Common Acronyms and Abbreviations for MDAP Programs

Acq O&M - Acquisition-Related Operations and Maintenance
ACAT - Acquisition Category
ADM - Acquisition Decision Memorandum
APB - Acquisition Program Baseline
APPN - Appropriation
APUC - Average Procurement Unit Cost
$B - Billions of Dollars
BA - Budget Authority/Budget Activity
Blk - Block
BY - Base Year
CAPE - Cost Assessment and Program Evaluation
CARD - Cost Analysis Requirements Description
CDD - Capability Development Document
CLIN - Contract Line Item Number
CPD - Capability Production Document
CY - Calendar Year
DAB - Defense Acquisition Board
DAE - Defense Acquisition Executive
DAMIR - Defense Acquisition Management Information Retrieval
DoD - Department of Defense
DSN - Defense Switched Network
EMD - Engineering and Manufacturing Development
EVM - Earned Value Management
FOC - Full Operational Capability
FMS - Foreign Military Sales
FRP - Full Rate Production
FY - Fiscal Year
FYDP - Future Years Defense Program
ICE - Independent Cost Estimate
IOC - Initial Operational Capability
Inc - Increment
JROC - Joint Requirements Oversight Council
$K - Thousands of Dollars
KPP - Key Performance Parameter
LRIP - Low Rate Initial Production
$M - Millions of Dollars
MDA - Milestone Decision Authority
MDAP - Major Defense Acquisition Program
MILCON - Military Construction
N/A - Not Applicable
O&M - Operations and Maintenance
ORD - Operational Requirements Document
OSD - Office of the Secretary of Defense
O&S - Operating and Support
PAUC - Program Acquisition Unit Cost

PB - President's Budget
PE - Program Element
PEO - Program Executive Officer
PM - Program Manager
POE - Program Office Estimate
RDT&E - Research, Development, Test, and Evaluation
SAR - Selected Acquisition Report
SCP - Service Cost Position
TBD - To Be Determined
TY - Then Year
UCR - Unit Cost Reporting
U.S. - United States
USD(AT&L) - Under Secretary of Defense (Acquisition, Technology and Logistics)
USD(A&S) - Under Secretary of Defense (Acquisition and Sustainment)

Approved APB

Navy Acquisition Executive (NAE) Approved Acquisition Program Baseline (APB) dated February 10, 2020

Mission and Description

The KC-130J Transport Aircraft (KC-130J) is a high-wing, long range land based monoplane which is powered by four turboprop engines equipped with six blade variable pitch propellers.

The KC-130J program provides the Marine Corps with air-to-air refueler/tactical transport capability to replace the KC-130 F/R/T aircraft. Specific KC-130J mission capabilities encompass air-to-air refueling, air delivered ground refueling, tactical troop transport, aerial delivery of personnel and cargo, airborne radio relay, tactical aero-medical evacuation, multi-sensor imagery reconnaissance, and close air support. The KC-130J improves readiness, capability and survivability while reducing maintenance and operating costs.

Executive Summary

Program Highlights Since Last Report

PMA-207 Tactical Airlift Program Office remains focused on sustaining fleet aircraft, reducing operating costs and increasing readiness while delivering new production aircraft. On April 5, 2018 a requirements letter was signed by Deputy Commandant for Aviation to increase the United States Marine Corps (USMC) warfighter requirement from 79 to 86. As a result, the total Navy and Marine Corps Program of Record increased from 104 to 111 aircraft consisting of 85 USMC and 25 United States Navy aircraft. The KC-130J APB was updated and signed on February 10, 2020. As of February 2020, 58 USMC KC-130Js have been delivered.

A five-year Multi-Year Procurement (MYP III) was approved by the FY 2019 National Defense Authorization Act (NDAA) in May 2018 and definitized on December 27, 2019, two months earlier than the scheduled date. MYP III will support USMC aircraft procurement from FY 2019-FY 2023.

High Combatant Command demand has accelerated the need to complete the Program of Record (POR) and retire the remaining aging legacy fleet aircraft. Until the POR completes, there will be a shortage of back-up aircraft reducing aircraft availability as the fleet transitions from the existing legacy aircraft to the KC-130J. The Program is executing plans to increase reliability and maintainability through reliability centered maintenance. This includes improved component repair turnaround times and contract changes to streamline support and return aircraft to service in the most expeditious and cost-effective manner.

