Human Resources Strategic Assessment Program
1600 Wilson Boulevard, Suite 400, Arlington, VA 22209-2593**

Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2006 Workplace and Gender Relations Survey of Active Duty Members*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The survey program is conducted under the leadership of Timothy Elig, Director, *Human Resources Strategic Assessment Program* (HRSAP).

Policy officials contributing to the development of this survey include: Kaye Whitley and Bonita Soley (ODUSD Sexual Assault Prevention and Response Office); James Love and Jerry Anderson (ODUSD Equal Opportunity); Martha Lappin and Morris Peterson (Army Research Institute); and COL William Huleatte, USA, BG Thomas Cuthbert, USA (Ret.), and CDR Deb Maddrell (Defense Task Force on Sexual Assault in the Military Services). Other important contributors to survey development include researchers from the University of Illinois at Urbana-Champaign, including Louise Fitzgerald, Fritz Drasgow, and Alayne Ormerod.

DMDC's Program Evaluation Branch, under the guidance of Brian Lappin, Branch Chief, is responsible for the development of questionnaires in the survey program. The lead survey design analyst was Rachel Lipari, Human Relations Survey Team Leader. Lindsay Rock designed the unique presentation of complex items used in this tabulation volume. They were supported in these efforts by Kristin Olson, Consortium Research Fellow.

DMDC's Personnel Survey Branch, under the guidance of Jean Fowler, Branch Chief, is responsible for developing the sampling and weighting methods used in the survey program, and survey database construction and archiving of data. The lead operations analyst on this survey was Sally Bird, SRA International, Inc., supported by Emma Holland, DMDC, and Ryan Hargraves, Consortium Research Fellow. Carla Scanlan used the DMDC Sampling Tool to plan the sample for this survey. Owen Hung and Michael Paraloglou, SRA International, Inc., used DMDC's Statistical Analysis Macros to calculate the estimates presented in this tabulation volume. Carole Massey, DMDC, and Deborah West, Northrup Grumman Corporation, provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing. WESTAT, Inc. created the sample weights for the survey data.

DMDC's Survey Technology Branch, under the guidance of James Caplan, Branch Chief, is responsible for the distribution of datasets outside of DMDC and maintaining records on compliance with the Privacy Act and 32 CFR 219.

Jacqueline Malone, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool. A team consisting of Rachel Lipari, Lindsay Rock, and Kristin Olson completed quality control for this tabulation volume.

2006 WORKPLACE AND GENDER RELATIONS SURVEY OF ACTIVE DUTY MEMBERS: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. *Human Relations Surveys* are in-depth studies of topics and populations, often requiring both paper-and-pencil surveys and Web-based surveys, that take longer to develop, administer, and analyze.

This report contains tabulations of responses from the *2006 Workplace and Gender Relations Survey of Active Duty Members* (2006 WGRA), conducted June 19 to September 5, 2006. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.²

Survey Content

The 2006 WGRA continues a line of military sexual harassment research begun in 1988. DMDC conducted Joint Service surveys of active duty members on gender issues in 1988, 1995, and 2002; surveys of Service Academy cadets/midshipmen in 2005 and 2006; and a survey of Reserve component members in 2004. Since 1995, the questionnaire was designed to both estimate the level of sexual harassment in the Services and provide new information on a variety of consequences of harassment (Bastian, Lancaster, & Reyst, 1996). The 2006 WGRA is the fourth DMDC active duty survey of workplace and gender issues, and was modeled on its predecessor, the *2002 Status of the Armed Forces Surveys—Workplace and Gender Relations* and the *Service Academy 2006 Gender Relations Survey*. The survey was subdivided into the following fourteen topic areas:

1. *Background Information*—Service, gender, paygrade, race/ethnicity, and permanent duty station location.
2. *Career Intention*—Years of service, likelihood to stay on active duty, and commitment to serve.

¹ Details on survey methodology are reported in DMDC (2007b).

² Refer to DMDC (2007a) to view a screen-shot version of the survey as it appeared on the Web.

