Acknowledgments

The Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2014 Post-Election Voting Survey of the Active Duty Military (2014 PEV5)*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The survey program is conducted under the leadership of Paul Rosenfeld, Director of the *Defense Research, Surveys, and Statistics Center (RSSC)*.

Policy officials contributing to the development of this survey include Samantha Walker and David Beirne, Federal Voting Assistance Program (FVAP), FVAP staff, as well as other FVAP stakeholders.

DMDC's Survey Design, Analysis, & Operations Branch, under the guidance of Carol Newell, Branch Chief, is responsible for the development of questionnaires in the survey program. The program manager and lead operations analyst on this survey was Kimberly Hylton, SRA International, Inc. The lead survey design analysts were Kimberly Hylton and Abigail Moore, SRA International, Inc. Kimberly Hylton and Kimberly Williams designed the unique presentation of complex items used in this tabulation volume. Carol Newell was also the Team Lead of Survey Operations, responsible for the survey database construction and archiving.

DMDC's Statistical Methods Branch, under the guidance of David McGrath, Branch Chief, is responsible for sampling and weighting methods used in the survey program. Fawzi al Nassir, SRA International, Inc., supervised the sampling and weighting processes, and provided consultations and overall process control. The lead statistical analyst on this survey was Timothy Markham, who designed the sample and developed weights for this survey. Susan Reinhold and Carole Massey provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing.

Rokell Person, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool. A team consisting of Kimberly Hylton, Abigail Moore, and Kimberly Williams completed quality control for this tabulation volume.

- a. Periodic FVAP e-mail reminders about upcoming elections 95
 - b. FVAP on Twitter..... 96
 - c. FVAP on Facebook..... 97
 - d. VAO outreach (e.g., announcements during formation, voter outreach events, information on bulletin boards, social media) 98
 - e. FVAP brochures 99
 - f. FVAP election dates handouts 100
 - g. FVAP fact sheets/one-pagers 101
 - h. FVAP voting posters 102
 - i. FVAP wallet cards 103
 - j. Voting-specific public service announcements (PSAs) 104

57. Would you prefer more or less communication from FVAP to better understand the absentee voting process? 105

2014 ELECTION

58. Thinking about the most recent election, to what extent do you agree with the following statements? 106
- a. I cared about the issues in the election..... 106
 - b. I cared about which candidates would win the election 107
 - c. Voting is an effective way to express my opinion on the issues in the election 108
 - d. Voting is an effective way to express my opinion on which candidates should win the election 109
 - e. If others (e.g., military members, family, or friends) found out I did not vote in the election, I would be embarrassed..... 110
 - f. If other military members found out I did not vote in this election, I would feel ashamed..... 111
 - g. Others (e.g., military members, family, or friends) are likely to know whether or not I voted in the election..... 112
 - h. It is not appropriate for members of the military to vote 113
 - i. I was confident that my ballot would be counted..... 114
 - j. It was easy to get in-person voting assistance at my installation..... 115
 - k. I knew exactly who at my installation to ask questions about voting materials, ballot requests, or other voting-related issues 116
 - l. I had questions related to the voting process but could not get a hold of someone who could answer them..... 117
 - m. Seeking in-person assistance at my installation was a waste of time because I received conflicting or inaccurate information..... 118
 - n. Printed voting materials were easily accessible at my installation when I needed them 119
59. For you personally, voting is first and foremost 120
60. How strongly do you feel personally that voting is a civic duty? 121

2014 POST-ELECTION VOTING SURVEY OF THE ACTIVE DUTY MILITARY: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Defense Research, Surveys, and Statistics Center* (RSSC), Defense Manpower Data Center (DMDC), conducts surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community. DMDC developed the *Post-Election Voting (PEV)* surveys starting in 2008. These surveys are conducted every other year at the request of the Federal Voting Assistance Program (FVAP) office as required by the Uniformed and Overseas Citizens Absentee Voting Act of 1986, Section 101.b (1), 42 USC §1973ff, now 52 U.S.C. 20310 (UOCAVA) and the Military and Overseas Voter Empowerment Act (MOVE Act). The surveys provide an evaluation of the effectiveness of assistance given to UOCAVA voters in federal elections.

