SAR Baseline (Production Estimate)

Defense Acquisition Executive (DAE) Approved Acquisition Program Baseline (APB) dated April 27, 2016

Approved APB

Defense Acquisition Executive (DAE) Approved Acquisition Program Baseline (APB) dated April 27, 2016

Mission and Description

The primary mission of the Joint Light Tactical Vehicle (JLTV) is to provide protected, sustained and networked light tactical mobility to the Joint forces capable of worldwide deployment across the full spectrum of military operations and mission profiles under all weather and terrain conditions.

The JLTV will be transportable over long distances within any theater of operations through numerous lift assets and options, from sealift and amphibious shipping to airlift (both fixed and rotary wing) and low velocity aerial delivery. It will provide mobility to reconnaissance units and direct fire in support of combat maneuver with substantial payload for personnel, equipment and supplies.

The JLTV will support command, control and communication in both stationary and on-the-move modes, enabling interoperability with Joint and coalition forces in decentralized operations over extended ranges in complex and dynamic operational environments.

System Description: the JLTV Family of Vehicles is comprised of two variants based upon a common automotive platform, a two-seat Combat Support Vehicle (CSV) and a four-seat Combat Tactical Vehicle (CTV) as well as a companion trailer. The two-seat CSV variant consists of one base vehicle platform: the Utility (UTL); which has a payload capacity of 5,100-pounds. The four-seat CTV variant consists of two base vehicle platforms: the General Purpose (GP) and the Close Combat Weapons Carrier (CCWC); which has a payload capacity of 3,500-pounds. Each base vehicle platform will be configured as mission package configurations such as the GP, Heavy Guns Carrier (HGC), CCWC, and UTL.

Executive Summary

Program Highlights Since Last Report

The JLTV is a Joint Army and U.S. Marine Corps (USMC) program for which the Army is the lead Service.

The JLTV program capability requirements are stable and funding is adequate to meet cost, schedule, and performance objectives established in the current approved APB. Since the last SAR report, the program did not realize an increase in programmatic or operational risk.

The JLTV program is tracking four primary program risks that were accepted at the August 2015 Milestone C and are actively managed with resourced risk mitigations in place. The four risks involve failure to: demonstrate FRP performance entry criteria; achieve compliance with the Command, Control, Communication, Computers, Intelligence, Surveillance, and Reconnaissance systems; achieve a Type Classification and Materiel Release; and to obtain transportability certification. The impact to any of these risks may delay the FRP Decision and add cost to accomplish technical integration and testing. The program's mitigations during LRIP are focused on early technical reviews, test schedule priority, optimization of test assets, and prioritization in issue resolution process.

Current Developmental and Operational Tests demonstrated compliance to all KPPs and Key System Attributes. Transportability testing was completed in November 2018 with the exception of the B-kit Low-Velocity Airdrop (LVAD) testing which is expected to complete in June 2019 with base vehicle LVAD testing also completing in June 2019 under a Systems Technical Support contract action.

On November 20, 2018, the Army Acquisition Executive (AAE) signed an ADM to increase the LRIP quantity from 4,990 to 11,087 vehicles. On December 10, 2018, the Army System Acquisition Review Council (ASARC) requested Joint Program Office (JPO) JLTV to provide additional detail from Soldier assessments of potential improvements to an Army Requirements Oversight Council (AROC) no later than May 2019. The AAE approved fielding of LRIP production quantities with a Conditional Material Release at the ASARC.

Between February and April 2018, Army and USMC units participated in the JLTV Multi-Service Operational Test and Evaluation (MOT&E) event. This was held at Twentynine Palms, California, with a USMC Amphibious Assault mission conducted at Camp Pendleton, California. A total of 39 JLTVs ran approximately 36,500 miles during this event, which included unique mission cycles, helicopter sling load, amphibious landing, and road marches. Eighteen performance areas of note were identified based on feedback from Soldiers and Marines. Ten were resolved and fixes will be implemented on all fielded trucks. Four are in process and will be retrofitted as designs are finalized and funding is available. Two performance areas and two trades were reviewed at a November 30, 2018 AROC with the PEO and Cross Functional Teams to provide performance improvement recommendations to senior leaders no later than May 2019.

JPO JLTV, in support of the AROC and ASARC direction, will provide test vehicles to Army Futures Command and Army Test and Evaluation Command by April 2019 for evaluation of Situational Awareness optimal solution sets to include larger door windows with and without camera mix. Improvements for noise reduction (both internal and external), to include mufflers, alternator isolation and new design on gears for gear box, and transaxles are desired to be included with Soldier' Situational Awareness feedback assessment. Cost, schedule, performance, and prioritization of unit requirements will be captured for troop seats (including automotive style seat belts with integrated roll-over protection) and JLTV-trailers to be provided to senior leaders.

