On 9 February 2004, a team of officers, directed by Major General Antonio Taguba, conducted the following interview Major General Taguba was appointed as an Investigating Officer under the provisions of Army Regulation 15-6, by Lieutenant General David D McKiernan, Commanding General of the Coalition Forces Land Component Command (CFLCC), to look into allegations of maltreatment of detainees, detainee escapes and accountability lapses, at Abu Gharib, also known as the Baghdad Central Confinement Facility (BCCF) The panel also inquired into training, standards, employment, command policies, and internal policies, concerning the detainees held at Abu Gharib prison Finally, the panel looked into the command climate and the command and supervisory presence

The following persons were present

The interview is summarized as follows

Sr, O4, AGR, 320th Military Police Battalion. As an S3, I'm responsible for operations and training within the 320th, to include subordinate companies. I'm essentially responsible for accomplishing the mission according to the commander's intent. We've had a variety of missions, since March, to include running the facility at Camp Freddy at Umm Qasr, to running half of the facility at Camp Bucca, as well as the Bucca TOC for the Base Ops, and moving up north to Abu Gharib prison, to run 3 facilities, there, my role is to ensure that each facility operates according to standards, the Geneva Convention. To ensure, despite extremely limited resources, we are able to complete the mission, which ranges from providing escorts, to guarding, feeding, housing, giving water, providing basic human supplies for prisoners, and I do that through taskings to subordinate units

I know that the Geneva Convention, 1949, differs with EPW's versus Security Detainees and Civilian Criminals. It gives the guidelines to how facilities should be established, and what should be provided to the prisoner. We know the basics of what is to be provided, such as food, water, housing, medical care. Well, I/R Battalions are not designed, nor were they trained to handle foreign civilian criminals. Part of an I/R mission is U.S. Confinement. It's been a little confusing, as to whether Geneva 4 applies to Security Detainees versus EPW's. Sir, I can tell you that I don't fully understand, because I've had several discussions, with several different JAG officers, and brigade personnel, S1's, and I really think there is a big problem. We originally had civilian criminals at Gancy. We also had, in other compounds, at Gancy, security detainees. So, civilian criminal, at first, we understood Geneva 4 didn't apply to them. Then, someone said it does, because they're under U.S. control, but they're civilian criminals. These were JAG officers at brigade. I remember, one time, COL. Was having a

conversation with someone maybe at the Magistrate Cell, explaining that Geneva does apply to security detainees, because they're CI's So, there's nothing that has ever been put out in black and white, from JAG channels, as to the differences that Geneva may apply, or may not apply, to EPW's, security detainees, displaced civilians, civilian criminals, which is a whole different area, etc

Nothing at our MOB Station was taught, in regards to I/R Operations. The training plan we submitted, which we had to work between the extremely changing MOB Station training plan, was one of compound operations, and processing, how to go through the processing line. They were the 2 focuses. And of course, daily, were the Rules of Engagement, Rules of Interaction, which are both contained in the Battalion SOP Scenarios? The total lack of support we know we're not going to have, when we get there, which has been the case for the 12 months. And then of course, weapons qualifications, react to indirect fire, briefings on smallpox, medical briefings, that sort of thing. That's all from Fort Dix I can recall right now.

When we closed Camp Freddy, and the prisoners went into the Bucca facility, we were escorts for 2 weeks, so we did refresher re-training on escorts, which was simply following the bus up, following the bus back, to simplify their role. Upon completion of the escorts, we were given 7 days to move a battalion and a company from Umm Qasr to Baghdad. Upon arrival at Abu Gharib, in between setting up the facility in conjunction with the engineers, which we set up the facility in a week, which is unheard of, then, making the place livable for soldiers, there was refresher training on compound operations, processing, and basic I/R Operations tasks

As I see it, Sir, it's ultimately the commander's responsibility, to provide that training, and then it's my responsibility, and, as it goes down, it's the sergeant major's responsibility and the platoon sergeant's responsibility. In conjunction, though, it's also the HHC Commander's, and the First Sergeant's responsibility. So, the 3 and the HHC work very close together, to accomplish his needs, requirements, training, and the battalion's overall mission. Actually, it's E5 to O5 responsibility.

