6. Description Of Task – Government ONLY

   The purpose of this task instruction is to begin the planning, site survey and product development for the deployment of a User Node.

   Task 1 – The contractor shall develop a schedule for the full deployment of the User Node. This will include all activities performed under this Task Instruction and the follow-on effort required to complete this effort under a separate follow-on contract as needed.

   Task 2 – The Contractor shall complete a site survey for the deployment of the User Node and deliver via the DAL a Site Survey Report.

   Task 3 – The Contractor shall begin product development of the architecture, hardware and network engineering drawings required for the installation. These draft products will be reviewed at the In-Process Review.

   Task 4 – The Contractor shall complete an In-Process Review held approximately one week prior to the completion of this Task Instruction and provide the associated products via the DAL.

7. Contractor Technical and Mgt. Approach – Contractor ONLY

   The contractor will create a comprehensive schedule for the User Node deployment.

   The contractor will perform final site survey and prepare site-specific engineering documentation for the deployment of the User Node.

   The contractor will perform impact analysis on current network design/network configurations and identify modification of the design/configurations required to include the User Node into the operational baseline.

   The contractor will conduct an In-Process Review approximately one week prior to the completion of this Task Instruction and will provide associated products via DAL.