There are no significant software-related issues with this program at this time.

| History of Significant Developments Since Program Initiation | |
|--|--|
| History of Significant Developments Since Program Initiation | |
| Date | Significant Development Description |
| January 2007 | JLTV is one of the first programs to fully implement the OSD September 2007 Competitive Prototyping policy which calls for two or more competing teams producing prototypes through Milestone B with the goal of reducing risk and synchronizing requirements. |
| December 2007 | JLTV achieved Milestone A initiating the Technology Development (TD) phase. |
| October 2008 | Three cost reimbursable contracts with a total value of \$239.8M were awarded under full and open competition to BAE Systems Land & Armaments, General Tactical Vehicles LLC and Lockheed Martin Corporation. TD efforts included the design, development, modeling, simulation, fabrication, test and test support of 24 prototype JLTVs and companion trailers. The initial requirements proved very challenging for the TD prototypes. Consequently, the requirements evolved to incorporate lessons learned and were closely aligned with the capabilities and performance demonstrated by the TD vendors. |
| January 2012 | A full and open competition solicitation was issued using a best value tradeoff source selection process. |
| August 2012 | The Milestone B decision authorized entry into EMD. |
| August 2012 | Three firm-fixed price contracts with a total value of \$184.8M were awarded to the AM General LLC, Lockheed Martin Corporation and Oshkosh Defense LLC for a 27-month period of performance. The EMD phase included 14-months of performance, reliability and ballistic testing in order to validate that JLTV prototype vehicles achieve KPP and Key System Attribute thresholds and to support the source selection process for Production and Deployment. Each EMD vendor fabricated, assembled, tested and delivered a total of 66 prototype vehicles and 18 trailers (22-vehicles and six-trailers from each vendor), along with ballistic structures, armor coupons and other test assets, vendor-furnished kits, trailers and data requirements. In November 2014, the period of performance for all three contracts ended and all EMD testing successfully completed. |
| August 2015 | On August 25, 2015, the Milestone C DAB was successfully held and the DAE signed the ADM authorizing entrance into the Production and Deployment phase. The contract was awarded on the same day to Oshkosh Defense LLC. On September 8, 2015 a Stop Work Order was issued to Oshkosh after Lockheed Martin filed a protest with the Government Accountability Office (GAO). On December 15, 2015 the GAO dismissed the protest due to Lockheed Martin's notice of intent to file a Post-Award Bid Protest with the U.S. Court of Federal Claims (COFC). The Stop Work Order was officially cancelled and Oshkosh resumed work. On December 17, 2015 Lockheed Martin officially filed a complaint with the COFC. On February 12, 2016 the COFC denied their request for a preliminary injunction and shortly after on February 17, 2016 Lockheed Martin officially withdrew their protest of the JLTV contract award decision. |
| April 2018 | Between February and April 2018, Army and USMC units participated in the JLTV Multi-Service Operational Test and Evaluation event. This was held at Twenty-Nine Palms, California, with a USMC Amphibious Assault mission conducted at Camp Pendleton, California. A total of 39 JLTVs ran approximately 36,500 miles during this event, which included unique mission cycles, helicopter sling load, amphibious landings, and road marches. |
| November 2018 | Approval of increase to LRIP quantity and awarded an additional 6,097 vehicles on November 27, 2018. |
| November 2018 | Army Requirements Oversight Council provided guidance to obtain Soldier assessment on situational awareness and provide additional information on noise, troop seats, and trailers. |
| December 2018 | Army System Acquisition Review Council approved fielding of LRIP production quantities under Conditional Material Release. |

| FOC | Nov 2039 | Nov 2039 | May 2040 | Nov 2039 |

Change Explanations

(Ch-1) The current estimate for Complete MOT&E changed from May 2018 to April 2018 to reflect the actual date of completion, which was one month earlier than previously estimated.
 (Ch-2) The current estimate for FRP Decision changed from December 2018 to May 2019 due to direction from the ASARC that delayed the decision so the JPO can provide additional detail from soldier assessments of potential improvements.

Notes

The above IOC is for the Army. The U.S. Marine Corps (USMC) IOC is scheduled for July 2019.
 The above FOC is for the Army. The USMC FOC is scheduled for September 2022.

Current APB Cost Estimate Reference

JLTV Joint Cost Position dated August 25, 2015

Cost Notes

For the JLTV program the unit of measure for APUC and PAUC calculations is one vehicle.

