SAR Baseline (Production Estimate)

Air Force Acquisition Executive (AFAE) Approved Acquisition Program Baseline (APB) dated September 20, 2012

Approved APB

Air Force Acquisition Executive (AFAE) Approved Acquisition Program Baseline (APB) dated September 20, 2012

Mission and Description

The aging Ultra High Frequency (UHF) Military Satellite Communications (MILSATCOM) system is being phased out and replaced by the Advanced Extremely High Frequency (AEHF) Satellite Communications (SATCOM) system.

B-2 Extremely High Frequency SATCOM and Computer Increment 1 program (B-2 EHF Inc 1) supports the replacement of the present B-2 UHF Terminal Set with an EHF SATCOM system that will be compatible with the legacy EHF Satellite (MILSTAR I/II) constellation and the future AEHF satellite constellation. The B-2 EHF Inc 1 system is one element of a system-of-systems that includes the AEHF satellites, multiple platforms, and the Family of Advanced Beyond-Line-of-Site Terminals. The B-2 EHF upgrade is a three-increment program. Increment 1 will provide upgraded flight management computer processors, increased data storage, a re-hosted Flight Management Operational Flight Program, and a high bandwidth data bus in order to prevent degradation of existing capabilities resulting from EHF SATCOM installation. Additionally, the Increment 1 Integrated Processing Unit and Disk Drive Unit architectures establish a high speed fiber optic structure network as well as maintain connectivity to legacy interfaces. Increment 1 provides a processing growth path to future B-2 upgrades. B-2 EHF Inc 2 would ensure continuing secure, survivable communication capability; and B-2 EHF Inc 3 would enable the B-2 to interface with the Global Information Grid and provide Net Ready capability. This SAR addresses B-2 EHF Inc 1 only.

Executive Summary

B-2 EHF Inc 1 consists of upgraded flight management processors, increased data storage and a high-bandwidth data bus which provide a processing growth path for future B-2 upgrades. The program realized several significant accomplishments during this period. The Aircraft Monitor and Control final report was released on April 2, 2013 and certified the system as compatible for nuclear operations. On April 26, 2013, Air Force Global Strike Command authorized fielding and full-up (conventional and nuclear) use of EHF modified aircraft.

The Engineering and Manufacturing Development (EMD) program successfully concluded. The projected Variance at Completion was reduced from \$9.0M to \$6.8M (3.2% of EMD contract overrun). The EMD contract is complete and is progressing through financial closeout.

The first production installation occurred at Whiteman Air Force Base, MO on October 21, 2013. The next aircraft began modification on February 6, 2014.

There are no significant software-related issues with this program at this time.

RAA	MAR 2015	MAR 2015	MAR 2016	MAR 2015

Change Explanations

None

Memo

RAA is defined as eight assigned aircraft modified, sufficient aircrews and maintenance personnel trained, sufficient aircrew and maintenance trainers upgraded, formal aircrew and maintenance technical orders delivered and adequate spares available to support 509th Bombardment Wing operational tasking. IOC is declared by the Commander, Air Force Global Strike Command when the B-2 operational squadrons have completed each incremental upgrade.

108.1	N/A	16	108.1	N/A	16	108.1	108.1

Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this FFP contract.

Contract Comments

Contract awarded September 27, 2012, for LRIP, with three options, one for Full Rate Production, and two for installs.

Deliveries and Expenditures

Delivered to Date	Plan to Date	Actual to Date	Total Quantity	Percent Delivered
Development		4	4	100.00%
Production		0	16	0.00%
Total Program Quantity Delivered		4	20	20.00%

Expended and Appropriated (TY \$M)

Total Acquisition Cost	539.0	Years Appropriated	10
Expended to Date	446.2	Percent Years Appropriated	76.92%
Percent Expended	82.78%	Appropriated to Date	529.2
Total Funding Years	13	Percent Appropriated	98.18%

The above data is current as of 2/14/2014.

Operating and Support Cost

B-2 EHF Inc 1

Assumptions and Ground Rules

Cost Estimate Reference:

The cost estimate is based on the FY 2012 Program Office Estimate and Air Force Cost Analysis Agency Independent Cost Estimate which was reviewed by the Air Force Cost Analysis Improvement Group on July 24, 2012 and resulted in the Service Cost Position.

Sustainment Strategy:

The maintenance concept for the B-2 EHF Inc 1 is two level (organizational and depot). Organizational maintenance will consist of Air Force maintenance personnel removing and replacing failed items, performing preventative maintenance, and conducting fault isolation actions. All repairs of the Line Replaceable Units (LRUs) removed from the B-2 aircraft will be accomplished at the depot level. The source of repair for depot maintenance for Increment 1 was initially projected to be Warner Robins Air Logistics Complex (WR-ALC) for the two LRUs, the Integrated Processing Unit and the Disk Drive Unit. An Office Under Secretary Defense/Acquisition, Technology & Logistics action item out of July 2011 Defense Acquisition Executive Summary briefing directed reassessment of the organic depot strategy based on LRU reliability projections. In response, a Workload Shift package (from organic repair at WR-ALC to Contractor Depot Repair) was submitted and approved. The System Development and Demonstration (SDD) contract requires delivery of repair data and associated training. The planning for establishing this repair capability will be accomplished during the SDD contract. There are no increased O&S costs associated with B-2 EHF Inc 1, because improved reliability and maintainability provided by this modification are projected to reduce O&S costs incurred for B-2 legacy computers. The B-2 EHF Inc 1 modification is replacing two legacy LRUs with two high reliability LRUs, per Mean Time Between Failure estimates, in each of the 20 aircraft. The unitized cost is the average annual cost to maintain the modification on the entire fleet based on the 35 years of operations covered by the estimate.

Antecedent Information:

There is no antecedent system for this modification capability.

Unitized O&S Costs BY2012 \$K			
Cost Element	B-2 EHF Inc 1 1 Aircraft	None (Antecedent) N/A	
Unit-Level Manpower	22.851		0.000
Unit Operations	0.235		0.000
Maintenance	46.634		0.000
Sustaining Support	55.031		0.000
Continuing System Improvements	17.873		0.000
Indirect Support	7.983		0.000
Other	0.000		0.000
Total	150.607		--

Unitized Cost Comments:

The annual O&S cost for one aircraft in service for 35 years. $\$105.4\text{M}/20/35=\0.15M

	Total O&S Cost \$M			
	Current Production APB Objective/Threshold		Current Estimate	
	B-2 EHF Inc 1		B-2 EHF Inc 1	None (Antecedent)
Base Year	105.4	115.9	105.4	N/A
Then Year	151.0	N/A	151.0	N/A

Total O&S Costs Comments:

The estimate covers 35 years of operations (FY 2013 - 2048) for 20 Primary Aircraft Authorized flying over 7,100 flight hours per year at steady state.

Disposal Costs:

Disposal costs for this modification are included in the B-2 platform.
