  - Rendervous with simliar - size ship 25 nm N of Guam app. 1030Z
- **Destination still unknown**
- **Probable Iranian aboard**

GUAM

1200 nm

71627050

- "National Pride" hijacked before the attack
- "Friends" may refer to North Koreans
- Activity consistent with KN naval SOF operations

CANADA
- Vahid in contact with Iranian

KN deleg to Tokyo conference

Pyongyang

Seoul

JAPAN

29 May KN-IR delegs at Tokyo conference

Vahid and 2 IR at electric plant

GUAM
- Vahid on ship
- Vahid contacts Canada

1200 nm

COMMENT:
- Circumstantial evidence of North Korean/Iranian cooperation
- State support likely but no direct evidence

71627052

- Iran/North Korea appear responsible for ongoing terrorist campaign despite only minor previous links
  - Vahid and Asadi presence on Philippine ship points to Iranian involvement

- **Food problems continue**

- **US DOE officials working at Yongbyon**
  - **No unusual developments reported**

- **No additional evidence of internal upheaval**

Yongbyon

Spent fuel storage building

5 megawatt reactor

- **North Korea capable of attacking with limited preparations**

- **Major detectable preparations -- none reported**
  - **Removal of mines/clearing DMZ**
  - **Lateral comms between corps**
  - **Activation of Supreme Command**
  - **Activity across DMZ**
  - **Increased tactical recce**

71627057

- **Carrot and stick tactics to lift US sanctions**

- **Reduce US influence in Persian Gulf**

Kim Chong-il

Supreme Leader Khamenei

71627058

SECRET

- **25 active of 150 indicators of IW attack**
  - PSY OPS   5 of 19
  - DESTRUCTION   4 of 14
  - INTEL OPS   3 of 26
  - COMPUTER NETWORK ATTACK   10 of 50
  - EW   1 of 12
  - MISC ACTS   2 of 5
  - No indicators active for:
    - Deception; defensive IO

71627059

- **10 of 50 active-computer network attack attempts to:**
  - Remotely access protected systems
  - Implant malicious software to destroy data and deny service
  - Penetrate/attack of US systems
  - Virus incident reports
  - Report of attack on networks originating from US government domains
  - Access/possession of passwords to US networks
  - Searching for/downloading of intrusion software/techniques
  - Denial of service attacks on networks
  - Theft of computer/systems
  - DISA COMSPOT's (communications incidents, actions, etc.)

71627065

- **KN/Iran probably cooperating**
- **Significant danger of simultaneous large scale IO/IW attack**
  - **Events have been cumulative, increasingly more violent and potentially more dangerous**
  - **Moved from civil to military targets**
  - **Spread from CONUS to PACOM**
- **IW assailants increasingly sophisticated**
  - **IW attacks have probed to find weaknesses in US systems**
  - **IW probes have practiced/rehearsed access**
- **Capable of large-scale civil and military disruptions**
  - **Also capable of more destructive attacks on selective targets**