The POE, Component Cost Estimate, and an ICE were completed for the program and reconciled into a Joint Cost Position during the 2018 SAR reporting period. Risks in the estimate include:

- If material costs increase, then manufacturing costs will increase.
- Variability in Add-on-Kit densities. If current model densities are lower than required, then the program could experience cost growth that will impact the program unit cost.
- O&S Costs are based on Multi-Service Operational Test & Evaluation (MOT&E) which if fielded vehicles are not indicative of MOT&E vehicles, then program O&S costs could either increase or decrease.

| Total Quantity | | | |
|----------------|----------------------------------|------------------------|------------------|
| Quantity | SAR Baseline Production Estimate | Current APB Production | Current Estimate |
| RDT&E | 118 | 118 | 132 |
| Procurement | 54599 | 54599 | 58190 |
| Total | 54717 | 54717 | 58322 |

Quantity Notes

U.S. Marine Corps (USMC) procurement quantity increased from 5,500 to 9,091.

The 2017 SAR Current Estimate for RDT&E quantities was 116. The USMC purchased 18 additional RDT&E vehicles and the Army plans to purchase two less vehicles than originally planned in the out years which changes the Current Estimate to 132.

The Air Force and the Navy are procuring JLTVs independent of the JLTV acquisition program established in the Memorandum of Agreement between the Army and the Marine Corps. The following funding and correlated quantity are not included in the JLTV APB or the cost and funding charts displayed above.

Forecasted Air Force Requirements

| | Prior | FY 2019 | FY 2020 | FY 2021 | FY 2022 | FY 2023 | FY 2024 |
|------------|-----------|-----------|-----------|-----------|-----------|-----------|------------|
| Proc:TY\$M | \$ 53.080 | \$ 46.577 | \$ 73.026 | \$ 61.915 | \$ 64.158 | \$ 61.619 | \$ 164.275 |
| Qty | 125 | 50 | 140 | 201 | 211 | 168 | 37 |

The table above represents Air Force FY 2020 PB request to procure JLTVs.

Forecasted Navy Requirements

| | Prior | FY 2019 | FY 2020 | FY 2021 | FY 2022 | FY 2023 | FY 2024 |
|------------|----------|----------|----------|----------|----------|----------|----------|
| Proc:TY\$M | \$ 1.260 | \$ 3.427 | \$ 9.613 | \$ 3.566 | \$ 4.546 | \$ 4.323 | \$ 2.939 |
| Qty | 3 | 8 | 22 | 8 | 10 | 9 | 6 |

The table above represents Navy FY2020 PB request to procure JLTVs.

Cost and Funding

Funding Summary

| Appropriation Summary | | | | | | | | | |
|---|--------|---------|---------|---------|---------|---------|---------|-------------|---------|
| FY 2020 President's Budget / December 2018 SAR (TY\$ M) | | | | | | | | | |
| Appropriation | Prior | FY 2019 | FY 2020 | FY 2021 | FY 2022 | FY 2023 | FY 2024 | To Complete | Total |
| RDT&E | 826.4 | 0.0 | 4.8 | 1.7 | 1.8 | 1.8 | 2.0 | 44.9 | 883.4 |
| Procurement | 2206.7 | 1878.7 | 1554.1 | 1581.3 | 1538.6 | 1520.4 | 1528.6 | 12814.5 | 24622.9 |

| Delta | -11.5 | -53.6 | -302.4 | -138.2 | -250.4 | -116.9 | -88.8 | -1356.1 | -2317.9 |

Funding Notes

The Program Office was approved by the Milestone Decision Authority to increase the LRIP quantity limit and permit taking advantage of contractually beneficial ordering periods to the Government and maintain an orderly increase in the production rate for the system sufficient to support a positive Full-Rate Production decision upon the successful resolution of remaining MOT&E performance areas. This award resulted in ~\$53M Joint (Army and USMC) cost avoidance based on the terms of the contract.

FY 2018 Army RDTE funds of \$16.9M accounts for a \$5.677M rescission due to under execution of FY 2018 funds that were set aside for MOT&E support. Loss of funding reduces the ability to complete engineering and integration optimization, and reduces the ability to increase capability to include emerging technologies.

FY 2018 Army Procurement funds of \$810.0M accounts for a \$24.390M rescission due to achieving the LRIP quantity limitation on contract. These reductions will limit procurement of vehicles but mitigations will enable Full Rate Production, First Unit Equipped, and Initial Operational Capability to occur on schedule.

Beginning in FY 2019, the Army realigned direct civilian personnel pay costs from RDT&E and Procurement investment accounts to O&M to provide additional transparency and auditability.

