a judge receiving threats related to a pending case; local prominence of a defendant which might interfere with the judge making a decision, etc.).

In order to divert a case to IJPs, the Senior Advisor should file a request with the Administrator of the CPA. This request would contain a brief description of the facts of the case and would lay out the reasons why diversion is required. If the Administrator agrees, the case would then be assigned to an international prosecutor and/or an international judge or a panel of international judges, depending on the stage of the proceedings. I would suggest that three regional courts be established in Baghdad, Basra, and Mosul respectively. Each of these courts would have jurisdiction over the criminal and investigative court districts within their geographical areas of responsibility.

At any stage of the proceedings, an international prosecutor could be appointed. If it is determined that the use of international judges is warranted in any given case, this could occur prior to the initiation of any specific stage of the proceedings. If a case is diverted during the investigative stage, the case would be sent to the regional court for hearing by a single international judge, sitting alone. During the trial stage, a case would be heard in the regional court location by a panel of three judges, two of whom would be internationals and one of whom would be an Iraqi judge from the court district which would have been the appropriate venue for the case but for the diversion.

Should a matter be appealed from the regional IJP court, an appeals panel would be composed of two international judges from the other regional courts and one Iraqi judge from the Court of Appeals district which would have had jurisdiction over the matter had it not been diverted. Finally, should a case be appealed to the Court of Cassation, the case would be heard by a panel of five judges, three of whom would be internationals (two assigned to the Supreme Court and one drawn from one of the regional courts) and two Iraqi members of the Court of Cassations criminal panel.

Since judges would be barred from sitting on more than one stage of any given case, the number of judges must be sufficient to accommodate investigative proceedings, trials, intermediate appeals, and appeals at the level of the Court of Cassation. With this essential constraint, it is possible that eight judges could be utilized in one case if international judges were included in proceedings at all levels. Although this may seem like a high number, I would suggest that it is probably the most efficient mechanism for use of IJPs that still roughly tracks the Iraqi system and procedures. Any other option which would utilize fewer judges and prosecutors would either require significant modification of Iraqi procedures (e.g., elimination of the appellate stage) or consolidation of all IJPs into one central court in Baghdad – a move that would result in considerable

logistical burdens on all of the other participants in the judicial process (police, local judges and prosecutors, prisons). Even under this option, extensive coordination will be required as IJPs, local judges and prosecutors, police, and prisoners are shifted from court to court. Accordingly, a coordination cell is built into the proposal for the IJP program.

Staffing and Operations

The International Judicial Unit (IJU) will fall under the overall supervision of the Senior Advisor, but will be headed by its own coordinator, assisted by a small management and support element. This management cell will coordinate the operations of the judges and prosecutors, will track cases, and will provide a centralized legal pool responsible for drafting diversion requests and for legal analysis.

In order to cover all stages of the criminal process, international judges must be assigned to the trial courts and to the Court of Cassation. Investigative proceedings and intermediate appellate proceedings would be handled by international judges assigned to the trial courts, but shifted to the other functions as needs require. As stated above, the IJPs would be assigned to three regional courts, sitting in Baghdad, Basra, and Mosul respectively. Assuming that a decision is taken to introduce IJPs by September 2003, the IJP Coordinator and the other members of the management cell would deploy in October 2003. The first IJPs, assigned to the Court of Cassation and the Baghdad regional court, would be deployed with their support staffs in December 2003. They would be followed in January 2004 by the IJPs going to Mosul and then in February by those going to Basra. If a decision on the use of IJPs is delayed beyond September, this staged deployment schedule could be implemented over a similar period of time, but commencing at a later date.

Each IJP will require a three person staff, consisting of a legal officer, a secretary, and an interpreter (of which two or possibly all three may be Iraqis). In Mosul, each IJP will probably require two interpreters – one for Arabic and one for Kurdish. In any event, these support personnel are absolutely essential for IJPs to be operational. Thus, their deployments must coincide with those of the IJPs. Likewise, should a decision be taken at a later date to increase the number of IJPs, each judge and prosecutor brought on would have to have the three-person support staff. Under the proposed structure, it would be relatively easy to do this within the operational framework suggested.

One other issue should be considered in relation to the deployment of IJPs and that is the security requirements that will attach to them. Due to the fact that they would be handling very high-profile cases, would be doing so in an extremely visible manner, and would be the ones determining the outcome of any matter (as opposed to police), the threat levels attributed to each of them will usually be very high. In Kosovo, almost all of the close protection resources of the UN mission were dedicated to security for IJPs. As it was necessary to provide secure accommodations, an armored vehicle, a chase vehicle, and at least four bodyguards for each one, this became a very burdensome obligation which had carry-over effects to other areas of the mission. Since close

protection resources are generally in high demand, but are often in short supply, the resource implications connected to IJP's in this regard should not be underestimated.

Handling of War Crimes/Crimes Against Humanity Cases

In the "Legal Issues and Procedures" section above, I included war crimes and crimes against humanity cases among the matters that could potentially be handled by IJPs. I am not suggesting, however, that all cases of this type be diverted to IJPs. The number and scale of crimes committed by the last regime are such that if prosecutions were launched in even a small portion of those cases, this would completely overwhelm the IJP resources I have proposed. Rather, I am suggesting here that if there are lower-level cases not addressed by a special tribunal, and those are relatively few in number, they could be possibly be included within the jurisdiction of IJPs.

