Complete this form for Department of Defense (DoD) information systems or electronic collections of information (referred to as an "electronic collection" for the purpose of this form) that collect, maintain, use, and/or disseminate personally identifiable information (PII) about members of the public, Federal employees, contractors, or foreign nationals employed at U.S. military facilities internationally. In the case where no PII is collected, the PIA will serve as a conclusive determination that privacy requirements do not apply to system.

**c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.**

Quicx is software that is used to upload and review construction drawings and submittals. Users submit design review comments in Quicx for government and contractor construction personnel to address. Email notifications are sent to users when new documents/submittals are uploaded and when new design review comments are entered. The software is also used to document construction related inspections and to develop/document functional performance tests for the commissioning (i.e., acceptance testing) of new building systems (e.g., heating units, fire alarm systems, lighting systems). Finally, the system is used to generate WHS Building Code permits, which are required for construction projects on the Pentagon Reservation.

The only PII data collected is the contact information (name, home/cell phone, work email address, position/title, and work phone) of the users and their associated DOD ID number found on their active CAC. The DOD ID is used to provide access to the CAC enabled system. Contact info (name and phone number is displayed) with the associated design review comments that are entered.

**d. Why is the PII collected and/or what is the intended use of the PII?** (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

The PII collected is utilized for the below purposes:

- Contact information is used for the identification of stakeholders for data entry of records. The user's information is then associated the project's record (e.g. who submitted, who is it being sent to, who responded, responsible parties, etc.) and associated dates of action.
- Contact information is used for distribution of notifications for any deliverables subject to review and comment by the stakeholders.
- Contact information is stored in a central contact directory that is viewable by all project stakeholders for which they have permission to view. Permissions for project access granted on a per project basis.
- DOD ID # utilized for authentication of users for logging into web-based portal on the JSP network.

**e. Do individuals have the opportunity to object to the collection of their PII?**  Yes  No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

Access to Quicx is through authentication of users by reading their CAC EDIPI / DOD ID number. Collection of EDIPI is necessary for system to function as designed and required by contract. All other PII requested for system is information that can be found in Outlook contact directory (name, position, phone, email). Contact information is necessary for the notifications generated within the system to function as intended and for the accountability of records of generated / dispositioned / edited.

**f. Do individuals have the opportunity to consent to the specific uses of their PII?**  Yes  No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

Quixx utilizes the individual's PII with only limited functionality. DOD ID number is solely used for authentication of access to the system. The use of an individual's contact information is solely used in the association of records with the person who accomplished the action. Actions include: generation of records, editing of record, deletion of records, changing of disposition of records. Association of a user's identity with the records allows an accountability trail to be kept, provide an identity of an individual for quality control /assurance measures and allow others to have a convenient means to show how to get a hold of them.

NOTE: Upon a user's initial logging into the system, the user must acknowledge the software End User License Agreement (EULA) and associated DOD security disclaimer.

**g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided.** (Check as appropriate and provide the actual wording.)