The KC-130J continues to make improvements and modifications to meet warfighter requirements. In 2Q and 3Q FY 2019, Harvest Hercules Airborne Weapons Kit Plus (HH+) configuration was fielded to squadron VMGR- 252 and 352. This allows Special Purpose Marine Air Ground Task Force to perform Intelligence, Surveillance/Reconnaissance and Close Air Support . In addition, the fielding of the HH+ capability will allow the sundown of the HH "legacy" configuration reducing fleet and funding burdens. The Program Office continues to progress with communication, navigation, surveillance and Air Traffic Management mandates. The Automatic Dependent Surveillance –Broadcast Out federal interim solution certification and fleet installations began 4Q FY 2018 and are on schedule to complete by June 2020. Other modifications include the addition of the Department of the Navy Large Aircraft Infrared Counter Measures and Intrepid Tiger II.

The Program continues to support active FMS cases with the Kuwait Air Force (KC-130Js), the Japan Maritime Self Defense Force (KC-130Rs), the Chilean Air Force (KC-130Ts) and the Philippines Air Force (KC-130Ts). The Program maintains coordination with international communities for Security Assistance and Security Cooperation and works to accomplish program objectives of assigned cases within applicable laws and regulations.

There are no significant software-related issues with this program at this time.

History of Significant Developments Since Program Initiation

History of Significant Developments Since Program Initiation	
Date	**Significant Development Description**
April 2010	KC-130J program was designated as ACAT IC by the USD(AT&L).
February 2011	KC-130J APB approved.
2nd Quarter FY 2013	FY 2014 PB included United States Air Force Multi-Year Procurement (MYP) II for FY 2014 - FY 2018.
2nd Quarter FY 2013	Congressional reductions in the FY 2014 appropriated budget resulted in the decrease of one aircraft. Total aircraft quantity remained unchanged.
December 2015	MYP II contract awarded for C-130J aircraft on December 30, 2015. The MYP II contract covers FY 2014 - FY 2018 procurements.
December 2015	Three FY 2013 United States Marine Corps (USMC) Congressional added aircraft were definitized.
2nd Quarter FY 2018	Completed Automatic Dependent Surveillance – Broadcast Out federal interim solution certification.
February 2018	FY 2019 PB included United States Air Force MYP III for FY 2019 - FY 2023.
April 2018	Requirements letter signed by Deputy Commandant for Aviation to increase USMC KC-130J Program of Record from 79 to 86 aircraft.
December 2019	Multi-Year (MY)III definitization.
February 2020	KC-130J APB update signed and approved.

Current Procurement Cost (December 2019)	
1.	The CAPE Preliminary Independent Estimate of Savings for the Third C-130J Multi-Year Procurement (MYP) Contract detailed report, dated March 12, 2018, provided an independent estimate of savings for the FY 2019 – FY 2023 joint services MYP. The Current Procurement Cost assumes the follow-on MYP pricing as estimated by the CAPE.

Low Rate Initial Production

Notes

There is no LRIP for this program.

Foreign Military Sales

Country	Date of Sale	Quantity	Total Cost $M	Description
Kuwait	8/5/2019		24.0	FMS Case KU-P-LCQ, Kuwait KC-130J upgrade to Defensive Electronic Countermeasures (DECM) capability which includes AAR-47, ALE-47, and ALR 56M and all support associated with DECM (Logistics, Engineering, Training, Support Equipment, Modification of Kuwait's Weapon System Trainer to include a Generic Threat Environment, Electronic Combat International Security Assistance Program and National Air and Space Intelligence Center support).
Kuwait	4/2/2018		3.9	FMS Case KU-P-LCR, Kuwait KC-130J upgrade to ADS-B Out and Mode 5 capability including upgrade of Identification Friend or Foe (IFF) and installation.
Kuwait	8/11/2014		98.5	FMS Case KU-P-GGY, Kuwait KC-130J integrated logistics support and aircraft sustainment (follow-on case to provide support upon depletion of KU-P-SBF funds)
Kuwait	3/11/2014		47.9	FMS Case KU-P-GGU, Kuwait KC-130J and L-100 engine and propeller support
Kuwait	5/4/2010	3	569.6	FMS Case KU-P-SBF, three KC-130J Kuwait aircraft were procured through the Air Force production contract and deliveries were completed in FY 2014. This case includes the procurement of the three delivered KC-130Js, a training facility, one weapons system trainer, and operation and sustainment support.

Notes

The Kuwait team has added an additional agreement to support the upgrade to Defensive Electronic Countermeasures capability.

Contracts

Contract Identification

Appropriation: Procurement
Contract Name: Multi-Year Procurement (MYP) II Contract
Contractor: Lockheed Martin Corporation
Contractor Location: 86 South Cobb Drive
Marietta, GA 30060
Contract Number: FA8625-14-C-6450/1
Contract Type: Fixed Price Incentive(Firm Target) (FPIF), Firm Fixed Price (FFP)
Award Date: December 09, 2013
Definitization Date: November 10, 2015

Contract Price							
Initial Contract Price ($M)			Current Contract Price ($M)			Estimated Price At Completion ($M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
19.0	19.0	0	527.6	535.5	8	535.5	535.5

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to contract modifications to support FY 2016 KC-130J aircraft 'Estimates at Completion'. Funding reflects both ceiling price for a quantity of three aircraft already delivered and current estimates at completion (target price) for a quantity of eight aircraft on contract combined.