Conversely, should a decision be taken that the best method for dealing with prosecutions of atrocities committed by the last regime is a mixed Iraqi/international process, the IJP program I have proposed in this memorandum could serve as the foundation for an expanded operation of this nature. Obviously, significant modifications would have to be made and the numbers of IJP's and support staff would have to be increased significantly. It might also be preferable to consolidate trials of this type into one special court, probably situated in Baghdad.

Prisons

One of the most sensitive issues that the CPA will have to address is the management of prisons. As I stated at the beginning of this memorandum, the Coalition will have ultimate responsibility for prison conditions and for the treatment of prisoners, even if correctional facilities are staffed with Iraqi officers. As the occupying powers, the US and the UK will have an obligation to maintain these facilities at a level of internationally acceptable standards. The CPA, therefore, will have little choice but to be actively involved in operations of prisons to a degree that may not be true of courts or police. Furthermore, considering that the entire management structure of the Iraqi prison system has been removed and that most lower-level personnel were poorly trained or not trained at all, and the vulnerability of persons in prison custody to abuse, the extent to which Iraqi capabilities in this area must be raised is significantly higher than for either courts or police. Accordingly, I am proposing a very pro-active approach in regard to prisons in which the CPA exercises overall management and operational responsibilities for the near-term, combined with an extensive training program.

Central Management (15 posts)

Office of the Director (2 international posts)

In order to oversee and manage the prisons system effectively, an experienced and senior corrections expert should be installed as the Director of the Prison Service. Although he or she will report to the Senior Advisor to the Ministry of Justice, the Director will head a

largely self-contained unit which need not rely on other resources within the Ministry of Justice. I would also suggest that an international secretary be provided for the Director to ensure that his or her immediate office functions efficiently.

Administration, Finance, and Legal Support (3 international posts)

As the prison system is effectively an independent element within the Ministry, it should be as self-sufficient as possible. Furthermore, since the administrative and financial issues relating to prisons are distinct from those relating to other justice functions, it will be beneficial to have two administrative/finance officers dedicated to prison issues. Likewise, a number of specialized legal matters will undoubtedly arise in connection with the operation of prisons and with the prisoners themselves. Accordingly, a legal officer responsible solely for these issues should be included in the international prison staff.

Operations (3 international posts)

A Chief of Operations would effectively serve as the deputy to the Director and would have responsibility for day-to-day operational control of the prison system. He or she would be assisted by two deputies, one with responsibility for adult male prison facilities and the other responsible for adult women and juvenile facilities. This arrangement would be consistent, to some extent, with the previous structure under which two separate directorates existed within the Ministry of Labor and Social Affairs for adult and juvenile prisons respectively. While I do not believe that it is necessary to maintain two separate directorates – with duplication of functions – it is essential that some division between operations of the two be preserved.

Security Office (2 international posts)

To effectively operate a prison system it is necessary to have a coordinated security approach common to all facilities. In order to do this, there has to be management from a central point wherein the security policies are created and monitored. Additionally, the security office should be the repository for criminal intelligence information on individuals held in custody. To carry out these functions, I am suggesting that two international experts be placed in charge of the office. One would serve as Chief of Security and the other as his or her deputy.

Medical Unit (2 international posts)

The physical and mental health of prisoners is always an area of great concern. Although Iraqi physicians will primarily be used to provide health care to prisoners, it will be necessary to exercise oversight of this very sensitive issue and to ensure that certain standards are maintained. Accordingly, I am proposing that an international medical doctor and an international psychiatrist be included among the international prison staff.

Engineering Unit (3 international posts)

At the present time, there are no prison facilities in Iraq that are completely functional. All of the facilities have been destroyed or damaged to the point that they are currently unusable. Although efforts are underway to quickly repair and renovate several prisons, these are temporary measures which will not meet long-term needs. As a result, numerous facilities around the country must be reconstructed or renovated in the coming months. To coordinate this work, I am suggesting that an architect, a civil engineer, and an electrical engineer be included among the international presence.

Field Facilities Management (54 posts)

Each prison and detention facility should be managed by an international prison officer until Iraqi capabilities are developed to the point that the CPA is comfortable that local operation of the facilities is feasible. To do this effectively, each facility must have assigned to it a director and at least two deputy directors, depending on the size of the institution. One of the deputies would serve additionally as the primary training tutor for Iraqi correctional officers working within their facility. With at least three international officers assigned to each facility, it should be possible to ensure that at least one international is present at any facility at all times. Based on preliminary estimates that five major prisons and twelve smaller detention facilities will become operational in coming months, fifty-five international prison officers would be needed to cover these requirements.

Training Element (8 posts)

As I stated above, the level of training among Iraqi correctional officers is very low or in many cases, simply non-existent. It will be necessary, therefore, to basically start from scratch in terms of training any officers that we would wish to retain. Likewise, all newly hired officers would have to receive basic training as well. To conduct the training programs, I am proposing that eight international training officers be deployed as soon as possible. Ideally, the training program for correctional officers could be co-located with the new police training program, so that common areas of instruction (e.g., human rights training) could be combined. The specialized instruction required for corrections personnel would be offered by these eight training officers. They would start immediately with two-week short courses designed to educate prison guards in the most basic skills and practices of prison operations. All current and newly-hired officers would receive this training. Subsequently, these personnel would be rotated back through the training facility for a more intensive course which would largely track the training program that will eventually be offered to new recruits.