When a training plan is set up, there is an Observer/Evaluator, someone who assesses the training. All training is AAR'd. We base the training on Battalion SOP, 3-3.19-40, which is Interment/Resettlement Operations, and parts of AR 190-8. So, basically, Sir, we use the FM's, AR's, and SOP's, to accomplish the mission, then you pull the training tasks that are required to do that mission. The entire chain of command has eyes on the training.

All of my cooks are in the compounds Mechanics, we have 3, which only leave to for HHC Admin, each If I could back up, nothing has been doctrine, since the day we hit the ground We have 4 I/R control teams, however, at Camp Freddy, we were running 16 compounds. The math doesn't work. There are not enough I/R control teams, which have the specialized training, to run a compound. You then have to take your guard companies, or they may be combat support companies, train them OJT, because there's no time to have a day of training. That hasn't existed, since we took the facilities. Then,

To run a compound, a 500-man compound, there're 14 MP's in an I/R control team There are 2 E7's, 2 E6's, and 2 E5's, per 12 hour shifts You should have almost 7 MP's on a compound, not counting the MP's in the 3 towers. We are tremendously low, due to of REFRAD's Our battalion HHC is authorized 56 L/R Control Tearn MP's. They run the compounds. I have, now, 33 That's it I run 8 compounds. So, on one compound, you should have, at least, 4 MP's per shift, on the gate, on the ground I'm lucky, if I have 3, so I usually have 2 MP's Each compound is authorized a 71L, who does all the paperwork, files, etc. and they're also authorized a supply person, who gets all the supplies for that individual compound. Due to the fact, that we've also been running Base Ops, at the BCF, all of our supply people have to go take care of that So, that leaves your MP's and your 71L on shift in the compound So, during the day, you may have 2 - 3 MP's and a 71L, or 2 MP's and a cook, or supply, or an electrician. Most of the soldiers, doing that now at the BCCF, also had to do it at Camp Freddy They've been, for lack of a better term, "running" prisoners, since April

It's a resource issue, Sir Currently we are at a C3 rating. Here's the problem with USR - we could have people in medical, in Landstuhl, and they are still on our books. We still count them I have 112 soldiers on the ground, and I'm authorized 148. The reason we are down to 112, is REFRAD's Some are medical, some emergency leaves turned hardship discharges And, in the reserves, you don't get those back. Your TDA gets locked upon mobilization. Even when the 10 from the Camp Bucca incident were pulled out of the unit, they still counted against our unit as available soldiers

The service support personnel will never work the compound, without the presence of a military police person, there They go through the Rules of Engagement, Rules of Interaction, handcuffing, less than lethal training, how the compound operates, which is more of an SOP thing, than a formal training, searches, and the basic MP functions at a compound

When the second version of the ROE came out, it identified the steps, to prevent an escape, and treating all with dignity and respect, and the steps for the levels of force that are utilized It defines hostile intent, one's inherent right to defend himself, halt in the native language, show your weapon. At first, warning shots were authorized, now they're authorized. Which changes, and it is briefed daily. The regulation does not authorize warning shots

The ROI are the Rules of Interaction, i.e. fraternization, how you talk to them, cultural sensitivity, not giving, or accepting gifts, you day to day contact with them. New soldiers are briefed. They read it, and walk through scenarios. It's posted in every tower, every compound tent, and every control area It's posted on the wall The Geneva Convention is not posted. Soldiers should know it only to a degree. I don't know every article that applies to prisoners or detainees. We've had the training

After support personnel have had training, they will observe an MP, before being allowed to perform a task. None of them work in Tier 1A and IB. The hard site should be MP pure

After the incident came out, one soldier was identified as being a mechanic, and one soldier was a 71L. I don't know if they had been through the training

I know for a fact, that if I were to tell my soldiers, to hit someone in the head with a baseball bat, they wouldn't do it. I believe one of the soldiers involved had a past criminal history, which, if it had been indicated, would have prevented him from working with prisoners. They saw interrogations, and how newly brought in prisoners were broken by Ml. I think, they were criminal individuals, who took the opportunity to do something they knew was wrong, after they're senior leaders departed the area.