3. *Military Life*—Time away from permanent duty station; number of times deployed for operations since September 11, 2001 and in the past 12 months; current deployment status; safety from sexual harassment and sexual assault; and perceptions of sexual harassment and sexual assault in the military.
4. *Your Military Workplace*—Gender mix of current workgroup; characteristics of immediate supervisor; qualities of supervisors and leadership; relationships with coworkers; mentoring; individual and unit preparedness; morale; and unit cohesion.
5. *Stress, Health, and Well-Being*—Physical well-being and level of stress in work and personal life.
6. *Gender-Related Experiences in the Military in the Past 12 Months*—Experiences of discrimination, unprofessional, gender-related behaviors, and sexual harassment in the 12 months prior to the survey.
7. *One Situation of Gender-Related Experiences*—Circumstances pertaining to experiences of unprofessional, gender-related behaviors, including characteristics of offenders, to whom behaviors were reported, members' satisfaction with the complaint process and outcome (if applicable), and/or reasons for not reporting.
8. *Unwanted Sexual Contact*—Experiences of sexual contact against members' will or without consent in the 12 months prior to the survey.
9. *One Situation of Unwanted Sexual Contact*—Specific behaviors experienced during one event with the greatest effect, when and where the event occurred, involvement of alcohol/drugs, characteristics of offenders, to whom behaviors were reported, actions taken and consequences of reporting (if applicable), and/or reasons for not reporting.
10. *Personnel Policy and Practices*—Views on current gender-related policies and leadership practices.
11. *Sexual Harassment Training*—Frequency and perceived effectiveness of training on sexual harassment.
12. *Sexual Assault Training*—Frequency and perceived effectiveness of training on sexual assault.
13. *Prior Experiences*—Experiences of being sexually harassed and/or sexually assaulted prior to entering the military.
14. *How Are We Doing?*—Perceptions of gender relations within the military and in the nation, and how they have changed over the past four years.

Population and Reporting Categories

The population of interest for the survey consisted of active duty members.³ of the Army, Navy, Marine Corps, and Air Force, excluding National Guard and Reserve members, who (1) have at least six months of service at the time the questionnaire is first fielded and (2) are below flag rank. Survey results are presented for the total DoD population and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified primarily by their responses to survey items. If the self-reported data are missing, then DMDC's *Active Duty Master Edit File* data, at the time of sampling, are used to impute the subgroup classification. Survey results are tabulated by: Service, paygrade, deployment, race/ethnicity, experienced behaviors, and gender. Definitions for reporting categories follow:

- *Service*—The categories include *Army, Navy, Marine Corps, and Air Force*.
- *Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1-E9). The *Enlisted* subgroup is broken into: junior enlisted members (*E1-E4, E1-E3 and E4*) and senior enlisted members (*E5-E9, E5-E6 and E7-E9*). The *Officers* subgroup includes Warrant Officers (*W1-W5*) and commissioned officers (*O1-O3 and O4-O6*).
- *Deployment*—The categories include *Deployed Past 12 Months* and *Not Deployed Past 12 Months*, and indicate whether members were deployed longer than 30 consecutive days during the 12 months prior to the survey.
- *Race/Ethnicity*—Respondents are classified based on self-reported categories consistent with requirements of the *Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity* (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone marking that they are Spanish/Hispanic/Latino, regardless of how they answered the question on race.
- *Experienced Behaviors*—The categories include *Experienced Unwanted Sexual Contact, Not Experienced Unwanted Sexual Contact, Experienced Sexual Harassment, and Not Experienced Sexual Harassment*.
- *Gender*—The categories include *Females* and *Males* overall and gender broken into the flowing categories: Service, paygrade, experienced behaviors, deployment status, and Service by E1-E4/enlisted/officers.

³ The survey was also sent to a sample of Coast Guard members but all results for Coast Guard are provided in a separate volume for the Department of Homeland Security.

Survey Methodology

The survey administration process began on June 19, 2006, with the mailout of notification letters to sample members. The notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected between June 26 and September 5, 2006, with paper surveys mailed on August 1, 2006 to those who did not respond via the Web.

Single-stage, nonproportional, stratified random sampling⁴ procedures were used. The sample consisted of 79,396 individuals drawn from the sample frame constructed from DMDC's *Active Duty Master Edit File*. Members of the sample became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that they were not on active duty as of the first day of the Web survey, June 26, 2006 (0.46% of sample).

Completed surveys (defined as 50% or more of the survey questions asked of all participants being answered, including the critical question, Q35) were received from 24,178 eligible respondents. The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 30%.

