Iraq Releases Fiscally Responsible 2004 Budget

The Iraqi Minister of Finance Mr. Kamil al-Gailani announced today the release of the Iraqi Budget for 2004.

The budget provides authority for the commutment and expenditure of money by the Iraqi Ministries for 2004 and sets the fiscal framework for 2005 and 2006. It meets the recurrent expenditures of the Ministries, including a significant social safety net, along with some of the most pressing capital projects, and provides for the most urgent daily and social needs of the Iraqi people.

Commenting on the preparation of the budget, Minister al-Gailani said, "This budget represents an important step towards the rebuilding of Iraq by Iraqis. The Budget was prepared by a team of Iraqi experts, with a series of budget hearings attended by representatives from the various Iraqi ministries, and chaired by officials of the Ministry of Finance."

Consistent with responsible fiscal policy this budget does not rely on increased borrowing, printing money, or foreign assistance.

The public release of the 2004 budget further demonstrates the Governing Council's commitment to public sector transparency. On the road to modernization, it is important for Iraq's institutions to be open to public scrittiny. This ensures spending will be directed towards those areas the Iraqi people feel have the greatest need. This transparency will also help reduce cases of corruption and strengthen the overall confidence of the Iraqi people and investors.

However, Iraq has very substantial reconstruction and redevelopment needs that are not able to be funded in the 2004 hudget. With this in mind, the Iraqi Governing Council plans to exert all possible efforts to finance the above mentioned needs through activating the national economy and the private sector. The Governing Council also plans to seek the support of the international community at the International Donors Conference in late October in Madrid.

Mr. al-Gailani concluded: "Iraq is a country with enormous economic and human potential. By applying sound economic financial and monetary policies, and creating a good investment environment with international donors over the transition. Iraq will restore the economic and financial status which it previously held."

Notes for editors

- 1. The Budget for 2004 expects revenues of around NID 49.5 trillion (USS 13 bilhon), with expenditures of NID 20.25 trillion (USS 13.5 bilhon), meaning the Budget in 2004 will run a deficit of around NID 900 billion (USS 600 million). This deficit will be funded through refunds from cancelled Oil-For-Food contracts, meaning there will be no need for Iraq to borrow or print money to finance its deficit. In 2005 and 2006, the Budget is in balance, with spending matching revenues.
- 2. The budget reflects the 5 core principles laid out by the Iraqi ministries to drive the economic agenda. The core principles include, economic openness, private sector development, international integration, transparency in Government spending, and providing a safety net for the poor.
- 3. Journalists can obtain copies of the Iraqi 2004 Budget at the Convention Center.

Justice

(note: the Ministry of Justice includes prisons)

Subject: Jan / Feb budget process

Attached are the estimated spending numbers for Ministries for January operating budget. This is the spreadsheet that was sent to governorate treasuries, along with the attached letters (in English and Arabic) that allows treasurers to pay those civil servants who were paid in December if the estimates do not include sufficient funds for individual departments. Full details included in the letter.

These are interim measures to ensure that salaries and other operating expenses are paid. The goal now is to finish up and submit to CPA – MOF (and to MOF through your Iraqi counterparts) your spending plans for February. This should include any January budget revisions (FPS, Haz Duty pay, allocation increases) that may not have been applied in the attached table. *Remember, Ministries are responsible for their own budgets and paying their civil servants' salaries. Ministry of Finance is here to supply guidance and ensure that you stay within your total amounts. For February and beyond, you need to tell us where and when you would like your budget allocations sent, using the format provided. If you want to spend money on capital projects, there has to be an additional sheet with your capital spending plan.

Notes:

- 1) Includes forty percent increase for the new salary scale, but in the absence of direction on where individual ministries need this distributed, it has been added to the Baghdad allocation.
- 2) Does not include additions for FPS and Hazardous Duty Pay. As you are working through your numbers and locations of guards with my colleague guards must be sent.
- Ministries that rely on support from the Ministry of Finance to pay the salaries of SOE's must ensure they have requested the proper amount from the Ministry of Finance, Budget Department. Questions on how to do this can be forwarded to CPA MOF or to Ministry of Electricity, which is working through this process.

2004 BUDGET PRESS STATEMENT - AS PREPARED FOR DELIVERY

I am pleased to announce the release of the Iraqi Budget for 2004.

This budget represents an important step towards the rebuilding of Iraq by Iraqis.

The budget was prepared by a team of Iraqi experts, with a series of budget hearings attended by representatives from the various Iraqi ministries, and chaired by officials of the Ministry of Finance.

The Ministry of Finance fully discussed the proposed budget with each Ministry and, based upon available resources, agreements were made as to the required allocations for operating expenditures and capital projects.

The 2004 budget is characterized by the following:

- 1. The budget was prepared by Iraqi staff.
- 2. Budget's expenditures were funded by available Iraqi resources. It does not rely on increased borrowing, printing money, or foreign assistance.
- 3. Financing the 2004 Budget: The current budget shows a deficit of about 600 million dollars (900 billion dinars) compared to the 2003 budget which showed a deficit of about 3,000 million dollars (4,500 billion dinars). This

2004 Budget Press Statement - As Prepared for Delivery

deficit will be financed from the return of unspent Oil-for-Food program funds.

4. Undoubtedly the estimated needs to rebuild Iraq would exceed resources available for the 2004 budget. The Governing Council will exert all possible efforts to finance the above mentioned needs through activating the national economy and the private sector.

It will also be financed through the money Iraq is requesting from the United States and through the Donors in Madrid on 23 and 24 October.

The Governing Council's approval of the budget provides the authority for the commitment and expenditure of money by the Iraqi ministries for 2004 and sets the fiscal framework for 2005 and 2006.

Iraq is a country with enormous economic and human potential. By applying sound economic financial and monetary policies, and creating a good investment environment with international donors over the transition, Iraq will restore the economic and financial status which it previously held.

Through ambitious redeveloping programs, the people of Iraq will achieve prosperity, security, and stability.

PRISON DEPARTMENT

MINISTRY OF JUSTICE

2004 BUDGET

General Paragraph

A credible prison service is a vital component in the administration of security and the administration of justice. The funding proposed will sustain the facilities opened in 2003, and establish further facilities around the country that meet with recognized international standards. It will ensure that Iraq will treat all prisoners with decency and fairness.

Capital Projects

A list of desired capital projects is shown below. At present there has not been a full assessment of all the facilities around the country by International Prison Experts. Consequently generic projects have been identified to provide a coverage of pre trail and post trial facilities for both adults and juveniles. In particular the Juvenile facilities under the old regime were concentrated in Baghdad, there is a need to have a much wider spread of facilities around the country.

COALITION PROVISIONAL AUTHORITY Ministry of Justice, Iraqi Correctional Services BAGHDAD, IRAQ APO AE 09302

20 February 2004

To:	Ministry of Finance, Director General
From:	Ministry of Justice, Prisons Department
Subject: Auth	ortzation for Release of 2004 Ministry Projects Capital, Section 8
	respectfully requests release of the ministry projects capital for 2004, section 8. The value is 81 billion dinar U.S. \$54,000,000).
Finance, the Markies, chief for the hearing	Atmister of Finance budget hearings in September of 2003. Senior advisor to the Ministry of Ministry of Justice, the Minister of Justice, Sarkies Seebo accountant for ICS, and CPT military advisor to ICS among other representatives were present and the agreement. A copy of the memorandum from budget advisor to the Ministry of Justice is reference as well as a copy of the worksheet provided by Ministry of Finance
	greed upon is less than what the advisory team recommended for the reconstruction and construction efforts ing the ICS to minimally acceptable standards outlined by the United Nations and the team of prison experts.
revenues in the design expension utilizing important material outportants as plant	evided by the United States Supplemental budget were intended to meet the shortfalls created by the lack of the Iraqi economy. The shortfalls are indicative of the needs at the time and based upon Iraqi materials, labor, sees, and other day to day operational expenses. However, the Supplemental funds will be spent, in large part, orded materials and designs that cannot be obtained in Iraq, therefore the increased cost will cause a shortfall in the ut of the monies. Given these facts and given that the Supplemental budget was intended to augment Iraqi budget ned last year, a failure to release any of those monies will create a critical situation in the development and of the Iraqi Correctional Service.
under CPA O necessary exp detention fact	fanticipated capital obligations is enclosed. Further obligations will be required as the ICS exercises its authority order #10 and the Memorandum of Agreement with Ministry of Interior. Ministry of Interior did not budget for the benses of feeding prisoners, housing prisoners, or treating prisoners using minimally acceptable standards. All the difficult in Iraq are woefully overcrowded. As ICS assesses centers owned by Interior and accepts responsibility for s, funds must be immediately available in order to rehabilitate the structures so that overcrowding is reduced and up is assured.
	iked that the Planning Office ensure that procedures are sufficiently streamlined so that projects will be started hat contractors may be paid in a timely fashion.
We thank you	for your time and consideration in this matter.

2004 Budget

Minister of Finance Minister of Planning

October 2003

- (a) The following definitions are used in this Budget Paper:
 - Budget year refers to 2004, while the forward years refer to 2005 and 2006, and the Budget period is 2004-6; and
 - one billion is equal to one thousand million.
- (b) Figures in tables and generally in the text have been rounded. Discrepancies in tables between totals and sums of components are due to rounding:
 - estimates are in New Iraqi Dinar (NID);
 - estimates are generally rounded to the nearest 100 million New Iraqi Dinar; and
 - estimates midway between rounding points are rounded up.
- (c) For the budget balance, a negative sign indicates a deficit while no sign indicates a surplus.
- (d) The following notations are used:

NID	New Iraqi Dinar
-	Nil
na	not available
bn	billion
\$m	\$ million

Budget Overview

This Budget provides authority for the commitment and expenditure of money by the Interim Government of Iraq for 2004 and sets the fiscal framework for 2005 and 2006.

As a consequence of over two decades of neglect by the former regime, Iraq has immediate reconstruction and redevelopment needs well in excess of available revenues.

The Budget meets, to the extent possible with available revenues, the recurrent costs of the Iraqi government, some of the most pressing capital projects and around NID 940 billion (\$US 625 million) in urgent nation building programs.

Iraq will run a deficit in 2004 of NID 886.3 billion (SUS 590.9 million), financed by refunds of unspent Oil-for-Food funds. In 2005 and 2006, the budget is in balance (see Table 1).

Table 1: Budget Aggregates for 2003 to 2006

	2003(a) bn NID	2004 bn NID	2005 bn N ID	2006 bn NID

Budget Balance (Deficit)	4,636.2-	886.3-	19.3	27.3

⁽a) The 2003 Budget only covers July to December 2003.

In 2005 and 2006, revenue growth will permit Iraq to commit increased expenditures to much needed investment projects. These investment projects will grow to around NID 8 trillion (\$US 5.3 billion) in 2005 and 2006.

The Budget process identified very substantial reconstruction and redevelopment needs, nearly all of which are not able to be funded in the 2004 Budget. The Iraqi Governing Council, in conjunction with the Coalition Provisional Authority, is seeking the support of the international donor and investment community to meet these unmet needs.

Budget Financing

Consistent with responsible fiscal policy this Budget does not rely on increased borrowing or printing money. Rather, the Budget deficit of NID 886.3 billion (SUS 590.9 million) for 2004 will be financed from the return of unspent Oil-for-Food program funds.

Table 2 outlines the financing of Iraq's budgets for the coming years.

