## Mission and Description

The AGM-88E Advanced Anti-Radiation Guided Missile (AGM-88E AARGM) program fields a major system upgrade to the AGM-88 High Speed Anti-Radiation Missile (HARM) inventory. The AGM-88E AARGM provides a significant enhancement to Naval operational capability in the Offensive Counter Air/Suppression of Enemy Air Defenses (SEAD) mission area by technological upgrade to the HARM guidance system to counter enemy use of simple and cheap countermeasures and tactics such as mobility and radar shutdown. The AGM-88E AARGM is employed in the Offensive Counter Air/SEAD role in direct support of all mission areas within the objective force (e.g., Strike Warfare, Amphibious Warfare, Anti-Surface Ship Warfare, Command and Control Warfare and Information Warfare) providing a rapid, organic response to air defense threats ranging from Smaller Scale Contingencies to Major Theater War. It will be employed by Naval aircraft operating from both sea and land bases.

The AGM-88E AARGM missile provides a new multi-mode guidance section and modified control section mated with existing HARM propulsion and warhead sections. The new guidance section has a passive Anti-Radiation Homing receiver and associated antennae, a Global Positioning System/Inertial Navigation System, and Millimeter Wave radar for terminal guidance capability. The AGM-88E AARGM also has the capability to transmit terminal (end game) data via a Weapon Impact Assessment transmitter to national satellites just before AGM-88E AARGM impacts its target.

The AGM-88E AARGM is the acquisition upgrade and complement to HARM, the Navy's only Defense Suppression missile. Acquisition of AGM-88E AARGM is critical to addressing the limitations and shortcomings of HARM, which include counter shutdown capability, limited lethality against advanced threat air defense units, limited captive carry life and no impact reporting capability.

The AGM-88E AARGM is fielded on the F/A-18C-F and the EA-18G. CPD objective aircraft include EA-6B, F-16C/J and F-35 external carriage (post platform IOC).

## Executive Summary

### Program Highlights Since Last Report

The AGM-88E AARGM Program remains on track and is executing the production, deployment and sustainment phases of the program. AARGM procurements are scheduled to continue through FY 2023. A total of 2,435 AARGM (including Captive Air Training Missiles (CATMs) and spare Guidance and Control Sections) are planned for production. 680 All Up Rounds have been delivered to date.

The Cooperative Production, Sustainment and Follow-on Development Memorandum of Agreement between the United States and Italy remains in effect.

AARGM Full Rate Production lot 7 was awarded May 2018 for Department of the Navy (DoN) and Royal Australian Air Force (RAAF) Foreign Military Sales production requirements; and Italian Air Force (ITAF) production requirements were added to the contract in September 2018.

The AARGM Block 1 Upgrade (software) addressed initial operational test and evaluation deficiencies and service-deferred Key Performance Parameters (KPPs). Fleet release of Block 1 Upgrade was initiated in May 2017 upon request from Fleet Forces Command. Fielding completed January 2018 and has subsequently met all KPPs during fleet operations.

Integration of AARGM on the ITAF's Tornado aircraft was completed April 2018 with successful Operational Testing.

There are no significant software-related issues with this program at this time.