Data were weighted using the industry standard three-stage process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The three-stage process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples such as the sample for this survey are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.
- *Adjustments for nonresponse*—Some sampled members do not respond to the survey. Continuing the previous example, suppose only half of sample members, 500, completed and returned a survey. Because the unweighted

⁴In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and Service (e.g., all male Army personnel in one group, all female Navy personnel in another). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the nonresponse rate. In this example, the base weight (10) is multiplied by the reciprocal of the nonresponse rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.

- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings used in designing the subgroups for the sample. The second is based on population characteristics that are known to be related to whether a sample person responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents was 7,000 men and 3,000 women. To dampen this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women so that the final weights for men and women would be 24.3 and 10 which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (pages 6-7) shows the number of respondents and the portion of respondents in each reporting category. Also shown are the estimated number of members and the portion of total members in each reporting category. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.⁵

Tabulation Procedures

Tabulations⁶ for each question in the survey are shown on a set of facing pages. The text of the questions and response options are shown at the top of the even-numbered pages with only the question number repeated on the odd-numbered pages. To compress the width of columns in the tables, the response options are shown with a number, letter, or DNA (i.e., *Does not apply*); then that number, letter, or DNA is used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding error.

⁵ There is also a slight difference in treatment of missing data. Cases with missing data are included in counts of respondents, but are excluded in population estimates.

⁶ Details of data editing and preparation are provided by DMDC (2007a).

Where an item can be presented as an average, that average is shown as a number estimate and in a bar chart. The averages can be quickly scanned for reporting groups differing from other similarly defined groups. Where a true response continuum is available (e.g., number of times trained), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage. When multi-level response scales (e.g., “yes,” “no,” “don’t know”) can be dichotomized, the bar chart represents either the sum of the percentages in multiple columns (e.g., “no” and “don’t know” summed) or the percentage in one column (e.g., “yes”).

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it reflects item nonresponse, and the table note indicates that “Percent responding are Service members who answered the question.”

Not all questions will apply to every respondent. Respondents to the paper version of the survey are instructed to skip questions that do not apply to them (based on their answers to previous questions). Where possible, the Web survey is programmed to skip respondents over questions that do not apply to them. For example, Q85 (In the past 12 months, how many times have you had military training on topics related to sexual assault?) does not apply to those who marked in Q84 that they did not have any military training during the past 12 months on topics related to sexual assault. The table note for this question indicates, “Percent responding are Service members who answered the question and who have had sexual assault training in the past 12 months (Q84).”

The survey does not always skip questions that do not apply to the respondents. In the tabulations, *Does not apply* responses are typically included in the percentages in the *Percent Responding* column. For example, members were asked to indicate in Q66a if they had talked about their experience of unwanted sexual contact with their spouse/significant other. Survey participants could indicate the response option does not apply to them because they did not have a spouse or significant other. In other cases, the *Does not apply* response is tabulated separately. For example, members were asked to indicate in Q51 if their complaint regarding their experience of gender-related behaviors was found to be true. Responses of *Does not apply, the action is still being processed* are tabulated separately.

Because the survey contains open-ended questions, not all responses are tabulated. For example, members were asked in Q35t if they experienced any unwanted gender-related behaviors in the past 12 months other than those listed. Since it is not feasible to tabulate the wide range of responses, the open-ended responses for Q35t are not tabulated.

Paper and Web Survey Comparability

On occasion, the paper and Web versions of the survey differ. These differences result from the technological advantages and requirements available in a Web-based survey. The survey response options differ at times. The use of *Does not apply* response options in the paper version are unnecessary in the Web version due to “smart skip” technology. For example, Q92 on the paper version (In your opinion, has sexual harassment in the military become more or less of a problem over the last 4 years?) has a response option of *Don’t know, you have been in the military less than 4 years*. For the Web version, respondents who had previously indicated in Q7 that they have been on active duty for less than 4 years were automatically skipped over Q92.

Combining Information From Multiple Items

Tabulations in this volume generally present data for individual survey questions. There are three types of exceptions. The first type of exception is where the results for multiple items are presented on a single set of pages.

- In Q18, members were asked whether they were in a military occupational specialty not usually held by persons of their gender and whether they worked in an environment where members of their gender were uncommon. The tabulations for this question show the percentage of each reporting category who marked Yes, indicating they worked in an occupational specialty not usually held by persons of their gender and/or indicating they worked in an environment where members of their gender were uncommon.