This report contains tabulations of responses from the *2014 Post-Election Voting Survey of the Active Duty Military (2014 PEV5)* conducted from October 28, 2014, to February 18, 2015.

This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations, a copy of the survey items, and a glossary of terms found in this tabulation volume follow this introduction.²

Survey Content

Topics covered in the *2014 PEV5* include background information, 2014 voter registration, absentee ballots, the 2014 election, the Federal Write-In Absentee Ballot (FWAB), the 2012 election, voting assistance, FVAP.gov, voting knowledge, and FVAP outreach. The survey was subdivided into the following 10 topic areas:

1. *Background Information*—Citizenship, age, paygrade, marital status, race/ethnicity, location, time overseas, number of months since member experienced permanent change of station (PCS) or deployment, and highest degree or level of school completed.
2. *2014 Voter Registration*—Voter registration status and location, non-registered voter preference for voter registration location, description of voter registration location (home state, duty location, or other), distance from residence to voter registration location, and time since last voter registration update.
3. *Absentee Ballots*—Absentee ballot requests; awareness, use, receipt, completion, and return of Federal Post Card Application (FPCA); notification

¹ Details on survey methodology are reported by DMDC (2015b).

² Refer to DMDC (2015a) to view the survey as it appeared on the web.

- of receipt, rejection, and acceptance of absentee ballot; receipt, completion, and return of absentee ballot; and satisfaction with absentee voting process.
4. *2014 Election*—Voting history, voting interest in 2014 election, voting behavior in 2014 election, reasons for not voting in 2014 election, agreement with statements about voting and resources, and feelings about personal obligation or choice about voting.
 5. *Federal Write-In Absentee Ballot (FWAB)*—Use, receipt, completion, and return of FWAB and reasons for using and not using FWAB.
 6. *2012 Election*—Voting behavior in 2012 election.
 7. *Voting Assistance*—Need for and resources used for information or assistance in preparation for 2014 election, FVAP products or services used for voting assistance, specific information or assistance needed, success in receipt of information or assistance from resources, method in which Unit Voting Assistance Officer (UVAO) or Installation Voter Assistance (IVA) Office provided information or assistance, other voting resources recommended by UVAO or IVA Office, and reasons for not seeking information or assistance.
 8. *FVAP.gov*—Agreement with statements about FVAP.gov and number of times FVAP.gov visited in preparation for 2014 primaries and General Election.
 9. *Voting Knowledge*—Self-evaluation of voting knowledge.
 10. *FVAP Outreach*—Awareness or receipt of outreach efforts/products, usefulness of outreach efforts/products, and preference for level of communication from FVAP to better understand absentee voting process.

Population and Reporting Categories

The target population for the *2014 PEV5* consists of active duty members of the Army, Navy, Marine Corps, Air Force, and Coast Guard, excluding National Guard and Reserve members,³ who (1) have approximately 6 months of service at the time the survey is first fielded, (2) are U.S. citizens, (3) are at least 18 years old, and (4) are below flag rank at survey fielding.

Survey results are presented for the total active duty population and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents were classified by survey self-report. If the self-report data were missing, then data from the sampling frame were used to impute a subgroup classification. Survey results are tabulated by: overall and Service, paygrade, age, gender, location, voter registration status, first-time voting status, and voting behavior in 2014 election. Definitions for reporting categories follow:

³ Although previous PEV5 surveys included members of the Reserve component population in the Active Guard/Reserve or who were activated on election day, FVAP chose to only survey active duty members in the *2014 PEV5*.