The **Development Fund for Iraq** (DFI) was established by the United Nations Security Council Resolution 1483 to be administered by the CPA, in consultation with the interim Iraqi authority. Contributions to the DFI have included a \$US1 billion (NID 1.5 trillion) transfer from Iraq's Oil-for-Food program account, proceeds from oil export sales, and funds in other countries that belonged to the previous regime. These funds may only be used for humanitarian assistance, economic reconstruction, Iraqi civil administration and other purposes benefiting the Iraqi people.

Vested assets consisted of approximately \$1.7 billion (NID 2.55 trillion) in Iraqi funds that previously belonged to the former regime in Iraq were frozen in US bank accounts and vested by the President of the United States in a special account of the United States

Department of Treasury. These funds will be fully disbursed in paying salaries and pensions to Iraqi civil service workers and to fund other Iraq relief and reconstruction projects in 2003.

Seized Assets These funds consist of state owned or regime owned cash that was captured and safeguarded by Coalition Forces in Iraq. The authority for use of these funds was delegated to the CPA Administrator to use only to assist the Iraqi people and to support reconstruction of Iraq. All of these funds will be disbursed in 2003.

In addition to these funds, US Government appropriated funds are also being used to assist in the reconstruction of Iraq.

Relative to the 2003 Budget that was published in July, the 2004 Budget has reclassified US Government appropriated funds to being 'off budget' sources of finance. These appropriated funds however are noted below.

Iraq Relief and Reconstruction Fund (IRRF):	\$US 2.475 billion (NID 3.71 trillion)
Natural Resources Risk Remediation Fund (NRRRF):	\$US 0.502 billion (NID 753 billion)
Army Operations and Maintenance Funds for the New Iraqi Army transferred from the Iraq Freedom Fund:	\$US 0.101 billion (NID 151.5 billion)

These funds will be fully committed against 2003 requirements.

Economic and Fiscal Policy Overview

This section provides an overview of the fiscal and economic policy issues and challenges confronting Iraq. It starts with an analysis of Iraq's economy over the past three decades. An assessment of the current state of Iraq's economy and the challenges confronting it follows. This is followed by an outline of the fiscal and economic policy framework proposed to re-develop Iraq's economy to improve the living standards of the population, drawing on the lessons from other transition economies.

The decline of Iraq's economy

It is very difficult to get reliable economic and fiscal data for Iraq over the past two decades. Since 1979 the Iraqi national Budget was prepared in secret, and very closely held by the highest levels of the regime. Similarly, releasing core economic information about Iraq (Gross Domestic Product, unemployment and inflation rates) to the wrong hands carried the death penalty.

Nevertheless, the devastating economic effect of the previous regime's policies is undeniable. Saddam Hussein and his Ba'ath party presided over a very significant fall in living standards in Iraq, both in absolute and relative terms.

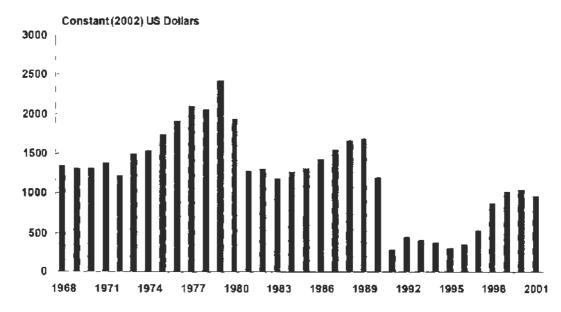

Chart 1 Iraqi per capita GDP: 1968-2001 (\$US 2002)

Source: Ministry of Planning, CPA estimates.

Thirty years ago, Iraq was an economic leader in the Arab world. Iraq had a strong workforce, modern infrastructure, and an effective public administration.

Today, while incomes of the rest of the world have gone forwards, per capita income in Iraq is a fraction of what it was 20 years ago (Chart 1).

The scale of this economic tragedy is difficult to overstate. The result is that Iraq today is an impoverished country, having once been a middle income country.

This decline in income co-incided with a collapse in infrastructure investment (Chart 2). This long term neglect of Iraq's vital infrastructure has left a legacy of a decrepit and fragile public infrastructure, and a capital stock a fraction of what it was two decades ago.

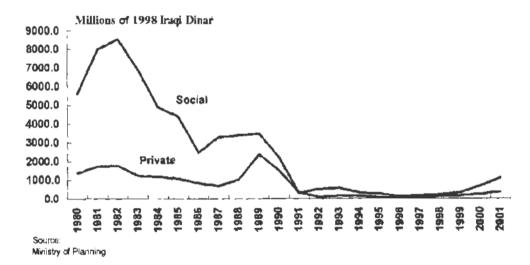

Chart 2: Gross Capital Formation in Iraq: 1980-2001

The economic legacy of Saddam Hussein

The source of Iraq's current problems stems from decades of economic mismanagement and corruption at the hands of Saddam Hussein and Iraq's Ba'ath party.

War, Opulence and Isolation

To some extent, this mismanagement is well known and broadly accepted. For example, the former regime:

 Started wars of aggression that cost untold Iraqi lives and tens of billions of dollars;

- Squandered Iraq's oil wealth on an opulent lifestyle for favoured officials of the previous regime, while ordinary Iraqis suffered a sustained decline in living standards; and
- Chose to isolate Iraq from the international community rather than dismantle its capacity for further military aggression against its neighbours and demonstrate that it had done so.

Some of the consequences of these policies are obvious.

The previous regime's wars and opulence diverted scarce resources away from social infrastructure and economic development. Its self-imposed isolation from the international business community has seen two decades of technological development pass it by, making state-owned enterprises increasingly inefficient. This is particularly evident in the crippled state of the banking and payments system.

Other consequences are less obvious.

The population policy of the previous regime was based on actively encouraging rapid growth in population to provide additional soldiers for its wars. However investment in education and housing declined, rather than increase in line with demand – in part reflecting the increased number of people seeking their share of Iraq's oil wealth.

In the first part of the 1990s, the previous regime's response to the international isolation it chose was to finance its spending by printing additional currency. The inevitable resultant hyperinflation created massive distortions throughout the economy, including the destruction of the real value of households saving deposits in the banks.

In the second part of the 1990s, the previous regime systematically and corruptly manipulated the humanitarian Oil-for-Food program instituted by Security Council resolution 986 and monitored by the United Nations.

The previous regime required that 10 per cent of the face value of contracts they submitted under the Oil-for-Food program be paid directly to the regime. These bribes were a key part in financing the palaces of the previous regime and maintaining and developing its military capability. In return, companies received inflated prices more than covering this additional cost.

In addition, a significant proportion of the goods imported under the Oil-for-Food program were on-sold by the State-owned enterprises at very significant discounts (over 50 per cent) in either local markets or smuggled out of the country to be sold in regional markets. The proceeds - much less than the oil exports used to purchase the goods - were then shared by the employees of the State-owned enterprises as 'profit' bonuses and the Iraqi budget (which in turn mainly funded the presidency and the military).

The result of this manipulation and corruption was that the humanitarian object of the Oil-for-Food program was undermined to a very significant degree. The extent of corruption under this program warrants further investigation.

State-Run Economy

Perhaps less obvious was the damage that the previous regime inflicted on Iraq through centralised command style economic policies.

The previous regime nationalised by force many industries from the 1970s. The consequence was a sustained reduction in the private sector's share of an already declining economy, as the private sector lost its incentive to save, invest and innovate.

The model of the State, rather than capital and product markets, determining the allocation of scarce financial capital has proven a failure across the world, as demonstrated by the collapse of the former Soviet Union. The experience of Iraq over the past two decades is yet another example, albeit among the most extreme, to add to this list.

Leaving aside the manner in which they were acquired, the enterprises run by the State have, almost without exception, been destroyers not creators of value, surviving only with subsidies from oil production.

Irag's Economic Challenge

Iraq is a country with enormous economic potential. With sound policies, significant investments and assistance from international donors over the next several years, Iraq has the human and natural resources to return to the position of economic leadership it once held.

Fiscal and Economic Policy Approach

Iraq has significant reserves of natural resources. However ultimately, Iraq's economic future will depend on the adoption of sound fiscal and economic policies.

The objective of Iraq's fiscal and economic policy is to raise the living standards of all Iraqis as rapidly as possible through sustained economic growth.

Responsible fiscal policy is a key component of Iraq's economic strategy. The 2004 Budget was prepared on the basis that Iraq needs to demonstrate that it can operate with the resources available to it. The 2004 Budget does not rely on increased borrowing or printing money.

More generally, there are five core principles guiding lraq's economic policy agenda:

- 1. Economic openness
- 2. Private sector development
- 3. International integration
- 4. Public sector transparency
- 5. A safety net for the poor.

Economic Openness

Economic openness is essential for markets to function properly, for business and job creation to occur, for ideas and entrepreneurship to flourish, and for Iraq to realise its full potential. The public sector has an important, but limited, role to play in everyday economic life.

Private Sector Development

The private sector, especially small and medium-sized companies that are often the most flexible and growth-oriented sector, will be strongly encouraged.

International Integration

Iraq is eager to full rejoin the community of nations – practically and economically. Iraq will seek new and open trade relationships, financial links and other ties to the outside world to facilitate economic growth.

Public Sector Transparency

Iraq's institutions will be open to public scrutiny. Iraq's institutions will operate be clearly defined rules and will be held strictly accountable for their performance. This will help to reduce room for corruption and strengthen the confidence of investors and the Iraqi people alike.

A Safety Net for the Poor

Iraq must also help those suffering hardship now during this difficult economic transition. All Iraqis must share in Iraq's economic wealth. This will be done in a way that leaves people free to make their own choices but will also build a strong foundation for a market economy.

Lessons From Transition Economies

From the experience of other countries, we know that economic transitions are not easy and take time. The three decades of economic destruction wrought by the previous regime will not be undone overnight.

The history and stark facts of the twenty-odd transition economies during the last twenty years is that all of them suffered severe depressions and none of them started to grow in less than two years from the date they made the decision to change.

Iraq is in a much more difficult situation than other transitional economies since, unlike the transitional economies in the former Soviet Union, there is a significant security problem and a grossly inadequate infrastructure.

Given the years of neglect and war, the economy can't get into full gear unless the security problem is solved and the basic infrastructure which will facilitate economic development is repaired – electricity, water, sewage, transportation, communications and health.

The 2004 Iraqi Budget is the bare minimum necessary to keep Iraq going. It is nowhere near enough to kick-start the economy and create an enabling environment for future growth and prosperity.

Iraq will need international assistance to help it through this transition period, and enable it to take large strides back on the path to economic prosperity.

If started now, the security situation could be improved significantly within a year, the communications and electrical situation well on its way to being workable and the water, sewage, health and transportation problems demonstrably on their way to success, completely changing the environment for investment.

These projects will of course significantly improve the employment situation and provide positive feedback on the security side.

Without this crucial investment there is little chance that the depressed private sector will recover in the short to medium term.

Iraq's Budget Process and Framework

Budget Process

The 2004 Budget process began in July 2004. Officials from the Ministries of Finance and Planning, in conjunction with the Coalition Provisional Authority (CPA), prepared and circulated guidance to Ministries, including "top line" provisional budget figures against which they needed to bid.

It included guidance on key assumptions to be used in the preparation of submissions, including a single exchange rate – 1500 NID to the US dollar.

In keeping with the principle of public sector transparency, this guidance was published on the internet at the same time it was provided to Ministries.