Conclusion

This revised proposal for the justice presence is based on an appreciation of needs as of the first week of June 2003. It has been prepared at a time when communications with areas outside Baghdad are still extremely problematic and when most central ministry

functions and courts are operating at only the basic levels, if at all. With that in mind, I have tried to build in as much flexibility as possible while anticipating problems that are likely to be encountered in coming weeks and months. I strongly believe that the core presence of justice personnel, as described in the first part of this proposal, will be necessary under any circumstances. The option to use international judges and prosecutors, as set out in the second part of the proposal, remains available should circumstances warrant it. I would reiterate that I do not believe that we are in a position to make this decision yet, and such a serious decision should be taken only when sufficient information is developed. The final part of the proposal, pertaining to prisons, addresses a pressing need and should, I believe, be implemented as soon as possible. Finally, I would add that effective implementation of all parts of this proposal is contingent upon a permissive security environment, adequate communications, and sufficient logistical support.

RECOMMENDED ACTION

I, therefore, request and recommend that you approve this medium-term plan for assignment of international legal advisors in key positions in the Ministry of Justice.

Position	No. of Positions	Description
Director/Program Manager	1	An experienced and senior correctional experts to direct the prison system, oversee facility construction and management, supervise the training program, and develop an Iraqi management capable of assuming control of the system. Directly responsible to the Senior Advisor for the Ministry of Justice.
Assistant Program Manager	1	Supports Director/Program Manager and acts as Director/Program Manager in his or her absence.
SAIC Field Ops Manager	1	Oversees management of contractors and logistical support to Prisons Department personnel
Director of Operations	1	Responsible for the day-to-day operation of prison system.
Deputy Director of Ops	1	Supports Director of Operations in the day-to-day operations of prison system and acts as Director in his or her absence. Exercise primary responsibility for adult male prison facilities.
Assistant Ops Director	1	Supports the day-to-day operations of the prison system. Exercises primary responsibility for female and juvenile prison facilities.
Director of Security	1	Exercises central management of security policies to provide a coordinated security approach common for all prison facilities. Additional responsibilities include the development of the repository for criminal intelligence information on individuals in custody.
Deputy Director of Security	1	Supports Director of Security and acts as Director in his or her absence
Assistant Security Director	1	Supports Security section and exercises primary responsibility over development of repository of criminal intelligence on individuals in custody.
Medical Director	1	Oversees medical services provided within prison system, managing Iraqi physicians to ensure that appropriate standards are developed and maintained
Deputy Medical Director	1	Supports Medical Director.
Psychiatrist	1	Oversees the development of appropriate mental health standards and the proper treatment of inmates with mental health issues.
Prison Directors	5	Supervises and exercises direct management of each major prison facility to be operated within Iraq until such time as Iraqi management capabilities are developed to the point when it is appropriate for Iraqi management of the prisons. This requires that a Prison Director or Deputy/Assistant Deputy be on site at all times
Deputy Prison Directors	4	Supports Prison Director
Assistant Deputy Prison Dir	5	Supports Prison Director.
Establishment Directors	12	Supervises and exercises direct management of correctional establishments within Iraq until such time as Iraqi management are developed to the point

when it is appropriate for Iraqi management of the facilities. This requires the continual exercise of authority over these facilities by a Director/Deputy/Assistant Director

Estab/Deputy Direc	12	Supports Establishment Director
Estab/Assist Direc	12	Supports Establishment Director
Construction Engineer	1	No prison facilities in Iraq are currently fully functional. The existing facilities were destroyed or damaged to the point that only a limited number of facilities are currently useable, even at minimal levels. Efforts have begun to quickly repair and renovate several existing facilities, but these are temporary measures that do not address long-term needs. Numerous facilities around Iraq will need to be reconstructed and renovated in the short-term. Further plans for future need to be developed and will undoubtedly require substantial construction efforts. The engineering and architectural staff will develop reconstruction and construction plans and supervise on-going construction efforts to insure that facilities meet adequate standards of security, safety and hygiene.
Electrical Engineer	1	Supports reconstruction or construction efforts outlined under Construction Engineer.
Architect	2	Supports reconstruction or construction efforts outlined under Construction Engineer.
Director of Training	1	Develop and direct training program for 15-20,000 new prison employees and retraining of existing employees. Supervise the establishment of a centralized training facility for prison system. Oversee the development of Iraqi capacity to provide appropriate training.
Deputy Director of Training	1	Support Director of Training
Curriculum Developers	3	Develop training program curricula for initial training program, continuing training within the facilities, and managerial training.
Correctional Trainers	30	Provide initial training for recruits and retraining of retained personnel. Provide continuing training within prison facilities and develop Iraqi instructor program.
Senior Legal Officer	1	Provide specialized legal advice on issues arising from the development, management and operation of the prisons system. Oversee the development of systems within the prisons to ensure that minimum due process requirements are met, including the proper treatment of prisoners and the development of systems to ensure that court proceedings and sentences are properly tracked. Develop a system and train Iraqi attorneys to support the prison system in the future.
Legal Officer	2	Support Senior Legal Officer
Financial Officer	1	Prepare and manage prison system's budget, including spending on construction of new prison facilities.
Deputy Finance Officer	2	Support Financial Officer
Procurement Specialists	2	Provide procurement support for prison system and construction efforts.