- *Overall and Service*—The categories include *Total*, *Army*, *Navy*, *Marine Corps*, *Air Force*, and *Coast Guard*.
- *Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1–E9). The *Enlisted* subgroup is broken into the following groups: *E1–E5* and *E6–E9*. The *Officers* subgroup includes warrant officers (W1–W5) and commissioned officers (*O1–O3* and *O4–O6*).
- *Age*—Categories include *18 to 24 Years Old*, *25 to 29 Years Old*, *30 to 34 Years Old*, *35 to 44 Years Old*, and *45 Years Old or More*.
- *Gender*—This category is self-explanatory.
- *Location*—The primary classification distinguishes *Overseas* from *US (Incl. Territories)*. *U.S. (Incl. Territories)* includes respondents with permanent duty stations located in the 50 states, the District of Columbia, Puerto Rico, and United States territories or possessions. *Overseas* includes respondents who were located overseas or on board a ship on November 4, 2014. The categories include *U.S. (Incl. Territories)* and *Overseas* overall and broken down by age groups.
- *Voter Registration Status*—Respondents are classified based on self-report categories. *Registered to Vote* includes members who indicated they were registered to vote in the United States in 2014.
- *First Time*—Respondents are classified based on responses to Q37 (Was this your first time...a. Voting or trying to vote in an election? b. Voting or trying to vote absentee in an election?).
- *Voting Behavior in 2014 Election*—Respondents are classified based on self-report categories. *Definitely Voted* includes members who indicated they definitely voted in person, by mail, by e-mail, at an online website, or by fax in the November 4, 2014, election. *Definitely Voted* is further broken down by *In Person* and *Absentee*. *Definitely Did Not Vote/Not Sure* includes members who indicated they definitely did not vote or are not sure if they voted in the election. *Definitely Did Not Vote/Not Sure* is further broken down by an *Interested* group, indicating if members were interested in voting in the election.

Survey Methodology

For this iteration of the survey, FVAP was particularly interested in younger military members, ages 18 to 29. This age group has typically responded to RSSC surveys at lower rates than older groups. However, an experiment on the 2010 PEV5 showed that 18 to 29 year olds responded at much higher rates when the survey was conducted by phone. As a result, the sample was divided into three treatment groups: one group included sample members of all ages who received the full, long form web survey; one group included only 18 to 29 year olds who received an abbreviated, short form of the web survey; and one group included only 18 to 29 year olds who received the same short form survey but was administered the survey by phone. The short form survey included only the core items needed to assess the following: registration

and participation rates, navigation through the absentee voting process, and use of voting assistance resources.

The web survey administration process began on October 28, 2014, with the mailout of notification letters to sample members. This notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. In an effort to further increase response rates, a letter signed by each Service's Senior Service Voting Representative (SSVR) on each Service's letterhead was sent to Army, Navy, Marine Corps, and Air Force sample members mid-way through the administration process. The letter encouraged sample members to participate in the survey and explained how the survey would assist each Service in evaluating its own Voting Assistance Program. Due to coordination difficulties, Coast Guard sample members received a second notification letter from FVAP rather than the Service-specific letter. Additional postal reminders and e-mail reminders were used to encourage survey participation throughout the administration process.

Data were collected on the web from November 5, 2014, to February 18, 2015. During the first month of the administration process, RSSC observed unusually low response rates on the short and long form web surveys. It was discovered that a domain name problem was creating e-mail deliverability issues. By the time the e-mail problem was resolved approximately six weeks into the field period, response rates were much lower than in prior years. Therefore, the field period was extended by one month. During the extension, a different e-mail delivery system was used.

The phone survey administration process began on November 5, 2014, with the mailout of a notification letter similar to the letter received by web sample members. Service-specific postal reminders described above were also sent to phone sample members mid-way through the field period. No additional postal or e-mail reminders were sent. Data were collected on the phone from November 18 to December 17, 2014.

Single-stage, nonproportional stratified random sampling⁴ procedures were used. The sample consisted of 94,699 active duty members drawn from the sample frame constructed from DMDC's *Active Duty Master File*. Of these, there were 16,873 18 to 29 year olds in the phone group and 5,955 18 to 29 year olds in the short form web group.