Ministries' budget submissions were received by the end of August. The Ministries of Finance and Planning conducted joint hearings in the first week of September in which each 'Ministry had the opportunity to explain and expound on the expenditure priorities they identified. These hearings were chaired by the Ministry of Finance and conducted in Arabic, with technical assistance provided by CPA officials.

The outcome of these hearings was then consolidated, and presented to the Governing Council and the CPA Administrator for approval.

5udget Coverage

Geographically, Iraq's budget was previously only for the Center and South of the country. This Budget covers all 18 governorates of Iraq, including the northern regions of Dohuk, Erbil and Suleymaniah. In the 2004 Budget, the northern regions of Iraq are treated as regional governments, with revenues flowing into the central Treasury consolidated revenue account and expenditures centrally funded by tied grants.

Budget Framework

Iraq's budget framework is characterized by a dichotomy between public entities that are 'on-budget' (all Ministries and their agencies that perform a public function) and 'off-budget' entities (also known as 'self-financing' entities).

All revenues of 'on-budget' entities are required to be put into consolidated revenue, controlled by the Ministry of Finance. Expenses of 'on-budget' entities are made against Budget appropriation lines.

Support for 'off-budget' entities is regarded as a transferred expenditure. Revenues of 'off-budget' entities are not required to be paid directly into consolidated revenue. Profits of State-owned enterprises are generally required to be transferred to the Ministry of Finance.

To avoid confusion, residual receipt of goods under the Oil-for-Food program are not recognised in the 2004 Budget.

The Budget Challenge

A key challenge in preparing the 2004 Budget was the lack of a clear base on where funds were spent by the previous regime.

Of the appropriations 'on-budget', a variety of exchange rates were used, as a means of providing subsidies, and little detail exists on how or where military or Presidency appropriations were spent.

Further, the vast bulk of public expenditure under the previous regime was 'off-budget', reflecting goods received under the Oil-for-Food program. The manipulation of this program by the former regime presented a significant challenge in preparing the 2004 Budget.

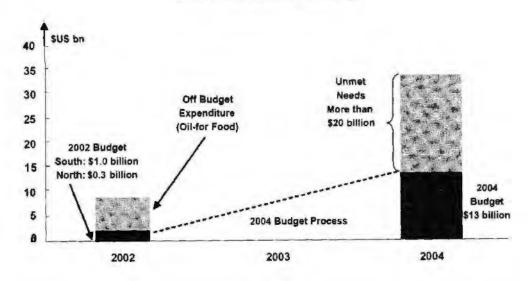

Chart 3: Iraq's budget challenge

Risks Surrounding the Estimates

The estimates of revenue and expenditure in this Budget incorporate best information available at the time of publication. A range of factors may influence the actual budget outcome in future years.

The disclosure of these factors in this statement increases the transparency of the fiscal projections and ensures they remain 'on-balance' estimates.

Events that could affect fiscal outcomes include changes in economic and other parameters and matters not included in the fiscal forecasts because of uncertainty about their timing, magnitude and/or likelihood.

In particular, there are upside and downside risks to the oil price and export volume forecasts. Similarly, there is a possibility that tax revenues will be higher or lower than expected.

Should anticipated revenues be lower than expected, either expenditures would need to be reduced, or other revenue sources identified.

Revenues

An important element of the Budget fiscal strategy is the resumption of existing, and the creation of new, revenue sources. This is balanced against the impact on the development of the private sector. While the oil sector will provide the substantial majority of revenues in the near term, in 2004 Iraq will begin to diversify its revenue sources.

Total revenue for 2004 is forecast at NID 19.3 trillion (\$US 12.8 billion), increasing to NID 28.8 trillion (\$US 19.2 billion) in 2005 and nearly NID 30 trillion (\$US 19.8 billion) in 2006 as oil production increases (see Table 3).

Table 3: Revenues

	2003 bn NID	2004 bn NID	2005 bn NID	2006 bn NID
Oil Revenue	4,096.5	18,000.0	27,750.0	28,950.0
Reconstruction Levy		450.0	525.0	
Personal Income Tax	-	15.0	45.0	90.0
Corporate Income Tax		30.0	75.0	150.0
Interest Income	76.5	15.0		
Transfers from SOEs	337.5	562.5	142.5	150.0
User Pay Charges	85.5	96.3	132.5	185.1
Other Taxes and Charges		90.0	105.0	120.0
Total	4.596.0	19.268.8	28.775.0	29,646.1

Oil Revenue

The Budget assumes that the level of oil exports will rise over the forecast period to reach pre-war level of 2.5 million barrels per day in 2005 – rather than the production target of the end of 2004. It also assumes a decline in the oil price from current levels to SUS 21 per barrel over the Budget period. These assumptions reflect the need for Budget revenues to prudently balance risks.

	2004	2005	2006
Oil Revenue (NID bn)	18,000	27,750	28,950
Oil Exports (mb/d)	1.6	2.4	2,5
Oil Price (\$US)	21	21	21

Reconstruction Levy

A 5 per cent reconstruction levy will be levied on all goods, except humanitarian goods, imported into Iraq from 1 January 2004. The revenues from the Reconstruction levy shall

be used only to assist the Iraqi people and support the reconstruction of Iraq. It shall expire on I January 2006.

NID billion	2004	2005	2006
Reconstruction Levy	450	525	

Personal Income Tax

From 1 January 2004, personal income tax will recommence, with a maximum rate of 15 per cent. It will be levied on the income of individuals, as defined under existing Iraqi income tax law. This lower rate, compared to the 75 per cent top rate that existed previously, will encourage compliance and reward effort.

NID billion	2004	2005	2006
Personal Income Tax	15	45	90

Company Income Tax

From 1 January 2004, company income tax will recommence at a flat rate of 15 per cent. It will be levied on the income of companies, including on the profits of foreign companies operating in Iraq.

NID billion	2004	2005	2006
Company Income Tax	30	75	150

Interest Income

The funds invested in the Development Fund for Iraq earn interest income.

NID billion	2004	2005	2006
Interest Income	15		-

Transfers from State Owned Enterprises (SOEs)

The following transfers are expected from SOEs in the forward estimates period.

Table 4: Revenue from State Owned Enterprises

	2003 bn NID	2004 bn NID	2005 bn NID	2006 bn NID
Central Bank of Iraq	-	75.0	90.0	105.0
Shopping Centers Company		75.0	7.5	
Automobiles Company		150.0	7.5	
Construction Materials Company		150.0	7.5	
Agriculture Supplies Company	135.0	105.0	7.5	
Al-Rasheed Hotel	7.5	7.5	22.5	45.0
Other enterprises	19 5.0			
Total	337.5	562.5	142.5	150.0

Transfers are only expected from several of the nearly two hundred State Owned Enterprises (SOEs) in 2004. The bulk of the transfers anticipated in 2004 reflect the proceeds from the resale of goods imported under the Oil-for-Food program by companies overseen by the Ministries of Trade and Agriculture. The transfer from the Central Bank of Iraq reflects interest earned on Treasury notes less operating expenses, approved capital projects and some retained earnings.

User Pays Charges

One of the general principles underpinning this Budget is that Iraqis must contribute to the recovery of their economy. This includes paying for services used – at least to the extent this was done under the previous regime. By 2004 user pay arrangements will be re-implemented for:

- Vehicle registration;
- Other fees from emergency services;
- Passport Fees:
- Higher Education Course Fees;
- Court Fees; and
- Social Security Rental Income.

The revenue expected from these charges is displayed in the table below.

Table 5: Revenues from User Charges

	2003 bn NID	2004 bn NID	2005 bn NID	2006 bn NiD
Passport Fees		0.8	8.0	0.8
Pharmaceutical scrip charge	15.00	30.0	37.5	45.0
Entry Fees to Cultural Institutions	0.15	0.8	8.0	0.8
Consultancy Charges	-	0.2	0.3	0.5
Sale of Statistical Publications		0.2	0.2	0.2
Court Fees	3.00	7.5	7.5	7.5
Social Security Rental Income	1.50	3.0	3.0	3.0
Vehicle Registration		30.0	45.0	60.0
Higher Education Course Fees	1.50	1.5	7.5	30.0
Other fees from emergency services		7.5	15.0	22.5
Flight overpass fees	7.50	15.0	15.0	15.0
Other fees and charnes	56.85	•	-	
Total	85.5	96.3	132.5	185.1

The structure of each of these fee arrangements will be reviewed by the responsible Minister, in consultation with the Minister of Finance, to assess its adequacy relative to the service provided. The details of this review for each of these fees and charges will be published no later than 31 December 2003.

In addition, there are several new fees and charges applicable in 2004:

- Flight overpass fees
- Pharmaceutical scrip charge (for non-exempt)
- Entry Fees to Cultural Institutions
- Consultancy Charges
- Sale of Statistical Publications

Flight overpass fees are charges for the use of Iraqi airspace by commercial airlines. A pharmaceutical scrip charge of NID 1500 per scrip will apply to help defray the large cost of pharmaceuticals. Exemptions will apply to this charge where its application would result in significant hardship. Entry fees will be charged at cultural institutions such as Baghdad Museum. The Ministry of Planning will charge for consultancy services and statistical publications provided to commercial interests (domestic and foreign) investigating investing in Iraq.

There are also some significant examples of other user pays arrangements in place that do not appear as budget revenue. For example, electricity charges are paid to State Owned Enterprises monitored by the Electricity Commission, rather than directly into consolidated revenue. Similarly, municipal water rates and charges are paid to the municipality directly.

Other Taxes

Several other taxes will be raised in 2004. These are outlined in the table below.

Table 6: Other Taxes

	2003 bn N IID	2004 bn N IID	2005 bn NII D	2006 bn NID
Excise Tax		15.0	15.0	15.0
Hotel and Restaurant Service Tax		7.5	7.5	7.5
Land Tax		15.0	30.0	45.0
Other		52.5	52.5	52.5
Total		90.0	105.0	120.0

A 15 per cent excise tax will apply to alcohol and tobacco products and other items to be determined. Collection of the 10 per cent tax on 4 and 5 star hotel accommodation and restaurants and the real estate transfer tax resumed on 19 September 2003. A range of other smaller existing taxes will continue to be collected. It includes taxes collected by regional governments.

In order to fund an indigenous effort to search for and recover funds stolen from Iraq under the previous regime, a luxury tax of ten per cent will be placed on the profits of businesses delivering remote television access.

Budget Expenditures

This Budget provides authority for around NID 20 trillion (\$US 13.4 billion) in expenditure in 2004, increasing to NID 28.8 trillion (\$US 19.2 billion) in 2005 and NID 29.6 trillion (\$US 19.7 billion) in 2006, in line with increased revenues.

Table 7: Expenditure Aggregates

	2003	2004	2005	2006
	bn NID	bn NID	bn NID	bn NID
Expenditures Operating Expenditure Capital Projects	7,362.3	19,026.7	21,119.2	21,463.8
	1,869.9	1,118.4	7,636.5	8,154.0
Total Expenditures	9,232.2	20,145.1	28,755.7	29,617.8

Expenditure information is presented in several different forms. First, operating expenditure and capital projects are presented for each Ministry and Statutory Authority, along with employment levels and staffing costs.

Operating expenditures are then broken down into the eight headings of the existing Iraqi budget system: staffing expenditures, service requirements, goods requirements, asset maintenance, capital expenditures, transferred expenditures, foreign obligations and staff and retirement rewards.

However, this presentation does not provide satisfactory guidance on what is being achieved by this spending. To correct for this gap, operating expenditures are also broken down into major initiatives in the Budget, along with normal ministry operating expenses.

