Synopsis of medical response for ISN #693

- 0058: Detainee arrived in Detention Clinic by Guard staff
- Detainee unresponsive, apneic, pulse-less, nonresponsive pupils fixed and dilated, mouth clenched with apparent rigor mortis, cyanotic blue around mouth
- 0059 CPR Initiated
- Detainee noted to have cotton clothing material in mouth and upper pharynx. Removed w/ significant difficulty due to jaw rigor mortis
- Cardio Pulmonary Resuscitation re-started
- 15-liter Oxygen nonrebreather w/ Ambu-Bag
- 18 g I.V. started in left AC with Normal Saline
- 0103 AED pads attached determined to be in non shockable rhythm
- Cardio Pulmonary Resuscitation restarted
- 0105: Detainee given 1 mg Atropine IVP
- Detainee continued to have no respirations and no pulse without CPR
- CPR continued
- Attempts at endotracheal intubation failed secondary to significant suspected rigor mortis in mandible. Several teeth broken in attempts to open mandible
- Respirations w/ Ambu-bag restarted with CPR
- Apnea, pulselessness, unresponsiveness reconfirmed w/ obvious rigor mortis. Obvious cyanosis noted
- 0115: Detainee pronounced dead by (b)(3) and SMO at GTMO JDG Delta Clinic

NARRATIVE SUMMARY

10 June 2006

Number: 888-00-0693

DOB: 1979

Language: Arabic

In process date: 18 June 2002

Allergies: No known drug allergies

Past Medical History: History of nephrolithiasis and urinary tract infections
History of peptic ulcer disease
Hunger striking 7/02, 7/05, 8/05, 9/05, 10/05, 12/05
Hunger striker – enterally fed from 12/05 until 6/06
Chronic knee pain
Chronic testicular pain – Varicocele
Old 5th metacarpal fracture stable

Past Surgical History: Right Mandibular abscess/cyst incision and drainage in July 2002.

In-Process Medical History: He arrived at Guantanamo Bay in good health. He had a 2cm scar in left frontal, multiple scars on scalp, superficial abrasion on left pinna and right cheek. He was found to have tenderness epigastrically on entrance physical exam. He complained about chronic testicular pain and dysuria on entrance history. His weight was 172 pounds with a BMI of 27.

Detention Medical History: He had access to medical care on a daily basis. In July 2002, he was treated for right mandibular abscess/cyst and required incision and drainage with multiple dressing changes. He was treated for a left otitis media in July 2003. He had a contact dermatitis in February 2005 that resolved with hydrocortisone and benadryl. He has complained about chronic testicular pain and was found to have a varicocele in February 2005 and was given scrotal support for comfort reasons. He complained of chronic knee pain and treated appropriately with anti-inflammatory pain medications and exercises. He has been a repeated hunger striker during 2005. In December 2005, he was worked up extensively for significant weight loss. After complete work up was negative, detainee admitted to being a covert hunger striker. He had been seen for inflammation of his nasal turbinates due to prolonged enteral feeding while on hunger strike. Evaluated by otolaryngologist in April 2006 for this issue and resolved with some topical antibiotics. Detainee was a prolonged hunger striker who was enterally fed for 5 months. He was 113.5% of IBW with a weight of 165lbs prior to ending his hunger strike and was returned to the regular blocks. Detainee brought to clinic on night of June 11th after committing suicide by likely asphyxiation from

obstructing his airway. Detainee declared dead at 0115 after a significant attempt to resuscitate.

Detention Psychiatric History: No known psychiatric history.

Detention Inpatient History: Admitted to detention hospital for weight loss work up in December 2005 and later enterally fed in the hospital before moving to the feeding blocks.

Detention Surgical History: In July 2002, he had incision and drainage of right mandibular abscess/cyst.

Dental History: He had access to routine dental care while in custody and in May 2004 and May 2006 for a routine exam and cleaning.

Eye Exam: He had access to routine eye exams.

Current Health: He is currently in good health on most recent exam with a BMI of 26.

Medications: None

Immunizations: PPD negative; MMR 4/03; Hep A/Hep B (TWINRIX) completed 10/03; Influenza 10/03; completed DpT/Tetanus 4/04. Hepatitis A, Hepatitis B, Hepatitis C and HIV screens were negative. He is not G6PD deficient.

Physical Examination: Deferred

Radiographic Studies: Not applicable.

DETAINEE'S IDENTIFICATION NUMBER:

693

Date: 14-May-06

Time: 1701

ISN: 888-00-0693

Cell#: (b)(2)

Language: Arabic English Farsi French Pashtu Russian Urdu Uzbek

Subjective:

FOOD REFUSAL ASSESSMENT: Detainee with a smile stated, "I'm good. I'm not crazy. They know me no crazy." Detainee limited his interaction with me, spoke with the guard briefly and he said he don't want to talk anymore to BHS.

