 SVR 23-3KH REFNO 1998 KH-00205 20230816 V1.0.pdf

I just distributed this report yesterday and it does mention a burial site with Hall's clothes so I am passing it onto you in case it is needed for the Cambodia information request.

Subject: Final SVR for 23-3KH

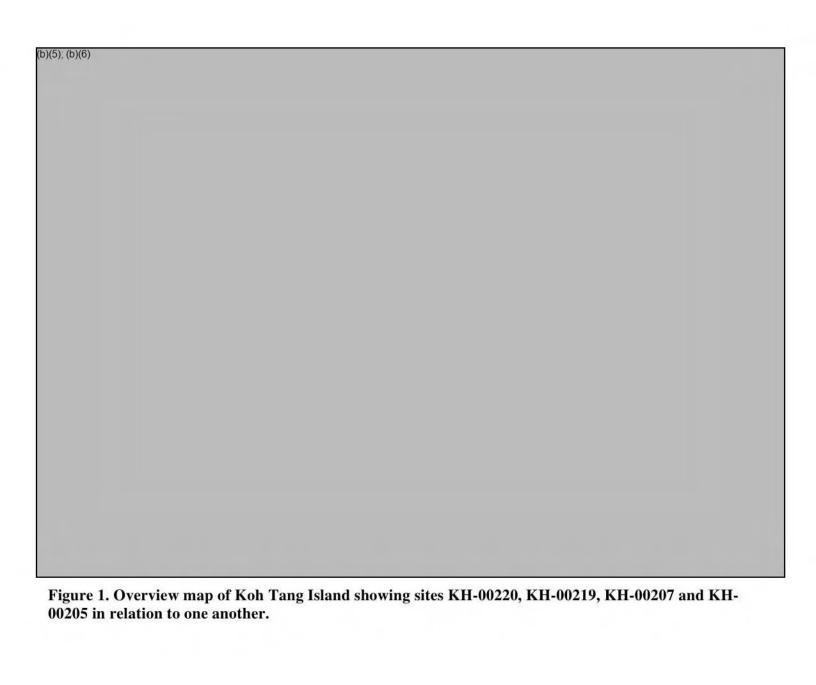

Hello All,

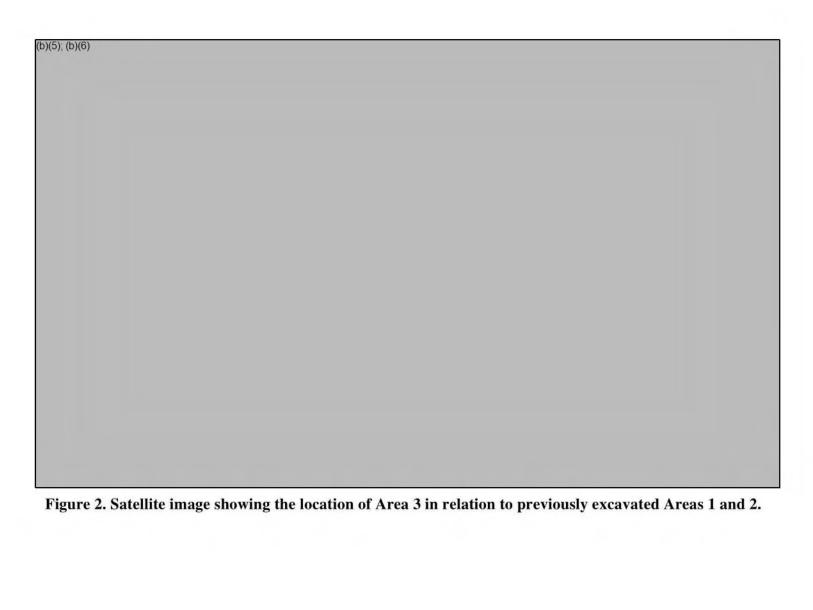

Please find attached the final SVR for partner mission 23-3KH by the Golden West

Mission/Team	23-3KH	Project Type	Investigation						
Case, Site, CS, Aircraft, BNR (list if multiple)	REFNO 1998, KH-00205,								
Project Location (City, State, Province, Country)	Koh Tang, Preah Sihanouk Province, Kingdom of Cambodia	uk Province, Coordinates (include EPE, WGS-84, 10.4 m above mean							
Project Dates/Scheme of Maneuver	19 and 23 April 2023								
Project Partners	Golden West Humanitarian Stony Beach	Foundation (GWHF)							
DPAA Main Point of Contact									
Summary Case Background	the U.S. Marine Corps' (U. ship SS <i>Mayaguez</i> and her belief that the <i>Mayaguez</i> 's helicopter-borne insertion a entrenched on the island, re [resolved], and 2038). In the to Koh Tang's West Beach helicopter. The REFNO 19 post at the far southern edg	S.M.C.) assault on Koh T crew by Khmer Rouge (K crew were being held on F and rescue mission but me esulting in heavy U.S. casule early evening of 15 May and establish a defensive 98 individuals were reported of West Beach and were ous investigations encountries.	e-man machine gun team that was part of ang following the capture of the cargo R) forces. Operating under the mistaken Koh Tang, the U.S.M.C. launched a t stiff resistance from KR forces halties (see also REFNOs 2002, 2003 v, the Marines were ordered to withdraw perimeter while awaiting extraction via tedly last seen manning a machine gun e not observed to have been wounded or tered Private First Class (PFC) Gary ach near a KR outpost.						