Cost and Schedule Variance Explanations

Cost and Schedule Variance reporting is not required on this (FPIF/FFP) contract.

Contract Identification

Appropriation: Procurement
Contract Name: MYP III FYOC D.O. 7027
Contractor: Lockheed Martin Corporation
Contractor Location: 86 South Cobb Drive Southeast
Marietta, GA 30063
Contract Number: FA8625-18-F-7027/1
Contract Type: Firm Fixed Price (FFP), Fixed Price Incentive(Firm Target) (FPIF)
Award Date: July 19, 2018
Definitization Date: December 27, 2019

Contract Price							
Initial Contract Price ($M)			Current Contract Price ($M)			Estimated Price At Completion ($M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
20.0	N/A	0	1665.9	1665.9	20	1665.9	1665.9

Target Price Change Explanation

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to contract definitization. MYP III will support USMC aircraft procurement for FY 2019 - FY 2023 aircraft.

Contract Variance		
Item	Cost Variance	Schedule Variance
Cumulative Variances To Date	0.0	0.0
Previous Cumulative Variances	0.0	0.0
Net Change	+0.0	+0.0

Cost and Schedule Variance Explanations

None

General Contract Variance Explanation

Cost and schedule variances are not reported for this contract, because an EVM waiver was granted by Mr. Steven J. Zamparelli, Director of Contracts, Headquarters Air Force Materiel Command on February 13, 2014 due to applicability to the program given work scope, history and the level of ambiguity associated with delivery.

Notes

FYOC Delivery Order (D.O.) 7027 was definitized on December 27, 2019 in support of Multi-Year Procurement (MYP) III. This D.O. supports aircraft procurment and long lead contract items. The schedule and cost section have been updated to reflect contract definitization.

Cost and Schedule Variance Explanations

None

General Contract Variance Explanation

Cost and schedule variances are not reported for this contract, because an EVM waiver was granted by Mr. Steven J. Zamparelli, Director of Contracts, Headquarters Air Force Materiel Command on February 13, 2014 due to applicability to the program given work scope, history and the level of ambiguity associated with delivery.

Notes

FYOC D.O. 7028 was definitized on December 27, 2019 in support of four KC-130J congressional added aircraft in the Block 8.1/LAIRCM confirguration.

Deliveries and Expenditures

Deliveries				
Delivered to Date	Planned to Date	Actual to Date	Total Quantity	Percent Delivered
Development	0	0	0	--
Production	58	58	111	52.25%
Total Program Quantity Delivered	58	58	111	52.25%

Expended and Appropriated (TY $M)			
Total Acquisition Cost	11052.0	Years Appropriated	24
Expended to Date	4585.1	Percent Years Appropriated	77.42%
Percent Expended	41.49%	Appropriated to Date	5548.7
Total Funding Years	31	Percent Appropriated	50.21%

The above data is current as of February 10, 2020.

Notes

On April 5, 2018 a requirements letter was signed by Deputy Commandant for Aviation to increase the United States Marine Corps warfighter requirement from 79 to 86. The total Navy and Marine Corps Program of Record increased from 104 to 111 aircraft consisting of 86 USMC and 25 United States Navy aircraft.

Operating and Support Cost

Cost Estimate Details

Date of Estimate:	February 12, 2020
Source of Estimate:	POE
Quantity to Sustain:	111
Unit of Measure:	Aircraft
Service Life per Unit:	40.00 Years
Fiscal Years in Service:	FY 2001 - FY 2070

This is the ninth update for the KC-130J O&S cost estimate since the original Navy SCP was established in 2010. It is the first update since the recent February 2020 APB approval. Naval Visibility and Management of Operating and Support Costs (VAMOSC) Aircraft Type Model Series Report (ATMSR) data from FY 2001 through FY 2018 was used to establish the KC-130J baseline. Projections based on the historical costs in ATMSR provide the majority of the out-year estimates. The variable Flying Hour Program and Engine Sustainment estimates are based on the most recent pricing and reliability data available.

The total aircraft procurement of 111 includes the maximum Program Aircraft Authorized (PAA) of 100 aircraft, ten Backup Aircraft Authority aircraft, and one test aircraft. The PAA includes 45 USMC Active aircraft at three squadrons, 30 USMC Reserve aircraft at two squadrons, 24 Navy Reserve aircraft at five squadrons, and one aircraft ("Fat Albert") to support the Blue Angels.

Sustainment Strategy

The KC-130J Sustainment Strategy is based on three main pillars.