COALITION PROVISIONAL AUTHORITY

CAMPBELL

BAGHDAD

ACTION MEMO

July 17, 2003

FOR: THE ADMINISTRATOR

FROM: Judge Donald F. Campbell, Director, Civil Affairs

SUBJECT: Prisons staffing needs

I request your approval for 87 Coalition staffers required by the Prisons Department at the earliest possible date. The vulnerability of prisoners to undetectable neglect and abuse including murder and torture, the past ubiquity of such neglect and abuse, primitive prewar prison conditions, and the dearth of qualified Iraqi personnel, demand that prisons be largely operated and not merely supervised by the Coalition. The current indigenous capability cannot provide training, reconstruction and new construction, managerial programs, treatment programs, daily routines, new and replacement security equipment, replacement of stolen items, and personnel systems, without which this indispensable component of law and order will flounder and defy international human rights standards. The requested level of Coalition involvement will be required for approximately two years, during which Iraqi replacements would be groomed and then phased in during the ensuing two years. This recommendation conforms to the staffing plan proposed by [redacted] before he departed last month.

The attached chart shows the prison system organizational structure, and the key offices within each department. No Iraqis currently have the requisite skills and knowledge to fill these positions. Experts estimate that the prison system will eventually detain approximately 30,000 persons, requiring a staff of 15,000 to 20,000. All of the more than 150 prisons nationwide have been severely damaged or destroyed. Rebuilding the system to conform to well-developed international standards on the rights of prisoners requires substantial Coalition involvement. Yet, at present, by August 3 there will be no more than five Coalition prisons staffers.

It is anticipated that the Coalition staffers would be drawn from the Departments of Justice and Defense, from our Coalition partners, and from contractors DynCorp and KBR, with the input of [redacted] our Prisons Department chief.

I therefore request and recommend that you approve:

- Eighty-seven Coalition personnel for the Prisons Department, beginning at the earliest possible date.

According to the mutual investigation between the Ips and the coalition forces, who suggests the following punishments against the staff of Al-Salihya facility.

- 1- We hereby certify the transferring of the colonel. Nadeem Mehdi Ghuthith to "Al-Russafa jail 2", and issue a final warning.
- 2- We hereby certify the transferring of the Lt-col. Falah Mehdi Salih to Al-Hilla jail and issue a final warning.
- 3- We hereby certify the transferring of the Lt-col. Majeed Ismael Khalaf to "Al-Russafa jail 1", and issue a final warning.
- 4- We hereby certify the transferring of Maj. Sarmad Jamil to "Al-Russafa jail 1".
- 5- We hereby certify the transferring of the 1LT. Zedan Khalaf Sekhi to Abu-Ghuraib Detention Center, and issue a final warning, And the transferring of the Lt. Ammar Hamid Majidi to "Al-Russafa jail 2", and issue a final warning.
- 6- We hereby certify the firing of the following officers and employees in Al-Salihya facility for abusing the management.

- 1- Maj. Faisal Humad Hussain.
- 2- Maj. Emad Khurshed Abdul. Haleem Kareem.
- 3- Cpl. Fu'ad Khurshed.
- 4- Cpl. Mushtaq ABBAS
- 5- SSG. ~~Sukainah~~ Sukainah Abid wali Raied ABBAS
- 6- employee Sukainah Abid wali.

General. Jomaa Husain Zamil
Manager of Tasferat and Jails.

1

The General Director of prisons

Regarding: According to the request of the coalition force existing in Al-Salihya prison ~~concerning~~ concerning of some mistakes and corruption in the prison, we physically went to this prison to handle this problem and we checked up the prison, I ordered the stuff in Al-Salihya to come to Al-Tasferat jail for investigation and we replaced this stuff ~~from~~ with stuff from our facility, during the investigation we figured out.

1- The colonel, Nadem Mehdi, The director, he said that he became a director for Al-Salihya since five months, in presence of Paul Primer, colonel

[redacted] ARSAS, Lt. colonel [redacted] Lt. [redacted], Lt. Col. [redacted]
Maj. [redacted] Maj. [redacted] Maj. [redacted] Cap. [redacted] Cap. [redacted]
and Lt. [redacted], who work in this facility

in three shifts, supervised by the coalition forces and after the work ~~in~~ all these days, we figure out that there is collaboration between the prison and the officers, who were ~~warned~~ warned many times, to stop dealing with the prisoners, they were directed by the American coordinator "Ma" and SG [redacted] one of these officers is [redacted] who take the address of the female prisoners and go and going to their houses to get some money from ~~them~~ their families.

10-2-03

CPT STEELING -
PEN OWN CHAT, RS
INVESTIGATE FURTHER
203 BEE ENCE)
APPROPRIATELY.

- 2 - →
=

(The above mentioned Major) coordinate with family of juveniles to get his private goals and he was warned for many times but he refused always and he replied roughly: (I did a good job!).

According to informations, that Major b(6) always meets with women (female detainees) specially after finishing my work. According to informations, that he is always close to Women. Some of Women are showing their bodies in front of him. He is passing foods cigarettes, ice and some of stuff, with they need it, he always get late to his work.

According to information, that LT. Colonel was let some of family visit the detainees and some of forbidding stuff were found during his duty shift.

٢٠٢٢

As I have been told, that LT. Colonel [redacted]
always leave his duty during time of duty. he
doesn't like the job because he can't be
able to be responsible in The Jail.

at

Concerning Major [redacted] ([redacted]). He
is one of good officers and ~~no~~ thing against
him.

concerning of (LT. [REDACTED]) agitator officer
he is always met with the final and advice
him many time and never obey the advice and
I think he sent the letters of the family prison
and always the prisoners request him and call
(abo hidan).

concerning of (Cpt. [REDACTED]) he is a good officer and
he working in the computer and counting and some
time he brings food for coalition forces in the prison.

concerning with (Col. [REDACTED]) he is a good
officer and quite and nothing agitates him. Some
times he gets late to his work because he hasn't
car and he worked hard.

concerning (LT. [REDACTED]) he joined before two months ago
as translator and he makes travels and he has many
days off and he is unsuitable.