History of Significant Developments Since Program Initiation	
History of Significant Developments Since Program Initiation	
Date	Significant Development Description
June 2003	The AARGM AGM-88E program received Milestone B approval to enter the System Development and Demonstration (SD&D) acquisition phase.
June 2003	ATK Missile Systems Company (AMSC) was awarded the SD&D phase contract. A total of 40 development missiles were produced.
July 2003	Navy Acquisition Executive (NAE) approved the Development APB.
October 2003	The System Design Review was conducted.
April 2005	The System Preliminary Design Review was conducted.
November 2005	The Cooperative Development Memorandum of Agreement (MOA) between the U.S. and Italy was signed.
February 2006	The Critical Design Review was conducted.
May 2007	Completed Developmental Test (DT)-1 firing.
October 2007	NAE approved the Development APB change 1.
July 2008	The AARGM Capabilities Production Document (CPD) was approved by JROC (152-08).
September 2008	The Milestone C Review was conducted. The Milestone C ADM granted LRIP authority with a not-to-exceed quantity of 187 units.
September 2008	The Operational Assessment (OA) was completed.
December 2008	The LRIP I contract was awarded.
January 2009	NAE approved the Production APB.
November 2009	A Cooperative Production, Sustainment and Follow-on Development MOA between the U.S. and Italy was signed.
April 2010	NAE approved the Production APB change 1.
April 2010	OPNAV approved the AARGM CPD Change 1, serial number 808-88-10.
June 2010	Initiated Operation Evaluation (OPEVAL) (Initial Operational Test & Evaluation (IOT&E)).
July 2010	The LRIP II contract was awarded.
November 2010	A Verification of Correction of Deficiencies (VCD) period was conducted to address anomalies identified in IOT&E.
February 2011	NAE approved the Production APB change 2.
July 2011	The AARGM program held a successful Operational Test Readiness Review (OTRR) and received approval to continue IOT&E.
October 2011	The LRIP III contract was awarded.
November 2011	NAE approved the Production APB change 3.
April 2012	IOT&E was completed.
June 2012	A VCD period was conducted to address anomalies identified in IOT&E.
July 2012	Initial Operational Capability (IOC) declared effective July 2012.
August 2012	The FRP Decision Review was conducted.
September 2012	The FRP Lot 1 contract was awarded.

November 2012	ASN(RDA) approved the Production APB change 4.
May 2013	Letter of Offer and Acceptance (LOA) between the U.S. and Australia was signed.
September 2013	The FRP Lot 2 contract was awarded.
April 2014	The FRP Lot 3 contract was awarded.
September 2015	The FRP Lot 4 contract was awarded.
February 2016	PB 2017 increased the total quantity objective from 1,879 to 2,435 AGM-88E AARGM and extended production through FY 2023.
April 2016	The FRP Lot 5 contract was awarded.
June 2016	ASN(RDA) approved the Production APB change 5.
May 2017	Fleet release of the Block 1 Upgrade was initiated.
August 2017	The FRP Lot 6 contract was awarded.
September 2017	A new FMS Case for Australia was signed.
October 2017	The FRP Lot 6 contract for Italy was awarded.
January 2018	Fielding of the Block 1 Upgrade was completed.
April 2018	Integration of AARGM on the ITAF's Tornado aircraft was completed with successful Operational Testing.
May 2018	The FRP Lot 7 contract was awarded for U.S. and Australia.
September 2018	The FRP Lot 7 contract for Italy was awarded.

## Track to Budget

### General Notes

The FY 2020 PB includes funding for the AARGM - Extended Range (AARGM-ER) program. AARGM-ER development funding is under the same Program Element, 0205601N, but a separate Project Unit from AARGM development funding. AARGM-ER procurement funding is included in the same Budget Line Item, 2327, beginning in FY 2021.

## Low Rate Initial Production

Item	Initial LRIP Decision	Current Total LRIP
<b>Approval Date</b>	9/30/2008	1/18/2011
<b>Approved Quantity</b>	187	112
<b>Reference</b>	Milestone C ADM	Gate 6 Sufficiency Review
<b>Start Year</b>	2008	2008
<b>End Year</b>	2010	2011

Milestone C ADM of September 30, 2008 originally granted LRIP authority utilizing FY 2008 - FY 2010 funding, with a not-to-exceed quantity of 187 units. Deliveries for Phase I of LRIP, utilizing FY 2008 and FY 2009 funding, completed in October 2011. Deliveries for LRIP II, a Firm-Fixed-Price (FFP) contract utilizing FY 2010 funding, completed in November 2012. Due to delays in Initial Operational Test & Evaluation, and to avoid a production line break, the incorporation of a third LRIP into the AGM-88E AARGM Acquisition Strategy, utilizing FY 2011 funding, was approved on January 18, 2011 by the Assistant Secretary of the Navy (Research, Development, and Acquisition) at the Gate 6 Sufficiency Review. The total LRIP quantity remained under the not-to-exceed quantity of 187 units, which does not exceed the 10% guideline. The LRIP III FFP contract was awarded on October 31, 2011 at the Government's cost goal. Deliveries for LRIP III began in December 2012 and completed in December 2013.

