Mission and Description

The DoD National Airspace System (NAS) is comprised of three systems: the Digital Airport Surveillance Radar (DASR), the DoD Advanced Automation System (DAAS), also known as the Standard Terminal Automation Replacement System (STARS) within the Federal Aviation Administration (FAA), and the Voice Communication Switching System (VCSS). The DoD NAS program is modernizing the DoD radar approach control facilities in parallel with the FAA. The DoD NAS program provides systems and facilities compatible/interoperable with the FAA modernization, prevents DoD flight delays and cancellations, continues DoD's access into Special Use Airspace, provides transparent services to military and civil aircraft, replaces aging DoD Air Traffic Control (ATC) systems, and increases flight safety. NAS is a Non-Developmental Item (NDI) acquisition. DoD will upgrade voice, data, and sensor systems as well as facility configurations and operations concepts to provide continued quantity and quality of ATC services to the aviation community. To supplement the DAAS, the DoD procured the Airfield Automation System (AFAS) to integrate weather, airport environmental data, and airfield equipment status at air traffic control positions. DoD military ATC and fighting/flying readiness will be maintained.

The unit of measure of this program represents NAS operational sites. A NAS site (unit) represents at least one paired DoD Advanced Automation Systems (DAAS) and Digital Airport Surveillance Radars (DASR). This definition of a unit is not representative of the typical equipment installed at a NAS site. It does not account for Voice Communication Switching System equipment, stand-alone DAAS equipment, or sites that have multiple DASR systems. Costs vary significantly from site to site due to particular site unique configuration requirements.

Low Rate Initial Production

	Initial LRIP Decision	Current Total LRIP
Approval Date	7/1/1995	8/8/2001
Approved Quantity	8	20
Reference	Milestone II ADM	ADM
Start Year	1995	1995
End Year	2001	2001

The Current Total LRIP Quantity is more than 10% of the total production quantity due to Air Force approved amendment to the Acquisition Decision Memorandum (ADM) dated August 8, 2001, which authorized LRIP of up to 20 Digital Airport Surveillance Radars (DASRs) and 13 DoD Advanced Automation Systems (DAAS). This keeps DoD DASR production and deployment efforts on track avoiding shutdown, restart, and retraining impacts.

The LRIP quantity of eight DASR and zero DAAS approved at Milestone II during July 1995 was for the radar and automation portions of NAS.

Assumptions and Ground Rules

Cost Estimate Reference:

The O&S cost estimate is based on analysis performed for the Milestone III decision, letter titled "Department of Defense (DOD) National Airspace System (NAS) Air Force Cost Analysis Improvement Group (AFCAIG) Service Cost Position (SCP)" from the Air Force Financial Management and Comptroller Cost and Economics office dated March 18, 2005.

Sustainment Strategy:

The estimate assumes a 34 year life from year FY 2000 to FY 2034 for the 88 sites.

Antecedent Information:

There is no antecedent system.