1. (SSG. [REDACTED] ABD ALAH) he sent the letters during
his duty shift and he is unstable.
2. SSG. [REDACTED] he always absent he has many days off and he always
escaping from his shift.

-4-
=

3- ~~Mr~~ Sukayna (employee) is taking money from the family of the prisoners and she allow the families to enter the unallowed stuff and we advice her many time and she didn't obey our orders, we prefer to move her.

4- Com. Foad & Khorshed is working in sweeping, cleaning and he transfer the letters, food stuff to the detainees and he tried to sell drugs he isn't suitable to this job.

Col. Nadeed firmed that all this informations are right and advice all the officers and the employees to obey the orders and to leave all the bad thing which may be abuse the Jail and he needs to be evaluated by the Coalition forces and he needs the witness of Mr. KoX, Mr. Siter
Mr. SG. Brery.

Second: Col. Fadhil Abdulabbas said that he is working in the Jail since five months and he has an informations about Maj. Faisal that maj has a relationship with the ladies, detainees, and an informations about Com. Emad that he send letters to the detainees's families. He is not suitable to this job.

Third: Lt Col. [redacted] said that maj. [redacted] has a relationship with the detainees. and also CPL. [redacted] is speaking with the detainees and passed to Bicarott and I informed my manager

According to investigation we suggest the following

1. The colonel [redacted] should be punished by warning and transferring him to second - AL Rusafa directorate.

2. LT. Colonel [redacted] Major [redacted] and Major [redacted] should be punished by warning and transferring them to Tasshrat, which located in (Babylon ~~governor~~ governorate)

3. LT. Colonel should be punished by warning and transferring him to first. Rusafa dept.

4. Major [redacted] should be transferred to first - Rusafa directorate

5. LT. [redacted] should be ~~warned~~ ^{punished} by warning and transferring him to second. Rusafa directorate

6 - we suggest, that colonel [redacted] [redacted] should stay in his work location because he is one of good officers and nothing against him.

7. We suggest, that Captin [redacted]
keep working in his work location because no thing
against him.
8. LT. [redacted] should be transferred to the
Second - Resafa dicorate
9. We suggest, that The (Comm. [redacted],
(SSG. [redacted], (Comm [redacted]) and
(final employee [redacted]) to be fined
according to the bad information against them.

please be advised

Subject: Staffing Patterns – DRAFT

In order to finalize the staffing requirements for the Iraqi Corrections Service, please review and submit comments about the applicable staffing pattern by Monday, 27 October 2003 at [redacted]

Staffing Formula Assumptions:

- With few exceptions, the basic formula for staffing the correctional facilities is that the security officers are on-duty for 24 hours or 1 day, and then off-duty for 48 hours or 2 days.
- This rotation schedule is primarily because of the lack of transportation to enable the staff to commute to-and-from their residence on a daily basis.
- During the 24 hour period, the posts are manned by either three (3) or four (4) officers, thus the actual number of hours worked vary from either eight (8) or six (6) hours respectively.
- During this 24 hour period of time, the employees will respond to an emergency incident
- Work schedule rotates three (3) 24 hour shifts per week.
- Regular Days Off (RDO)

IRAQI CORRECTIONS SERVICES
BAGHDAD, IRAQ, APO AE 09335**

November 29, 2003

MEMORANDUM FOR: ICS Personnel and Accounting Department and Warden Raad of the Al-Hillah prison.

SUBJECT: Off Site ICS Training Academy in Al-Hillah, Iraq

1. The ICS is conducting Correctional Officer training from 30 November til 10 December 2003 in Al- Hillah prison. This training will be conducted by ten personnel who will need food and lodging. These items will be paid from the AL-Hillah operating budget.
2. The personnel will be lodged at the Al-Aklass Hotel in the city center of Hillah. The cost of this is \$8,000 ID or \$4 US per room per night double occupancy. This equates to \$40,000 ID or \$20 per night for 5 rooms or \$440,000 ID or \$220 US for the duration of the training in Al-Hillah.
3. The per diem or food rate for each person should be roughly the same as the lodging rate. That rate is \$8,000 ID or \$4 US per day per person for the period of the 11 days that training will be conducted. This cost is \$88,000 ID or \$44 US for the training period covered and a total cost of \$880,000 ID or \$440 US. Other arrangements for feeding which could reduce the per diem cost can be utilized.
4. If there should be any questions or concerns please contact the ICS Training Director CPT.

Subject: Staffing Pattern - DRAFT

[Redacted]

Attached is the staffing pattern for the Baghdad area prisons and detention centers. This is a DRAFT.

Please review and advise. I'll take a copy of this with us for the staff at Rusafa Complex and the Academy. I think this is too many staff, and believe that it will require revisions. Nevertheless, it is the closest to an indication of the requirements that we have at this point. I'd like to review and finalize by Monday. We will need the Iraqi's to review.

Thanks,

Chuck

10/25/2003

Medical Director	1	Supports Medical Director
Psychiatrist	1	Oversees the development of appropriate mental health standards & the proper treatment of inmates with mental health issues.