The second exception is where members can provide multiple answers to a single question (e.g., race).

- In Q5, members were asked to mark one or more races. The tabulations show the percentage who responded that they are White, Black, American Indian/Alaska Native, Asian, and/or Native Hawaiian/Other Pacific Islander. Respondents who indicated more than one race are also shown in the percentage of More Than One Race Marked. For example, if a respondent indicated they were Asian and White, they were counted in the percentage as Asian, White, and More Than One Race Marked.

The third exception pertains to constructed composite measures (e.g., scales, incident rates, summary variables), described below. For example, incident rates for unprofessional, gender-related behaviors are constructed from multiple items. Typically, individual items from a composite measure are presented first, then the composite measure is presented. Where applicable, Cronbach’s coefficient alpha, a measure of scale reliability, is provided in the table notes. For details of the psychometric analyses used to confirm the properties of the measures and more detailed discussion of the creation of composite measures, please see Nye, Lytell, Omerod, Lawson, Perry, Wright, Fitzgerald, & Drasgow (2007).

- *Organizational Commitment:* Three measures of organizational commitment (Q9) are presented. *Affective commitment* can be defined as an emotional attachment to, an identification with, and an involvement in an organization (Q9a, b, e, h, j, and m). *Continuance commitment* can be defined as attachment based on the perceived costs of leaving an organization (Q9c, f, i, l, and n). *Normative commitment* can be defined as a sense of obligation to remain in an organization (Q9d, g, and k). Higher scores indicate stronger organizational commitment.
- *Supervisor Satisfaction:* In Q21, members were asked about their satisfaction with their supervisor. The composite measure includes survey items on members' agreement that their supervisor can be trusted, treats all assigned people fairly, does not have conflict with people who report to him/her, gives satisfactory direction, evaluates performance fairly, and makes work assignments fair (Q21a-f). Higher scores on this measure indicate members strongly agreed with positive statements about their supervisor.
- *Leadership Satisfaction:* In Q22, members were asked about leadership satisfaction. The composite measure includes survey items pertaining to their satisfaction with their work group leadership's commitment to quality work, positive work environment and Service member well-being (Q22b-d, f). For the purposes of this report, Q22b, d, and f were reverse-coded. Higher scores indicate higher degrees of satisfaction.
- *Careerism:* The composite measure includes survey items pertaining to the extent to which a member perceives that leaders put their personal interests above the organization's interests to further personal advancement (Q22a-d, f). For the purposes of this report, Q22a and c were reverse-coded. Higher scores indicate members have greater perceptions their leaders exhibit careerism.
- *Coworker Satisfaction:* The composite measure includes survey items on members' agreement with statements about coworker relationships, coworker work efforts, work group compatibility, and the helpfulness of coworkers (Q24a-e). Higher scores on this measure indicate members strongly agreed with positive statements about their coworkers.
- *Work Satisfaction:* The composite measure includes survey items on sense of pride, use of skills, work enjoyment, and the opportunity to acquire valuable skills (Q26a-e). Higher scores on this measure indicate members strongly agreed with positive statements about their work.
- *Unit Cohesion:* The composite measure includes survey items pertaining to the affective ties within a small group that sustain commitment to their peers, their unit, and their mission (Q29a-d). Higher scores on this measure indicate greater perceived unit cohesion. For additional information on the

Unit Cohesion scale constructed from these items, please see Siebold & Lindsay (1999).