Capital projects funded by the budget are listed, along with their estimated cost in 2004 and total project cost.

Finally, for each Ministry and statutory authority a summary of all expenditure items is presented.

Expenditure Summary by Ministry

Table 8 provides a summary of operating expenditure, capital projects and total expenditure approved in the 2004 Budget by Ministry and Statutory Authority.

Table 8		2004			2005			2006

Staffing Levels and Expenditure Summary by Ministry

This table provides a summary of the number of employees on the direct Government payroll by Ministry. An allocation of salaries has been provided to each Ministry to meet salary costs for these employees, using the interim four tier salary scale. The new 13 tier salary scale will increase the overall public sector wage bill. The budget allocation to fund this increase is only transferred to a Ministry when the proposed aggregate plan for allocating all of the Ministry's staff into the new tiers has been approved.

Table 9: Ministry Staffing Levels

Operating Expenditure Summary by Input

This table provides a summary of operating expenditure broken down into the eight headings of the existing Iraqi budget system.

Table 10: Operating Expenditure Summary by Input

	2003 bri NI D	2004 bn NI D	2005 bn N ID	2006 bn NI D
Staff Expenditures	1,467.6	3,159.0	3,153.0	3,148.5
Service Requirements	277.2	544.8	544.2	584.0
Goods Requirements	419.7	1,101.1	1,354.0	1,528.9
Assets Maintenance	99.4	154.4	193.0	204.1
Capital Expenditures	154.1	159.4	179.3	192.8
Transferred Expenditures	4,173.1	11,182.8	12,406.2	12,223.7
Foreign Obligations	205.7	925.2	1,414.3	1,631.8
Salaries & Retirement rewards	565.5	1,800.0	1,875.0	1,950.0
Total Budget Inputs	7,362.3	19,026.7	21,119.2	21,463 .8

Capital expenditures are regarded as operating expenditures if they represent the regular purchase of capital items necessary for the operation of a ministry, rather than representing a capital project or investment. New vehicle expenditures, for example, are recorded under this expenditure line.

Transferred expenditures include, amongst other things, the cost of the public distribution system and support for State Owned Enterprises.

The Foreign obligations category includes the war reparations to Kuwait required under Security Council resolution 1483 (discussed further below).

Operating Expenditure Summary by Output

Table 11 below provides a summary of operating expenditure by program initiatives. A brief description of each item follows.

Table 11: Operating Expenditure Summary by Output

Public Distribution System

A central element of the Oil-for-Food program under Security Council Resolution 986 was the monthly provision of a ration of food to each Iraqi citizen in return for a nominal

fee. This ration represents the principal income of many Iraqi households. The estimated full year total cost of this program is NID 7.4 trillion. A reduced level of funding is necessary in 2004, reflecting the residual provision of food items under the Oil-for-Food program.

This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Public Distribution	_	5,250	7,350	7,350
System				

Normal Ministry Operating Expenses

Ministries require a level of funding to meet the normal (or base case) operating expenses (including salaries – except in 2003, where they were centrally financed).

Estimated cost (bn NID)	2003	2004	2005	2006
Normal Ministry	869.2	2.192.7	2,353.4	2,430.5
Operating Expenses				

Contingency Reserve

Given the uncertainty surrounding Iraq's situation, it is prudent to set aside a contingency reserve to cover the level of currently unidentified needs likely expected to arise over the Budget period. This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Contingency Reserve		1,125	1,500	1,500

Local and Regional Government Grants

Local and Regional governments provide services direct to their communities. Grants will be provided to these governments to supplement, not replace, their traditional financing sources - fees and charges for the services provided. This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Local/Regional	294.0	1,117,5	1,117.5	1,117.5
Government Grants				

Reserve for New Salary Scale

A new thirteen tier salary scale takes effect in October 2003. This reserve reflects the estimated additional cost of the new salary scale. The amount allocated to Ministries for salary expenses in this Budget reflect the previous four tier scale. As each Ministry has its allocations across the thirteen tiers approved, the additional cost will be transferred from this reserve to the Ministry's budget appropriation. This amount is included under salary expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Reserve for New Salary	_	1,065	1,065	1,065
Scale				

Nation Building Projects

With the fall of the previous regime, Iraq is in the transition to becoming a free and democratic society. This transition process requires many of the traditional democratic institutions and structures to be built, or at least significantly reconstructed. This measure provides funding of around NID 938 billion in 2004 and NID 75 billion in 2005 and 2006 for nation and institution building projects.

The projects that are expected to be funded under this measure are listed below. The Ministers of Finance and Planning have joint responsibility for assessing these proposals for submission to the Governing Council. This amount is included under transferred expenditures.

Table 12: Nation Building Projects

Other projects	466.5	435.0	15.0	15.0
Total Nation Building Projects	466.5	937.5	75.0	75.0

Kuwait War Reparations

United Nations Security Council resolution 1483 requires Iraq to pay 5 per cent of gross oil export revenues to meet reparation claims from the first Gulf war. This amount is included under foreign obligations.

Estimated cost (bn NID)	2003	2004	2005	2006
Kuwait War Reparations	205.5	900.0	1,380.0	1,447.5

Support for State Owned Enterprises (SOEs)

Iraq's State Owned Enterprises (SOEs) employ nearly 500,000 people. From 1 January 2004, salaries of SOEs employees will no longer be centrally funded directly from the Budget, but will need to paid from SOEs revenues. With the greater consumer choice and lower prices associated with open borders many of these enterprises will be unprofitable as currently structured.

This hudget provides NID 750 billion in 2004 in support for SOEs to enable them to resume and maintain operations as options for their future are assessed – it does not allow for significant reconstruction of destroyed facilities or significant new investment. Lesser amounts are set aside for 2005 and 2006 reflecting both an expected improvement in the profitability of these enterprises and the expectation that some less profitable enterprises would be closed.

This support has yet to be allocated to each SOE, as sufficient information is not yet available. Through their responsible monitoring Ministry, SOEs will apply to the Ministry of Finance for access to this support on a case by case basis as information on their needs becomes clearer. Updated lists of allocations to individual SOEs will be published at regular intervals.

This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Support for SOEs	-	750	675	600

Economic Restructuring Programs

The transition of Iraq's economy from centrally managed to one driven by market forces will involve significant restructuring of the economy. Economic restructuring programs are necessary to assist this transition process. Payments to workers made redundant through the closure or restructuring of State Owned Enterprises will reduce the hardship associated with this necessary but difficult process. Similarly training programs will assist in providing a closer match of the skills of the workforce with the changing demands of the labour market. This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Economic Restructuring	160,5	750	750	750
Programs				

Pensions and Other Transfer Payments

There is a range of pension and transfer payments in Iraq, including: pensions to retired public servants, military and their dependents; 'private' pension arrangements previously financed through the social security fund, and the 'family social bonus' paid to those in greatest need. The number of beneficiaries is expected in increase over the Budget period, as previous restrictions (eg. caps) are lifted. This amount is included under salaries and retirement rewards.

Estimated cost (bn NID)	2003	2004	2005	2006
Pensions and Other	225	675	750	825
Transfer Payments				,

Stipends to Demobilised Military

With the dissolution of the old Iraqi Army, the Coalition Provisional Authority decided to pay, for an indefinite period, stipends to the demobilised military. A future Iraqi government will need to decide whether or not to continue paying these stipends. This amount is included under salaries and retirement rewards.

Estimated cost (bn NID)	2003	2004	2005	2006
Stipends to Demobilized	180	375	375	375
Military				

Agricultural Subsidies

lraq's agricultural sector has a long history of state support and control. On the one hand this has involved the subsidized provision of agricultural inputs, while on the other hand price controls discouraged and distorted the pattern of agricultural production. The strategy in this Budget has two pillars – increasing agricultural output prices to market prices and delivering subsidies in a more efficient manner. This amount is included under transferred expenditures.

Interest on Treasury Notes

Iraq has around NID 3.5 trillion in Treasury notes on issue, with a coupon of 6 per cent per annum. The vast majority of these notes are held by the Central Bank of Iraq and the State owned commercial banks. Meeting the interest obligations on these notes will cost NID 210 billion per annum. This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Interest on Treasury	-	210	210	210
notes				

Interest on Foreign Debt

Iraq has very substantial levels of foreign debt. Security Council resolution 1483 provides a moratorium on interest and principal repayments until the end of 2004. The level of interest and principal payments on foreign debt beyond 2004 is a matter for future negotiations. In this budget, NID 300 billion is set aside for interest payments in 2005 and 2006. This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Interest on Foreign debt	_	-	300	300

Payment System Fees

The execution of this budget requires the movement and payment of significant amounts of currency. In 2003 many of these services have been provided by Coalition forces. In 2004, these services will need to be purchased by the Government of Iraq – usually, but not necessarily by SOEs (in particular the banks). The budget sets aside NID 135 billion per annum for fees and charges associated with payment system services provided to the Government. The amount paid for particular services is a matter for competitive commercial negotiations. This amount is included under service expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Payment System Fees	-	135	135	135

Oil Export Production Fee

Gross oil export revenue is recognized directly on the budget, in accordance with Security Council resolution 1483. It follows that expenses associated with the production of oil exports also need to be funded through the budget. This budget provides for NID 200 per barrel of oil exported to be paid to companies monitored by the Ministry of Oil. This amount is included under transferred expenditures.

Estimated cost (bn NID)	2003	2004	2005	2006
Oil Export Prod'n Fee	-	109.5	146	182.5

Consultancies

Iraq's Ministries will be confronted with a range of new issues and challenges over the period ahead, outside their recent institutional experience and expertise. To meet this challenge, Ministries will need to engage independent external consultants to advise on these issues and more generally to assist in building institutional capacity.

The range and type of these issues is not yet known with certainty, so it is not yet possible to allocate these amounts by Ministry and/or project. Rather, this funding provides a capped general allocation of NID 75 billion per annum that Ministries can apply to the Minister of Finance for access on a case by case basis as needs emerge. The Minister of Finance will publish details on consultancies approved at regular intervals. This amount is included under service requirements.

Estimated cost (bn NID)	2003	2004	2005	2006
Consultancies	_	75	75	75

Economic Policy Consultancy

The Minister of Finance will engage independent consultants to advise him on a range of economic policy issues. This amount is included under service requirements.

Estimated cost (bn NID)	2003	2004	2005	2006

Ministry of Justice Department of Prisons Office of Coalition Provisional Authority Baghdad, Iraq APO AE 09302

22 October 2003

MEMORANDUM FOR: Minister of Justice

THRU: COL Senior Advisor, Ministry of Justice

THRU: Senior Advisor, Iraqi Correctional Services (ICS)

SUBJECT: ICS Management Team

ICS administrative functions are not being conducted in any recognizable manner. Immediate action is imperative to correct the problems within ICS management and provide leadership with direction, due to the dire situations facing ICS.

The problems facing the department are:

- Inadequate leadership by decision-makers
- Lack of action by appropriate employees
- Failure to make timely payment of contractual obligations
- Failure to make timely and accurate payment of employee salaries
- Failure to properly coordinate with other ministries regarding local and national:
 - o Disbursement of funds
 - Acquisition of property and facilities as per CPA Order Number 10 and directives given by the CPA prisons team
 - o Identification of employees throughout Iraq
 - o Development of provincial prison departments
 - o Operations of ICS detention centers and prisons
- Failure to manage current construction projects
- Failure to actively pursue new construction projects as per CPA advisory team guidance and priorities
- Failure to plan for the use and management of 2003 budget funds, given guidance for 2003 operations and as directed by the CPA advisory team

Although Iraq's Governing Council and several other ministries are making great strides toward the goal of operating freely as sovereign government and without the aid of CPA or others, the ICS remains stagnant. Failure to operate in a proactive or even in a reactive fashion will require an unduly extended presence of CPA or U.N. representatives. The opportunities available to the department are being squandered as experts and advisors are wasting precious time and resources in order to maintain the most basic of operations.