It's common for NCOs to work all day, get a couple hours of sleep, and then go back and do their rounds at night. It's very common, due to the fact that there's a lack of personnel. The way I/R battalions are MTOE'd they are not designed to run 3 different facilities. In my S3 section there's an O4, an E9, and a couple of E6's

The panel stopped, to discuss MA

Finished with their discussion, the panel gave MAJ all a list of items, to be addressed, and brought back on a Sworn Statement

On 10 February 2004, MAJ returned, to provide a sworn statement, and documents, outlining the program of training for support personnel transferred into military police functions. He also presented documents outlining his unit's request for logistical support.

MAJ then made the following statements

Sir, on the CD are all the Situation Reports (SITREPs) from August to present, which went up from the 320th to the 800th, which I know were then wrote up, and sent to CJTF-7 Also contained on the CD are Troops to Tasks, I couldn't find all of them Also, I printed out several SITREPs, in case you wanted to view them right away. There also emails on logistical support

COL reads a swom statement made by SGT and MAJ responds as follows

We were attacked, and there were suspects, I believe a woman and her son They brought to them to the site, directly inside the ECP inside the walls. We responded I went down, and the IRF was called to secure them. The MI folks later pulled up They approached the 2 individuals that were on the ground, and there was yelling. Then, when coming up to me. they took the individuals, and moved them back, I recall ILT while I was on the radio with the TOC I heard him say something to me I didn't understand him He said something like, "I'm not going to let them continue" I told him to stand by I went with him to the other side of the vehicle I saw one of the MI soldiers push the male lraqu from the back of the truck 1LT was already there I came up, told them to stop, got all of their names, instructed the IRF to do statements. We went to SFC who is the 1SG of the 519th MI Company, advised him of the situation, and told him IRF was making statements. He informed me that 2 of the soldiers that went out there, he shouldn't have sent them, because their friend was killed. He asked me if I saw any physical abuse whatsoever, and I said, "No, but I could see that their emotions were above being able to handle the situation in a calm manner." After ILT intervened, I told the one soldier that he was to have no contact, called over his NCOIC, as a matter of fact, and told him, to put that soldier in the front of the truck, and he was to have no contact with the 2 people in the back. The NCOIC was then required to nde with the Iraqi female and male up to the holding area, where they could then screen them, to see if they had anything to do with the attacks. Come to find out, they supposedly were doing their water irrigation, at night, as many of the farmers do

I never witnessed any physical abuse. I wouldn't tolerate it. I'm very sensitive to how prisoners are handcuffed. Our soldiers are more very sensitive, because of what our soldiers went through. I won't even allow profanity, though they don't understand what you're saying, and it's culturally insensitive. I heard the yelling and screaming, and profanity, which I addressed, when I went to the back of the truck. It's uncalled for, because they don't even know what you're saying. No, Sir. At no time, did I witness any prisoner abuse. This incident was immediately handled by the MI chain of command, Sir.

The interview complete, MAJ was dismissed

On 12 February 2004, MAJ returned for a follow up interview, and to provide the 320th MP Battalion's SOP, regarding the use of dogs. The interview is summarized as follows.

The SOP was prepared 10 December CPT produced the work schedule. He was the NCOIC of the dogs, because he was the senior handler CPT would review and sign it, and then I would sign it. This was briefed to the Commander. We originally received two Army dogs, then, three Navy dogs. The two Army dogs are patrol/narcotics. The three Navy dogs are patrol/bomb. We originally set it up, where all the dogs would rotate through the ECP, Entry Control Point. I think that's the one LTC the horizontally signed off on. When I came back from leave, I thought it was best to strictly use the Navy dogs at the ECP, and keep the Army dogs in the compounds. As far as I know, the dogs are all certified, and we also allow time for their training. I believe it's a mandatory 4 – 6 hours a week.

Initially, there was a little bit of "we – they," when we put the two services together. The Navy dogs fell right into place, but there was some concerns about the Army dogs. Understandably, they didn't want to work the ECP, because they're not bomb dogs. There was a strong personality problem with the Army folks, whereas the Navy folks were here to help. They came from Sicily, I think, and they're here to work for you. So, I had gathered together the 5 dog handlers, my Operations Sergeant Major, CPT. Hampton, and, I think, one of my Operations NCOs. I had a meeting right outside the TOC, and said, "By virtue of military rank you're on this installation, therefore you work for the battalion. So, this is how the schedule will be set up. This is what the objective of the schedule is, what dogs will work where, who will focus on what. Whoever has a problem with it, we'll be more than happy to call your chain of command, and you can pack your bags and leave." I didn't have any problems after that conversation.