- *Perceived Stress*: The composite measure includes the evaluation of the member's personal stress levels, measured by their emotional experiences/reactions in the month prior to taking the survey (Q30a-j). The measure of perceived stress is a 10-item version of the *Perceived Stress Scale*[®] (Cohen & Williamson, 1988). Items were scored 0 to 4. For the purposes of this report, Q30d, e, g and h were reverse-coded. Scores are reported as a single figure, which is the sum of the individual scores (range 0 to 40). Higher scores indicate greater perceived stress.
- *General Health*: The General Health scale is designed to provide a self-assessment of overall physical well-being. The four scale items (Q31a-d) were taken from the general health perceptions subscale on the Short-Form Health Survey (SF-36) of the *Medical Outcomes Study* questionnaire (Ware & Sherbourne, 1992). For the purposes of this report, Q31b and c were reverse-coded. Higher scores on this measure indicate more positive perceptions of health.
- *Overview of Composite Measures of 2006 Incident Rates of Gender-Related Harassment and Discrimination Experienced by Active Duty Members*: Incident rates, constructed from 30 items, reflect whether members indicated they experienced gender-related insensitivity, coercion, harassment, or discrimination.⁷ The 2006 WGRA incident rates comprise the percentage of members who indicated experiencing at least one of the behaviors during the 12 months before responding to the survey.
 - *Sex Discrimination*: To assess perceptions of discrimination in the workplace, members were asked to indicate if they had recently experienced any of the 12 behaviors or situations where they thought gender was a motivating factor (Q33). The items form three incident rates: *Evaluation* (Q33a-d), *Assignment* (Q33e-g, l-m),⁸ and *Career* (Q33h-k). In order to be counted as having experienced *Evaluation*, *Assignment*, or *Career* discrimination, respondents must have indicated that gender was a factor in their experience of at least one of the behaviors in the scale (Q33). In addition to the tabulation of incident rates of the three types of discrimination, a summary variable *Sex Discrimination*, is also tabulated. In order to be counted as having experienced *Sex Discrimination*, respondents must have

⁷ A Service member is included in an incident rate if he/she endorsed one survey item, more than one survey item, or all survey items included in that rate. That is, a member is counted in an incident rate only once regardless of the number of items he or she endorsed.

⁸ This item is constructed from Q33l and Q33m. Question 33l asks if a respondent did not get a job assignment that he/she wanted and for which he/she was qualified. Question 33m asks the respondent if this assignment was legally open to women. Combining these items allows the focus to be only on jobs that were legally open to women.

indicated experiencing one of the 12 behaviors where gender was a factor AND they must have indicated that they considered at least some of the behaviors experienced to have been sex discrimination (Q34).

- *Unprofessional, Gender-Related Behavior.* Incident rates of unprofessional, gender-related behaviors were derived from 18 behavioral items (Q35) and represent a continuum of behaviors. The categories of behaviors and corresponding items are as follows: *Crude/Offensive Behavior* (Q35a, c, e-f), *Unwanted Sexual Attention* (Q35h, j, m-n), *Sexual Coercion* (Q35k-l, o-p), *Sexist Behavior* (Q35b, d, g, i), and *Behavior Against One's Consent* (Q35r-s). Respondents were asked to indicate how often they had been in situations involving these behaviors, ranging from *Never* to *Very often*. Items are derived from the *Sexual Experiences Questionnaire (SEQ)*⁹ (Fitzgerald et al., 1988; Fitzgerald, Gelfand, & Drasgow, 1995). Incident rates indicate whether the individual reported experiencing at least one of the behaviors in a category (e.g., *Sexual Coercion*) at least once in the 12 months before responding to the survey.
- *Sexual Harassment.* The prevalence of sexual harassment is determined using a two-step process. In order to be counted as having experienced *Sexual Harassment*, respondents must have indicated they experienced one of the following types of unprofessional, gender-related behaviors: *Crude/Offensive Behavior*, *Unwanted Sexual Attention*, or *Sexual Coercion* during the 12 months prior to completion of the survey (Q35) AND they must have indicated that they considered at least one of the behaviors experienced to have been sexual harassment (Q36).
- *Combinations of Unprofessional, Gender-Related Behaviors:* Combinations of unprofessional, gender-related behaviors experienced during the one situation were determined by responses to Q35. If a respondent indicated experiencing Sexist Behaviors only in Q35, they were counted in *Experienced Sexist Behavior* (single category). Respondents who experienced Crude/Offensive Behaviors only in Q35 were counted in *Experienced Crude/Offensive Behavior* (single category). Respondents who experienced Unwanted Sexual Attention only in Q35 were counted in *Experienced Unwanted Sexual Attention* (single category). Respondents who experienced Sexist and Crude/Offensive Behaviors (without indicating experiences of Unwanted Sexual Attention or Sexual Coercion) in Q35 were counted