Data were weighted using an industry standard process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples are selected from lists, and each member of the list has a known nonzero probability of

⁴ In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by paygrade and Service (e.g., all Army enlisted members in one group). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.

- *Adjustments for nonresponse*—Some sampled members do not respond to the survey. Continuing the previous example, suppose only half of sample members (i.e., 500 out of 1,000) completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the response rate. In this example, the base weight (10) is multiplied by the reciprocal of the response rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.
- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings used in designing the subgroups for the sample. The second is based on population characteristics that are known to be related to whether a sample member responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents was 7,000 men and 3,000 women. To reduce this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women, which would give unbiased estimates of the total and of men and women in the subgroup.

Due to the complex sample design, two sets of weights were created to accurately estimate all survey questions. The first set of weights was used to create estimates for questions that could only be seen by sample members who received the long form web survey. The second set of weights was used to create estimates for questions that could be seen by all web and phone sample members. For this second set of weights, intermediary weights were created for web and phone data separately; then, the intermediary weights were combined into one set of final weights for all sample members.⁵

Table 1 (page 7) shows the number of respondents and the percentage of total respondents in each reporting group. Also shown are the estimated number of eligible

⁵ Refer to DMDC (2015b) for more information on the construction of weights for this survey.

members and the estimated percentage of total eligible members in each reporting group. Differences in the percentages of respondents and estimated populations for the reporting categories reflect differences in the number sampled, as well as differences in response rates. The weighted estimates are less than the population from which the survey sample is selected as some members of the population are ineligible to take the survey. Members of the sample became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that they were not on active duty, were not a U.S. citizen, or were not at least 18 years old as of November 4, 2014 (0.2% of the sample). Completed surveys (defined as 50% or more of the survey questions asked of all participants are answered) were received from 12,620 eligible respondents. The overall weighted response rate for eligible sample members was 16%.⁶

Tabulation Procedures

Tabulations⁷ for each question from the survey, including the text of the questions and response options, are shown. To compress the width of columns in the tables, the response options are shown with a number or letter; then, that number or letter is used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding.

Where an item lends itself to presentation as an average, that average is also shown as both a number estimate and in a bar chart. The averages lend themselves to a quick scan for reporting groups differing from other similarly defined groups. In some cases, the responses are averages of the numeric scales presented with the response options. The mean bar charts for numeric scales in these tabulations were created by using the midpoints of the response options to calculate averages. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it may reflect item nonresponse, and the table note indicates that “Percent responding are active duty members who answered the question.” Because some items were only presented to sample members who received the long form survey, analyzing the relationship of responses and percent responding between items on the short and long form is not possible.

⁶ The 2010 PEV5 and 2012 PEV5 overall weighted response rate for eligible sample members was 15% and 17%, respectively.

⁷ Details of data editing and preparation are provided by DMDC (2015a).

Not all questions will apply to every respondent. Where possible, the web survey is programmed to skip respondents over questions that do not apply to them. For example, Q9 (How long had you been located in this country?) does not apply to those who marked in Q8 that they were in the United States/territories or on board a ship. The table note for this question indicates, “Percent responding are active duty members who answered the question and who were located overseas (Q8).” In addition, some questions only appeared on the long form web survey. For example, Q2 (Were you a U.S. citizen?) does not apply to sample members who received the short form web and phone surveys. The table note for this question indicates, “Percent responding are long form active duty members who answered the question.”

Margins of Error

The presence of survey nonresponse required weighting to produce population estimates (e.g., percent female).⁸ Because of the weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN[®] PROC DESCRIPT (Research Triangle Institute, 2013).

By definition, surveys are subject to error from nonresponse (eligibility and completion). Standard errors are estimates of the variance around population parameters, such as percentages or means, and are used to construct margins of error (i.e., confidence interval half-widths). Estimated percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tabulation volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- “0” indicates that no one in any reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 30), or relative standard error (greater than 0.225),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,

⁸ As a result of differential weighting, only certain statistical software procedures (such as SUDAAN[®] PROC DESCRIPT) correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

[®] Registered 2013 by Research Triangle Institute, P.O. Box 12194, Research Triangle Park, NC 27709-2194.

- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.

Note. Percent responding are active duty members who answered the question and who indicated they were registered to vote in the United States (Q11). Legal voting residence is defined as the state or territory where active duty military members last resided prior to entering military service OR that they have since claimed as their legal residence. The right to vote extends to members even though they may no longer own property or have other ties to that state.

2014 Post-Election Voting Survey of the Active Duty Military

Welcome

[Security Protection Advisory](#)

[RCS# #DD-P&R\(AR\)2145](#)

[Exp. 04/09/2016](#)

You have been selected to take a survey for members of the active duty military on your experiences with the absentee voting process during the November 4, 2014, General Election. When you click the *Continue* button below, you will be asked to:

- Create a Personal Identification Number (PIN)
- Read the Privacy Advisory
- Take the survey, which should only take you about 20 minutes

Thank you for your time and participation.

Section 508 Compliance

The U.S. Department of Defense is committed to making electronic and information technologies accessible to individuals with disabilities in accordance with [Section 508 of the Rehabilitation Act \(29 U.S.C. §794d\), as amended in 1999](#). Send feedback or concerns related to the accessibility of this website to: DoDSection508@osd.mil. For more information about Section 508, please visit the [DoD Section 508 website](#).

PRIVACY ADVISORY

Your name and contact information have been used only for the distribution of this survey. Your responses to the demographic questions will allow DoD to better analyze all responses among varying demographic groups. Responding to this survey is voluntary. Most people can complete the survey in 20 minutes. There is no penalty to you if you choose not to respond. However, maximum participation is encouraged so the data will be complete and representative.

ADDITIONAL INFORMATION

The Uniformed and Overseas Citizens Absentee Voting Act, as modified by the Military and Overseas Voting Empowerment Act, 42 United States Code, Section 1973ff, now 52 U.S.C. 20310, and Executive Order 12642 requires the Department of Defense to conduct this survey.

This survey is sponsored by the Federal Voting Assistance Program (FVAP), which works to ensure all Service members, their eligible family members, and overseas citizens are aware of their right to vote and have the tools to do so - from anywhere in the world. Information collected in this survey will provide FVAP with critical information to help improve the services and information available for local election officials. Reports will be provided to the President and to Congress.

Some findings may be published by FVAP, the Defense Manpower Data Center (DMDC), or in professional journals, or presented at scientific conferences. Your responses could be used in future research. Briefings and results from these surveys will be posted on the web: <http://www.dmdc.osd.mil/surveys/>.

DMDC uses well-established, scientific procedures to randomly select a sample representing the Defense community based on combinations of demographic characteristics (e.g., location, gender). Your responses will be kept private to the extent permitted by law. This is your chance to be heard on issues directly affecting you. While there is no direct benefit for your individual participation, your responses on this survey **make a difference**.

Identifying information will be used only by government and contractor staff engaged in, and for purposes of, survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. In no case will individual identifiable survey responses be reported.

The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure the survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as survey responses.

Survey data may be shared with DoD researchers or organizations outside the DoD conducting research on DoD personnel. In most cases these researchers will be provided with a dataset containing limited demographic information (e.g., service, paygrade group, gender). DMDC performs a disclosure avoidance analysis to reduce the risk of there being a combination of demographic variables which can single out an individual. In rare instances and only with sponsor approval, DMDC may make available datasets with many more demographic variables to a small number of approved researchers. There is some risk individuals might be identified on these datasets, however, DMDC implements several procedures to protect the data. The datasets will only be available in a secure environment where they cannot be downloaded or transferred. Statistical analyses can only be printed after review and approval to ensure identifying information is not released. Access to these datasets will only be allowed on a need-to-know basis with an appropriate Memorandum of Understanding in place. Researchers will only have access to the dataset to conduct pre-approved analyses within an agreed-upon timeframe. After the time elapses, researchers will no longer have access to the data.

