*Issue Title (Duplication of Effort):  
M-001 MILLER REPORT Item 3a, Recommendation, pg 2*

**(U) RECOMMENDATION / OBSERVATION:**

Establish a robust coordinating authority to direct and coordinate all HUMINT collection and analysis in Iraq. Supplement this authority with a collection management operation focused to support the needs of the Global War on Terrorism (GWOT), the Theater Commander and CJTF-7 Commanders' intelligence and targeting objectives. Additional resources are required for the CJTF-7 CJ2X to sustain effort.

*Issue Title (Unclear Priority Definition):  
M-002 MILLER REPORT Item 3a, Recommendation, pg 3*

**(U) RECOMMENDATION / OBSERVATION:**

HUMINT collection priorities were not clearly defined, leading to ambiguous collection efforts. There are a large number of collection priorities that require a clear prioritization as to which requirements support the commander's critical information requirements.

**(U) RECOMMENDATION / OBSERVATION:**

Expedite the exchange of Counterterrorism information and analysis between collectors in the field and the national intelligence community by integrating the Interrogator Tiger Teams with analysts at the CJTF-7 CJ2X and national intelligence community through JITF-CT. Energize the analysis-collection feedback loop of the intelligence cycle with robust, timely, GWOT oriented, collection management planning and execution.

**(U) RECOMMENDATION / OBSERVATION:**

Establish and train interrogation Tiger Teams comprised of one interrogator and one analyst, both with SCI access. CJTF-7 has established an initial cadre of integrated Interrogation Tiger Teams from current assets and scheduled deploying interrogators and analysts to attend strategic interrogator and analyst training at Tiger team University, USAICS, and Fort Huachuca in October 03.

*Issue Title (Inadequate Information Systems):*  
*M-021 MILLER REPORT: Item 6, Recommendation, pg 7*

**(U) RECOMMENDATION / OBSERVATION:**

- Create a robust automated knowledge center, incorporating information and documents currently located in diverse data stores to allow for sharing of all information on internees: OPTIONS (ref pg 11)
- Implement a theater level network that supports folder, file, and document sharing.
  - Ensure bandwidth is adequate to support the network traffic and all the users.
  - Ensure that all units have access to the network with adequate number of workstations to support the mission, especially for those units that capture and/or initially process internees and those units that conduct analysis and interrogations.
  - Develop a database that incorporates the various data stores, from the time of capture and through the intelligence analysis and interrogation process.
  - The web-based Joint Detainee Information Management System (JDIMS) developed for and currently utilized by JTF Guantanamo, with some tailoring and modifications, will be adequate to meet this need of a consolidated internee database. This database also contains a collection management and dissemination module that manages all requirements and reporting on internees. It also contains an online reports writing feature, which allows the analysts and interrogators to create reports and immediately share information.
  - The Detention Information Management System (DIMS) also developed for and utilized by JTF Guantanamo to capture initial detainee information as well as operational data gathered by the military police, will allow for input of internee information from the time of capture and throughout their stay at the detention facilities when not being interrogated.
  - A Joint Detainee Information Management System-Iraq will share data with JTF Guantanamo detainee database and make it available to the intelligence community. By sharing detainee information, the intelligence community will benefit from a web-based single source of detainee information readily available to them via the SIPR network.

*Issue Title (Inadequate Information Systems):  
M-021 MILLER REPORT: Item 6, Recommendation, pg 7 (cont.)*

**(U) RECOMMENDATION / OBSERVATION:**

- A similar system should be implemented in Afghanistan for the detainee operations conducted there.
- The goal of a worldwide-integrated detainee database is to address the needs of detainee interrogation operations and to share information regardless of location. It is the tool to bridge intelligence and technology in order to achieve information dominance and efficient operational control over the detainee/internee population and allow for near-real time data mining, information visualization, and intelligence exploitation to combat the Global War on Terrorism.