⁹ The SEQ was modified to replace “Made unwanted attempts to stroke, fondle, or kiss you” (due to its similarity to unwanted sexual contact) with two new items: item n, “Intentionally cornered you or leaned over you in a sexual way” and item q, “Made sexually suggestive comments, gestures, or looks (e.g., stared at your body).” Item q is tabulated individually but not included in any scales.

in *Experienced Sexist Behavior and Crude Offensive Behavior*. Respondents who experienced Sexist Behavior, Crude/Offensive Behavior, and Unwanted Sexual Attention (without indicating experiences of Sexual Coercion) in Q35 were counted in *Experienced Sexist Behavior, Crude/Offensive Behavior, and Unwanted Sexual Attention*. Respondents who experienced any other combination of behaviors in Q35 were counted in *Experienced other combinations of behaviors*.

- *Unwanted Sexual Contact*. Respondents were counted as having experienced unwanted sexual contact if they indicated *Yes, once* or *Yes, multiple times* to Q56.
 - *Combinations of Unwanted Sexual Contact*. Combinations of unwanted sexual contact experienced during the one event were determined by responses to Q57. Respondents were counted in the *Experienced unwanted sexual touching (single category)* if they indicated experiencing sexual touching (without experiencing attempted or completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object). Respondents were counted in the *Experienced attempted sexual intercourse, anal, or oral sex (with or without unwanted touching)* if they indicated experiencing attempted sexual intercourse, oral sex, anal sex, or penetration by a finger or object (without experiencing completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object). Respondents were counted in the *Experienced completed sexual intercourse, anal, or oral sex (with or without unwanted touching or attempted sexual intercourse, anal, or oral sex)* if they indicated experiencing completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object.

Margins of Error

The complex sample design required weighting to produce population estimates, (e.g., percent female).¹⁰ Because of the weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN[®] PROC DESCRIPT, (Research Triangle Institute, Inc., 2004).

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters (such as percentages or means) and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of

¹⁰ As a result of differential weighting, only certain statistical software procedures, such as SUDAAN, correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tab volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- “0” indicates that no one in any reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 15), or relative standard error (greater than 0.3),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.

Note. Percent responding are active duty members who answered the question. Incident rates indicate the percentage of active duty members who experienced at least one of the behaviors during the 12 months before responding to the survey and indicated their gender was a factor. Cronbach's coefficient alpha = 0.74.

Note. Percent responding are active duty members who answered the question. Incident rates indicate the percentage of active duty members who experienced Evaluation, Assignment, or Career discrimination in the 12 months before responding to the survey and who indicated that they considered at least some of the behaviors experienced to be sex discrimination (Q34/Q35). Cronbach's coefficient alpha without the inclusion of Q34a = 0.86.

Note. Percent responding are active duty members who answered the question. Incident rates indicate the percentage of active duty members who experienced Crude/Offensive Behavior, Unwanted Sexual Attention, or Sexual Coercion in the 12 months before responding to the survey and who indicated that they considered at least some of the behavior experienced to be sexual harassment (Q35/Q36). Cronbach's coefficient alpha without the inclusion of Q36 = 0.91.

2006 Workplace and Gender Relations Survey of Active Duty Members

[Security Protection Advisory](#)

[RCS#DD-P&R\(\(OD\) 1947](#)
[Exp. 12/31/06](#)

Welcome!

Thank you for your participation. You have been selected to take a survey on your attitudes and opinions about your workplace and experiences over the past year. When you click the Continue button below, you will be asked to:

- Create a personal PIN #.
- Read the Privacy Act Statement.
- Answer some questions about both general workplace respect issues and experiences of unprofessional and unwanted gender-related behavior in the workplace.

Thank you, again, for your time and participation.

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION FOR 2006 WORKPLACE AND GENDER RELATIONS SURVEY OF ACTIVE DUTY MEMBERS

In accordance with the Privacy Act, this notice informs you of the purpose of the HRSAP Surveys and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

AUTHORITY: 10 USC Sections 136, 481, 1785, and 2358. 10 USC Section 1.

PRINCIPAL PURPOSE: Information collected in this survey will be used to research attitudes and perceptions about gender-related issues, estimate the level of sexual harassment and unwanted sexual contact, and identify areas where improvements are needed. This information will assist in the formulation of policies which may be needed to improve the working environment. Reports will be provided to the Office of the Secretary of Defense, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the following Web site: <http://www.dmdc.osd.mil/surveys/> In no case will your individual identifiable survey responses be reported.