If you answer any items or indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC may notify an office in your area for appropriate action.

If you experience any difficulties while taking the survey, please contact the Survey Processing Center by sending an e-mail to ADM-Survey@mail.mil or calling, 1-800-881-5307. If you have concerns about your rights as a research participant, please contact the OUSD(P&R) Research Regulatory Oversight Office at 703-575-2677/703-575-3536 or e-mail R2O2@tma.osd.mil.

Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to February 18, 2015. Please include in the e-mail or phone message your name, Ticket Number, and the

PIN that you selected when you started this survey. Unless withdrawn, partially completed survey data may be used after that date.

Click **Continue** if you agree to take the survey.

FREQUENTLY ASKED QUESTIONS

What is the Federal Voting Assistance Program (FVAP)?

- FVAP administers the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) on behalf of the Secretary of Defense. FVAP works to ensure that all Service members, their eligible family members, and overseas citizens are aware of their right to vote and have the tools and resources to successfully do so - from anywhere in the world.

What is Defense Manpower Data Center (DMDC)?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in the Department of Defense (DoD). DMDC also conducts Joint-Service surveys including the Status of Forces Surveys, QuickCompass, and Human Relations Surveys for DoD. To learn more, visit the DMDC website.

<http://www.dmdc.osd.mil/>

What is the Post-Election Voting (PEV) Program?

- Post-Election Voting (PEV) surveys are sponsored by the Director of the Federal Voting Assistance Program (FVAP) as the Presidential designee to administer the Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UOCAVA). UOCAVA, as amended by the Military and Overseas Voter Empowerment (MOVE) Act, requires FVAP to provide to Congress an assessment of voter registration and participation by absent Uniformed Services voters and the effectiveness of FVAP activities. The PEV surveys are designed to assist FVAP in administering UOCAVA and are used to develop ways to further improve the absentee voting process for military personnel and overseas citizens.

What is UOCAVA?

- The Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) was enacted in 1986 and permits members of the Uniformed Services and Merchant Marines, their eligible family members, and U.S. citizens residing overseas, to register and vote absentee in elections for Federal offices. The Federal Voting Assistance Program (FVAP) administers the Federal requirements of the law and works to ensure UOCAVA citizens are aware of their right to vote and have the tools and resources to successfully do so from anywhere in the world.

How do I know this is an official, approved DoD survey?

- In accordance with [DoD Instruction 8910.01](#), all data collection in DoD must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# #DD-P&R(AR)2145, expiring 04/09/2016.

How did you pick me?

- DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., location, gender).

Why should I participate?

- This is your chance to be heard on issues that directly affect you, including sources of voting information and assistance, satisfaction with voting information and assistance, and voting in the 2014 election.
- Your responses on this survey **make a difference**.

How do I participate?

- The survey will be available at this website around November 5, 2014. Currently, you may (1) read the Privacy Advisory, (2) verify contact information, and (3) provide e-mail address(es) so we can notify you when the survey launches.

What is ADM-Survey@mail.mil?

- The official e-mail address for communicating with military members about Post-Election Voting (PEV). "ADM-Survey@mail.mil" is short for Active Duty Military Survey.

Why am I being asked to use the web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- The survey is administered by our contractor, Data Recognition Corporation, an experienced survey operations company. The survey collection tool begins on a .mil site within DMDC. Once you enter your ticket number, you are redirected to a contractor site which uses a .net domain. This allows everyone to access the survey, even from a non-government computer.

Do I have to answer all questions?

- No, it is not necessary to answer every question. We know you are very busy so the survey will let you start and stop as necessary, while continuing to save your progress.
- Within the survey screen, you have four control buttons: *Next Page* (→), *Previous Page* (←), *Clear Responses*, and *Save and Return Later*. Use these buttons to navigate through the survey or skip questions. Use *Save and Return Later* to give yourself flexibility to complete the survey at a convenient time. When you return to the survey website, enter your Ticket Number to get to the place in the survey where you had stopped.