The To Complete dollars include program funding from FY 2025 through FY 2039

Low Rate Initial Production

| Item | Initial LRIP Decision | Current Total LRIP |
|--------------------------|-----------------------|--------------------------------|
| Approval Date | 8/20/2012 | 11/20/2018 |
| Approved Quantity | 3100 | 11087 |
| Reference | Milestone B ADM | ADM for LRIP Quantity Increase |
| Start Year | 2015 | 2015 |
| End Year | 2017 | 2019 |

The Current Total LRIP Quantity is more than 10% of the total production quantity of 58,190. The LRIP increase from the previously approved LRIP Quantity of 4,990 vehicles to 11,087 vehicles will permit an orderly increase in the production rate for the system which is sufficient to lead to FRP upon the successful resolution of remaining Multi-Service Operational Test & Evaluation performance areas.

Contracts

| Contract Identification | |
|-----------------------------|--|
| Appropriation: | Procurement |
| Contract Name: | LRIP & FRP contract |
| Contractor: | Oshkosh Defense LLC |
| Contractor Location: | 2307 Oregon St Oshkosh, WI 54902 |
| Contract Number: | W56HZV-15-C-0095 |
| Contract Type: | Firm Fixed Price (FFP), Cost Plus Fixed Fee (CPFF) |
| Award Date: | August 25, 2015 |
| Definitization Date: | December 15, 2015 |

| Contract Price | | | | | | | |
|------------------------------|---------|-----|------------------------------|---------|-------|-------------------------------------|-----------------|
| Initial Contract Price (\$M) | | | Current Contract Price (\$M) | | | Estimated Price At Completion (\$M) | |
| Target | Ceiling | Qty | Target | Ceiling | Qty | Contractor | Program Manager |
| 114.7 | N/A | 201 | 3483.4 | N/A | 11121 | 3483.4 | 3483.4 |

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to exercising Option Periods 1 through 3 which includes buying 10,920 additional vehicles plus associated kits, trailers, test support, System Engineering and Program Management, System Technical Support, and the JLTV Technical Data Package.

The Current Contract Price Target also includes Air Force Procurement funds for the purchase of 130 vehicles, Navy Procurement funds for the purchase of three vehicles, FMS funds for a United Kingdom (UK) System Technical Support work directive and FMS funds for the purchase of two UK vehicles along with associated kits in accordance with FMS case UK-B-WTH.

Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this (FFP/CPFF) contract.

General Contract Variance Explanation

An EVM waiver was granted by the Army Acquisition Executive on July 1, 2015 due to the Cost Plus Fixed Fee Contract Line Items containing Level of Effort (LOE) type work. There is a possibility that an System Technical Support work directive could exceed the \$20M threshold, represent work of a discrete, non-LOE nature, and reflect a period of performance long enough to warrant application of EVM. Should such a case arise, JLTV will invoke EVM requirements on any individual or combination of related work directives that reflect such characteristic.

Notes

This contract is comprised of a basic performance period plus eight option periods.

| Current Contract | Qty |
|-------------------------|--------------|
| Army | 8440 |
| USMC | 2546 |
| Air Force | 130 |
| Navy | 3 |
| UK | 2 |
| Grand Total | 11121 |

Total quantity includes RDT&E and Procurement funded vehicles. Army quantity includes 60 Army Reserve vehicles.

Deliveries and Expenditures

| Deliveries | | | | |
|----------------------------------|-----------------|----------------|----------------|-------------------|
| Delivered to Date | Planned to Date | Actual to Date | Total Quantity | Percent Delivered |
| Development | 118 | 118 | 132 | 89.39% |
| Production | 3337 | 3330 | 58190 | 5.72% |
| Total Program Quantity Delivered | 3455 | 3448 | 58322 | 5.91% |

| Expended and Appropriated (TY \$M) | | | |
|------------------------------------|---------|----------------------------|--------|
| Total Acquisition Cost | 25711.0 | Years Appropriated | 12 |
| Expended to Date | 1906.8 | Percent Years Appropriated | 37.50% |
| Percent Expended | 7.42% | Appropriated to Date | 4922.8 |
| Total Funding Years | 32 | Percent Appropriated | 19.15% |

The above data is current as of March 11, 2019.

Notes

The Development Quantity above includes 90 RDT&E-funded, prototype vehicles purchased during the Technology Development and EMD.