I don't know the politics of it, but 1A was given to MI for higher value detainees. Then, CPA came to me, and said we had to clear out 1B. That was a problem, because I had all these juveniles, some criminal, some security detainees, and females in 1B, because I had no place to put them. So, we moved them out within two days

It wasn't an easy transition First, I had to gather the resources to do it. Then, transfer the paperwork and disks with all their information down to that facility. Then hopefully, they have the capability to open up the disk. But, getting the resources to do everything was a strain, every time we moved somewhere.

We moved them out It sat vacant for at least a week I was getting females and juveniles, and I had to put them somewhere, because I wasn't allowed to turn away prisoners. So, I put them in IB. Then, the MI and CPA came to me, and asked, "How come there's people in 1B?" I said, "Because you all have me handcuffed. You've tied my hands. You told me to empty this facility. There's no place to put females and juveniles. I can't mix them with the adult male population, obviously. This is the only place I have to put them." So, they finally agreed that they had me handcuffed, and I had

no choice I had to accept them, put them in 1B, and get beat on by CPA and MI. Then, turn around and get the resources together, to move them down to Clark or Mustafa. So, it was always double work. That was the biggest issue I had

I'm the S3, and I have my hands in everything. As I tell my section, we are the heartbeat of the mission. I'm also AGR, so I'm full time. I don't know, Sir. I like to make things happen. If there's a problem, I'll fix it. If there's an issue with a soldier, I'll help them. Sometimes, I go to far into people's sections, but it's always for good reasons.

LTC articulates the priorities for the Battalion, at times, in front of the Battalion and in staff meetings. We have a staff meeting, and a force protection meeting everyday. There, he puts out guidance, taskings, and goals

The entire release program is broke. I'll start by that The Conditional Release Program is gaining more visibility, than the regular Security Detainee Review Board. We get a list. If it's for Security Detainees, the list comes from Brigade or the Magistrate. They would be the results of the Security Detainee Review Board, which determined who should be released. Once we received that list, we would find out who was where. Then, our S1 folks would go to MI, to ensure that this individual is not MI Hold, or not on CID. Hold, as well. They would check it with the Magistrate, CID, and MI. Then, we'd set up a release date, which was usually two days later, sometimes later. We'd take the list to the compound, and they would verify if those people are on their compound. Once that's done, we'd set up a plan, to have them pulled out of the compounds, taken up to the holding area for outprocessing, put them on vehicles, and take them to eight different locations in Baghdad, to release them

At home station, we have I/R Companies that are War Traced to us They are not the same as our Peace Traced. The 305th MP Company is in our War Trace, as well as our Peace Trace, so we approved their METL. We did identify Battle Tacks – Establish an I/R Facility, Provide Logistics in Support of an I/R Facility, Accountability of all EPWs, and Force Protection. When we went to Abu, we identified I/R and Guard Companies. Some were Combat Support Companies that were dwindled down to a Guard Company and given Guard Company equipment, and some Guard Company training. The training that we gave them consisted of right seat rides for 4 –7 days, depending on their Company Commander's assessment of their ability to do the mission. All the tasks were very similar – searches, handcuffing. The only real difference is the towers. My battalion doesn't have individual tasks for towers. Geneva Hague Convention training is done twice a year. It's mandatory twice a year. I can't think of anything related to Geneva Hague in our METL. Before we left home station, we had all Ts in our METL. Assessment, except Force Protection, which was a P.