Immediate personnel changes are required and suggestions are as follows:

- ICS Director. The interim director, Salam Kareem Hussein has indicated that he
 has no interest in a permanent assignment as ICS director. The Ministry of
 Justice candidate should be installed immediately. The new director should be
 responsible for ensuring that the entire national system is coordinated, that
 communication is maintained, and that all aspects of the system operate in a
 consistent manner.
- Deputy Director, Adult Corrections (including Females). Khazi Yaseen Al-Any Taha was suspended pending investigation of improprieties. The director or Ministry of Justice should fill this vacancy as soon as possible.
- Deputy Director, Juveniles. Hammed Jaber Aboud displays no leadership ability and indicates that he has no fear of being removed from his post and welcomes the prospect.
- Assistant Deputy, Juvenile Legal Affairs. Mona Mahdi Idrees has no desire to
 work in a position of responsibility and also indicated that she welcomes removal
 from her post.
- Regional Directors. Official appointments for regional directors or provincial directors do not exist. These positions must be identified, authorized, recruited, and assigned as soon as possible.
- Facility Managers or Wardens. Individual facility wardens and deputies need to be identified for all facilities throughout Iraq. The individuals must be responsible for maintaining proper operation of the facility and must be responsible for the reconstruction projects or new construction projects. The individuals must be supported by the provincial management, regional management, and national management teams.

Failure to address these issues immediately will result in an absolute collapse and failure of the correctional system. The ICS will revert to operations as observed under the former regime. A return to old practices is not acceptable and cannot be tolerated.

NOT DRAWN:

174 \$22,500 NONE 120 \$48,000 NONE The Ministry of Justice respectfully requests that the Ministry of Housing and Construction carry out an assessment of the below identified facility in concert with our CPA-MOJ Prisons Office. The point of contact representative for this project is John J. Armstrong, who is coordinating Prison and Detention Center reconstruction and construction activities. I understand that you have met him at your office on

The facility was previously known as "Al Katool", and served as a Detention Facility in the Rusaffa area of Baghdad. The facility is located across the street from the Police Academy at (Grid Coordinates).

Our needs are pressing, and require expedited action to execute the assessment quickly in order to begin and complete reconstruction activities as soon as possible. It is our intent to be able to occupy this location in 120 days or less.

Special Requirements, in addition to the standard items generally included in such assessments are:

- 1) The Complete Rehabilitation of Utility Services for continuous operation as a holding facility for criminal detainees (Electric, Water and Sewage)
- 2) Rehabilitation of existing Kitchen, Toilet and Shower facilities.
- 3) Upgrade of Holding Cells, where possible, to opening of windows to allow natural light to enter in sufficient quantity.
- 4) Addition of toilet and hygiene fixtures to Holding Cells, where possible.
- 5) Installation of Security Hardware at all gates, door and window locations to prevent escapes.
- 6) Wall and Perimeter evaluation to secure the compound from escape as well as unauthorized intrusion.

Following the completion of this assessment, a decision will be made by the Ministry of Justice as to the required work to be done at this site. The Ministry of Housing and Construction will be tasked with the preparation of any pre-award documents for such proposed projects, and with preparing and advertising the requests for bids, contract award and execution of the actual contract. During the life of the contract, the Ministry of Housing and Construction will act as the agent of the Ministry of Justice to administer the contract.

Funds are available for this project. Funding for this project will be provided by transfer of funds from the Ministry of Justice to the Ministry of Housing and Construction.

Subject: Transitioning to New Iraqi Dinar Financing

Transitioning to New Iraqi Dinar Financing

- 1. From October 15, 2003 Ministry funding will be provided in new Iraqi dinar with the exception of settling dollar contracts entered into *before* October 15, 2003.
- Alternatively, if ministries or departments want to buy dollars because their current dollar balance is not enough to cover domestic contracts entered into before October 15, 2003, they can purchase these from the Central Bank at the previous day's exchange rate
- 3. Ministries will be expected to make domestic expenditures with new Iraqi dinar.
- 4. Till December 31, 2003, when requesting transfers from the Treasury account to their own accounts, centrally financed departments should not request funds that will be used to finance large purchases of imports in dollars. These should be left in the Treasury account and the Ministry of Finance will exchange them for dollars, which it will transfer to the Iraq DFI account at the Central Bank. DFI New York will issue a dollar payment for the imports against receipt of these funds. Departments must register this as expenditure in their records at the budget exchange rate of 1:1500
- Five private banks are now able to provide international banking service which will normalize transfers of money into and out of Iraq and make available standard Letters of Credit to finance imports into Iraq.
- 6. Local Treasury Offices and other departments are to run down the remaining dollar balances in their accounts until December 31, 2003. This dollar expenditure will be scored against departments' allocations at a rate of 1:1500, which was the rate used to convert the dollar budget to New Iraqi Dinars. All positive balances remaining in department's accounts, including any dollar amounts remaining at that time will be transferred back to the central Treasury Account at the end of the year
- 7. After meeting existing dollar obligations, local Treasury offices and departments can sell dollars to the Treasury Account at the Central Bank at a rate of 1:1500. This is the same the rate used to convert the dollar budget amounts to New Iraqi Dinars. The MOF will credit the local Treasury or department's account in Dinars for the amount exchanged
- 8. Unless specifically authorized by the Ministry of Finance, all dollar accounts of Ministries will be closed on January 1, 2004

Iraqi Currency Exchange Overview

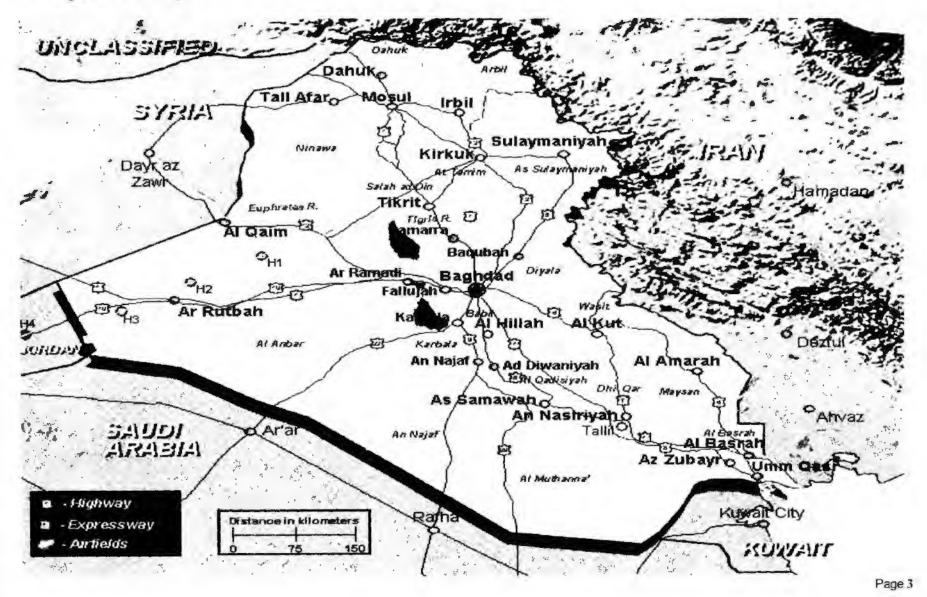

17 November 2003

Accomplishments

- Hired more than 700 personnel
- Established ICE Project Management Office
- Established 3 Distribution hubs with storage and security elements
- Established 8 currency convoys comprised of 64 vehicles
- 17 of 24 currency flights completed from England
- One of three currency flights completed from Spain
- Received 5.1 Trillion in new Iraqi Dinar
- Trained 905 Iraqi bank personnel
- Each of 243 Banks loaded with an initial 4.6 Billion new Dinar (\$2.3 mil)
- Each Bank has been emptied of old currency at least 2 times
- Established Verification and Destruction site

Map of Iraq

Mission Phases

First Phase:

Provide each exchange site with 4.6 billion new Iraqi Dinar

Provide each exchange site with supplies to conduct the exchange

Second Phase

Start collections of old currency

Provide each bank branch holding Treasury accounts with October government salaries and jobs program funds

Third Phase

Provide each site with an additional 4.6 billion new Iragi Dinar

Continue collection of all old currency from each exchange site

Provide each bank branch holding Treasury accounts with November government salaries and jobs program funds

Provide 50 selected banks with currency for the military stipend payment

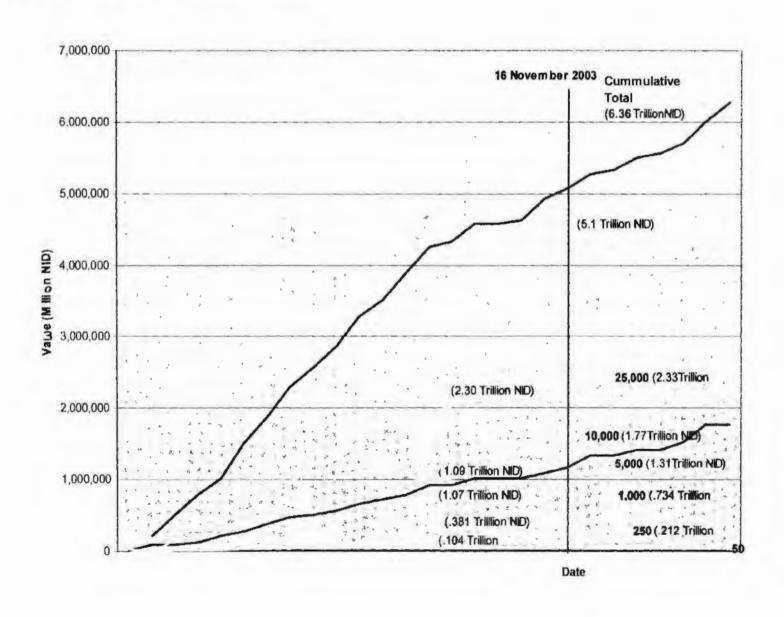

Fourth Phase

Transition bank delivery responsibility back to the Iraqi banking system (banks in Baghdad are operating using normal banking procedures)

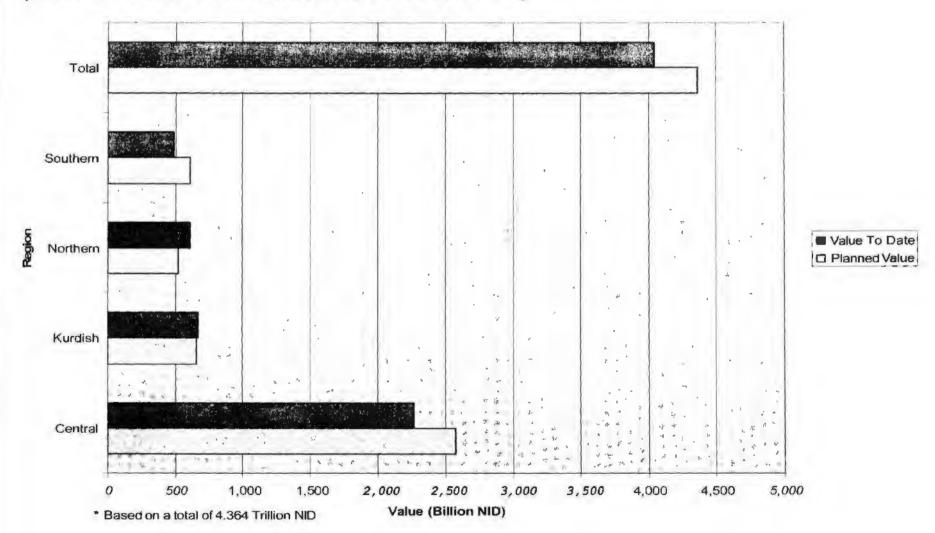

Provide deliveries to a bank outside of Baghdad only after the bank has provided the Central Bank of Iraqwith a check for new currency