Prison Director	5 Supervises & exercises direct management of each major prison facility to be operated within Iraq until such time as Iraqi management capabilities are developed to the point when it is appropriate for Iraqi management of the prison, the requires that a Prison Director or deputy / assistant deputy be on site at all times
Deputy Prison Directors	4 Supports Prison Director
Assistant Deputy Prison Dir.	5 Supports Prison Director
Establishment Directors	12 Supervises & exercises direct management of correctional establishments within Iraq until such time as Iraqi management are developed to the point when it is appropriate for Iraqi management of the facilities. This requires the continual exercise of authority over the facilities by a Director / Deputy / Assistant director.
Estab/Deputy Direc	12 Support establishment director.
Estab/Assist Direc	12 Support establishment director.
Construction Engineer	1 No prison facilities in Iraq are currently fully functional. The existing facilities were destroyed or damaged to the point that only a limited number of facilities are currently useable, even at minimal levels. Efforts have begun to quickly repair and renovate several existing facilities, but these are temporary measures that do not address long - term needs. Numerous facilities around Iraq need to be reconstructed and renovated in the short-term. Further, plans for future need to be developed and will undoubtedly require substantial construction efforts. The engineering and architectural staff will develop reconstruction and constructions plans and supervise on-going construction efforts to insure that facilities meet adequate standard of security, safety and hygiene.
Electrical Engineer	1 Support reconstruction / construction efforts outlined under construction engineer.

Architect	2	Support reconstruction / construction efforts outlined under construction engineer.
Director of Training	1	Develop and direct training program for 15-20,000 new prison employees and retraining of existing employees. Supervise the establishment of a centralized training facility for prison system. Oversee the development of Iraqi capacity to provide a appropriate training.
Deputy Director of Training	1	Support Director of Training.
Curriculum Developers	3	Develop training program curricula for initial training program, continuing training within the facilities, and managerial training.
Correctional trainers	30	Provide initial training for recruits and retraining or retrained personnel. Provide continuing training within the prison facilities and develop Iraqi instructor program.
Senior Legal Officer	1	Provide specialized legal advise on issues arising from the development, management and operation of the prisons system. Oversee the development of systems within the prisons to ensure that minimum due process requirements are met, including the proper treatment of prisoners and the development of systems to ensure that court proceeding and sentences are properly tracked. Develop a system and train Iraqi attorneys to support the prison system in the future.
Legal Officer	2	Support senior legal officer.
Financial Officer	1	Prepare and mange prison system's budget, including spending on construction of new prison facilities.
Deputy Finance Officer	2	Support financial officer.
Procurement Specialists	2	Provide procurement support for prison system and construction efforts.

To the police, according

subject / asking for personal files

We request your approval to provide us with the personal files of the following employees according to the ~~request~~ memo of the ministry of justice no. 9810 in the 11th of Nov. 2003.

1 - Amjad Abul-Jhafor

2 - Kaseem Abid Elaby

3 - Rasool Sukran

5 - Jameel Hamid Atia

MAJ [redacted]

CPA policy is the same as for prior Iraqi Correctional Officers. If they were on the payroll before the war and can prove they were on the payroll before the war, then they "can be" rehired but they must reapply for their old posts and rank; however, the Iraqi Ministry of Finance has a hiring freeze on right now for any new hires (an exception to the freeze can be done if the individual can prove he was not fired by the previous regime or just abandoned his or her post. You'll have to go through the MOI to get that exception). Those IZ Police will have to go through our version of a police academy. If they cannot prove they were on the payroll prior to the war, then you have to treat them as new hires. As for the cell phone vendor for MND-SE, I've copied the Ministry of Communications and Transportation this message.

Sincerely,

-----Original Message-----

Subject: Request some help-Police

Good morning sir. It has come up here at the HOC exactly what if any guidance exists for the grandfathering of police in Iraq. I know that it was left up to the individual military commanders in IMEF who stayed and who left. Could you ask Chief [redacted] if there is any "official" CPA policy for prior police. We are looking into the matter as background as to whether there was or is any obligation to rehire any of the prior police. This continues to come up here for some reason. If you could see if anyone there has any background knowledge or guidance on the matter I would appreciate it.

Col [redacted] (British LNO was tasked with looking into this, who in turn came to you know who. I informed of past IMEF policy but he wanted to know country wide. Apparently it came up in the NGO meeting here and he left before I could get full background. I will of course let you know the full story, when I get it. But in the interim, if you could look into it, I would give you many thanks, sir. Thanks, and I will provide when I get more.

Also, could you get me a phone number for someone with the Cellphone system in the MND south area. I need to find out if any way to talk to the vendor of the cell phones for the MSR Tampa Highway Patrol project. I need to know if there is a point of contact with the vendor. I know that you said that the Ministry of Communications will not provide anything with this project, but how about the vendor? Please let me know. Thanks muchly, stay safe up there, Maj [redacted]

Major Mohamed also told me that on previous occasions Captain [] marched the classes across to Russafa for allocation of duties and that this had not happened on the latest course. Based on that I conclude that some staff may not be reporting for work. Consequently I have arranged to go to Russaf on Saturday with the wage records and go through everyone name by name.

As I was leaving Sarkees I was given the list of staff from Dawoodie that you requested on 3 November together with a further list of guards.

The following schedule is based on documents provided by Major Mohamed at Russafa. It shows the allocation of staff to the prisons and detention centres in the Baghdad area.