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people take 16-30 minutes to complete the survey. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if a direct threat to harm yourself or others is found in survey comments or communications about the survey, DMDC is legally required to forward information about that threat to an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to select a sample that represents the Defense community. This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., location, gender). You were selected at random from one of these clusters of people. This is your chance to be heard on issues that directly affect you. While there is no benefit just for you for your individual participation, your answers on a survey make a difference. For example, results from previous surveys have played an important role in evaluating and developing policies and practices regarding general workplace respect issues as well as sexual assault, sexual harassment, and other gender-related issues.

STATEMENT OF RISK: The data collection procedures are not expected to involve risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, identifying information (name, address) is not stored in the same file as answers to survey questions. Answers to survey questions may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. To further minimize this risk, some variables are randomly set to missing. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality. A respondent who experienced sexual harassment or unwanted sexual contact may experience discomfort and/or other emotions while completing the survey. Contact information is provided below for those who experience such discomfort.

- **If you are a victim of sexual assault, or a person who wishes to prevent or respond to this crime, you may want to contact a Sexual Assault Response Coordinator (SARC) or Victim Advocate (VA).**

SECURITY PROTECTION ADVISORY

WEB SITE PRIVACY: Neither the Department of Defense nor Data Recognition Corporation will collect personal information about you when you visit this Web site unless you choose to provide it yourself. If you supply us with personal information, it will be treated as confidential.

In addition, our system does not enable "cookies," which are files placed on your computer's hard drive in order to monitor your use of the site or the Web. For more information about your privacy rights, please read the Privacy Act Statement at the start of the survey.

This Web site does gather certain data from your visit but does not store it in a way that it can be linked to you. This non-personal information helps us make the site more useful by recognizing the types of technology being used. The data collected appear below:

1. The Internet Protocol (IP) address for the computer and the server being used on the Internet (for example, www.compuserve.com, www.aol.com, 122.3.55.34). Depending on your Internet service provider, IP addresses may identify your computer; in other cases, they identify no more than your Internet service provider (such as AOL or Earthlink).
2. The type and version of the browser and operating system used to access our site.
3. The date and time this site was accessed.
4. Number of bytes sent and number received.
5. The pages you visit.

This information is stored permanently for troubleshooting technical problems and for future capacity planning. It cannot be linked to any survey response data and resides in a completely different database. It may be shared with DoD as required for troubleshooting connections from DoD computers.

None of this information will be revealed publicly or used to identify you.

ABOUT THIS QUESTIONNAIRE

Why should I participate?

- This is your chance to be heard on issues that directly affect you.
- Some examples of topics include: policies regarding workplace respect, experiences of discrimination/harassment, and other unwanted and unprofessional sex-related behaviors.
- Your answers on this survey make a difference. For example, results from previous surveys have played an important role in evaluating and developing policies and practices regarding general workplace respect issues as well as sexual assault, sexual harassment, and other gender-related issues.

How do I participate?

- To participate, you are asked to (1) read the Privacy Act Statement, (2) verify contact information, and (3) provide us e-mail address(es) so we can notify you when the survey is ready. We would appreciate your doing this step now. To participate now, click the Continue Now button

How did you pick me?

- We use well-established, scientific procedures to sample from the Defense community.
- This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., Service, rank, etc.).

- You were selected at random from one of these clusters of people.

Why am I being asked to use the Web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- A .net domain was chosen for two reasons:
 1. The survey operations contractor, Data Recognition Corp., consolidates both Web and paper survey data for DoD and it is more efficient for the Government to collect it at their site.
 2. This makes it as easy as possible for everyone to access the survey, even from a non-government computer. If you cannot access the government Start Page (<https://dodsosd.mil>), you can start from the contractor site: <http://www.dodsosd.net>

Do I have to take the survey in one sitting?

- No, it is not necessary to complete the survey in one sitting. Just click the "Save and Return Later" button and the work you completed will be saved.
- When you return to the survey Web site, enter your Ticket Number and PIN to get to the place in the survey where you had stopped.

Can I withdraw my answers once I have started the survey on the Web?

- Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to DATE by sending an e-mail to HRSurvey@osd.pentagon.mil or leave a message, toll-free, at 1-800-881-5307. Please include in the e-mail or phone message your name, Ticket Number, and the PIN that you selected when you started this survey.