Country	Date of Sale	Quantity	Total Cost \$M	Description
Australia	9/20/2017	(b)(3) .10 USC § 130	6.9	Letter of Offer and Acceptance between the United States and Australia was signed on September 2017 establishing FMS Case AT-P-AQP for the procurement of AGM-88E AARGM Captive Air Training Missiles, spares and support. The missiles are expected to deliver in FY 2020.
Australia	7/23/2015		11.7	Letter of Offer and Acceptance between the United States and Australia was amended on July 23, 2015 for the procurement of additional AGM-88E AARGM All Up Rounds and spares under FMS Case AT-P-AZN. The missiles were delivered in FY 2017.
Australia	5/31/2013		37.1	Letter of Offer and Acceptance between the United States and Australia was signed on May 31, 2013 establishing FMS Case AT-P-AZN for the procurement of AGM-88E AARGM Captive Air Training Missiles, spares and support. The missiles and spares were delivered in FY 2015 with support continuing through FY 2018.
Italy	11/15/2005	160	129.0	Cooperative Development Memorandum of Agreement (MOA) between Italy and the United States was signed on November 15, 2005. Cooperative Production, Sustainment and Follow-on Development MOA between Italy and the United States was signed on November 18, 2009. The quantity of 160 represents the total estimated number of missiles that Italy is expected to receive through Full Rate Production.

**Notes**

Exemption 3-(b)(3) and the applicable statute/rule is 10 U.S.C. § 130c (certain sensitive information of foreign governments) applies to the Australian data.

**Nuclear Costs**

None

## Contracts

### Contract Identification

**Appropriation:** Procurement  
**Contract Name:** AARGM FRP 6/7  
**Contractor:** Alliant TechSystems Operations, LLC  
**Contractor Location:** 9401 Corbin Avenue  
 Northridge, CA 91324  
**Contract Number:** N00019-17-C-0005  
**Contract Type:** Firm Fixed Price (FFP)  
**Award Date:** August 31, 2017  
**Definitization Date:** August 31, 2017

Contract Price							
Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price At Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
156.8	N/A	236	367.6	N/A	567	367.6	367.6

### Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to the subsequent exercise of the FRP 7 Options for the United States Navy, Italian Air Force and Royal Australian Air Force (USN/ITAF/RAAF) and the procurement of additional All Up Rounds (AURs) and Captive Air Training Missiles (CATMs) for the USN.

### Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this (FFP) contract.

### Notes

The contract value of \$367.6M includes United States Navy, Italian and Australian requirements for AURs and contractor production support.

**Contract Identification**

**Appropriation:** Procurement  
**Contract Name:** AARGM FRP 4/5  
**Contractor:** Alliant TechSystems Operations, LLC  
**Contractor Location:** 9401 Corbin Avenue  
 Northridge, CA 91324  
**Contract Number:** N00019-15-C-0123  
**Contract Type:** Firm Fixed Price (FFP)  
**Award Date:** September 03, 2015  
**Definitization Date:** September 03, 2015

**Contract Price**

Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price At Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
118.7	N/A	154	257.2	N/A	330	257.2	257.2

**Target Price Change Explanation**

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to exercising options for the United States Navy, Italian Air Force and Royal Australian Air Force quantities and modifications for obsolescence procurements and Life of Time Buys.