Continue collection from the exchange sites

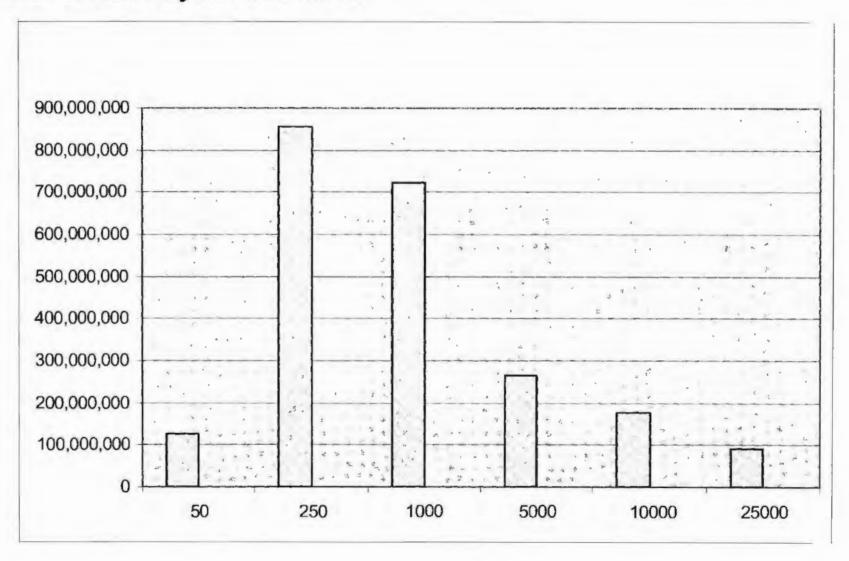

Planned Total Value of Deliveries

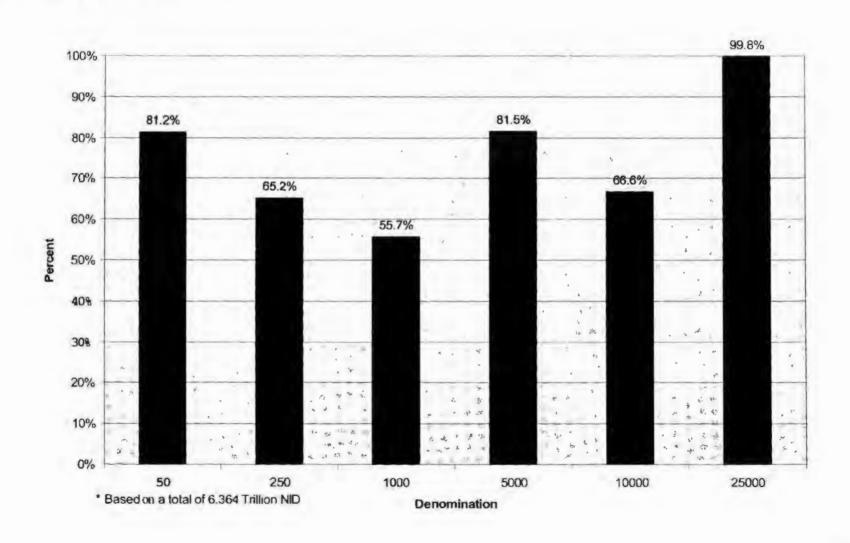

Convoy Dinar Distribution By Region (Plan v. Actual Distribution as of 16 NOV 03)

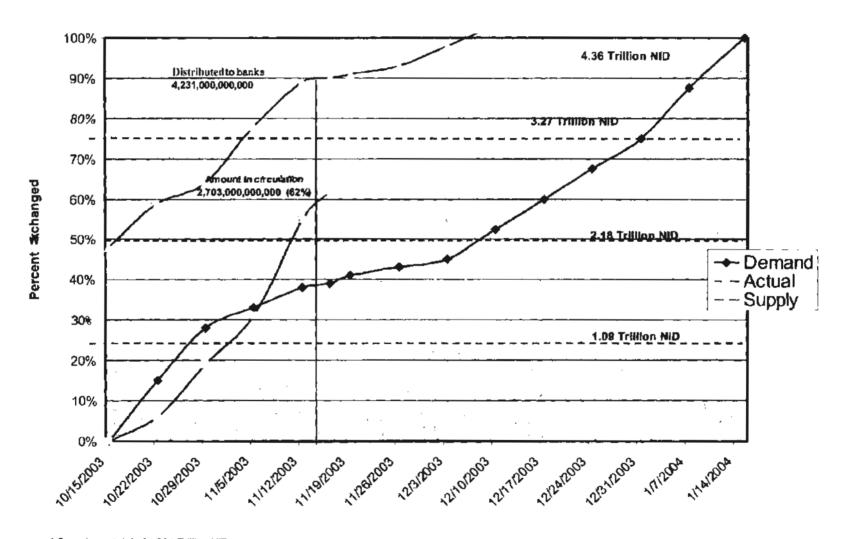

Number of Notes by Denomination

In-Country Delivery of Iraqi Dinars by Percent of Flight Plan* -- As of 16 NOV 03 --

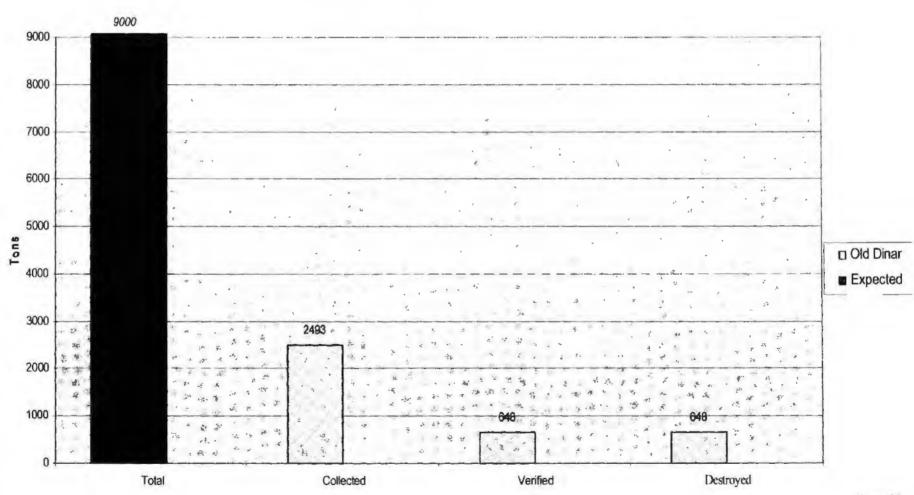

Anticipated v. Actual Currency Exchange Totals as of 16 Nov 03

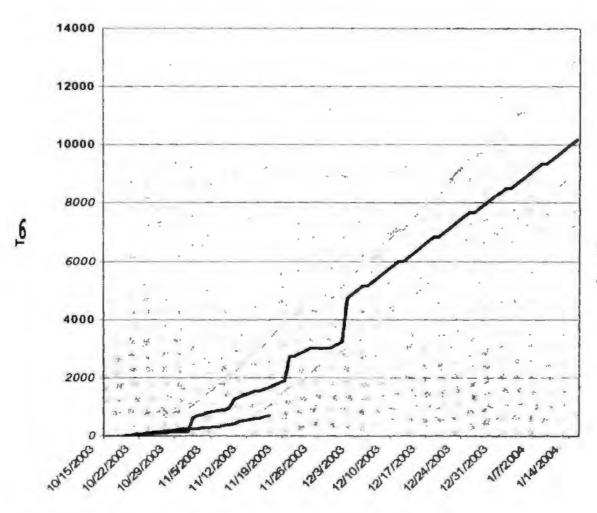

^{*} Based on a total of 4.364 Trillion NID

Disposition of Old Dinar (as of 16 NOV 03)

Collection, Verification, and Destruction Capacities of Old Dinar

Planned Destruction

ActualTons Destroyed

Planed Destruction to date: 1130 Tons

Actual Destruction to date: 696Tons

Questions

Policy on Payment of Public Sector Pensions and Benefits for the Fourth Quarter of 2003

This policy applies to public sector pensioners registered with the Pension Administration of the Ministry of Finance, to the public sector pensioners registered since 1990 in the Kurdish administrations, to the "private sector" or contributory pensioners and family benefit recipients of the Ministry of Labour and Social Affairs, and to the recipients of the benefits for Anfal victims, disabled and families of martyrs in the Kurdish areas.

Emergency Payments. Following the two emergency payments of \$40 to support pensioners which were made in the period April –June, Ambassador Bremer approved a flat rate pension payment of \$60 to all public sector pensioners, to all private sector pensioners and family benefit recipients, and to all benefit recipients in the Kurdish areas for the period July-September.

Fourth Quarter Pension Payment. The Minister of Finance has now announced a further flat rate pension payment for the period October-December to be paid in new Iraqi dinar at the rate of 90000 new Iraqi dinar to all public sector pensioners, private sector pensioners, family benefit recipients and benefit recipients in the Kurdish areas. In addition the Minister of Finance has announced the payment of a Ramadan bonus of 30000 dinars to all pensioners and other recipients to be paid together with the fourth quarter pension payment. Payment will take place from November 1 in accordance with local arrangements, and in the denominations determined by the local director of the pension administration. In Baghdad civil pensioners will be paid in November and military pensioners will be paid in December.

Type of Pensioners	Monthly pension under previous regime, ID	Third quarter pension payment, USD	Fourth quarter pension payment, ID
More than 30 years service	8000	\$60	90000 plus Ramadan bonus of 30000
More than 15 years service	5000	\$60	90000 plus Ramadan bonus of 30000
One dependent	5000	\$60	90000 plus Ramadan bonus of 30000
More than one dependent	7500	\$60	90000 plus Ramadan bonus of 30000

Procedure for payment of pensions and benefit

<u>Financing.</u> Provision of funds to pay pensions and benefits will be the responsibility of Ministry of Finance officials, acting in accordance with the established policy, through the Treasury account.

Payment. Payments will be executed through the banking system where possible. In these cases the funds will be sent to the relevant bank and the bank will make the payments to the pensioners against an official list of pensioners provided by the Pensions Administration. If is it not possible, pensions will be paid through pay sites staffed by the Pensions Administration of the Ministry of Finance and benefits will be paid through pay sites staffed by the Ministry of Labour and Social Affairs. The pay site should be designed to be secure, convenient and efficient, and minimise the time that customers spend in queues. The Director General of Pensions, Ministry of Finance will issue a circular to all Pensions offices setting out details of the payment of pensions.

<u>Verification of identity</u>. Each pensioner and benefit recipient shall he expected to show three forms of identification to qualify for payment, including the pension ID card and the ID card. In exceptional cases, the director of the pension administration or the director of the MOLSA office may authorise payment on the basis of two forms of identification, providing proper records are kept of such cases. Any person caught using false ID to obtain a pension or benefit by fraudulent means shall be subject to criminal charges.