The first pillar concerns KC-130J Depot Source of Repair. The Air Logistics Complex (ALC) located at Hill Air Force Base in Ogden, UT is the primary depot-level maintenance facility for the aircraft. Aircraft Inspection, Repair, and Overhaul Depot Corporation in Kuala Lumpur, Malaysia is the current depot-level maintenance facility that supports aircraft located in the western pacific (Marine Corps Air Station Iwakuni, Japan). Completed core logistics and level-of-repair analyses favor this approach. Industrial capabilities are sufficient to provide comprehensive support at all levels.

The second pillar is the use of commercial sustainment contracts to help support the KC-130J airframe and propulsion systems. Support of fielded aircraft is currently accomplished through three sole source Naval Air Systems Command sustainment contracts. The airframe sustainment contract is with Lockheed Martin Aero, Marietta, GA and the propulsion sustainment contracts are with Rolls Royce Corporation, Indianapolis, IN and Dowty Propellers, Sterling, VA. The original equipment manufacturers assert restrictions on the government's right to use and release their proprietary technical data due the commercial origin of their products. Lack of rights to proprietary data precludes establishment of organic repair capability which require sole source of the engine and propeller repair, Repair of Repairables, logistics and engineering services to Rolls Royce and Dowty Propellers. Rolls Royce Corporation was the competitively selected provider for engine repair, priced based on reason for removal vice cost per engine hour and excluded repairs.

The last pillar involves KC-130J component supply support. This support is provided through the normal military supply system which includes Naval Supply Systems Command, United States Air Force ALC, and Defense Logistics Agency.

Antecedent Information

The antecedent systems are the KC-130F, KC-130R, and C/KC-130T aircraft. The KC-130F and KC-130R were used in a blended analysis to compare to the KC-130J. C/KC-130T reserve squadron aircraft data is not included in the

Antecedent Average Annual Cost per Aircraft, and it should be noted that the KC-130F/R models were in ramp-down phase during the time that data was available. Additionally, both the KC-130F and KC-130R were ACAT II programs that relied heavily on United States Air Force program sustainment. KC-130J aircraft will replace the KC-130F, KC-130R, and C/KC-130T aircraft one-for-one.

The capture of O&S data in available reporting systems has changed significantly over time. Antecedent systems began their service life before continuous, reliable recording systems were available. Naval Visibility and Management of Operating and Support Costs (VAMOSC) provides costs for FY 1997 to present. The cost data for platforms in existence prior to 1997 is either unavailable or incomplete. In summary, sufficient historical data and resources do not exist to create a credible comparison of Total O&S Costs.

A data pull from the VAMOSC ATMSR was made to obtain Maintenance, Sustaining Support, and Continuing System Improvements cost data. The steady state average of this data from 1999 to 2001 was used. The VAMOSC total aircraft number for these years was 47, 48, and 48, respectively. The Unit Level Manpower and Indirect Support costs were assumed to be the same as for the KC-130J. The Unit Operations costs were calculated using Cost Adjustment and Visibility Tracking System data from 1995 to 2009 to obtain the fuel consumption ratio of the antecedent aircraft to the KC-130J. The antecedent average annual cost was then multiplied by the KC-130J total operating aircraft years to find the total BY antecedent cost.

For comparison purposes, the BY Antecedent Total O&S Cost is the product of the Antecedent's Average Annual Cost per Aircraft and the Operational Aircraft Years of the KC-130J.

Annual O&S Costs BY2010 $M		
Cost Element	**KC-130J Average Annual Cost Per Aircraft**	**KC-130 F/R/T (Antecedent) Average Annual Cost Per Aircraft**
Unit-Level Manpower	2.109	2.109
Unit Operations	1.353	1.226
Maintenance	4.302	1.869
Sustaining Support	0.264	0.124
Continuing System Improvements	0.802	0.293
Indirect Support	0.777	0.777
Other	--	--
Total	9.607	6.398

Item	Total O&S Cost $M			
	KC-130J			KC-130 F/R/T (Antecedent)
	Current Production APB Objective/Threshold		Current Estimate	
Base Year	41862.3	46048.5	40994.4	26856.4
Then Year	77651.9	N/A	76448.5	N/A

Equation to Translate Annual Cost to Total Cost

The Average Annual Cost per Aircraft for the KC-130J is calculated by dividing the Total O&S Cost by the Total Operational Aircraft Years for the program. Total Operational Aircraft Years is 4,267 years. $40,994.4M / 4,267 years = $9.607M/year.

The Total Operational Aircraft Years is calculated by summing the annual total active aircraft constrained by the

maximum PAA of 100 aircraft. The primary inputs for this are the Aircraft Program Data File produced by Office of the Chief of Naval Operations (N98) and the FY 2021 PB procurement profile.

O&S Cost Variance
