The Pentagon Reservation Utility Network (PRUN) provides connectivity between Operator Workstations (OWS), servers and building control devices necessary for the control and monitoring of Pentagon facilities operating at the Pentagon reservation. PRUN has multiple locations all housed at the Pentagon reservation. PRUN is in the Operations and Maintenance phase of the system life cycle. PRUN's mission is to serve as the main communications platform for all utility equipment, vertical transportation and building controls on the Pentagon reservation. It provides authorized Facility Services Directorate (FSD) personnel with a secure and efficient network for the purpose of supervisory monitoring and controlling all building control devices for the Pentagon campus and its personnel. It also provides authorized Facility Services Directorate (FSD) personnel with connectivity to intelligent field devices, and through the utilization of the Building Management System (BMS), the ability to remotely monitor and control all mechanical equipment (i.e. domestic water distribution system and HVAC) and electrical equipment (i.e. lighting and Mission Critical power) on the Pentagon Reservation. The PII collected and maintained in the system includes, name, work email, work phone number, position and title.