<u>Verification of payment</u>. Upon receipt of the pension, each pensioner should sign the official list of pensioners against their name in order to provide verification that payment has been made.

Payment of Backpayments and Recovery of Excess Pensions. Employees who have not received their full pension or benefit payment for the third quarter of 2003 shall be entitled to payment of the balance. Any double payment of the previous quarter's pension or benefit shall be deducted from the fourth quarter's pension or benefit payments. For the purpose of calculating payments and deductions for back payment of previous quarters' payment in dollars, a conversion rate of 2000ID: 1USD should be used.

Accounting for previous quarter payment. The Pension Administration of the Ministry of Finance and the local office of the MOLSA shall provide information to the local Treasury Office on the number of pensioners and benefit recipients paid in the previous quarter. Information should include funds received, funds paid out, number of pensioners/benefit recipients paid and the balance remaining. Unused funds will be redeposited in the bank from which they were withdrawn and a receipt filed with the local Treasurer. This information should be sent to the Director General of Account in Baghdad to allow a full accounting of all payments made.

New Pension Arrangements. A committee established by Ambassador Bremer, with representation from various Iraqi ministries, is currently considering new pension arrangements that may be introduced at the beginning of 2004.

Adviser, Ministry of Finance

Adviser, Ministry of Finance

SALARY IMPLEMENTING INSTRUCTIONS

The Iraqi Governing Council and the CPA Administrator have approved new salary scales to Iraqi civil servants and other Iraqi government employees. These instructions will explain the new structure and provide implementing instructions for the transition from the current four grade structure.

The new salary scale is the result of extensive study and interaction of a Salary Task Force composed of representatives of the Iraqi Ministries and government and out side pay experts brought in for the project. The Iraqi working group studied the issue for over a month and made valuable recommendations that form the basis for the plan.

The plan takes into consideration all those who are currently receiving salary payments under the four grade program. Their salaries will remain at their current levels unless their experience, productivity and performance will cause them to be slotted at a higher grade. Those grand-fathered under this save pay formula will remain at their pay level until promotions and longevity increases catch up to them. Thus all current lraqi government employees will receive the same or greater pay under this system compared to the current system.

The new system is based on pay for work. No one will receive special bonuses or stipends. The workers pay will be based entirely on the base salary in the scale and not/not on other supplementary pays. The workers will be expected to work a normal Iraqi work week of at least 35 hours in order to be paid. Shift workers, those working overtime, and other similar issues will be compensated within salary scale limits by management decisions.

Transition to the new pay scale will take place over the next few months starting in most cases on 1 October 2003. The Iraqi task force is working on bench-mark job positions to aid managers in their decision about where an individual is placed on the scale. As Ministries and commissions and State owned industries complete their slate of employee assignments, the Ministry of Finance and Ministry of Planning will work together to ensure worker distribution conforms to the affordability percentage per grade. If they do not, then the situation will be considered by the Iraqi Salary Working group to resolve the distribution either by reclassification of some workers or a nation-wide cross-leveling. Once these classifications are finalized then the new salary scale will enter into effect the next month for that particular organization. No one can be paid under the new scale and job classification until the end of October pay dates, as the salaries will be paid in the new Iraqi dinar. All wages will be paid in Iraqi Dinars. Those payments taking place after October 15 will be paid with the new Iraqi dinar on a one-forone basis.

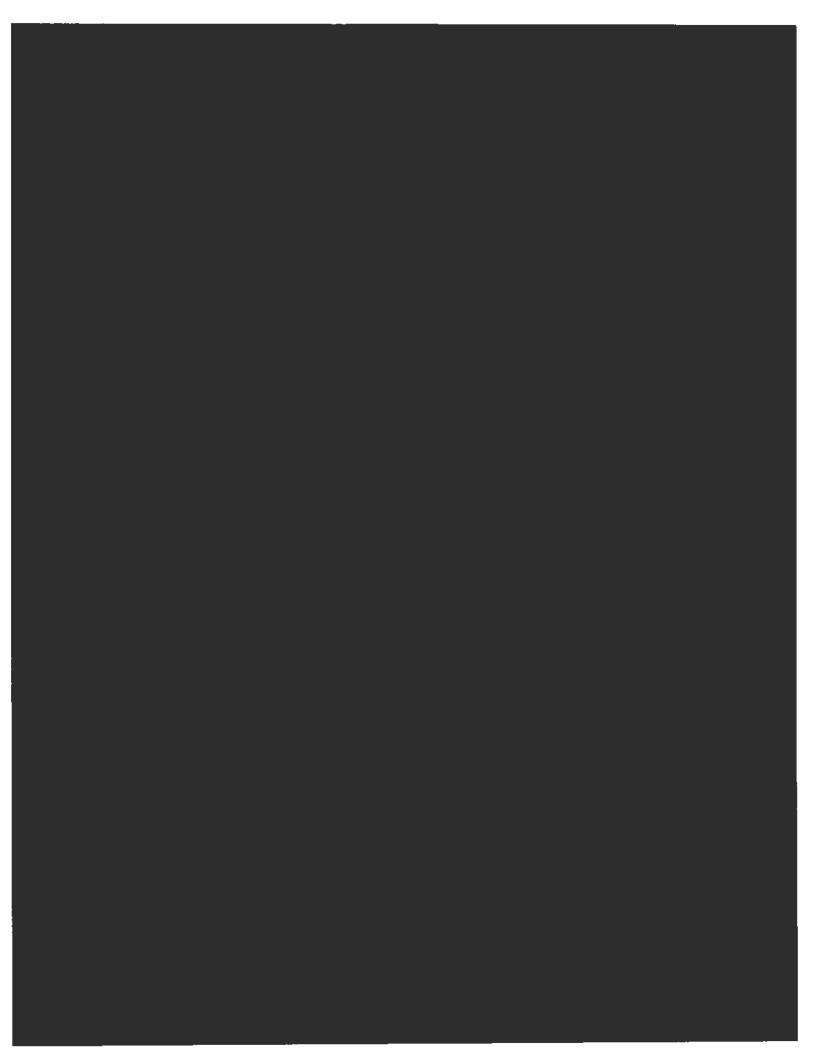

Workers receiving their first month's pay under the new salary system will be required to provide recognizable photo identification. In subsequent payments, a bank account number where workers would like future wages to be deposited will be required.

Ministries will provide workers' names, identification numbers to both the Ministry of Planning and the Ministry of Finance, and a new grade/step classification for each employee. Once it is ascertained that the Ministry or Agency's list and grade structure is completed and approved by the Ministry of Finance, the salary funds will be included in the Ministry or Agency's operating budget for each remaining month in 2003 and will be the basis for a salary budget line in the 2004 budget.

TIMELINES

- A. Wednesday 3 September The Iraqi Salaries working group finalizes benchmark jobs.
- B. Thursday 4 September A CPA Administrator order will be issued making the salary scale official. These instructions, the Administrator's order, and the salary scale will be released to CPA Senior Advisors at the weekly CPA economic meeting.
- C. Sunday 7 September A press conference will take place at 1000 announcing the order and providing details on the new system. It will launch a broader strategic information plan that will disperse more information in coming weeks.
- D. Saturday 6 September 1 October Ministries, Agencies, and commissions should be instructed to start the classification of employees into the new scale. Upon completion, they will provide copies to the Ministry of Planning and the Iraqi Salary working group for examination. This will ensure proper adherence to national-wide grade dispersion and affordability. Once approved, a copy will be provided to the Ministry of Finance for a final financial review.
- E. 1 October- 1 January. Upon approval of the above ministries and working group, the employees may be informed of their new salary. Employees can appeal their salary assignment in writing through their management as outlined in the Administrator's order, but they will continue to be paid at their initial classification until their appeal is adjudicated. Those employees who do not continue/come to work at the new scale will be free to leave the civil service. Military, Police, firefighters, security guards and essential medical personnel will only be allowed to leave their duties with permission of their respective ministers. Employees of the CTF-7, such as security guards and municipal workers will be integrated into the new scale starting 1 October. Short term contract workers will continue to be paid according to their contracts by the contractor.
- F. 1 October 1 January. Salaries for approved Ministry/Commission salary classification plans will be implemented no later than the first day of the month following approval. Employees will be paid their new salary on the last work day of the month. Employees paid under the four grade pay system will be paid at that rate or the new scale whichever is higher. Employees who are paid under the four grade scale will remain at that rate until promotion or longevity/productivity allow for movement to a higher step or grade.
- G. 30 October- 30 January. The first few payments will be in cash. Subsequent payments will be by direct deposit to an Iraqi bank account of the employees choosing. A full month's pay will be issued for a full month's work. Overtime may be paid by individual ministries or handled through compensatory time off. Their anticipated additional costs should be reflected in their 2004 budget proposals as a separate line under salaries and compensation.
- G. 1 October indefinite. New hires after the date of the CPA implementing order will be paid at the new salary rate as of 1 October. USAID (and their contractors) and CTF-7 will use the new scales for new hiring after 1 October. NGOs, independent contractors and international organizations will be encouraged to use the rates. Accordingly, some jobs will start at a lower rate than under the current four grade scale.

Iraq Releases Fiscally Responsible 2004 Budget

The Iraqi Minister of Finance Mr. Kamil al-Gailani announced today the release of the Iraqi Budget for 2004.

The budget provides authority for the commitment and expenditure of money by the Iraqi Ministries for 2004 and sets the fiscal framework for 2005 and 2006. It meets the recurrent expenditures of the Ministries, including a significant social safety net, along with some of the most pressing capital projects, and provides for the most urgent daily and social needs of the Iraqi people.

Commenting on the preparation of the budget, Minister al-Gailani said, "This budget represents an important step towards the rebuilding of Iraq by Iraqis. The Budget was prepared by a team of Iraqi experts, with a series of budget hearings attended by representatives from the various Iraqi ministries, and chaired by officials of the Ministry of Finance."

Consistent with responsible fiscal policy this budget does not rely on increased borrowing, printing money, or foreign assistance.

The public release of the 2004 budget further demonstrates the Governing Council's commitment to public sector transpareucy. On the road to modernization, it is important for Iraq's institutions to be open to public scrutiny. This ensures spending will be directed towards those areas the Iraqi people feel have the greatest need. This transparency will also help reduce cases of corruption and strengthen the overall confidence of the Iraqi people and investors.

However, Iraq has very substantial reconstruction and redevelopment needs that are not able to be funded in the 2004 budget. With this in mind, the Iraqi Governing Council plans to exert all possible efforts to finance the above mentioned needs through activating the national economy and the private sector. The Governing Council also plans to seek the support of the international community at the International Donors Conference in late October in Madrid.

Mr. al-Gailani concluded: "Iraq is a country with enormous economic and bunan potential. By applying sound economic financial and monetary policies, and creating a good investment environment with international donors over the transition, Iraq will restore the economic and financial status which it previously held."

Notes for editors

- 1 The Budget for 2004 expects revenues of around NID 49.5 trillion (USS 13 billion), with expenditures of NID 20.25 trillion (USS 13.5 billion), meaning the Budget in 2004 will run a deficit of around NID 900 billion (USS 600 milhon). This deficit will be funded through refunds from cancelled Oil-For-Food contracts, meaning there will be no need for Iraq to borrow or print money to finance its deficit. In 2005 and 2006, the Budget is in balance, with spending matching revenues.
- 2. The budget reflects the 5 core principles faid out by the Iraqi ministries to drive the economic agenda. The core principles include: economic openness, private sector development, international integration, transparency in Government spending, and providing a safety net for the poor.
- 3. Journalists can obtain copies of the Iraqi 2004 Budget at the Convention Center.