The interview complete, MAJ was released

STATEMENT (Continued)

- the alleged incident. CID had already been notified and had briefed me on the incident in question and had shown me the pictures. Upon viewing the pictures 1-had to "take a break" as I was in shock as to what I was viewing. It was obvious that these soldiers had acted independently to commit these inhumane, criminal acts. These were obviously the acts of criminals and these individuals should receive the maximum punishment allowed. It is obvious that the leadership did not have an indication or knowledge that this could happen or was happening. The Commander, myself, staff and NCOs of the 320th MP BN would not allow such activity. This Command has 'preached' against any type of violations of the ROE. ROI and has constantly reviewed/ lectured the humane treatment of prisoners. If the command had an inkling that these individuals could have done such acts, these individuals would not have been permitted to be in the presence of prisoners. If the Command had known of these activities, these individuals would have been apprehended immediately. It would be my opinion that prisoners these soldiers had seen similar, yet, possibly not to this extreme, activity by the MI personnel during interrogations of these prisoners. They then took it upon themselves to conduct such criminal activity. I have been a Military Police Officer for 17 years, involved in all types of investigations, to include undercover work with the German Police. I was a RA Officer. Reserve Officer and now AGR Officer. A criminal will perform a criminal act if committed to do so, regardless of the amount of acts.
- 6 Spot Checks Command presence has been a vital role of NCOs and Officers in the Battalion (subordinate companies included) especially with this particular mission. Three confinement facilities, over 6,000 prisoners and extremely limited resources (as seen in the Troop to Tasks). Leaders at all levels randomly go through the facilities at all hours of the day and night, from the BN CDR to Squad leaders. I pesonally know this to be a fact. However, due to the extremely limited assets constant addition of missions, REFRADS, work to be done during the daylight hours (0600-2100), Officers and certain Senior NCOs cannot be at each facility every night. The issue of lack of personnel has gone to the extreme that CO CDRs. Senior NCOs, BN Staff pull duty at a guard post, escort, or the compounds to give their soldiers a day off, to reduce the chances of complacency, stress and misjudgement. Would it be possible to commit such acts if leaders are checking on their soldiers? Of course. Again, someone with the obvious frame of mind and intent of these individuals will accomplish their cowardly tasks at their own time and pace. Based on a theory that thus should have been prevented, there would have to be an Officer or Senior NCO for each soldier in each unit. This BN ensures that there is an NCOIC for each compound, shift, escort, mission. There exists three facilities, 2 Entry Control points, Force protection points, Holding Area, Processing Line and Clis. Based on the strengths of the units, they must be split into several locations to accomplish all missions which results in the unitization of Senior NCOs and Officers to have to pull shifts at times to meet mission.
- 7 Actions in addition to what the units have been doing to check on their soldiers at all hours, a DA Form-6 has been instituted at the Battalion to have every E7 and above to make nightly sporadic checks at each facility. Deposite its effect on daily missions, it has been implemented. ROE, ROI more detailed guard mounts are ongoing
- 8 Since the 320th MP BN assumed the mission of the British Corps Holding Area in March 2003, which had 16 compounds (versus the 4 compounds that an I/R BN doctrinally can operate), to the mission now at BCF, required number of personnel has been a significant issue. Despite this, this unit has accomplished every mission assigned, performing non-doctrinal missions under resourced, forced to create new doctrine. This unit has processed, safeguarded, fed, housed over 25 000 detainees.

STATEMENT (Continued)	
The 320th has housed more EPWs, Security Detainees, and prisoners then any other unit is supported by the Theater accountability roll ups and reports. We have had 13 escapes in 1 These escapes in relation to the number of prisoners equals 052%. I was asked by the panel what we could have done differently. Here is what was done to a personnel and resources. After many Requests for Forces cut down the I throughout the Battalion. Senior NCOs and Officers would perform their daily missions, in night shift. Officers and Sr NCOs would pull shifts for their soldiers. Fought the opering resources were received. In addition, I instructed an NCO in the S3 section to compile all missions, ensured that the Companies created and maintained SOPs for their missions, review Perhaps a standard training team could have been established to move through out the units I feel obligated to mention that during mid to end of September, the CITF-7 IG visited BCI the outbrief to the BN CDR, BN Staff, Company CDRs and leadership of other tenant units outbrief with "There are the poor, weak and the forgotten, you all are definitely the forgotte challenge of being resourced properly, the constant mortar attacks, and the increasing prison to the standard properly, the constant mortar attacks, and the increasing prison as BCF was declared an Enduring Base. However, no additional resources in the armit summation the 320th MP BN accomplished their mission, and continues to do so. Despit declication to duty, loyalty and training persevered. Mistakes were made, yet, corrective as implemented by the Command. The Battalion Chain of Command was in constant communication.	I months, with 5 different tacilities attempt to mutigate the shortage of R&R leave from 1957 to 55, rest for a few hours and then work of new compounds until proper SOPs/MOIs for all different newed and approved by the BN is a leave to be some some some some some some some som
soldiers. I had absolutely no information that any type of prisoner abuse in any degree had steps would have been taken to ensure that such actions ceased and actions against those inc