Objective:

Visited feeding block with without Interpreter. Detainee was seen seated inside his segregation cell. Detainee appeared well nourished with energy as he uttered with normal tone of voice his comments. Detainee wore a black support brace on his right ankle. According to the nutritionist flow chart, there's no detainee current weight for May. His last weight dated 6 April was 150.8 pounds and his height is 66.5 inches. His in processing weight was 149 pounds in Jan 2002 (Average weight = 134). Detainee did not appear to be in any physical or mental distress at this time. SIB noted or observed. Internal or external stimuli was noted or observed.

Mental Status Exam:

Appearance: neat/clean

Mood: mellow

Distinguishing Features: none noted

Affect: congruent

Alert/Orientation: alert

Thought Content: within normal limits

Speech: normal English

Thought Process: goal directed

Eye Contact: good

Thought Perception: within normal limits

Communication: normal

Attention/Concentration: within normal limits

Motor Skills: within normal limits

Intelligence: average

Memory: intact

Insight/Judgment: good

Level Status: Level III

Self-injurious Behavior: Detainee denied or none noted

Assessment:

Dx: No Diagnosis on Axis I, Antisocial and Borderline Traits

It appeared detainee did not appear to be in any mental or physical distress at this time. Although detainee have his reason for being involuntarily feed since January, it appeared detainee will continue to be on hunger striker until he's release to his home country. He does not seem to have any concerning depressive symptoms or evidence of thought disorder. The detainee's food refusal coincides with multiple other food refusals who were or are demanding release and or for medical reasons.

Plan:

Continue to rule out symptoms or evidence of thought/mood disorder in 7 days providing detainee will talk.

- F/U is scheduled for every week
- Initiate or maintain precautions for
- Recommend medication evaluation
- Encourage fluid intake and eating

- Discuss case at next treatment team
- Referral to psychologist for complete evaluation
- Recommend discharge from service

Cell#: (b)(2)

Language: Arabic English Farsi French Pasntu Russian Urdu Uzbek

Subjective:

Food Refusal: Attempted to speak with detainee via Arabic interpreter. Detainee stated "I am good everything is good. Are you from Psych, oh no, I have nothing to say. I know your questions and you know my answers. Have a good day." When questioned about SI/HI/AVH Detainee stated "No, No, good bye, I do not want to talk." Detainee refused to answer any questions in regards to somatic complaints or sleeping and eating.

Objective:

Upon approach to cell detainee was standing at the bean hole speaking with block guard. Detainee's rate, tone, and rhythm of speech were all within normal limits per interpreter. Detainee appeared to be well nourished and within grooming standards. Detainee was not cooperative with interview when he discovered that this technician was from BHU. According to the nutritionist flow chart, detainee current weight is 154 pounds (gained 4 pounds since his last weight on 08APR06) Cognition appeared to be intact. No SIB was observed or noted from block guards. Detainee did not appear to be experiencing any internal or external stimuli.

Mental Status Exam:

Appearance: neat/clean

Mood: euthymic

Distinguishing Features: none noted

Affect: constricted

Alert/Orientation: alert

Thought Content: within normal limits

Speech: normal Arabic per interpreter

Thought Process: coherent

Eye Contact: good

Thought Perception: within normal limits

Communication: normal

Attention/Concentration: distracted

Motor Skills: within normal limits

Intelligence: average

Memory: intact

Insight/Judgment: adequate

Level Status: Level III

Self-Injurious Behavior: Food Refusal

Assessment:

FOOD REFUSAL: Detainee does not want to interact with BHU. This is the first interaction with this Detainee by this Technician. According to previous SF600 Detainee has history of refusing to speak with the BHU. He does not seem to have any concerning depressive symptoms or evidence of thought disorder.

Plan:

Continue with treatment plan.

- F/U is scheduled for every week
- Initiate or maintain precautions for
- Recommend medication evaluation
- Encourage fluid intake and eating

- Discuss case at next treatment team
- Referral to psychologist for complete evaluation
- Recomm (b)(3):10 USC §130b,(b)(6)

ISN: 888-00-0693

Cell#: (b)(2)

Language: Arabic English Farsi French Pashtu Russian Urdu Uzbek

Subjective:

Tech attempted to conduct an assessment with detainee, via an arabic interpreter. Detainee stated, in arabic, "you know I don't want to speak with you, leave me alone". Detainee refused to answer any questions regarding suicidal or homicidal ideations. He did not voice any somatic complaints. Assessment was unsuccessful.

Objective:

Upon arrival, detainee was seen sitting in a chair in his cell. He was being observed by the guards after a feeding session. Detainee did not look to be in any distress.

Mental Status Exam:

Appearance: neat/clean

Mood: irritable

Distinguishing Features: scars

Affect: constricted

Alert/Orientation: alert

Thought Content: unable to assess

Speech: ranging via interpreter

Thought Process: unable to assess

Eye Contact: fair

Thought Perception: unable to assess

Communication: inappropriate

Attention/Concentration: distracted

Motor Skills: within normal limits

Intelligence: average

Memory: intact

Insight/Judgment: poor

Level Status: Level III

Self-Injurious Behavior: Food Refusal

Assessment:

Food refusal.

Detainee did not respond to questions about food refusal. He was uncooperative with tech and arabic interpreter. Tech encouraged detainee to stay nourished and drink water on a daily basis.

Plan:
