## Mission and Description

The C-5 Reliability Enhancement and Re-engineing Program (C-5 RERP) is the second phase of a two-phase modernization program for the C-5. The Avionics Modernization Program was Phase I and is the baseline for C-5 RERP. Following completion of Phase II, C-5 RERP, the aircraft is designated a C-5M. C-5 RERP is a comprehensive modernization effort that will improve aircraft reliability, maintainability, and availability. C-5 RERP will enable the C-5M to achieve wartime mission requirements by increasing fleet availability (mission capable rates and departure reliability), reducing total ownership costs, and improving aircraft performance. This effort centers on replacing the current TF39 engine with a more reliable, commercial off-the-shelf General Electric (GE) CF6-80C2 (F138-GE-100 military designation) turbofan engine with increased takeoff thrust, stage-3 noise compliance, and Federal Aviation Regulation pollution compliance. In addition to new engines/pylons, C-5 RERP will provide upgrades to wing attachment fittings; new thrust reversers and auxiliary power units; upgrades to the electrical, hydraulic, fuel, fire suppression, landing gear, and pressurization/air conditioning systems; and airframe structural modifications. These aircraft improvements increase payload capability and access to communication, navigation, surveillance/air traffic management airspace. C-5 RERP also decreases aircraft time-to-climb, increases engine-out climb gradient for takeoff, improves transportation system throughput, and decreases engine removals.

The procurement tempo to deliver a C-5 RERP aircraft is a three-year process. The first year is advance procurement of material with longer than 12 months duration to buy and deliver, the second year involves material procurement and fabrication, while the third and final year is installation on the aircraft.

## Executive Summary

Lockheed Martin Aeronautics (LMA) delivered nine C-5M aircraft to the Air Force in 2015. The total complement of aircraft for Dover Air Force Base (AFB) was completed in 2014. Travis AFB received 9 aircraft, bringing their complement of aircraft to 14 as of December 31, 2015. The 9 deliveries in CY 2015 brought the total number of C-5Ms delivered to 32 aircraft. In addition, LMA delivered 2 aircraft in CY 2016 bringing the total C-5M fleet to 34 aircraft as of February 22, 2016.

Aircraft 68-0213, the first C-5C model to undergo the RERP modification, was delivered on April 24, 2015 and was ferried to Stewart Air National Guard Base (ANGB) for refurbishment before final delivery to Travis AFB.

A "handshake" agreement was reached during negotiations for the FY 2015 Lot 7 Production (Install) contract on the first day of "face-to-face" negotiations on July 6, 2015. The contract was awarded on August 13, 2015 and is the final lot buy for RERP.

Since the introduction of a government advisory team and an onsite representative in CY 2013, an improved LMA production feedback process and streamlined LMA/Defense Contract Management Agency flight operations process have stabilized the RERP modification line. Significant savings have been achieved in several modification phases: aircraft induction timelines have been reduced 32 percent; aircraft modification timelines have been reduced 15 percent; quality assurance steps have been reduced 16 percent and functional testing has been reduced 8 percent. Together these reductions have reduced the delivery time from 678 calendar days in CY 2013 to 479 calendar days in CY 2015, a reduction of 199 calendar days (29 percent). LMA delivered nine of nine aircraft scheduled for delivery in CY 2015 and two of eight aircraft planned for delivery in CY 2016. Thirty-four of fifty-two aircraft have been modified to the C-5M configuration as of February 22, 2016.

A C-5 Safety Investigation Board (SIB) convened January 5, 2015 in response to multiple gear strikes causing a Class B mishap during acceptance testing at LMA. The number one main landing gear malfunctioned twice on two separate acceptance test flights while conducting hydraulic pressure tests during landing gear retraction. The SIB completed its investigation January 29, 2015 and the formal outbrief to the Air Force Life Cycle Management Center commander was held February 20, 2015. All recommendations were implemented. The aircraft completed acceptance testing March 31, 2015 and was delivered on April 6, 2015. The aircraft was ferried to Stewart ANGB for refurbishment on April 8, 2015 prior to delivery to Travis AFB.

At Air Mobility Command's request, the C-5 team successfully expedited delivery and fielding of updated C-5 software (Operational Flight Program version 3.5.2) and associated logistics support to include training, technical orders and the Time Compliance Technical Order (TCTO). The new software fixed a number of nuisance errors and also eliminated a safety risk during takeoff and landing. The contract was awarded January 29, 2015; aircrew training was completed March 31, 2015; and the TCTO was completed on all fielded aircraft (total of 30) in November 2015. The first Lot 6 production aircraft to be delivered with the new software occurred October 21, 2015.

On April 2, 2015, C-5M 85-0010, from Travis AFB, set 46 world records in the time to climb category with a 264,000 pound payload. Gross takeoff weight was 735,222 pounds. The records have been validated and certified by the National Aeronautics Association and the Federation Aeronautique Internationale. The C-5M Super Galaxy is now the top aviation record holder with a total of 89 world records; beating the AN-225 (73 records) and the B-1B (83 records).

The C-5 RERP CPD requires the C-5M to achieve a wartime Mission Capability Rate (MCR) of 75 percent. Since the start of production in October 2010, the C-5M has demonstrated that capability during several events. The latest event was three C-5Ms supporting real-world movement of helicopters and other equipment from Rota Air Base Portugal to Afghanistan from December 6, 2015 to January 2, 2016. During this period, the aircraft flew 41 sorties and achieved an impressive 90.5 percent MCR.

There are no significant software-related issues with this program at this time.

#### Confidence Level

Confidence Level of cost estimate for current APB: 50%

Confidence Level for current Acquisition Program Baseline (APB) cost is 50%. The Independent Cost Estimate (ICE) to support C-5 RERP Full Rate Production decision, like all life-cycle cost estimates previously performed by the Cost Assessment and Program Evaluation (CAPE), is built upon a product-oriented work breakdown structure, based on historical actual cost information to the maximum extent possible, and, most importantly, based on conservative assumptions that are consistent with actual demonstrated contractor and government performance for a series of acquisition programs in which the Department has been successful.

It is difficult to calculate mathematically the precise confidence levels associated with life-cycle cost estimates prepared for Major Defense Acquisition Program (MDAPs) programs. Based on the rigor in methods used in building estimates, the strong adherence to the collection and use of historical cost information, and the review of applied assumptions, we project that it is about equally likely that the estimate will prove too low or too high for execution of the program described.

## Low Rate Initial Production

Item	Initial LRIP Decision	Current Total LRIP
<b>Approval Date</b>	11/5/2001	3/25/2008
<b>Approved Quantity</b>	12	16
<b>Reference</b>	Milestone B ADM	Milestone C ADM
<b>Start Year</b>	2006	2007
<b>End Year</b>	2010	2012

The Current Total LRIP Quantity is more than 10% of the total production quantity due to the C-5 RERP Milestone C ADM approving an LRIP quantity of 16 systems as being necessary to maintain a steady ramp to FRP. The start year changed from the Initial LRIP Decision to the Current Total LRIP during the Nunn-McCurdy restructure.

The procurement tempo to deliver a C-5 RERP aircraft is a three-year process. The first year is advance procurement of material with longer than 12 months duration to buy and deliver. The second year involves material procurement and fabrication, while the third and final year is installation on the aircraft.

## Contracts

### Contract Identification

**Appropriation:** Procurement  
**Contract Name:** C-5 RERP FRP Lot 5  
**Contractor:** Lockheed Martin  
**Contractor Location:** 86 South Cobb Drive  
 Marietta, GA 39963-0290  
**Contract Number:** FA8625-07-C-6471/5  
**Contract Type:** Fixed Price with Economic Price Adjustment (FPEPA)  
**Award Date:** October 20, 2010  
**Definitization Date:** October 20, 2010

### Contract Price

Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price At Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
162.9	N/A	11	1099.1	N/A	11	1099.1	1099.1

### Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to contract modification adding the following to Lot 5: Long lead, material/fabrication, installation, initial spares, readiness spares package, rapid repair and response, and support equipment.

### Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this (FPEPA) contract.

### General Contract Variance Explanation

Cost and schedule variances are not reported for this contract, because an EVM waiver was granted in an ADM, dated October 07, 2010, due to fixed price production contract.

### Notes

This contract is more than 90% complete; therefore, this is the final report for this contract.

**Contract Identification**

**Appropriation:** Procurement  
**Contract Name:** C-5 RERP FRP Lot 6  
**Contractor:** Lockheed Martin  
**Contractor Location:** 86 South Cobb Drive  
 Marietta, GA 39963-0290  
**Contract Number:** FA8625-07-C-6471/6  
**Contract Type:** Fixed Price with Economic Price Adjustment (FPEPA)  
**Award Date:** October 21, 2011  
**Definitization Date:** October 21, 2011

Contract Price							
Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price At Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
160.0	N/A	11	1014.6	N/A	11	1014.6	1014.6

**Target Price Change Explanation**

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to contract modification adding the following to Lot 6: Long lead, material/fabrication, installation, initial spares, readiness spares package, rapid repair and response, and support equipment.

**Cost and Schedule Variance Explanations**

Cost and Schedule Variance reporting is not required on this (FPEPA) contract.

**Contract Identification**

**Appropriation:** Procurement  
**Contract Name:** C-5 RERP FRP Lot 7  
**Contractor:** Lockheed Martin  
**Contractor Location:** 86 Cobb Drive  
 Marietta, GA 39963-0290  
**Contract Number:** FA8625-07-C-6471/7  
**Contract Type:** Fixed Price with Economic Price Adjustment (FPEPA)  
**Award Date:** October 19, 2012  
**Definitization Date:** October 19, 2012

Contract Price							
Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price At Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
155.5	N/A	11	1088.0	N/A	11	1088.0	1088.0

**Target Price Change Explanation**

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to contract modification adding the following to Lot 7: Long lead, material/fabrication, installation, and rapid repair and response.

**Cost and Schedule Variance Explanations**

Cost and Schedule Variance reporting is not required on this (FPEPA) contract.

## Deliveries and Expenditures

Deliveries				
Delivered to Date	Planned to Date	Actual to Date	Total Quantity	Percent Delivered
Development	3	3	3	100.00%
Production	30	31	49	63.27%
Total Program Quantity Delivered	33	34	52	65.38%

Expended and Appropriated (TY \$M)			
Total Acquisition Cost	7066.6	Years Appropriated	16
Expended to Date	5450.4	Percent Years Appropriated	100.00%
Percent Expended	77.13%	Appropriated to Date	7066.6
Total Funding Years	16	Percent Appropriated	100.00%

The above data is current as of February 09, 2016.

RERP 3010/3600 expenditures as of February 9, 2016.

Scheduled deliveries are based on the award of the Production Contract Schedule Re-Baseline modification, dated November 6, 2012.

## Operating and Support Cost

### Cost Estimate Details

Date of Estimate:

Source of Estimate:

Quantity to Sustain:

Unit of Measure:

Service Life per Unit:

Fiscal Years in Service:

O&S costs are not tracked separately for C-5 RERP. O&S costs are included in the overall operational costs for the existing C-5 fleet managed by the program office at Robins Air Force Base.

### Sustainment Strategy