Executive Summary	Sayva District, Sihanoukvii located along the eastern ed KH-00220 site, 1200 m sou site (Figure 1). A previous 2015 (ESR REFNO 1998; at the eastern-most end of I trenches separated by bault origin and not associated w after re-interviewing two w m from the shoreline. The tidentified an unexploded 40 burial feature in which mat material was recovered from different location at site KH	hang Cheung Village, Khu lle Province) led the GWH dge of East Beach, approximate the KH-00219 so investigation, including extended the KH-00219 so investigation, including extended the first area of the KH-00215-048-R, REF East Beach. The first area of the KH-00205 who guided the tended the first area of the KH-00205 (Area 3). He point the burial feature. During the owner where he recalled the KH-00205 (Area 3).	Im Stung Chhay Commune, Kampong IF team to site KH-00205. The site is imately 1150 m southeast of the ite, and 990 m southeast of the KH-00207 (cavations, was conducted at this site in EFNO 1998). Those excavations took place (Area 1) was excavated as a series of cred that was determined to be Asian in m then excavated a second area (Area 2) cam north to a location approximately 30 lisposal (EOD) technician located and a 2, and the team later excavated a possible with PFC Hall was recovered. No osseous ag the 2023 site visit, (b)(6) pointed to a lated to a general area approximately 17 m American soldier being buried (Figure 2).						

Partnerships and Innovations PARTNER SITE VISIT REPORT (SVR) TEMPLATE Effective Date: 30 May 2023

	but is bordered by a pond which delineates the southern boundary of the eyewitness indicated area. The team did not excavate any test units.
Evidence Observed or Recovered	GWHF did not recover or retain any possible evidentiary material.
Recommendations	Full systematic excavation of the 25 x 8 m (200 sq m) area. Witness indicated that KR protocol when an enemy was killed was to strip the corpse of gear and clothing. The possessions would then be combed through for anything of value then discarded. This area is adjacent to the location where PFC Hall's uniform clothing and ID tag was discovered and corroborates the story well.

(b)(6)

ESR For Partner Activity 23-3KH at Site KH-00220 (REFNO 1998) Conducted 23 March through 26 April 2023 in Koh Tang, Cambodia

Comments in this report are not intended to provide final analytical conclusions.