NOTE Non-MP personnel were placed in the compounds to provide additional and required security for the MP on duty. TIAlso, Non-MP personnel Work with a MP at all times. If they are placed in the towers, following the above training they right seat ride with a MP for a minimum of 3 days. Also, the Admin personnel are assigned to the compound Control Teams per the MTOE. In addition to providing additional security, they maintain the files and logs. The Non-MP personnel are given this training in the event they need to be utilized, yet again their hands on with prisoners is limited unless required.

MAJ CJTF7-320 MP BN S3 MAJ CJTF7-320 MP BN S3 From Sunday, November 02, 2003 7 48 AM Sent: Τo Cc FOOD Subject

ALCON

Have you ever experienced about 80 prisoners standing in line at 2130hrs at night, cold, and being told that the vendors do not have any more food? Welt this is becoming a nightly routine, and because " was there I can tell you it is a very unpleasant experience. Why is it so difficult to bring enough food. That is what the MP (soldiers, are asking every meal due to the fact that they, not you, or me, have to deal with it every day. So I guess my question is who in the helican fix this so that we can at least give the soldier the basic necessary tools to guard prisoners, without the n having to work about a riot, fight or other related problems in the compounds during meal times. On by the way, you now know why we have to have MREs on hand every day. So please do not question the ordering of MREs, we need them to feed prisone's even though there exists a contract for food. In the mean time I would simply suggest that someone call contracting, the vendor or perhaps Ray Parks (though that conversation will be filled with promises and not results), and fix this continuing problem. Unfortunately the basics required to "house" prisoners food, lights, prisoner supplies is still a serious issue

🦟 🦟 FW SIR Prisoner rigt

MAJ

As you know we had a very serious not last night in Vigilant. Currently there are 689 prisoners in Vigil, in The compounds, based on the segregation requirements are bushing at the searns. I cannot emphasize anough the need to reduce the population in Compounds A, B, & C. This is an unstable situation which is putting the lives of the fill and soldiers at risk. It have been to many prisoner nots since March and I can tell you that last riight was one that call there turned real bad real quick. The design of Vigilant places the MP in a dangerous situation in the eye inclined with so many prisoners. We must reduce the population in Vigilant ASAP. The situation last night is simply situated to the time being and could erupt at any time. Please forward this to whomever can expedite the process.

As you can see from the below SIR, the issues are that there are many Security Detaineds that have been best or for giperiods of time and 1) Not interrogated yet or 2) have been questioned months ago and are still being hed inholded in the process, yet we MUST increase the speed of the interviews, release boards etc. In order to maintain since peach test high. It asked the Prisoner compound representatives to provide me altist of prisoners that have not test seen. Yes to do know that there will be many on the list that have been seen, but will put their numbers down hopping multiple them in It also know that your BDE gives you prior test however, that does not maintain peace in the compounds.

F.Y1, the prisoner compound reps request that someone of some type of authority meet with them labillar in a tighter process. From last night's events, 1 can tell you that this issue will not go away.

