INTRODUCTION

Briefing Includes

- Graphic displays of overall results

Margins of error range from $\pm 1\%$ to $\pm 2\%$

Margins of error do not exceed $\pm 2\%$

Percentages and means are reported with margins of error based on 95% confidence intervals. The range of margin of error is presented for the question or group of questions/subitems.

INTRODUCTION

Briefing Includes

- Tables showing results by reporting categories (e.g., Service, paygrade)
 - Statistical tests used to compare each subgroup to its respective “all other” group (i.e., to all others not in the subgroup)
 - Results of statistical tests shown by color coding significant differences among reporting categories
 - Results are not presented if the question does not apply to the reporting category or if the estimate is unstable
 - “NR” indicates the estimate is Not Reportable because it was based on fewer than 30 respondents or the relative standard error was high
 - “NA” indicates the response option was Not Applicable because the question did not apply to respondents in the reporting category based on answers to previous questions