1.	Case Overview: The REFNO 1998 incident involves the 15 May 1975 loss of a three-man machine gun team that wa part of the U.S. Marine Corps' (U.S.M.C.) assault on Koh Tang following the capture of the cargo ship SS <i>Mayague</i> and her crew by Khmer Rouge (KR) forces. Operating under the mistaken belief that the <i>Mayaguez</i> 's crew were being held on Koh Tang, the U.S.M.C. launched a helicopter-borne insertion and rescue mission but met stiff resistance from KR forces entrenched on the island, resulting in heavy U.S. casualties (see also REFNOs 2002, 2003 [resolved], and 2038). In the early evening of 15 May, the Marines were ordered to withdraw to Koh Tang's West Beach and establish a defensive perimeter while awaiting extraction via helicopter. The REFNO 1998 individuals were reportedly last seem manning a machine gun post at the far southern edge of West Beach and were not observed to have been wounded on killed in the fighting. The REFNO 1998 incident has been investigated, surveyed, and excavated numerous times since the early 1990s. In 2019, during the 19-1KH Joint Field Activity (JFA), a DPAA investigation team (IT) conducted visual inspection of witness-indicated loci designated sites KH-00219 and KH-00220, (b)(5); (b)(6)
	partner team excavated site KH-00219 during the 21-2KHb JFA (b)(5)
	2022, an Ohio Valley Archaeology, Inc. (OVAI) partner team excavated site KH-00207, (b)(5); (b)(6) sites KH-00219 and KH-00220. No PME was recovered.
2.	Site Data and Coordinates:
2.	a. Site number: KH-00220
	b. (b)(5); (b)(6)
	c. Site elevation: 6.7 m above mean sea level at N500 E500 datum
	d. Date site approved for excavation as indicated by the Excavation Proposal: 7 February 2023
	e. Lab Tracking: CS23-0144
3.	Executive Mission Summary: From 23 March through 26 April 2023, during partner activity 23-3KH, DPAA partner Golden West Humanitarian Foundation excavated the REFNO 1998 ground loss site KH-00220 on Koh Tang. Sihanoukville Municipality District, Preah Sihanouk Province, Cambodia. Under the direction of (b)(6) the Lead Archaeologist (LA), the team excavated approximately 1,252 sq m to depths ranging from 0 to 104 centimeters below surface. On 26 April 2023, the LA suspended recovery operations due to the end of the specified mission timeline. On 26 April 2023, the LA also turned over the recovered possible evidence via a DPAA chain of custody form to (b)(6) from the DPAA Indo-Pacific (IP) Directorate, who later released it to (b)(6) from DPAA Detachment 1, Thailand (DET-1).
4.	Evidence Observed/Recovered:
	a. Did you recover and retain possible ID media: No
	b. Did you recover and retain possible material evidence (PME): Yes
	c. If you did recover and retain PME, did it include possible Life Support Equipment (LSE): No
	d. Did you recover and retain possible osseous material (POM): Yes
	e. Did you recover and retain possible human remains (PHR): No
	f. Were incident related items recovered, photographed, but not retained: Yes
	 g. Please list items photographed but not retained: Miscellaneous fabric, munitions, and miscellaneous plastic items h. Does field analysis of recovered items support the correlation of this site to the subject case: No
_	
5.	Evidence/Remains POC and Location of Materials:
	a. (b)(6) b. DET-1 Thailand
	c. (b)(6)

Partnerships and Innovations EXCAVATION SUMMARY REPORT (ESR) Effective Date: 30 Mar 2023

6. Lead Archaeologist (LA) Recommendations:

- a. If evidentiary materials were recovered, have those excavation units been surrounded with evidence free units: No
- b. Has the excavation reached its archaeological limits and exhausted the potential to recover evidence: No
- c. Do you recommend additional archaeological excavation at this site: Yes
- d. Please specify where you recommend additional excavation at this site: We were unable to create an evidence-free margin of units in the northeast portion of the grid. The area that could contain additional evidence is located east of units N520-524 / E530-531, N516-520 / E530-531, and south and east of units N512-514 / E528-530. Each of these units contained POM in diminishing frequency. If lab analysis determines the POM to be PHR then additional excavation is recommended. If the POM is determined not PHR, then the site has been excavated to its archeological limits and no further excavation is recommended.
- 7. Report Writers: (b)(6) Golden West Humanitarian Foundation, LA
