OSD Records Disposition Schedules

Overview

The records disposition schedules contained in this document are collected from the General Records Schedules (GRS) and National Archives and Records Administration (NARA) approved OSD-specific schedules, as of January 2024. They are arranged by Series, according to a 'functional' file system; that is, by major functions within OSD and the components falling under the purview of OSD for Records and Information Management.

The OSD Records Disposition Schedules will be revised periodically as NARA approves new schedules and as the GRS is updated. The records described in this schedule are created and maintained in different media and formats. In some cases, the file description will specify the media/formats of the records. Unless the media/format is specified, the remaining file numbers are considered to be media neutral, i.e., they were written to authorize the disposition of records in any media or format.

CATEGORY TITLE: Budget and Finance

CATEGORY DESCRIPTION: Budget and apportionment records accumulated in an Agency in the course of formulating its budget for submission to the OMB and to the Congress; in defending its requests for funds before both bodies; and after enactment of an appropriation bill; and ensuring that the funds are used in such a way as to suffice for the appropriate period of time. The funds are made available to the Agency by the OMB, usually in quarterly portions. The Agencies must indicate and justify regularly to OMB their proposed rate of expenditure. After the funds have been made available to the OSD, its own controls over the funds are in its expenditure accounting records, and detailed information relative to expenditures is contained in the accountable officer's account.

OSD budget records normally are created at all levels of organization. They show proposals from all operating levels as well as the OSD-wide coordinating work done by the budget office. Therefore, the records consist of detailed work papers and budgetary statements developed by single operating units, the more significant budget statements and related papers representing consolidated submissions prepared at the OSD level.

The nature of the budget presentation itself is standardized by the OMB, which prescribes a format and procedures for all Federal Agencies. The budget submission, a record copy designated by the OSD, is a duplicate of the set of papers submitted to the OMB. These include summary statements of appropriations and expenditures, statements of contract authorizations, and statements of receipts as well as narrative summary statements that highlight the principal features of the OSD requests and supporting documents. The narrative presents the policies and the programs of the Agency that the budgetary requests are to support. In addition to the summaries, the submission includes schedules of obligations and statements on each type of appropriation and fund under which OSD operates. Finally, OMB requires additional supporting data on objects of expenditure, particular Agency programs, and figures based on the cost of various types of service operations, such as personnel and payroll activities.