Why does the survey ask personal questions?

- DMDC reports overall results, as well as by other characteristics, such as location, gender, etc. To complete these analyses, we must ask respondents for these types of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel so that no groups are overlooked.
- Sometimes sensitive questions are asked in order to improve personnel policies, programs, and practices. Your responses will only be reported in aggregate.

Will my answers be kept private?

- Your responses will be kept private to the extent permitted by law. Please view the Privacy Advisory.
- All data will be reported in the aggregate and no individual data will be reported.
- We encourage you to safeguard your Ticket Number to prevent unauthorized access to your survey. In addition, to ensure your privacy, be aware of the environment in which you take the survey (e.g., take the survey when no one else is home, take care to not leave the survey unattended).

Can I withdraw my answers once I have started the survey?

- If you wish to withdraw your answers, please notify the Survey Processing Center prior to February 18, 2015 by sending an e-mail to ADM-Survey@mail.mil or calling, toll-free 1-800-881-5307. Include your name and Ticket Number.

Will I ever see the results of the survey?

- The Federal Voting Assistance Program (FVAP) will post survey results and a corresponding post-election report to Congress at <http://www.FVAP.gov/>.

ELIGIBILITY

Glossary of Terms and FVAP Service Descriptions

General Terms	
ETS	Electronic Transmission Service
FPCA	Federal Post Card Application <i>FPCA (Standard Form 76)</i> is a single form that you can use to register to vote and/or request an absentee ballot for Federal elections. Some States require eligible voters who vote absentee to use the FPCA to request an absentee ballot.
FVAP	Federal Voting Assistance Program FVAP and the Services support absent Uniformed Service members by providing a broad range of non-partisan information and assistance to facilitate the participation in the democratic process. FVAP offers many different forms of assistance for absent Uniformed Service members including their website, FVAP.gov, an online assistant tool for completing voting forms, staff support, and the Voting Assistance Guide.
FWAB	Federal Write-in Absentee Ballot <i>FWAB (Standard Form 186)</i> is a backup way to vote in case your requested absentee ballot does not arrive in time to vote and return your ballot. It lets you write in the names of the candidate you wish to vote for.
IVA	Installation Voter Assistance Dedicated IVA offices are located on military installations to provide accurate, non-partisan voting information and assistance to members of military units who wish to vote.
UOCAVA	Uniformed and Overseas Citizens Absentee Voting Act
UVAO	Unit Voting Assistance Officer Designated individual who provides accurate, non-partisan voting information and assistance to members of military units who wish to vote.
VAG	Voting Assistance Guide The VAG is a reference guide for absentee voting regulations, laws, deadlines, and procedures across all 55 States and U.S. territories. It is the primary source of information for citizens covered by UOCAVA regarding procedures for registering to vote, requesting a ballot, and voting in a specific State or territory of legal residence.
VAO	Voting Assistance Officer Designated individual who provides accurate, non-partisan voting information and assistance to U.S. citizens who wish to vote.
FVAP Products and Services	
FVAP ETS	FVAP provides an ETS that enables your office to transmit and receive election materials via toll-free fax to/from Uniformed Service members, their eligible family members, and overseas U.S. citizens. ETS also provides a fax to e-mail conversion when the voter only has e-mail.

FVAP Products and Services	
FVAP staff support	FVAP provides e-mail support through vote@fvap.gov and a toll-free telephone service that allows military members and their eligible family members to ask FVAP staff for voting information or assistance.
FVAP.gov	FVAP website provides voting-related information and resources for absent Uniformed Service members, their eligible family members, overseas U.S. citizens, and those that support them. The website provides State-specific election information that voters can rely on when voting absentee.
FVAP online assistant tool	FVAP offers an easy-to-use online assistant at FVAP.gov to guide voters in completing FPCAs and FWABs. The online assistant tool simplifies the completion of FPCAs and FWABs by providing State-specific information and instructions on how to download, print, and mail forms to local election officials.