COALITION PROVISIONAL AUTHORITY ACTION MEMO

14 September 2003

Senior Advisor

CPA Office of Management and Budget

To:	Ministry Senior Advisors
From:	Senior Advisor, Office of Management and Budget
	find attached your preliminary 2004 Budget allocation as at 14 September. These is are based on the information the Iraqi Ministry of Finance has received from inistry.
next 48 Memo t	a please check this information with your Iraqi Ministry, and respond within the Hours — ie by 5pm Tuesday 16 September. A checklist is provided in this to guide you. The key thing to focus on is how your Ministry intends to spendtal Projects budget for 2004. List in as much detail as you can.
This is Septem	your last chance to consider your budget for 2004 – it is being published on 24 ber.
Please o	direct all questions and responses to either:

Additional Information

The checklist for you is outlined below:

- Have you listed all capital projects that you can undertake using your Budget allocation?
- Is the operating expenditure aggregate correct, and allocated correctly across expenditure categories?
- Please fill in a brief description of what the Budget will do for the Ministry (please no wisecracks, we know it's austere...)
- · Are the number of employees correct? Not known. Employees correctly
- Please provide in priority order the 'top 5' largest unmet needs for your Ministry. You can provide the remainder by cob 18 September.
- Do you have any State Companies that are receiving budgetary support? If so, what are their names (and how much are they getting)?

1) fresus Opérating
Experses
2) Detartion Contreg
3) / Prisas.

Capital tens

\$ 90

Iraqi State Owned Enterprises

Company Information Questionnaire - Please provide answers on separate sheets with the question # referen

	English
	What is the name of your Company?
	Provide a brief description of your Company (in 200 words or less). Include description of your products, facilities, customers and number of employees.
3	Name of contact person and position held at Company
4	Phone # and email address for contact person
5	How much money in US \$ are you requesting?
6	What exactly will the money be spent on? Be specific, and account for 100% of the loan amount. Describe the products or services, quantity to be purchased, unit pricing and names of suppliers.
7	How does this loan and its uses address your long term goals for your Company?
8	Describe why you need the products or services you intend to purchase. What will it allow you to produce?
9	Do you have a customer for the products you will produce? If yes, name the customers.
10	How much cash do you currently have in the bank? Provide the bank name and branch.
11	How much money is currently owed to you by customers? Provide names of the customers that owe you money.
12	What is the market value of inventory you currently have? Include both raw material and finished goods. Describe the inventory.
	Identify any assets that you can use as collateral for the loan. For example, finished inventory, accounts receivable or property. Provide the market value of these assets.
14	How much money do you currently owe to suppliers? Identify the suppliers by name and amount for each supplier.
15	How much money do you currently owe to banks? Identify the banks by name and amount for each bank.
	How much revenue does your Company expect to generate in the next 3, 6 and 12 months?

Iraqi State Owned Enterprises

100

Company Information Questionnaire - Please provide answers on separate sheets with the question # referen

17	When will you repay the money? Will you repay 100% of the loan at one time, or repay in installments. If in installment, provide repayment dates and percentages repaid on each date.	
18	What are the competitive strenghts of your Company?	
19	Who are your biggest competitors? Include both Iraqi (companies and imports from other countries.	
20	What is your market share in Iraq for the products this loan will help you produce?	
21	Describe the risks to your Company's projections. What could potentially prevent you from meeting these goals?	
22	Provide brief description of the top three executives at Company, including years at Company and relevant experience. Provide CV's on separate sheet, if available.	
23	Provide a copy of your most recent (unaudited is acceptable) historical balance sheet, income statement and cash flow statement.	
24	Provide a copy of your last audited historical balance sheet, income statement and cash flow statement.	
	Provide a copy of your projected balance sheet, income statements and cash flows for the next 3, 6 and 12 months.

Ministry of Finance Budget Office

To: All Ministries and directorates not connected to a ministry Subj.: Instructions of preparing the budget for year 2004

Ministry of Finance would like to refer to the preparation for budget estimations of 2004 (Current & Investment), and the ministries have to present the estimation of their budgets according to the budget forms which are already used in recent years according and also to the estimation bases of the past years.

Priorities should be given to security, services and a good standard of living. Infrastructures and reconstruction should also receive priority in order to enable all economic projects to operate again as soon as possible.

The 2004 budget necessitates that vital needs of people should be studied objectively to provide allocations for them, taking into consideration the limited revenues we can raise during the next year. This means that all official ministries and directorates should start collecting fees from people in exchange for the services these directorate offers.

The Ministry of Finance asks all ministries to adhere to the attached time table and submit their budget to this ministry before 8/15/2004. Discussions with a various line ministries are to be carried from 8/15 to 9/5, the following procedures should be taking into consideration during budget preparation:

1- Budgets of centrally financed directorates:

- a) Each ministry should have a high committee at ministry HQ or the directorate not connected to a ministry HQs to carry out discussions concerning the budget operational and investment according to budget forms and regulations. A total budget according to the ministries (Part) is required.
- b) Each directorate within the line ministries and every department within directorates not connected to a ministry should have sub-committees to discuss their budgets.
- c) This ministry will discuss the total budget of every ministry, so all members of these committees and sub-committees should be well informed about the details of their budget to ensure accuracy and speed.

2- Budget of self financed directorates:

a) The followings should be taken into consideration:

First : Production should be increased according to qty. & quality.

Second: Human & financial resources should be used perfectly.

Third: All directorates and companies should be restructured to increase administrative efficiency to fulfill production objectives of the annual budget.

Fourth: To reduce expenditures as much as possible.

- b) The directorate of Accounting/MOF should be provided with the planning budgets starting from human and financial resources ending with financial plan, all tables and enclosures data that explain the number of production units should be mentioned together with the difference services. All details concerning production operations should be mentioned like quantity, quality, and costs.
- c) The above mentioned budget committees should be responsible to prepare the plan budget estimations before submitting them to MOF.

3- The Investment Budget:

The investment budget should be prepared according to regulations previously followed; taking into consideration the following items:

- a) When asking for estimations, priorities are to be given to basic services like electricity, water...etc. which have direct contact with the life of people; we must ensure the continual operations of these projects.
- b) New suggested projects to support the Iraqi economy and reform the infrastructure to achieve the required development.
- c) Reconstruction projects are to be implemented only when they are proved to be of economic benefit to the country.
- d) Previous consultation with other ministries like the ministry of planning is required before submitting the final estimations to the MOF.

With regards

Deputy of the MOF

Subject: FW: 2004 BUDGET HEARINGS SCHEDULE

Please note that these hearings will be at the Iraqi Ministry of Finance (grid coordinates in the attachment).

You are going to need security escorts to get there for your hearings. and will be there throughout. Your senior CPA advisor should attend with whichever Iraqi from your Ministry intends to defend your budget to the interim Iraqi Minister of Finance.

ensure we have at least three interpreters for the entire period (one for and and one for the CPA Senior Advisor, so the CPA reps can have simultaneous translations).

Attached is a memo on the 2004 Budget hearings schedule.

Regards

2004 BUDGET HEARINGS SCHEDULE

Venue: Ministry of Finance Computer Centre Building (MB 4535 9108)

Objective: One hour has been provided for each Iraqi Ministry to discuss their Budget

submission to the Iraqi Ministry of Finance.

CPA role: OMB staff will be on hand to assist the process and the Ministry of

Finance in particular. We expect CPA advisors to perform a similar role.

The proposed schedule is attached.

Office of Management and Budget

Schedule:

Sunday 31 August

```
0900 = 1000 Ministry of Water Resources (formerly Irrigation)
```

1000 - 1100 Ministry of Agriculture

1100 - 1200 Ministry of Education

1200 - 1300 Ministry of Security Affairs

1300 – 1400 Ministry of Housing and Construction

Monday 1 September

```
0900 - 1000 Ministry of Health
```

1000 - 1100 Ministry of Higher Education

1100 - 1200 Electricity Commission

1200 - 1300 Iraq Science and Technology Commission

1300 - 1400 Ministry of Trade

Tuesday 2 September

```
0900 - 1000 Ministry of Industry and Minerals
```

1000 - 1100 Ministry of Oil

1100 - 1200 Ministry of Justice (including prisons)

1200 - 1300 Ministry of Foreign Affairs

1300 - 1400 Ministry of Interior

Wednesday 3 September

```
0900 = 1000 Ministry of Culture
```

1000 - 1030 Ministry of Transport

1030 - 1100 Ministry of Communications

1100-1200 Ministry of Planning

1200 - 1230 Ministry of Wagf

1230 - 1300 Ministry of Labor and Social Affairs

1300 -- 1400 Board of Supreme Audit

Thursday 4 September

```
0900 - 1000 Ministry of Public Works (Municipalities and Local Authorities)
```

1000 = 1100 Ministry of Youth and Sport

1100 - 1200 Ministry of Finance

1200-1300 Baghdad Mayoralty

1300 - 1400 Central Organisation for Standards

Saturday 6 September

0900 - 1400 Suleymania Region

Sunday 7 September

0900 - 1400 Erbil Region

PRISONS

In the limited time available the following comments should be made:-

It is very difficult to provide building specifications when a full survey of all prison facilities has not been carried out. The figures in the Supplemental provide a generic solution to the best available information at the time.

The original estimate is that the prison population for the size of Iraq will be 30,000. The budgets have been drawn up with this figure in mind. On the original plan was to stand up institutions with 11,000 beds by the end of this year. This has been revised to 8,000. The supplemental aims to add an extra 18,000 beds. A worst case scenario predicts a 38,000 prison population by the end of 2004 (straight line average incarceration rate). There will be a shortfall of prison beds in 2004. Any savings in capital costs can be used to expand or build new facilities. The security situation may well add considerable numbers to the prisoner population depending on the level of violence.

There is an urgent need to bring prisons into action to deal with the continuing security situation and to relieve US military from prison and escort duties. Consequently a premium may have to be paid in order to stand up facilities quickly and bring in the necessary machinery, material and expertise to do so. The volatility of prices that can be obtained locally will also impact on the total price of the contract.

The initial costs were based on estimates by US experts. For example the capital cost in 2001 of Tucson Prison in Arizona was estimated at \$195 million. This was for a 4800 bed facility.

The best prison facility in Iraq is Abu Ghraib. It was foreign built. It would be intended that local quality build would be used if it was thought adequate. More likely there would be a blend of Iraqi and International standards, with some international supervision.

The amounts given in the supplemental refer to bringing prisons up to the minimum standards promulgated in OCPA Memorandum No 2 regarding the Management of Detention Centres and Prisons. This means that the overall operating cost of the prison service will be much higher than the old regime. There will be an incremental capital costs in improving old facilities.

Some of the facilities have been badly damaged and can be restored, others have been completely destroyed (Kan Bani Sa'ad and Baquba prisons) They will have to be rebuilt. The problem is that our picture of the prisons is incomplete.

The start up costs are for fully equipping prisons. Among other things it includes bedding, uniforms for prisoners and officers, furniture, fixtures, and equipment. Also equipment for administration, transport, communications and for security.

Initial operating costs relates to the average cost of operating each facility for a year. We do not have enough data to work out the actual average cost per inmate in comparison to the states. The annualized operating costs is estimated at \$12,000 per inmate per year.

The budget does not include the Kurdish region.