Once again, I cannot emphasize enough the tack of stability in Vigitant and the need to reduce the coputation

7 A prisoner Riot began when an MP broke up a fight between two prisoners. The prisoners were throwing friority water cans, and rocks at the MP's. The prisoners indicated that the riot began because the MP's broke up the fight an subdue if the offenders and because they wanted to go home. The 320th TOC dispatched the IRF and QRF. Shortly thereafter, the riot was quelted due to diplomacy by the S3 and no injuries occurred. Alarm clocks were requested and issued. Additionally, the prisoners indicated that they have been in the compounds upwards of five months without being asked any questions by MT. This is why they wanted to go home. The prisoners will provide a list of any prisoner who is similarly situated. MAJ will make an inquiry as to why these prisoners have not been questioned with MI. He will their inform the compound reps of any information obtained. The riot was quelted and there were no reports of any makes.

the light sets in the by Mr some otherway I hope the above i escapes, all of wh on this above our	day when you were here and for the past how many months I addressed the light set issue the repair of a compounds as we were told was supposed to fix the light sets. Now I am being informed BN PBO, that there has not been a contract awarded so the light sets cannot be fixed unless included is this the case? And if so, why wasn't I informed after the hundreds of emails. SITF'EP requires etc. Info is not correct. Bottom line, the compounds tack the proper lighting to protect soldiers prisoners and lich is MISSION. I am not sure why a greater emphasis for the past couple of months has not even put level. We are talking about soldiers, safety and prisoner saisty and the prevention/deterence of escaps of the status of the repair of light sets. I know that issues are being worked to bring Amiltan light.

While I am addressing basic necessities, Contract Meals. Disaster That is the best way to describe this issue. Short hundreds of meals every feeding, bugs and dirt are found in the meals several times a week, and for the past two days prisoners have been vomitting after they eat. That coupled with the fact that their arrival time varies transdoubly. This is of great concern as Ramadan has begun. We are now out of MREs for the prisoners and are attempting to get some today from the 541st. We are just about at 4000 prisoners between thee locations, and as each day gets by the tension within the prisoner population increases, obviously. Yet, simple fixes food, would help tramendously.

I appreciate your immediate assistance with these issues

locations to here, yet the number that I have seen will not fix the problem

Food is not just late, there isn't enough. Our MPs. Medics and field surgeon can easily identify bugs, at ats all out and they did. We talk to the people who bring the food and all they say is that they just deliver. We submit head and day and strongly suggest a 10% overage as BUCCA does and they agreed to that. Instead they are 30% short in liquids this long existed before was even the DEP CDR. As for taking the prisoners word I think we have user computers a little bit longer than most. Parks is full of shit and not the least bit trustivorthy. Willy doesn't anyone sering of from Victory.

The Brigade Deputy sent an e-mail to you on 22 OCT 03 that the services at the SOW for Baghdad Central is to be awarded on the 28 Oct. This will give one contractor and the services at the site and that includes maintaining the light sets. For food, yes he has been late but he can not control 1AD road blocks and closed roads for IEDs. They are constructing a kitchen facility there on site and like help with the delivery problem. For head count, your unit must submit a timely head count to them. If you get prisoners in after the head count is given to the contractor then they can not deliver food they do not know you need. The real hadren facility on site should also help solve this problem. The contractor has people with the food from the Fether to your site. They eat the meals and I would like to know who from your staff is inspecting the food before to give it. The prisoners? Who is making the charges that there is dirt, bugs or what ever in the food? If it is the prisoners I would take that with a grain of salt.

As for your light sets. There are light sets coming from Bucca by rail and from the 744 by air. Moving assets in theater takes time. I talked to Mr. Parks about working on the fixed lights and the light sets. Your people tolchim to do a survey and give them the information before starting work. Also, Mr Parks needs a bulb that goes into the fixed lighting system so he knows what to get

MAJICUTE? 800TH MP 8DE-S3 724 MP ALOC To,

Cc. MÁJ CFLCC/3A FWD-PMÓ Subject SRE MWDs

The situation here at BCF is now critical. Last riight we had a significant riot in Camp Vigilant. MWhs are a mus and we need them asap. We currently have 4500 prisoners in three different locations. We need the Jugs We have the housing for the doos and handlers (the engineers are building kennels). We can support the personnel. For some reason this would seem easy simply based on the population at Bucca versus here. In addition we are recoverd here is supers. from BUCCA that have been there for months and they are causing a great deal of products the entered to the thinasap? Please advise I cannot emphasize enough how critical this is now

Court that I was to

Ma'am ALCON

I would ask that this be reconsidered. I have removed all M16s from the compounds as we do not ask adequate weapons racks to secure them. If all 9mms are to be removed I would request that all be replaced by shiptowns (non-lethal). That would require the BDE to task other units to provide shotguns as we (BN & COs) would not have enough. Again, non-lethal would be great if the BDE can provide the weapons. I can relay many incidents the carrying of a weapon has prevented a more serious incident. The compounds are maxed and extremely unstable Removing weapons from the compounds would place the lives of the MPs in danger.