Why does the survey ask personal questions?

- The Defense Manpower Data Center (DMDC) traditionally reports not only overall results, but also results by race/ethnicity, paygrade, etc.
- To complete these analyses, we must ask respondents for this type of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel (e.g., enlisted/officer, males/females) so that no groups are overlooked.
- Sensitive questions about topics like unwanted and unprofessional behavior at work will be used to improve personnel policies, programs, and practices. As with all questions on the surveys, your responses will be held in confidence.

Will my answers be kept private?

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579). Privacy Act Statement & Informed Consent Information for 2006 Workplace and Gender Relations Survey of Active Duty Members.
- Only group statistics will be reported. Individual data will not be reported.

Will I ever see the results of the survey?

- This survey's briefings and reports will be posted on the following Website:
<http://www.dmdc.osd.mil/surveys/>

What is DMDC?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in DoD. It also conducts Joint-Service surveys and operates the Status of Forces Survey Program for the DoD. To learn more, visit the DMDC Web site:
<http://www.dmdc.osd.mil/>

How do I know this is an official, approved DoD survey?

- In accordance with DoD Directive 8910.1, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is DD-P&R(QD)1947, expiring 12/31/2006.

What is HRSurvey@osd.pentagon.mil?

- The official e-mail address for communicating with DoD about this survey. The name is short for Human Relations Survey, which includes surveys on equal opportunity and gender issues.

How to Contact Us

- If you have questions or concerns about this survey, you have three ways to contact the Survey Operations Center:

PRIVACY ACT & INFORMED CONSENT

In accordance with the Privacy Act, this notice informs you of the purpose of the HRSAP Surveys and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

Returning this survey indicates your agreement to participate in this research.

AUTHORITY: 10 USC Sections 136, 481, 1785, and 2358. 14 USC Section 1.

PRINCIPAL PURPOSE: Information collected in this survey will be used to research attitudes and perceptions about gender-related issues, estimate the level of sexual harassment and unwanted sexual contact, and identify areas where improvements are needed. This information will assist in the formulation of policies which may be needed to improve the working environment. Reports will be provided to the Office of the Secretary of Defense, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the following Web site: <http://www.dmdc.osd.mil/surveys/>. In no case will your individual identifiable survey responses be reported.

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people take 16-30 minutes to complete the survey. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if a direct threat to harm yourself or others is found in survey comments or communications about the survey, DMDC is legally required to forward information about that threat to an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to select a sample that represents the Defense community. This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., location, gender). You were selected at random from one of these clusters of people. This is your chance to be heard on issues that directly affect you. While there is no benefit just for you for your individual participation, your answers on a survey *make a difference*. For example, results from previous surveys have played an important role in evaluating and developing policies and practices regarding general workplace respect issues as well as sexual assault, sexual harassment, and other gender-related issues.

STATEMENT OF RISK: The data collection procedures are not expected to involve risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, identifying information (name, address) is not stored in the same file as answers to survey questions. Surveys are kept in a secure facility during data entry. Within six months of the end of the data collection, surveys are shredded in a secure recycling facility. Answers to survey questions may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. To further minimize this risk, some variables are randomly set to missing. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality. A respondent who experienced sexual harassment or unwanted sexual contact may experience discomfort and/or other emotions while completing the survey. Contact information is provided below for those who experience such discomfort.

14. ABSTRACT This report provides the results for the 2006 Workplace and Gender Relations Survey of Active Duty Members (2006WGRA). The 2006WGRA was designed to both estimate the level of sexual harassment and provide information on a variety of consequences of sexual harassment. This report gathered information on demographics; military workplace information; career intention; military life; stress, health, and well-being; gender-related experiences in the military; unwanted sexual contact; sexual harassment and sexual assault training; and personnel policy and practices. In this tabulation volume are an introduction to the survey, cross tabulations of the resulting data on a series of demographic variables of interest to the various policy offices within OUSD(P&R), and a copy of the survey instrument. Results are tabulated by Service, paygrade, deployment status, race/ethnicity, experienced behavior, and gender.						
15. SUBJECT TERMS Demographics, gender-related experiences, gender relations, personnel policies, sexual harassment, unwanted sexual contact, sexual assault, training, Services