File

↓

	Total	Ministry of Interior	Ministry of Labour & Social Affairs	New Employees
HQ Guards	✓ 58	23	2	33
HQ	✓ 26	20		6
Russafa 1	✓ 92 ✓	30	18	44
Russafa 2	106	30	26	50
Russafa 3	42	9	6	27
Al Saihia	112	29	43	40
Al Khark Hospital	22	19		3
Psychiatric Hospital	17 ✓	17		
Abu Ghraib	166	9	94	63
	641	186	189	266

Tasferat

There is a disparity between the number employed at each facility and the wages records.

If the records were complete the numbers shown below would match the "Tasferat" wages list less any movements of staff through resignations etc. According to Major Mohamed the total on the "Tasferat" October wages amounted to 509 staff. Taking this figure there is a difference of 57 employees who do not appear to have been allocated a post.

Mol	186
New	266
Total per above schedule	452
Total wages paid October	509
Difference	57

When I pointed out the discrepancies in the figures Major Mohamed told me that the the allocation details did not include the MLSA guards from the last course.

October Total Tasferat	509
November Sacked	-16
MLSA	189
	682
Class 10	114
Total guards for adult facilities	796

The financial and the managerial coordinator of the CPA,

Pursuant your directions issued on the 2ND of Sep. 2003, we would like to inform you about the followings:

1- It has not been included any civil officer (new appointment), without a previous approval, whereas our office has appointed the officers through the ministry (the ministry of labor), and according to the official restrains, and pursuing the approved cadre no. 1784, and in accordance with the non- vacant and vacant degrees.

2-the penitentiary- house of correction for adults- was administratively subordinated to the ministry of labor and it is connected with the ministry of justice on 8TH of June, 2003.

3-It has not been included any officer in the list without an official and an original approval.

4-The valid work s formula in our office is to obtain the approval of the CPA about the appointment and to issue an order concerning the names of the appointed officers and the number of the managerial Order and the date of their commencement.

Please, scrutinize this, taking in your consideration the order of appointment and commencement.

With regard,

The attachments:

The cadre of our office,

The vacant and non-vacant

Iraqi Police Assistance for payment of wages.

Yesterday Captain [redacted] made a request that IP's provide security for the payment of wages for the Iraqi Prison Service.

We ^{originally} understood that the payment was to take place at Dowoodhe on Wednesday. We have now been told it will be tomorrow.

I would be ~~extremely~~ obliged if full assistance can be given to the Prison Department.

The number of employees is approximately 1200. There may be additional former personnel present who are wanting to return to work, and may be disruptive.

MADE COMMENT YOU ARE JUST
A GUARD AND SHOULD BE WORKING
OUTSIDE. WAIT UNTIL THE 700
GUARDS AT DAWOODY GET TO WORK

To/ The Administration of the Coalition Provisional Authority, Sub/ Report on Iraqi Reform Office / elders
We want to clarify some following points which concern the employment staff and the reformation guards for reformation department in Baghdad and the governorates which is already exist with in the structure of the Iraqi reform office for elders which includes the reformation and administration departments in Baghdad and the governorates and also to the main office

And it includes the following administrative department

1. individual and management section
2. legal affairs
3. Planning department
4. Accounting department
3. Scrutiny department
2. Technical committee (social research includes the socialists researcher to study the host (prisoner) condition)
- ✓ Papers, files, officials mail and the printer.
1. Secret archive (Saving the secret papers)
4. Computer department prisoner
Open recently includes the whole data ~~about~~ which includes the full name and surname, mother name, DOB, , place of birth, living area, kinds of the crime judgement period. noticing that the prisoner is

because department contains women
so there is difference between
reformatory department for men and
for women because there were
nursing for children, for some
prisoners who have children, this
case related with the humanity
state, so the child related strongly
to his (her) mother more than to
his (her) father. We want to
settle the settlements and security
in this country, because always
crime being fought by honest
people whom desired to be settle
and relax before it will be
fought by law or punishment
institution so always we reach our
aim. And we hope all worse man
rehabilitation and know the
wrong which he does and follow
the right direction in human life
and serve human being in stead
of murder and steal the income
and steal public and private
property and we will do our best
and time to serve humanity
treated the offender good.
overtake the circumstance which
makes him does this unacceptable
work in society.

with our best

To :- The manager of AL-Tassfeet and
The manager of Abu Ghariib Prison.

Sub Report.

We are the correctional officers of the third
course -

In 8-13-2003 we were charged with a duty
our number were only six, and the manager
of the third course did not attend for the reason
of his preoccupation in a special court at Police
academy. Anisuray happened during a patrol
among the officers because the officer
Qasim Abdul Hassan Abid and the officer
Ammar Ibrahim they said that "we were
absolutely relieve from responsibility of any
patrol and duty in accordance of the administrative
order which were issued from the manager of
Abu Ghariib Prison and we were devoted to
bureau and administration."

Only four employees have shouldered the responsibility
of the gate, the names of them:-

- 1- Salah Jaafar Ali.
- 2- Jaafar Ali Hussain.
- 3- Ammar Ibrahim
- 4- Ali Mahdi Sabih.

Subject: Staffing Matters

Chuck,

Attached is a draft request to the Office of Management and Budget and MoF regarding our need for additional staff. The budget for Prison Employees is included to give you a breakdown of the anticipated salary levels for this year.

The salary review document is a set of notes on the salary matrices and the exercise we need to do. You will see the staffing patterns you are developing are crucial to getting this done properly.