Operating and Support Cost

Cost Estimate Details

| | |
|---------------------------------|-------------------|
| Date of Estimate: | December 31, 2018 |
| Source of Estimate: | POE |
| Quantity to Sustain: | 58190 |
| Unit of Measure: | Vehicle |
| Service Life per Unit: | 20.00 Years |
| Fiscal Years in Service: | FY 2019 - FY 2058 |

The total JLTV vehicle quantity of 58,322 includes 132 RDT&E-funded vehicles and 58,190 Procurement-funded vehicles. RDT&E vehicles represent prototypes from Technology Development and EMD and vehicles for Live Fire and Destructive Testing during Production. Prototypes, Live Fire Test, and Destructive Test assets will not be fielded.

Procurement Quantity: 49,099 (Army) / 9,091 (U.S. Marine Corps (USMC))

Sustainment Strategy

The Sustainment Strategy reflects peacetime Operational Tempo (OPTEMPO) as identified by sub-configuration by the Army and in JLTV Operation Mode Summary & Mission Profile for the USMC. Reduced OPTEMPO is used for Army training, Army Prepositioned Stocks and inactive USMC units.

Interim Contractor Support begins in FY 2019 for Army and USMC fielding and will not exceed three years; sustainment then transitions to organic maintenance support. USMC Supply Support is required from IOC (FY 2020) until fielding is complete (FY 2023).

The Army maintenance concept is two levels of maintenance: Field and Sustainment. The USMC maintenance concept is three levels of maintenance: Operator/Crew, Field, and Sustainment.

The JLTV will incur a condition-based overhaul, starting at ten years. Of the operational vehicles that are older than ten years, 2.4 percent per year will undergo condition-based overhaul.

Antecedent Information

The Antecedent System is the High Mobility Multipurpose Wheeled Vehicle (HMMWV). Total and annual per vehicle O&S costs for HMMWV were provided by Army Product Manager Light Tactical Vehicles (PM LTV). This estimate is based on an operating schedule from FY 2015 to FY 2045 and includes actual HMMWV costs as available.

The HMMWV costs provided by PM LTV are for Army only.

| Annual O&S Costs BY2015 \$K | | | |
|--------------------------------|---------------------------------|--|-------------------------------|
| Cost Element | JLTV | | HMMWV (Antecedent) |
| | Average Annual Cost Per Vehicle | | Average Annual \$ Per Vehicle |
| Unit-Level Manpower | 6.332 | | 8.000 |
| Unit Operations | 2.145 | | 1.700 |
| Maintenance | 8.869 | | 4.500 |
| Sustaining Support | 1.670 | | 5.500 |
| Continuing System Improvements | 1.375 | | 0.600 |
| Indirect Support | 0.990 | | 3.000 |
| Other | 0.000 | | 0.000 |
| Total | 21.381 | | 23.300 |

The JLTV O&S costs reflect peacetime operations.

| Item | Total O&S Cost \$M | | | |
|------------------|--|------------------|--------------------|---------|
| | JLTV | | HMMWV (Antecedent) | |
| | Current Production APB Objective/Threshold | Current Estimate | | |
| Base Year | 27224.1 | 29946.5 | 24883.0 | 57839.0 |
| Then Year | 40346.6 | N/A | 37167.9 | N/A |

Equation to Translate Annual Cost to Total Cost

Unitized O&S Cost = Total O&S Costs / Total Operational Vehicle Years where Total Operational Vehicle Years = Total Operating Vehicles x Economic Useful Life

Total O&S Costs: \$24,883.0M (BY\$ 2015)

Total Operational Vehicle Years: 1,163,800

Total Operating Vehicles: 58,190

Economic Useful Life: 20 Years

| O&S Cost Variance | | |
|--|-------------|---|
| Category | BY 2015 \$M | Change Explanations |
| Prior SAR Total O&S Estimates - Dec 2017 SAR | 26777.7 | |
| Programmatic/Planning Factors | 0.0 | |
| Cost Estimating Methodology | -1200.9 | Updated methodology for field maintenance civilian labor, system specific base operations, consumables & reparable. |
| Cost Data Update | -723.8 | Reflects updated vehicle manufacturing costs as input to |

modifications & overhaul. Updated cost data for transportation & training costs.

| | | |
|-------------------------|----------------|-----------------------------------|
| Labor Rate | 714.4 | Updated AMCOS Military Pay rates. |
| Energy Rate | -684.4 | Updated cost of fuel. |
| Technical Input | 0.0 | |
| Other | 0.0 | |
| Total Changes | -1894.7 | |
| Current Estimate | 24883.0 | |

Disposal Estimate Details

| | |
|--|-------------------|
| Date of Estimate: | December 31, 2018 |
| Source of Estimate: | POE |
| Disposal/Demilitarization Total Cost (BY 2015 \$M): | 185.2 |

Total Demilitarization Cost includes costs for disposal and transportation associated with disposal of JLTVs. The reduction in disposal costs is due to cost estimating updates.
