WASHINGTON, DC 20301-1700

INFO MEMO

JAN 21 2015

FOR: SECRETARY OF DEFENSE

FROM: J. Michael Gilmore, Director,  Operational Test and Evaluation

SUBJECT: (U) Report on the Operational Effectiveness, Suitability, and Survivability of Aegis Ballistic Missile Defense (BMD) 4.0 and Standard Missile-3 (SM-3) Block IB

- (U) Due to a clerical error in the previously issued report dated December 2014, some tables and their associated text erroneously defined a small raid as consisting of 3 to 5 threats and a large raid as consisting of 6 to 18 threats. This has been corrected in the attached January 2015 report at TAB A. Raids are now properly categorized throughout the report as follows: raids of 1 to 2 threats, small raids of 3 to 6 threats, and large raids of 7 to 18 threats.
- (U) This change does not affect the overall conclusions of the report or my previous transmittal memo.

COORDINATION: NONE

Attachment: TAB A

Prepared by: (b)(6)