The salary matrices for the ICS follow the Facility Protection Service and the Police. The differences are not that great between the services. The FPS also may be a source of recruits with a ready made command structure as elements of it are being disbanded. This needs to be explored.

The Personnel Issues document is really a draft document and should be read as such. It simply goes through various issues that have come up in the last month and we need to take a policy decision on some of them.

[REDACTED]

Your explanation is noted, and it is incomplete.

Per the instruction I provided you last evening, the position reconciliation that you have been tasked with for approximately 1 month, needs to be completed by Friday.

The data fields that are critical, in order to justify any requests for additional positions includes:

1. Position
2. Name of Employee
3. Location of Assignment (facility or institution)
4. Reporting to Work (Yes or No)
5. Agency of origin (MOI, MOJ, MLSA)

When you summarize this information, we will then be in a position to justify more. I recognize that you have a need for more information for your purpose. However, it is essential that you complete this task by Friday.

Reconciling 1,400 names in the fields provided above, should be relatively simple.

Chuck Ryan

Subject: Personnel Matters

Chuck

Apologies. Here is the best available on the reconciliation front:-

The attachments above

Adults November – Based on the wages sheets this provides a department by department list of Baghdad employees with a summary of job titles by payment degree. The wages list has not been modified by the adults staff to reflect new work locations, but rather relies on the old departments.

Juveniles 359 – A list showing job titles. There are some names included are in Mosul and there is an annotated list with location of employees.

The total number is incomplete, as there some 460 Juvenile employees being paid in Baghdad.

Abu Ghraib exMLSA employees – List showing employees now working in Abu Ghraib. Again it is partial.

The Personnel Summary List – Contains the fields of information required for each employee on the payroll. Each personnel file's information is summarized on this document for input into an Excell 2000 spreadsheet. The Juveniles are ready to input the data but their PC is broken. The adults have about another 100 files to summarise onto the sheets and have input about 250 names. The Tasferat Employees I am assured are near to completion. They are to provide two discs with copies of the completed sheets to you next week. The information is in Arabic. The information required includes place of work and hopefully you will be able to sift the information you require once the whole exercise is completed.

A further exercise is for each management unit to provide a bi weekly list of employees, showing who has come in and who has left and for what reason. In addition I have instructed that no wages are to be paid to anyone without the production of an ID card and notifying us of the place of work. These exercises provide the best way of getting to grips with the location and movement of staff.

In type is a list of the Juveniles by job and details of those serving at Al Karkh.

The following are General Jumas locations per lists provided, They include some ex MLSA guards as well as new ones and of course Mol staff.

Abu Ghraib – Shows guards working at Abu Ghraib from a list provided by Major Mohamed

Directorates Location – HQ staff under the General Jumma

List of Employees Names – Covers Al Karkh, Kadimiah and AL Salyihah

Al Rashad Hospital – General Jumas area of responsibility

General Directorate HQ - Jumas HQ staff

Russafas -

The Adults seem to have their own little command structure for their own guards at Abu Ghraib. It appears to me that we should transfer the wages responsibilities to the Tasferat wages lists in order to make a clear line of command for General Juma for any staff working under him. The others can be transferred over once they are

12/5/2003

working to him.

Training- There are 201 adult guards to be trained. Their personnel files have been put aside in anticipation of the courses. I understand that there are still some exIP guards who have not been trained. Some may be working despite the requirement to complete it before they did so.

The course records have not been helpful in identifying the source of the candidates who had previous experience. Equally there was no record on the staff files of what has happened

There is a great difficulty in reconciling staff available with the lists I have been given.

According to the Adults there are 648 guards out of a total of 836 staff. This gives 188 office staff! Needs to be checked

The guards due to go in the next course 202

Old guards at Abu Ghraib per list 147

Adult guards at Dawoodie 27

Course 10 100

Course 11 114

Total 650

By my calculations he has about 509 personnel at the beginning of the month and 388 guards from Adults. Total 897.

Information given to you

Russafa 294

Al salhiya 9

Rashed Hospital 18

Al Karkh 20

Abu Ghraib 250

Kadimiyah 130

Total 721

The difference may be partly due to some admin staff being missed out. I was told that there was some difficulty in assigning guards after they finished the course. Mac marched them over to Juma after the course. Abdulhardy did not and I have told him to do so as I suspect some guards are not reporting for duty. Again if their pay is transferred to Juma then he should be better able to monitor what is going on. Pay records = adult staff working.

I am concerned that there has been some alteration of staff records by Mrs Fatheya Mohamed Ali, who has been working on the personnel files. Once the data base is complete an audit will need to be completed as there may have been some names added to the list over the last few months as people moved on. The whole wages issue is rather vexed, and I suspect there is some abuse going on. Some people have been listed as POW in Iran and I saw one reference to someone who died. Keeping the staff working has been difficult and I suspect the slow timing over the last few weeks is because of some fraud. In September when I visited Dawoodie I received warnings about my safety as soon as I started going through the personnel files and wage lists.

I hope this helpful

Heidi

Subject: New Prison Hires

[REDACTED]

As agreed, I discussed the new prison hires with [REDACTED]

- Justice (prisons) is allowed to pay any previously authorized payrolls and replace any staff that have been dismissed
- Approval for any new increase in payroll should be argued according to the policy set out on the CPA website for new hires
- This should be accompanied by a summary of your consolidated payroll across the country

I would welcome clarification the approved staffing levels for prisons that you mentioned.