I believe that this assessment is not one of accurracy, and is made with a lack of expending the type of internment/prison facility. I am extremely concered that this is not based on experience of operating a lactive and up to 500 prisoners that are simply held in by wire and not a hard site facility. We are on the ground and have near upgrating facilities since March with over 15,000 prisoners.

As we all know this is not a doctrinal mission and not that of Desert Strom where many of the plaster placify surrendered and "enjoyed" their stay with food imedical care and clothing. This is not a "by the book imission, not MET ITC has required that traditional doctrine be changed. This is not a defensive response yet one of grifal colors hosed on fact. If horiestly believe that my soldiers lives would be in jeopardy. It am at the compounds daily and right: Thee the personality of the compound and its lack of stability. Please do not take offense, but that cannot be seen for anywhere but here. Many of the MP approached me when I removed the M16s as they were not comfortable with the algorithm firepower. If believe that removing their 9mms will make them even more uncomfortable and extremely once held. The MP who questioned the carrying of weapons is from the 372nd, and has not operated such a facility since inclination and has only been in his position for a couple of weeks. Experience is not there. We have held 3 miles 3 contributes shootings in the past 4 days. If cannot emphasize enough the lack of stability within the compounds.

Each compound only has at the most 3 MP on the gate. In the event that the prisoners (10) or so start in the gate which has occurred, how then would an unarmed MP defend themselves? Keep in mind these facilities are but over landfills and the prisoners daily make home made shanks and weapons. They would not need to take a veacon it on the AIP to kill an MP. They would bring one with them. We remove these types of weapons daily from the conscious.

SCP. Unfortunately this is completely not correct. If you question every (17) LR BN in the system as to when the information in their SQP was obtained, the reply is that it was given to them. The 320th SQP was requested by the Validation team at Ft Dix and the NDRS folks at the Pentagon to be distributed to all other IF BNs. The same slenda of operation has been used, again, since March.

We are required to transport prisoners to the Medical lacility. We are not provided with the proper cansomic onto transport prisoners. Additionally, there are 2 MP that transport the prisoner to the medical clinic

I am at the compounds at least 3 hours a day and 5 hours at night. On the spot corrections are made asneeded. It is an issue of manipower. Overwork, lack of days off, as we all know, leads to routine, boredom and complatency with any task. This is addressed and reiterated daily.

I would again reiterate that this be reconsidered based on the above allow for additional training. If that it what is behered to be needed and relevaluated. I strongly request that either the 9mms remain or event MP is armied with a tom-lethal shotguri. MPs escort the prisoners many times a day outside of the compounds to be trash and of the destails around the compounds. They need require a weapon. Keep in mind again, the prisoners do have weapons in the compounds. They need require a weapon. Keep in mind again, the prisoners do have weapons in the compounds. The cannot take the non-lethal shotguri from the front of the compound. If we do the MPs at the gate would rot lave any type of weapon at all totally defensive. I would submit another COA to be securing the 9mm in a fock that in the ammunition separate. Yet, shotguris would be required. We have experienced that weapons are required in the run year. The lowers cannot safely engage all areas of the compounds.

DECLASSIFIED

TY U.S. Central Command

Division 1 5 OCT 2004

The facility is not designed for the MP to have an escape route if the prisoners rush the gate or come over this wire. This riots of this magnitude happen, as experinced at Camp Freddie in BUCCA. Last hight we had to call an additional 70 kMPs from the living areas to quall a riot, where three prisoners were stabled and several were beaten with tent pries. The kMPs had weapons which I whole heartedly believe kept the prisoners in the wire.

I have spoken to several of the MPICO CDRs and they have relayed their concerns of placing soldiers in the far liter without weapons. They also believe that weapons are required in the run way based on the prisoners the MPs are securing.

I would not continue to empahsize the request to reconsider if I did not believe that weapons are aline less), thill retare the compounds