**Cost and Schedule Variance Explanations**

Cost and Schedule Variance reporting is not required on this (FFP) contract.

**Notes**

The contract current value of \$257.2M includes \$11.4M of Italian requirements for All Up Rounds (AURs).

This contract is more than 90% complete; therefore, this is the final report for this contract.

## Deliveries and Expenditures

Deliveries				
Delivered to Date	Planned to Date	Actual to Date	Total Quantity	Percent Delivered
Development	40	40	40	100.00%
Production	2435	692	2435	28.42%
Total Program Quantity Delivered	2475	732	2475	29.58%

Expended and Appropriated (TY \$M)			
Total Acquisition Cost	2666.5	Years Appropriated	27
Expended to Date	1484.6	Percent Years Appropriated	87.10%
Percent Expended	55.68%	Appropriated to Date	1923.5
Total Funding Years	31	Percent Appropriated	72.14%

The above data is current as of March 11, 2019.

### Notes

The 40 assets procured under the development phase are not fleet representative assets, and are not reflected in the AARGM sustainment strategy.

## Operating and Support Cost

### Cost Estimate Details

<b>Date of Estimate:</b>	January 08, 2016
<b>Source of Estimate:</b>	POE
<b>Quantity to Sustain:</b>	2435
<b>Unit of Measure:</b>	Total Quantity
<b>Service Life per Unit:</b>	15.00 Years
<b>Fiscal Years in Service:</b>	FY 2012 - FY 2039

The estimate concentrates on the costs for AGM-88E AARGM unique components. The estimate does not include any costs related to the HARM Government Furnished Hardware (rocket motor and warhead). AGM-88E AARGM has a 60 month Serviceable In-Service Time Maintenance and Reliability Monitoring Program. The 2435 quantity to sustain does not include 40 developmental assets that are not maintained.

### Sustainment Strategy

The AGM-88E AARGM sustainment approach is leveraged off of the existing High Speed Anti-Radiation Missile (HARM) maintenance structure. The system is supported via a modified three level maintenance concept utilizing Organizational (O), Intermediate (I), Depot levels and a Designated Overhaul Point (DOP) for the AGM-88E AARGM unique components (guidance and control sections). The Original Equipment Manufacturer is the DOP for guidance and control section repair based on the completed Joint Depot Source of Repair Decision process. There are no changes to the manpower requirements or manning levels at activities that will operate and provide support to AGM-88E AARGM as O-level and I-level; capabilities are consistent with the HARM operations.

### Antecedent Information

The Antecedent System is the HARM. Data is based on a HARM period of performance of FY 1990 - FY 2009 (20 years), vice FY 2011 - FY 2039 (29 years) for AARGM. Historical O&S costs were collected from the Naval Visibility & Management of Operating and Support Costs database. Antecedent costs are not normalized to the AGM-88E AARGM parameters.

Cost Element	Annual O&S Costs BY2003 \$M	
	AGM-88E AARGM Average Annual Cost Per Total Quantity	AGM-88 HARM (Antecedent) Average Annual Cost Per Total Quantity
Unit-Level Manpower	0.000	0.000
Unit Operations	0.000	0.000
Maintenance	0.590	1.800
Sustaining Support	3.300	1.700
Continuing System Improvements	1.710	1.600
Indirect Support	0.000	0.000
Other	0.000	0.000
<b>Total</b>	<b>5.600</b>	<b>5.100</b>

Item	Total O&S Cost \$M			
	AGM-88E AARGM		AGM-88 HARM (Antecedent)	
	Current Production APB Objective/Threshold	Current Estimate		
<b>Base Year</b>	162.6	178.9	162.6	101.3
<b>Then Year</b>	254.8	N/A	260.2	0.0

#### Equation to Translate Annual Cost to Total Cost

Total Cost / Total Years of Service = Annual Cost

\$162.6M / 29 years = \$5.6M per year

O&S Cost Variance
